8. This canalization project was not preceded by the usual form of investigation to determine its advisability. An item of the river and harbor act of August 18, 1894, directed the Secretary of War to submit plans and estimates for improvement of the Ouachita River by locks and dams, "to give slack-water navigation as far above its mouth as in his judgment such improvement is practicable."

So it has grown.

9. The present commerce, consisting largely of timber products, is not extensive, and owing to the character of the adjacent country, which is devoid of large commercial, mining, or manufacturing industries, the river traffic can not reasonably be expected to assume the magnitude considered essential to warrant the construction and maintenance of an expensive system of locks and dams. The question is now complicated, however, by the work already done, and it must be decided to what extent the unexecuted portion of the project should be continued or abandoned.

10. Below Monroe, where, apparently, is the more important general commerce, one lock and dam have been completed and the remaining two are well advanced, and if left in their present condition they will not only be of no value, but will form obstructions to navigation. It therefore seems desirable to finish these structures which will complete the slack-water improvement up to Monroe. Above Monroe two locks and dams have been completed, and practically nothing

has been done on the remaining three, which would require, as now estimated, $1,804,000 to complete. In the opinion of the board there is not sufficient commerce, present and prospective, to justify the expenditure of this amount. The board therefore concurs with the division engineer and reports that, in its opinion, it is advisable in the interests of general commerce and navigation to modify the existing projects for the improvement of the Ouachita River, Ark. and La., so as to provide only for the completion of Locks and Dams Nos. 2 and 3, and the operation of these when completed, and of Nos. 4, 6, and 8, together with such snagging as may be necessary to facilitate navigation up to Camden. The advisability of further lock-and-dam construction (Nos. 5, 7, and 9) should be investigated again after there has been an opportunity to note the results of the complete canalization below Monroe.

There may be some reason, although I do not know what it is, when the Army engineers recommend $234,000 that the bill should carry $474,000.

Capt. Fiske says in this same document, consisting of a number of reports made by the Government since 1871:

Due to the improvements made by the Government since 1871 the river is now practically free from snags, overhanging trees, etc., and can be navigated safely at any point below Arkadelphia where there is sufficient depth of water.

A very necessary requisite for navigation, of course.

Further in the statement of Capt. Fiske:

If much freight can be found here, it will be due to the increased use of a section now but little developed, and it is in part for the purpose of developing this section that the improvement of the Ouachita is sought.

I have already, I think, referred to the commerce, consisting largely of lumber and staves and crossties and shingles.

Col. Townsend, who is the division engineer, in passing, passed also on this matter. He says:

The district officer has based his recommendations on an existing river tonnage of about 70,000, of which 50 per cent consists of logs or similar timber products, and over 10 per cent of sand dredged from the river and merely transported to the nearest landing for further shipment by rail.

* * * * * * *

Below Monroe the construction of the locks and dams has progressed to such an extent that they can not be abandoned without the works already built causing serious obstructions to navigation. As the district officer estimates that they can be completed for an additional appropriation of $234,000, and the commerce which does not consist of timber products is generally confined to the lower portions of the river, the completion of Dams Nos. 2 and 3 is recommended.

Above Monroe work has not been begun on three of the dams, whose estimated cost is $1,804,000.

The hearings which took place after this recommendation were somewhat interesting. I want to quote in a few minutes, on the Arkansas hearings, some statements by the chairman of this committee which are about the best thing along this line that I have heard from any one. I do not know whether he will stay and hear them. I hope he will.

At the hearings at Monroe there were present Senator JOSEPH E. RANSDELL; Hon. RILEY J. WILSON, Member of Congress; ex-Senator Lorimer; and about 150 residents of Monroe. The district engineer explained the reason for calling the hearing and asked for information about a number of points:

Senator RANSDELL then gave a brief account of the history of the project, and urged its completion to Camden, as originally contemplated, in the interest of fair-play to those residing in Arkansas.

Senator Lorimer then spoke. He represented—

A large lumber corporation which had located its mill on the Ouachita because of the excellent transportation facilities that would exist when the project under way was completed. * * * It was impossible for his company to profitably market their oak and other hardwoods except by making use of water transportation. In conclusion, he stated that he was investing the money of the best set of friends that mortal man ever had on the face of God's green earth in this enterprise, the success of which largely depended upon the provision of an adequate channel in the river as at present contemplated.

Other hearings were held along the line; one at Felsenthal, where 50 persons were present, including Senator ROBINSON; Hon. W. S. GOODWIN, Member of Congress; and a delegation from El Dorado. The arguments were summed up by Senator ROBINSON on this occasion.

The Columbia hearing was held on board the snag boat *Ransdell* September 17. Twenty persons were present, and the large and increasing commerce of this river was gone into.

At Camden about 100 persons attended the hearings, and a United States Senator there presented the cause of this river. Mr. King gave some very interesting information:

He stated finally that the Standard Oil Co. had already built tanks at Camden with a view to making Camden its local distributing point, that the company's intention was to supply their tanks by means of a barge line operated between Baton Rouge and Camden as soon as the channel of the river was improved sufficiently to permit.

Another gentleman stated that—

There was 384,000 acres of bottom land bordering the river between Camden and Arkadelphia, much of it covered with green timber that can not be profitably moved until the river improvement is completed. * * *

Senator ROBINSON stated that Congress as a whole approved of the vast majority of projects recommended by the Engineer Department; that some few mistakes were believed to have been made by the department; that the action of Congress in calling for the reexamination of the Ouachita and other rivers was taken solely in order to get the last river and harbor bill through, and should not be construed as indicating a general doubt on the part of Congress as to the worthiness of even the streams specified.

Other gentlemen addressed this hearing, and Mr. King rather hit the nail on the head when he said:

As we understand the proposition down there, the chief trouble we have had with the Board of Army Engineers in considering the expenditure of Government money on the Ouachita River has been the fact that they do not see what we have done with the work already accomplished. They do not see, if we are so interested in the river, if the people are so interested in the river and consider that their commercial destiny is tied up in the river, why we do not use the river.

Senator RANSDELL stated that this was a project—and so, I assume, he will defend this project—with which he had been closely associated during 17 years of congressional life, and he said:

You gentlemen are probably aware of the fact that the first estimate for this project was a fraction under $2,000,000, and now the estimated cost is considerably over $4,000,000, under the revisions which have been made from time to time.

And then there is some rather mild denunciation of ex-Senator Burton because of his work in defeating the last two river and harbor bills, which I think will stand to his credit as the best work of his life. In conclusion, he says:

It seems to me that the Ouachita River is one of the very few streams in this country in which, if I may say so, the Engineer Corps itself is on trial, because if this project is costing a great deal of money, and if we have spent considerably more already than it was thought the whole project would cost, it is the mistake of the Engineer Corps—

This was directed to the gentlemen—

$2,700,000 have already been expended, and you are less than 50 per cent finished. You have not quite completed 50 per cent of it. The original project, as stated, was to cost less than $2,000,000. It seems to me it is up to you to maintain the honor of the corps by saying, frankly, "Yes; we made some mistakes, like all human beings will make mistakes. It was a different river from any other river in the country, but we are going to stand by it and put it through. We are not going to yield to any sentimental cry against the 'pork barrel' and to the improper influence of one man forcing legislation of this kind upon a bill in the dying hours of the session."

That may be sentimental in a way, but you gentlemen are sentimental, just like all other human beings.

It is too bad that the sentiment did not move them to tears, and the tears fall in this river so as to increase its flow. [Laughter.]

Mr. President, that is one of the projects. While I know it can not happen, I wish that in every farm home of this country, and in every shop where men are working, and in every place where women are bending their backs and toiling to make a living the story of the Ouachita River could be told them, and that they could see the sneers and hear the laughter and the jokes about spending the people's money. You can delude yourselves that you can put that kind of business over on the American people. It has been done for a long while. The day is going to come when it will stop, and it will stop short, and the men who are responsible for it will terminate their careers in Congress. You can fool all the people, as Abraham Lincoln said, some of the time, and some of the people all the time, but you are not going to fool all of them all the time. They are "getting on to the curves" of these appropriations. You can hide your heads, ostrich-like, in the sand and say, "It does not affect us," but a day of reckoning is going to come.

I pass from that to a worse one, if it is possible.

Mr. NORRIS. Mr. President, did I understand the Senator to express the wish that some Senator would get up in this body and defend that proposition?

Mr. KENYON. I do. I wish that, with this great concourse of Senators here, some one would arise and defend it.

Mr. NORRIS. Why is the Senator so cruel as to wish such a difficult and impossible task on any of his colleagues?

Mr. KENYON. I should like to know what the defense is. I should like to know, when we come to vote on cutting down $474,000, which has not been recommended, to $234,000 how many votes will be for it. I wonder how many Senators will rush in and say, "What does the bill say? We vote for it." The degree of intelligence exhibited on some votes cast is remarkable.

Now I pass to a worse one—and I wish I did not have to discuss it, because it is the river which the distinguished chairman of this committee, I think, defended. I would be willing to stake my life or my hope of salvation on the honor and the rectitude of the chairman of this committee. I know this is right in his home country. That river is the Arkansas River.

We have expended over three and a half million dollars on the Arkansas River. It is as good a river, possibly, as some of the others. The commerce in 1913, excluding timber and sand, was almost nothing. The engineers in 1915 allotted $193,350. In 1913 and 1914 there were 44,127 snags removed from the river. The engineers, as I understand, recommended

the abandonment of the project; and I want to read a little for the RECORD about this river.

It has a length of 1,460 miles. There have been a number of previous projects on this river, running back to 1832. We have spent on previous projects up to June 30, 1902, $2,249,085.20, distributed as follows: Construction of permanent works, $903,311.93; maintenance of permanent works, $314,119.14; operating snag boats, $1,031,654.13, or a total of $2,249,085.20. Between July 1, 1902, and June 30, 1915, we have spent $1,153,844.35.

There has been no material effect—

The engineers say on page 989—

on freight rates. Snagging and dredging operations are of benefit through the low-water period, in which the work is performed, by reason of cleared channels and increased depth.

* * * * * * *

Commercial statitics: Plantation products and supplies made up 10 per cent, miscellaneous freights 30 per cent, and forest products 60 per cent of the commerce for the calendar year 1914.

The work altogether, including maintenance, amounts to $3,402,929.55.

Commerce, 79,169 short tons in 1914; of that, 35,000 tons were logs, 3,000 tons lumber, sand and gravel 17,000 tons hauled 7 miles. So that the actual commerce, as we understand commerce, was almost nothing on a project where we have spent over $3,000,000.

We talk a good deal about the Army engineers and following the Army engineers. We will have a chance to see on this project how many Senators will follow the Army engineers when it is a question of striking something out of a bill.

Let us see what the Army engineers report. This is Document No. 461. A resurvey was ordered of this river in the last river and harbor bill, and the Chief of Engineers, Gen. Kingman, reports as follows:

The Arkansas River has been under improvement by the United States since 1832, when snagging operations were inaugurated. The present project provides for improving the river from its mouth to the head of navigation by snagging operations, removing shoals by dredging and the use of contraction works, and holding the improved channel by revetment where necessary; the tentative use of two dredges on that part of the river between the mouth and Ozark, 318 miles; and the maintenance of existing works, including those at Pine Bluff, Ark. It was not expected that the operation of the two suction dredges between the mouth and Ozark would be able to maintain a navigable channel throughout that section, but these dredges were recommended for use in an experimental way to determine the practicability of improving the river by this method and at the same time to aid and encourage navigation. Experience has now demonstrated that no benefit commensurate with the cost can be expected from them, even if confined to the short reach below Pine Bluff, where they have been operated. The commerce has been decreasing and now amounts to only about 55,000 tons, a large part of which consists of forest products, which can usually be handled at medium and high stages without improvement. In view of the existing physical and commercial conditions the district officer thinks that the work of revetting the banks should be revived, and he recommends that the project be modified to provide for—

Certain improvements, and so forth.

After due consideration of the above-mentioned reports, I concur in the views of the division engineer and the Board of Engineers for Rivers and Harbors, and therefore recommend that legislation be enacted modifying the existing project for improvement of Arkansas River so as to limit the work to snagging the river from its mouth to the mouth of the Neosho, at an annual cost of about $35,000, and authorizing the transfer without charge of the dredges and other plant not required for snagging to such other works of improvement as the Chief of Engineers may designate.

There is a recommendation of the Chief of Engineers; and this bill carries $209,000 when he recommends $35,000.

Col. Black set forth in his report that there has been expended to June 30, 1914, a total of $3,243,650.91; that the snagging will cost $35,000 annually, and it will require $118,000 for the operation of two dredges. He says that the commerce has been decreasing, and now amounts to only about 55,000 tons, a large part of which consists of forest products.

* * * * * * *

The Arkansas River flows through an alluvial bed, and the channel is subject to unusually rapid changes in position and depth. Its banks are easily eroded, and experience has shown that no permanent improvement of channel can be expected unless the banks are protected by revetment. This would necessitate practically continuous work on one or both banks, similar in character to that being done on the Missouri River under the existing project for that stream. Such work on the Missouri River costs from $50,000 to $60,000 per mile, and is expected to result in a channel depth of 6 feet or more.

* * * * * * *

The board fully realizes the advantages of water transportation and the benefits that would result to a large section of the States of Arkansas and Oklahoma if a stable channel of good navigable depth were available. The physical conditions on this stream, however, and particularly its small low-water discharge, are such as to prevent any radical improvement except at a cost which is entirely disproportionate to resulting benefits, as far as they can now be foreseen. The removal of snags, at an estimated cost of $35,000 per year, will make the natural depths available and permit a light-draft navigation, such as has been carried on in the past. It is believed that this work should be continued.

In view of the foregoing, the board recommends legislation modifying the existing project so as to limit the work to snagging the rived from its mouth to the Neosho, at an annual cost of about $35,000, and authorizing the transfer without charge of the dredges and other plant not required for snagging to such other improvement as the Chief of Engineers may designate.

There is the recommendation of the Board of Army Engineers. And so I might go on.

I want to quote from Maj. Putnam the commerce on the river for the last few years. That appears in the document, page 10. In 1905, 86,000 short tons; in 1910, 59,516 short tons; in 1913, 55,228 short tons. Maj. Putnam advises a little more improvement than the balance do.

Col. Townsend also, who is the Chief of Engineers, stands for the same proposition as Col. Black and Gen. Kingman. Col. Townsend says on page 12 of the same document:

3. Whatever may be the causes of this decline of river traffic, they are of general application to all the western rivers, and the density of traffic on the Arkansas River is so small that there is no probability that the improvement of its channel will counteract this general law, particularly since the radical improvement of the Mississippi River from St. Louis to New Orleans, which has existed for the past 10 years, has had no appreciable effect upon it.

* * * * * * *

5. It is therefore recommended that the improvement of the Arkansas River be at present confined to snagging, which is warranted by the existing commerce, and that all attempts to permanently improve the river channel be deferred until there is an appreciable revival of commerce on the Mississippi River.

There was a very interesting hearing on this proposition by the people interested, which took place at Little Rock. The distinguished chairman of this committee spoke and I want to read something he said that is the eternal everlasting truth about some of these appropriations. He said in arguing this matter to the board—I am quoting what the chairman said to the board, and I quote it with my most euthusiastic approval:

There are millions of dollars scattered over the United States not doing any good except to improve the political prospects of some party. I have been aware that, whether from oversight or whatever it is, there comes up to our committee recommendations that seem to me to be discriminatory. Some things that are not half so worthy as other things are recommended where other things are not recommended. If it is the policy of this administration and of this board to adopt a more rational, businesslike system, I shall aid them in their efforts to do so, and if, after a fair test, the Arkansas River falls under the condemnation of any rule that has been adopted and will be uniformly applied, I will stand as religiously for that as any other; but, when I am backed by such reports as the two I have called your attention to—and the policy was reasonable of digging out this stretch of 173 miles of river from here to the Mississippi River—I believe I am justified in showing some earnestness and protesting with some emphasis against the report made, and which is now under consideration by you.

Before the House committee arguments were made by Members of Congress, a Member of the Senate, and other parties who claimed to be familiar with this river, and in some way the appropriation came back in the bill.

Mr. President, I expect when this question is reached to move to strike this item from the bill as a test at least whether anything can be stricken from a river and harbor bill, whether recommended by the engineers or not.

If this is a flood proposition, if it is to protect the people from floods, that is a very different matter. I should not feel like withholding my vote from assisting in all proper ways people who might be in distress from overflows for which they are in nowise responsible.

I wish for a moment to refer to our old friend, the Brazos River. My impression is that under the act of March 4, 1915, a reexamination was ordered of this river from Old Washington to Waco, a part for which $200,000 is appropriated in this bill. I should like to ask the Senator from Texas if that is not correct. Was not a reexamination ordered?

Mr. SHEPPARD. The Senator is correct.

Mr. KENYON. Has any report ever been filed?

Mr. SHEPPARD. The reexamination is in progress now on a very elaborate scale.

Mr. KENYON. It would seem that where a reexamination had been ordered of a project and the engineers were working on that reexamination and had not as yet filed their report the project could well await the report of the engineers. That would seem reasonable.

I want to refer to the engineers' report on this project, and I shall take but little time on it. I dislike to raise objection to it on account of the very great interest of my friend from Texas in it.

From Velasco to Old Washington is one of the divisions of the Brazos. The other is Old Washington to Waco. The Brazos is a very long stream at the entrance of the Gulf of Mexico 50 miles from Galveston.

For a distance of about 40 miles to the head of tidewater at Bolivar Landing the river had a depth of about 4 to 20 feet at mean low tide; thence up to Old Washington the depths were 1 to 3 feet at ordinary stage of water on the shoals; and the river was obstructed by snags and overhanging trees. The widths varied from 200 to 400 feet. It

had a small low-water discharge, and the flood discharge, though small, can not be carried in the channel and the banks are overflowed during all large floods. The banks erode readily, consequently the navigable channel is unstable.

Previous project: Adopted by river and harbor act approved June 3, 1896, for improvement between Velasco and Richmond only. A total of $123,676.79 was expended on these projects, all of which was for new work. (For scope of previous projects, see Appendix, p. 1860.)

Present project: The river and harbor act approved June 13, 1902, extended the improvement between Richmond and Old Washington, and the river and harbor act approved March 3, 1905, included all the river between Velasco and Old Washington, 254 miles. The project consists in the removal of snags and overhanging timber and in narrowing the river at its shoals by training walls and spur dikes, in order to concentrate the current and obtain greater depths, at an estimated cost of $225,000, with $20,000 annually for maintenance.

* * * * * * *

Operations and results during the fiscal year: Snagging work was carried on by U. S. snag boat *Waco* between 35 and 242½ miles above the mouth of the river, removing a total of 19,262 snags and overhanging trees, at a total cost of $16,567.88. Level lines to establish high-water marks were run at a cost of $208.57. Alterations to convert the snag boat *Guadalupe* to a suction dredge were made, and the sum of $5,939.28 charged to this work. A total of $21,925.33 was expended on the work, all for maintenance.

Condition at the end of fiscal year: The river has been fairly well cleared of snags and obstructions; those remaining were passed over while snag boat was working at higher stages of water. About 50 per cent of the bank trimming has been done, and the river has been deepened somewhat and bank caving has been reduced materially. A total of $275,814.85 has been expended on existing project, of which $93,312.69 was for new work and $182,502.16 was for maintenance.

Speaking now of the part from Velasco to Old Washington, page 913 of the volume of the report:

Commercial statistics: No record of commerce could be obtained for 1914. The record for 1913 shows 1,080 short tons, valued at $81,000. No record of commerce had been obtained for 1912. One boat makes weekly trips from Galveston to Columbia, but no record could be obtained.

And we have spent $399,491.64.

There has been allotted under the act of October, 1914, $10,000, and under the act of 1915, $10,000, making a total on that portion of the river of $419,814.85—one boat; a thousand tons of commerce!

Old Washington to Waco:

Original condition: The profile of this section of the river shows an alternating series of steep and gentle slopes, not navigable above Hidalgo Falls, 260 miles above the mouth of the river. The ordinary discharge is so small that open-river navigation is impracticable.

So March 3, 1905, was the date of the act for the improvement of this portion of the Brazos.

Under the provisions of this act the examination was made and report submitted for a project which contemplated securing a navigable depth of 4 feet at ordinary stage of water for four months and 3½ feet for six months of the year by constructing eight locks and dams and 103 miles of open-channel work, at a total estimated cost of $2,915,000.

* * * * * * *

Operations and results prior to the fiscal year: Lock No. 1, near Navasota, Tex., had been brought to 98 per cent of completion, and Lock No. 8, 7 miles below Waco, Tex., was 75 per cent completed. A total of $853,052.11 has been expended, of which $441,564.63 was expended at Lock No. 1, and $404,080.06 at Lock No. 8, near Waco, Tex., and $7,407.42 for investigating sites for two additional locks, preparing plans, etc.

* * * * * * *

Effect of improvement: There has not been any effect on freight rates, and none is expected until the improvement is completed.

* * * * * * *

Commercial statistics: No freight is now carried on this section of the river, nor can be economically until the improvement is completed.

We have spent on that part of the river $993,689. Twenty thousand dollars was allotted in 1914; $200,000 was allotted in 1915 after this Congress had passed an act for a resurvey, or a total altogether on the Brazos of $1,818,503.85—no commerce at all on one part of it and a thousand tons on the other. Go home and tell your people that you are spending their money and piling up taxes to dump into propositions like the Brazos River.

Not everybody in Texas is so enthusiastic about the Brazos River. Congressman CALLAWAY on the floor of the House—it may be violating the rule to refer to it, but there are not enough here to object to the violation—said that for a large part of the time there is no water in the river to furnish irrigation needs; that they had locks and dams; and you could not find water at times in the Brazos and the Trinity. It was the Trinity I was thinking of, the river where Col. Riché had recommended the sinking of artesian wells to get water. But that is the Trinity. The people laughed at that, and it seems funny for the Government to spend its money to sink artesian wells in the bottom of the river to get water. Let us go home and tell the folks that we are standing for that kind of a proposition, so they may give three extra cheers when they pay some of their war taxes.

But everybody in Texas is not afflicted with this desire to have something out of the Public Treasury. Another citizen of Texas, Mr. Guyler, has written a letter which was placed in the CONGRESSIONAL RECORD by Congressman FREAR. Congressman FREAR is entitled to the thanks of his countrymen for the fight he has made against this measure, resulting in the House of Representatives in nearly 150 votes cast against this bill. Mr. Guyler writes Congressman FREAR on January 26, as follows:

WALLIS, TEX., *January 26, 1916.*

Hon. JAMES A. FREAR,
*Washington, D. C.*

DEAR SIR: Noticing in the press your attitude respecting appropriations toward improvement of various streams, and more particularly those applying to the Brazos and Trinity Rivers of Texas, I felt constrained to write you expressing my complete approval of your course. I am a native Texan, born and raised within 2 miles of the Brazos River; am 50 years old. My father and myself have owned land bordering on the Brazos for 58 years. I now own one tract which borders river for about 3 miles. I beg your pardon for mentioning these items. It is done to evidence my familiarity with the subject. The Brazos is an alluvial-banked stream, easily caves in banks. The work the Government has done and is doing is so utterly useless that it is contemptible and farcical, and apart from the absolute, complete, total, utter waste of such appropriations engineers have made regulations which are costing the people along the banks of said streams large sums of money.

I will mention two. If I should put in a ferry, I have to raise my cable 60 feet above low water—40 feet ordinarily would do. This additional height necessitates longer cables and stronger and more costly posts for elevating. The same applies to bridges. It has cost the people of Fort Bend County at least $40,000 excess to erect four bridges across the river, and this same expense will apply to every bridge and ferry from the mouth to Waco. The reason given for this is to allow height sufficient to clear steamboats. Now, I have lived on Brazos for 50 years and my father since 1858, and never in all that time has there ever been a steamboat either up or down, except the Government snag boat and possibly one or two small gasoline launches sent out by Waco boosters to prove the navigability of the stream. I am not a civil engineer, but I believe it would be cheaper to dig a canal from the Gulf to Waco then attempt to deepen the Brazos; and if an honest, capable engineer would investigate without being wined and feted by those interested, it would be overwhelmingly defeated. Our politicians seemed to be governed by those who make the loudest noise and the common people have no horns or bands or champions—

They ought to take that boat that was navigating on the Altamaha with a loud horn—

I wish you every success. * * * You are welcome to use my name.

Yours, respectfully, R. W. GUYLER.

So we go on with $1,700,000 in this project, going on for a number of years, God knows when, and a number of millions more that are to be put into it.

I want in passing just to say a word or two about the Trinity River, which carries an appropriation of $250,000 for locks and dams. This is a 37-lock canalization project. There is not anything definite about it as to the time when it will be completed. One lock and dam is built one year and another lock and dam is built another year. It has been estimated that it will cost the Government $12,000,000. There is no commerce; and that is met by the statement that, of course, there can not be commerce until the project is completed. At the rate of progress at which it has been going on it will take somehting like a hundred years to complete it.

This is the stream I referred to where Col. Ritchie once recommended sinking artesian wells in order to get water. It should be remarked that the city of Dallas is to contribute $50,000 to this enterprise. Dallas at an early time in the history of this project contributed sixty or sixty-six thousand dollars to the enterprise. It is creditable, of course, that there is some cooperation, though undoubtedly it is more of a booster proposition, for Dallas is one of the liveliest places in the whole country.

Mr. SHEPPARD. Mr. President, the people of Dallas have contributed altogether over a million dollars in connection with the Trinity River.

Mr. KENYON. Dallas, of course, is one of the most enterprising places in the country.

Mr. SHEPPARD. And they have at this session offered to put up $3,000,000 if the Government will complete the project.

Mr. KENYON. I do not doubt it. Well, is this not assisting Dallas as a drainage proposition for their sewage?

Mr. SHEPPARD. Not at all.

Mr. KENYON. But if they are willing to put up $3,000,000, why do they not go ahead and build this thing themselves?

Mr. SHEPPARD. Because it will cost anywhere from $6,000,000 to $9,000,000; or probably more.

Mr. KENYON. Well, Dallas was enterprising enough to almost get the Democratic national convention, so I suppose the putting up of an amount of this kind is not at all troublesome to them.

Mr. SHEPPARD. Does not the Senator from Iowa think that the project evidently has some merit if the people interested offer to put up an amount of that kind?

Mr. KENYON. That is the first argument I have ever heard that would make me think at all that it did have some merit.

It would seem that the people there, at least, think it has some merit.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER (Mr. VARDAMAN in the chair). Does the Senator from Iowa yield to the Senator from Massachusetts?

Mr. KENYON. I do.

Mr. LODGE. If I may ask the Senator from Iowa a question, Is not the real benefit obtained by these appropriations overlooked by him? Do they not promote and tend to the support of many worthy and deserving persons?

Mr. KENYON. Undoubtedly.

Mr. LODGE. I thought that had been overlooked.

Mr. KENYON. That is an argument. I thought I had covered the subject pretty completely, but I am sorry to say I omitted that.

Mr. SHEPPARD. We on this side could not hear the observation of the Senator from Massachusetts.

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Texas?

Mr. KENYON. The "Senator from Iowa" will yield to the Senator from Texas.

Mr. LODGE. My observation was simply that the Senator from Iowa had overlooked one very important reason for these appropriations, and that is that their expenditure led to the support of a number of very deserving persons, whether the river was improved or not.

Mr. SHEPPARD. I will state, Mr. President, that there is *no such reason* in connection with any river that I know anything about.

Mr. LODGE. Somebody does the work.

Mr. SHEPPARD. A motive of that kind would be an essentially unworthy motive.

Mr. LODGE. I am delighted to hear the Senator say so.

Mr. SHEPPARD. And I would hesitate before I would intimate that anybody had an idea of that kind.

Mr. LODGE. That some deserving person would be supported by the work?

Mr. SHEPPARD. Yes, sir; before making any suggestion of that kind I should hesitate a long time; I certainly would not make it in connection with anything that the Senator from Massachusetts had anything to do with.

Mr. LODGE. The support of deserving persons is a very worthy object.

Mr. KENYON. Mr. President, I very much hope that this interesting discussion may proceed without any unusual friction. I want to place in the RECORD from the engineers' report what I may have to say about this project. I now quote from page 938:

Original condition: Prior to the beginning of improvement the river had a navigable depth of about 4 feet at ordinary low water from its mouth to Liberty (limit of tidal influence), a distance of approximately 40 miles. Rafting of logs could be carried on at ordinary low water to a point about 50 miles above the mouth. The river above tidal action is a narrow stream with a low-water depth insufficient for even light-draft navigation.

* * * * * * *

From the manner in which appropriations have been made for the improvement of the Trinity River, it has been held that the entire project outlined in House Document No. 409, Fifty-sixth Congress, first session, has never been adopted in its entirety by Congress, but that only such locks and dams have been authorized as have been specifically appropriated for. The report in question contemplated the construction of 37 locks and dams with incidental dredging and other open-channel work, at an estimated cost for a 6-foot navigation of $4,650,000 and $280,000 annually for maintenance after completion, but of this number only 7 locks and dams have been specifically appropriated for and the location of 2 others authorized.

The amount so far expended on this project is given on page 940, at the end of the fiscal year, as being $2,062,262.42.

Effect of improvement: Owing to the fact that the river is not yet navigable to Dallas, the only place at which it can come into active competition with the railroads, no effect on freight rates has been produced.

* * * * * * * *

Commercial statistics: The commerce transported during the calendar year 1914 consisted mainly of logs in rafts and of merchantable timber, with a small amount of cotton and other farm products.

*Comparative statement.*

| Calendar year. | Short tons. | Value. |
|---|---|---|
| 1912 | 60,677 | $768,115 |
| 1913 | 27,147 | 406,428 |
| 1914 | 12,610 | 102,394 |

All of the above tonnage, except the rafting of logs, originated at or below Liberty, Tex. In addition, during the calendar year 1914, 20 bales of botton and 300 passengers were carried by the light-draft gasoline boat *Commodore Duncan* between Dallas and Lock and Dam No. 2.

*Financial summary.*

| | |
|---|---|
| Amount expended on all projects to June 30, 1915: | |
| New work | $1,830,595.06 |
| Maintenance | 238,667.36 |
| Total | 2,069,262.42 |

As shown by the engineer's reports, volume 2, page 2677:

The snag boat *Trinity*—

The principal navigation on these rivers seems to be the navigation of snag boats—

The snag boat *Trinity* remained laid up at Liberty, Tex., from the beginning of the fiscal year until October 15, 1914, due to lack of funds. An allotment for this work having been made from the river and harbor act of October 2, 1914, the snag boat was placed in commission October 16, 1914, working down the river from Liberty, Tex., and continued work until February 10, 1915, on which date it was again laid up, due to shortage of funds. It resumed work on May 26, 1915, and worked from that date to the end of the fiscal year. The items of work performed were as follows:

| | |
|---|---|
| Number of miles worked over | 18 |
| Snags destroyed | 28 |
| Stumps destroyed | 4 |
| Shore snags cut | 758 |
| Logs removed from channel | 1,825 |
| Leaning trees cut | 7,509 |
| Trees girdled | 204 |

A very great work. What a farce!

There is all of that money so far expended; and, of course, when any objection is raised we are met by the argument, "Why, you would not spend all of this money and then waste it by doing nothing more?" So we go on and on, building more locks and more dams, until 37 are now to be completed. I suppose that that project will be defended. I know my good friend from Texas [Mr. SHEPPARD] thoroughly believes in it, and I thoroughly believe in the honesty of all of his purposes; but how people who are not in Texas—I mean it in no sectional way—can vote for this project with the showing made by the engineer's report as to the absolute lack of commerce and the millions so far expended I can not see, unless it be for one thing, and that is in time to give the people of that part of Texas a potent force to regulate railroad rates.

The Brazos appropriation and the Trinity appropriation certainly can not be defended on the ground of navigation. The defense must be that their improvement will give to the people along their banks actual water competition, which will reduce freight rates. That is a great big subject, which we have discussed here considerably in days gone by. Undoubtedly water transportation on the Lakes has resulted in a great deal of benefit to the people of the Middle West in giving actual water competition; but we are always confronted with that proposition, that people along the rivers are getting better rates. The truth is, however, that the whole people of the country are contributing to that end. If the people along these rivers are getting better rates, then somebody else has got to pay for it, and you are working an injustice to some one else.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Nebraska?

Mr. KENYON. I do.

Mr. NORRIS. What is the length of that river?

Mr. KENYON. The Trinity River?

Mr. NORRIS. Yes.

Mr. KENYON. "The Trinity River rises in north central Texas and flows approximately 650 miles southeasterly to Galveston Bay."

Mr. NORRIS. I mean that portion of it included in the provisions for improvement.

Mr. SHEPPARD. I will say that it is about 500 miles from Dallas to the mouth of the river.

Mr. KENYON. The Senator from Texas says about 500 miles.

Mr. SHEPPARD. A little over 500 miles from Dallas to its mouth.

Mr. KENYON. I see from the report of the Chief of Engineers that that stretch is 512½ miles long.

Mr. NORRIS. How many of the dams are now completed?

Mr. KENYON. Seven have been appropriated for and two others authorized. There have not been seven completed. I presume the Senator from Texas can state how many have been completed.

Mr. NORRIS. What is the maintenance cost, approximately, for each one of these dams, and how many of the employees of the Government have to stay there all the time to look after them?

Mr. KENYON. I can not tell the Senator that; I have not figured that out.

Mr. NORRIS. How many dams are there to be in all?

Mr. KENYON. There are to be 37 dams altogether; and I think four or five have been completed. I will ask the Senator from Texas whether that is correct?

Mr. SHEPPARD. About five have been completed, and the other two are almost completed.

Mr. NORRIS. What do they cost? Has the Senator that information?

Mr. KENYON. I have the figures somewhere as to the cost of these various dams, but the Senator asks questions so fast that it is hard to keep up with him. I think they cost in the neighborhood of $350,000 each.

Mr. NORRIS. And there are to be 37, the Senator says?

Mr. KENYON. There are to be 37.

Mr. NORRIS. The river will be dammed worse when it is completed than the Senator is damning it now.

Mr. KENYON. I do not know but that the people who make it possible will be damned worse than the river.

Now, I wish to put in the RECORD a couple of letters in regard to this river to a Member of the House of Representatives from Texas. Not all of the people of Texas are enthusiastic about this river, nor are all of the Members of Congress from that State. One Member of the House from Texas has fought this river; he has ridiculed it, and has said that the appropriations for this river were unjustifiable. He has exhibited a good deal of courage, as I understand he lives very near the river. Here is a letter to him which was placed in the CONGRESSIONAL RECORD in the other House, and which I wish to place in the Record here:

CITIZENS' NATIONAL BANK,
*Waxahachie, Tex., January 30, 1913.*

Hon. OSCAR CALLAWAY,
*Washington, D. C.*

DEAR SIR: I wish to commend you for your course on the rivers and harbors appropriation bill. That you are right in your position there can be no question. Money appropriated to make navigable dry creeks hundreds of miles away from tidewater is money wasted. How so-called engineers can make favorable reports on such schemes is past comprehension. But they do it. Many seem to think the Government a big institution, with money without limit, and that every dollar they can get from the Government by any means is fair, and that the people are gainers to that extent, when in truth all governments as purely governments are paupers. Every dollar the Government has must come from the people. If all these foolish appropriations were placed where good results would follow, it would be commended. Why Congressmen will vote for such wild, foolish appropriations is passing strange.

I will not read the reasons he assigns—

It can only be assigned to ignorance or insincerity. The people are getting tired of such foolishness. I have heard many commend you for your stand.

Yours, truly, O. E. DUNLAP.

I read another letter from the same town:

THE CITIZENS' NATIONAL BANK,
*Waxahachie, Tex., April 1, 1913.*

Hon. OSCAR CALLAWAY,
*Washington, D. C.*

DEAR SIR: From press reports I note that you have been opposed to further appropriations for the furtherance of the proposed navigation of the Trinity River. I do not think this a practical project at all, and I wish to congratulate you on the fair, unprejudiced stand you have taken, especially so in the face of all the opposition and criticism this stand has brought upon you. Personally the cleaning and clearing of the underbrush along the river would be of much personal benefit to me, as I have considerable land adjoining same, but I do not think it right that the funds of the Federal Government should be used in bringing this about, although, as stated, should the Trinity be made a navigable stream it would be of considerable benefit to me and a project which would meet with my hearty support could I conscientiously believe it practicable, which I do not.

With best wishes to yourself, I am,

Yours, very truly, R. W. GETZENDANER.

I am not acquainted with these gentlemen, but I assume the Representative from Texas must be, and in placing their letters in the RECORD he vouches for their standing and probity.

So we have this proposition, Mr. President, that on a stream with about 12,000 tons of commerce, over $2,000,000 have been expended, and millions more are yet to come.

I will take up now for a moment the Black and Current Rivers. They are not particularly important; and the commerce on them, after the exclusion of logs and timber rafted, is practically nothing. For the Black River we have appropriated $257,457.96, and for the Current River $77,043.24 have been appropriated. I will read just one brief statement from the engineers with regard to these rivers:

The low-water widths—

Referring to the Black River—

of Buttermilk Bend are 120 and 140 feet. Its low-water depths are uniformly 8 feet. The corresponding depths in the reach and crossing immediately below the bend are 3 feet. There are no shoals immediately above or below the bend that interfere with navigation, the controlling shoal above being the Indian Ford, 3 miles upstream, where a low-water depth of 18 inches obtains, and the controlling one below being Mussel Shoal, 4½ miles downstream, where a low-water depth of 2 feet obtains.

Eighteen inches of water in a stream, and yet we are asked to make appropriations for it!

Now, I come to a very interesting stream, upon which there were some illuminating hearings in the House. I refer to the St. Francis River. This is one of the streams where a witness testified in the House that you did not know when you got to it and you did not know when you got across it.

In its original condition—

Say the engineers in their report, on page 1006, volume 1—

this stream was not navigable above Lesters Landing (190 miles above the mouth) at any stage. Between Lesters Landing and Marked Tree, 41 miles below, navigation was possible at high stages only, and below Marked Tree to the mouth, 149 miles, it was difficult at medium and ordinary low stages and impossible at extreme low water. The minimum usable depths below Marked Tree were 10 to 12 inches for a width of 30 feet. Above Marked Tree the depths and widths were 6 inches and 10 feet, respectively. Wappapello, Mo., 340 miles above the mouth, has been considered to be the head of steamboat navigation, and logs and ties are floated from about 40 miles farther up; however, by reason of the fact that a section of river below—Lesters Landing to head of Varney River—is navigable during high water only, and even then with great difficulty, Lesters Landing is the practicable head for any form of power-boat navigation from below.

Another one of the rivers included in this group is the L'Anguille, concerning which the report of the engineers, on page 1007, says:

During periods of no backwater the minimum usable depths are but 6 to 8 inches, with a channel width of 10 to 20 feet.

Six to 8 inches of water!

Neither of the tributary streams are navigable—

Say the engineers' reports, on page 2729—

during low water, and the main stream—the St. Francis—is navigable by only very light-draft boats at that time. During the calendar year 1914 the St. Francis River in the vicinity of Madison was too low for navigation purposes from June 17 to December 29, and in the vicinity of Marked Tree from June 14 to December 31.

And so it runs.

Freight traffic: Logs and lumber are practically all the freight traffic. They amount to 294,000 tons, and the balance of the traffic amounts to but a few hundreds. But I want to call attention more especially to some of the hearings in the House.

The St. Francis River—

Says Mr. CARAWAY, in the House hearings—

for 81 miles has no defined channel or banks. It varies in width—that is, the sunk lands—from a quarter of a mile to about 7 miles. I notice that in the report the engineer states that it is from one-fourth to 2½ miles, but, having lived for quite a while in the so-called lake or sunk-land section, I am entirely familiar with it, and know that he is in error somewhat. The channel of the river, or what used to be the channel, has almost entirely disappeared. When I first knew the river, as far up as Lake City, through the sunk lands, steamboats of considerable size ran. That was only 15 years ago. Where the wagon and railway bridges cross the lake at Lake City, and which have draws, and were built within the last six or seven years, under these draws there are now islands and willow trees growing, which are tall enough to reach from this floor to the ceiling. The channel is choked with a growth which we locally call smartweed. It grows to a height of 15 or 20 feet, and at places I have seen it so thick that it appeared to be land on which you might walk, but if you attempted to do so you would sink in 10 or 15 feet. I knew a very estimable gentleman to lose his life because he mistook that formation of weeds for land. He walked out on it and was drowned.

He says, further:

With all due deference to the chairman, I understand that a great deal of the river and harbor improvement work has commerce only as a secondary incident, though it is the alleged reason for the improvement.

This is the part I especially call attention to, as a stream for which we are appropriating money, and, further, carrying a survey in this bill for some more of it beyond the line of anybody dreaming, I should think, of navigation:

Sixteen miles above the head of the sunk lands the St. Francis River has a channel with banks 17 feet above the low-water state; 9 miles below the sunk lands, at Marked Tree, it has 18 feet, and a short distance below that, at Madison, in St. Francis County, it has 38-foot banks. Through the sunk lands, in some places, it has a well-defined bank on one side, but on the other the average above low water, I should think, was not over 18 inches, and it may be less than that. In fact, when you approach it at many place you will not know when you reach the river, and the channel winds around through logs and growth and this smartweed, as we call it, and you can actually cross the river and never know it. As I said, where they have built the railroad bridge and wagon bridge at Lake City, and where I have seen steamboats at least 30 or 40 feet in length, there are willows growing up, in some places coming through the flooring of the bridges. There is no sign of a river there, and for three-quarters of a mile up and down stream, where I used to see the river, there is nothing now to be seen but vegetation. However, there is water there, and if you should probe down through this growth you would be apt to find water anywhere from 18 inches to 10 feet deep. If you canalize this river, you make it a continuous navigable stream for whatever uses it may be put, and I think the reports will show that this river carries about as much commerce as the ordinary streams.

So we have a river as to which the witnesses testify that you do not know when you reach it and when you cross it.

Now, as to the surveys in this bill, the committee seemed to have a rule that anybody wanting a survey could have it put on, because surveys do not cost much, although the Commerce Committee of the Senate increased this appropriation by $100,000 to cover surveys, and there is one survey which runs up into these sunken lands. As to that, the engineers say that in this section there is a low-water depth of about 2½ feet, with many logs, snags, and overhanging trees and a discharge of about 170 cubic feet per second. The commerce consists mainly of logs and mill supplies. In the sunken lands for 81 miles the banks are usually submerged and the stream divided into a number of poorly defined channels, having a depth of not more than 15 inches at average stage and but 8 to 10 inches at low water. If we are going as a business proposition to consider anything, I think we should hesitate somewhat about extending any surveys to that kind of a proposition. The controlling depth at ordinary low water, the engineers say, is about 12 inches, while in dry years it is as little as 8 inches.

So much for the St. Francis.

I only want to refer, in order that I may have it in the RECORD, to the Cumberland River, which carries a very heavy appropriation in this bill. The continuing improvement provided for in this bill is below Nashville, and only maintenance is carried in the bill above Nashville. There are two projects on the Cumberland—the upper Cumberland, extending from Nashville to the headwaters of navigation, and the lower Cumberland, extending from Nashville to the Ohio River. The appropriation is to carry on the work on the lower Cumberland, providing for seven locks and dams.

We have spent on the Cumberland River about $5,000,000. The commerce amounts to about 130,000 tons. When one of the projects, either above or below Nashville—I think above Nashville—was up for consideration the Army engineers recommended the cooperation of the States of Kentucky and Tennessee, and that a portion of the money should be contributed by those States; but it was stated in that hearing that the State of Kentucky could not contribute, owing to her constitutional provisions. In any event, the Army engineers recommending that, it would seem that if we intend to follow the Army engineers we should make that kind of a provision.

This bill carries $710,000 for that river, in addition to over $5,000,000 heretofore appropriated; and if the valuable wood, timber, and sand is deducted it would leave a traffic of around 100,000 tons in 1914. The amount expended above Nashville is $3,295,640.73. Under the allotment of March 4 there was allotted $378,000. Below Nashville the amount expended has been $1,214,801; the allotment of October, 1914, was $210,000, making a total of $5,088,441.30.

Now, let us see a little about the commerce.

The commerce looks large in some of these reports. There are great duplications of commerce. Logs and lumber and sand and gravel hauled only a few miles are put in to swell the commercial statistics, but on careful analysis and an exclusion of these matters the ordinary statistics in few cases amount to very much.

Above Nashville, as given on page 2847 of volume 2, the short tons for the year 1914 were 314,028. Upon analyzing that we find that 68,583 tons was logs, 20,656 tons lumber, 60,240 tons railroad ties, 100,925 tons sand and gravel, which was hauled about 12 miles. So, excluding those matters which do not require any canalization or any large channel, there would not be to exceed 100,000 short tons.

Below Nashville there is apparently 153,458 short tons of commerce for the year 1914. Of that, sand and gravel, hauled an average of 12 miles, constitute 38,976 tons; railroad ties, 96,092 tons; lumber, 580 tons; logs, 2,903 tons. So if that was deducted we would have a commerce that would not amount to over 20,000 or 25,000 tons.

I make this estimate, so that it may go in the RECORD, from the engineers' report of 1915, volume 2, page 2847:

Above Nashville, 314,028 tons, as follows: Sand and gravel hauled 12 miles, 100,925 tons; logs, ties, and lumber, 172,507 tons; or a total of 273,432 tons, which, deducted, leaves a net amount of 40,596 tons.

Below Nashville, 153,458 tons, as follows: Sand and gravel, 38,976 tons; logs, ties, and lumber, 102,024 tons; making 141,000 tons, or a net amount of 12,458 tons as the commerce on this stream, where we have expended $5,000,000!

The engineers say, as I understand their record, that the appropriation should be $340,000. This bill carries $705,000. In 1914 there was $210,000 allotted for the Cumberland River below Nashville, and in 1915, $378,000. I shall offer an amendment as to this at the proper time, for which I shall ask consideration, reducing that appropriation.

I want to place in the RECORD some facts as to the Tennessee River. That is given $944,000 in this bill. About $11,000,000 has been appropriated for this river. Deducting sand, gravel, and valuable timber, the commerce in 1914 reached about 186,000 tons. That included ore and marble hauled from 5 to 15 miles, amounting to about 78,000 tons. Of that, it seems almost impossible from the engineers' reports to determine just what is for maintenance and what is to continue the project; and it must always be borne in mind, in the discussion of the commerce on the Tennessee, that the coal and marble were hauled a very short distance, and that is a factor to take into account.

I want to analyze the commerce a little.

The commerce for the year 1914 above Chattanooga would appear to be rather large—305,616 short tons. Of that, 5,000 tons was logs in barges, 25,000 rafted; lumber towed, 8,000; ties, 18,000; and sand hauled 27 miles, 145,000, which, when deducted, leaves rather a small commerce in consideration of the large amount expended.

Between Chattanooga and Florence the engineers give us, on page 2871, 124,872 tons for the year 1914; but of that 15,000 tons is logs towed in barges, 1,000 rafted, 10,000 lumber, ties 2,000, sand hauled 25 miles, 54,000; and if that should be deducted there would be a very trivial commerce left. Between Florence and Paducah, applying the same rule, the same result would follow. So the commerce, if we are to justify these expenditures in that way, certainly would not warrant the large expense.

I ask permission to place in the RECORD an analysis of the commerce on that river which I do not want to take the time to read.

The PRESIDING OFFICER (Mr. HUSTING in the chair). Without objection, it will be so ordered.

The matter referred to is as follows:

TENNESSEE RIVER ABOVE CHATTANOOGA.

Season of navigation, year 1914: Closed June 10, 1914; opened December 2, 1914.

*Vessel classification.*

[1] Part transported by owners.

Number of passengers carried, 3,182.

The foregoing tabulation does not include the freight transferred between the Nashville, Chattanooga & St. Louis Railway Co.'s terminals at Hobbs Island and Guntersville, Ala. Two towboats, handling large transfer barges that accommodate from 8 to 10 freight cars each, are employed by the railway company as a connecting link between its lines on the north and south banks of the river. Freight is not unloaded from the cars, and the railroad keeps no separate traffic records pertaining to this car ferry, but regards it in the same light as any ordinary crossing, although the terminals are 22 miles apart. It is considered that this business is not altogether in the nature of actual river traffic, but inasmuch as the statistics heretofore compiled for this section have included the commerce thus handled, a condensation of the railroad company's report for the last calendar year is given on next page.

*Traffic handled in 1914 by railway transfer boats between Hobbs Island and Guntersville, Ala. (22 miles).*

| Class of commodities. | Quantity. | Estimated value. |
|---|---|---|
| | *Tons.* | |
| Farm products | 12,544 | $1,379,840 |
| Timber products | 4,267 | 64,105 |
| Merchandise | 44,838 | 6,725,700 |
| Miscellaneous | 20,711 | 410,665 |
| Total | 82,360 | 8,580,310 |

With the addition of this business the total traffic for the year 1914 amounts to 207,232 tons, valued at about $12,334,623. These totals should be employed in any comparison of the commerce of this section for 1914 with that reported for years previous to 1910.

TENNESSEE RIVER BETWEEN FLORENCE AND PADUCAH.

Season of navigation, year 1914: Navigation was continuous throughout the year from Paducah to Hamburg. From Hamburg to Riverton navigation was interrupted during the months of June, July, August, and September, though vessels drawing less than 24 inches could pass over the shoalest sections above Hamburg at all times during the year.

[1] Part transported by owners.

Number of passengers carried, 21,561.

Mr. KENYON. I refer for just a moment, as not so particularly important, to the harbor of Ontonagon, Mich., where they have expended large sums of money, and the tonnage last year was 12,032 short tons.

Grand River, Mich., is one of the wasteful projects, where we have appropriated $518,000. The commerce has been a decreasing commerce, until it is down to 49,000 tons, and the work is practically abandoned in that river.

On Clinton River we have expended $99,000. There is a small tonnage. About all there seems to be there is a few gasoline boats. The tons last year were 14,108. We expended $72,919.57. It seems to be more of a pleasure resort than anything else.

On the Fox River, Minn., which I will not take the time to go into, we have made large expenditures. There is a very small traffic. It seems to have benefited the people by making a good place for skating on in the wintertime.

The Sacramento and Feather Rivers are put into this bill, carrying appropriations of, I think, $75,000, but committing us to an expenditure of $5,860,000. I am not sufficiently familiar with that to go into it.

I want to refer now to the Ohio River. The Ohio River is the most expensive project that is being carried by the Government. It has cost millions and will cost millions more. It has a large tonnage, and if any improvement of this character can be justified as an experiment it would probably be the Ohio River.

Some years ago there was an examination of the Ohio River by the War Department, with a view to obtaining a channel depth of 6 and 9 feet, respectively, and that Board of Army Engineers, through Gen. Mackenzie, made a most interesting report. They found that a 6-foot navigation at low water could be established from Pittsburgh to Cairo by the construction of 45 locks and movable dams, at a cost of fifty million nine hundred and sixty-two thousand and some odd dollars, and a 9-foot channel at a cost of $63,731,488, with a cost of maintenance of $15,000 for each lock and dam, a total of $675,000 for the 6-foot project and $810,000 for the 9-foot project.

These projects were outside of terminals, which do not seem to have been considered by the board, so that the cost combined is $63,731,488 and $1,000,000 a year for maintenance.

There has been considerable of that work done. The question is whether it should be abandoned or not. The Ohio River has some advantages in being the great industrial center of Pittsburgh and the fact that it flows through a country that has a large population, many manufacturing plants and coal interests. The traffic on the Ohio River is largely coal, and the difficulty with the situation is that you get your movement only in one direction; there is not much to come up the river.

The Ohio Valley Improvement Association has for years besieged the Government for appropriations with which to deepen the Ohio River to 9 feet. The present plan was adopted in 1910 and involved, as I have said, an expenditure of about $63,000,000, but if the terminals are included which are necessary in any plan of river improvement to be successful the project would come closer to $70,000,000.

The Ohio is one of the few American rivers that has retained any large traffic in recent years. At Cincinnati there has been an increase of over 56,000,000 bushels of coal in 1893 to 62,000,000 bushels in 1906. It is not a large increase but is more substantial than on any of the other rivers.

As I have said, the Ohio River has some advantages that other rivers do not have. Its headwater is the great industrial center

of Pittsburgh and there are various industrial towns along the river. It is perhaps the best river on which to attempt any scheme of canalization.

The Board of Army Engineers were of the conclusion that there would be a tremendous traffic on the Ohio River, agricultural products and coal and raw material of all kind. Perhaps the traffic on the Ohio River will be, if anything, the raw material that enters into the many industrial enterprises along the line.

Lumber traffic presents no prospect along the Ohio River, because the forests are cut down, sand and gravel are hauled but a short distance, and what is to be hoped for would be the raw material entering into manufactures, because the Ohio Valley is becoming a very great manufacturing center.

The board estimated the cost of necessary dredging, in addition to the $63,000,000, to be about $5,000,000, and, as I have said, that does not include the cost of the terminals, which would run the project over $70,000,000.

The board believes that the traffic of 3,500,000 tons of coal may be moved from Pittsburgh to Cairo in a year, and there would be a profit in that for the boat company. It has to be borne in mind that the river line is generally farther than the railroad. For instance, along the Ohio the distance from Pittsburgh to Cincinnati is 468 miles on the river, while on the railroad it is 326 miles. Whether the average rate per haul per ton-mile by water can be made less than by railroad is, of course, problematical. If the Government furnishes the waterway entirely free to boatmen and we did not take into consideration at all the capital invested in making the river navigable, then the water transportation will, of course, be lower.

There now are about 100,000 tons of continuous commerce apart from soft coal that has always floated down the river. It reached a very large sum in 1914. One-half of the valuation of the commerce is from trade ferried across the river.

I do not know, Mr. President, whether the Ohio River plan warrants further expenditures or not.

I had expected to take up the Missouri River project and the Mississippi, but the junior Senator from Missouri [Mr. REED] is not present, who desired to be here; and I think I will discuss what I have to say about the Missouri River when we reach that item in the bill, and also the Mississippi River.

Mr. President, I have covered—in I know a very uninteresting way—some of the projects in this bill which have led my mind to the conclusion that the bill ought not to be passed by Congress, even in different times from those we are now engaged in, but that especially at a time when there are so many necessary expenses, apparently this is certainly an indefensible bill. I have said very frankly that if there were enough Senators who would enter into a legislative fight—proper legislative tactics—to defeat this bill I would be glad to join in that kind of a movement. There are not, and, so far as I am concerned, I am going to criticize this bill all the way through, and fight it all the way through, and offer amendments to these various projects, and try and have half the amount substituted, and put these matters up to the judgment of each individual Senator and let all these questions be voted on.

I hope the bill will have a full and free discussion from both sides. I have tried to discuss it in a fair way without any insinuations or reflections upon anybody. I feel deeply that this system of appropriations is going to stop before many years, and that the real friends of river and harbor legislation have to get rid of all the little indefensible schemes that are placed in this bill, and that the awakened conscience in this country is going to demand that Congress, not only in this but in other measures, shall have some regard for the people who have to pay the bills.

I shall discuss other features of the bill as the consideration of the measure proceeds.

## HOUSE OF REPRESENTATIVES.

### TUESDAY, *May 9, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We thank Thee, Almighty God, our heavenly Father, for the spirit of evolution potent in the mind of man from the beginning, leading him from savagery to civilization, the earnest of the grander possibilities which lie with us all. Help us, therefore, to be earnest, to be faithful, to be true to ourselves and true to Thee, until we all come unto the measure of the stature of the fullness of Christ; and Thine shall be the praise forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

#### LEAVE TO EXTEND REMARKS.

Mr. BUCHANAN of Illinois. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a speech on the subject of Our Merchant Marine, by Mr. Andrew Furuseth, before the Economic Club of Boston, on February 23.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD by printing a speech on the subject of Our Merchant Marine, delivered by Mr. Andrew Furuseth in Boston last February. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the Philippine bill.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent to extend his remarks in the RECORD on the Philippine question. Is there objection?

Mr. FITZGERALD. We all have 10 days to print on that subject. That time is not up yet. I think there ought to be a limit on the gentleman from Illinois. There is on the rest of us.

Mr. STAFFORD. There is no limit on the gentleman from Illinois. He is limitless in his activities.

Mr. FITZGERALD. Five legislative days.

Mr. SLAYDEN. Make it ten.

Mr. FITZGERALD. The gentleman from Illinois is not so busy that he can not write his remarks within five days.

The SPEAKER. The gentleman from New York [Mr. FITZGERALD] proposes to limit the time of the gentleman from Illinois to extend his remarks to five legislative days.

Mr. MANN. I ask that my request be submitted.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD on the Philippine bill. Is there objection?

Mr. FITZGERALD. Reserving the right to object, Mr. Speaker, I wish to say that I think five days are enough. There is no reason why the gentleman should have unlimited time, and I will object. I ask unanimous consent that the gentleman have five legislative days.

Mr. MANN. The gentleman need not ask unanimous consent for me. I am able to ask my own unanimous consent.

The SPEAKER. The gentleman from New York objects to the request of the gentleman from Illinois, and that is the end of it.

Mr. FITZGERALD. I ask unanimous consent that the gentleman from Illinois may have five legislative days.

The SPEAKER. No; he does not want it.

Mr. KITCHIN. I withdraw the objection of the gentleman from New York. [Laughter.]

The SPEAKER. The gentleman from North Carolina withdraws the objection of the gentleman from New York, and the gentleman from Illinois gets his chance to print his speech, anyway.

Subsequently,

Mr. FITZGERALD. Mr. Speaker, was my objection to the request of the gentleman from Illinois withdrawn?

The SPEAKER. Yes; it was withdrawn by the gentleman from North Carolina [Mr. KITCHIN].

Mr. FITZGERALD. I wanted to know, because I wanted to see how easy it was to make the gentleman from Illinois petulant.

The SPEAKER. The objection was withdrawn by the gentleman from North Carolina.

Mr. MANN. I did not hear the remark of the gentleman from New York.

Mr. FITZGERALD. The gentleman can read it in the RECORD to-morrow.

#### DIXIE HIGHWAY BRIDGE.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent for my colleague from Georgia [Mr. WALKER], who has an emergency bridge bill, that it may be considered by the House.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read the title of the bill (H. R. 14771) granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River, to be known as the Dixie Highway Bridge.

Mr. ADAMSON. I ask unanimous consent for the present consideration of this bill, because it is an emergency matter.

Mr. GLASS. I ask for the regular order.

#### RURAL CREDITS.

The SPEAKER. The gentleman from Virginia demands the regular order, and the House automatically resolves itself into

the Committee of the Whole House on the state of the Union for the further consideration of the rural-credit bill.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes, with Mr. GARNER in the chair.

Mr. GLASS. Mr. Chairman, I would like to inquire how much time remains for general debate.

The CHAIRMAN. The gentleman from Virginia has used 55 minutes and the gentleman from California [Mr. HAYES] 1 hour and 47 minutes.

Mr. GLASS. I yield five minutes to the gentleman from Oklahoma [Mr. HASTINGS].

Mr. HASTINGS. Mr. Chairman, the importance of this bill can not be overestimated. In my judgment, no bill which is likely to be considered by this Congress will have more far-reaching and beneficial effect. While the European countries have had a system of rural credits for a great number of years, it is new legislation, so far as the United States is concerned.

By the act of March 4, 1913, Congress authorized the appointment of a commission to visit Europe and make a study of this great question. Under this act a commission was duly appointed by the President, made a trip to Europe, collected and compiled valuable information, made an exhaustive study of the subject, and submitted a comprehensive report.

A number of rural-credit bills were introduced in the last session of Congress, referred to the respective committees, reported back to the House and Senate, and some consideration given them. However, it was finally decided to defer action upon the matter. The whole subject was referred later on to a joint subcommittee of both branches of Congress, with authority to hold hearings during the recess last summer, and instructed to report back by the 1st day of January, 1916. This was done by bills being introduced in both the Senate and the House and referred to the respective Banking and Currency Committees.

PURPOSE OF THE BILL.

We have just concluded consideration in the House of the Agricultural appropriation bill, which carries an appropriation of $24,501,093. Broadly speaking, the money appropriated by that bill is for the purpose of securing beneficial information for the use of farmers in applying scientific methods in planting and growing their crops and in caring for and marketing them. Farming has become a great industry, and to be carried on successfully it must be done along business lines. Everyone recognizes this. To do it the farmer must have money not only to buy land, but improve it, buy live stock, and purchase machinery in order to make it productive.

The accommodations offered by commercial banks do not meet the needs of the farmer, as they must always have quick assets with which to pay the checks of their depositors. The farmer should have a different system of credit. He requires loans upon longer terms and can not afford to pay the interest rates charged by commercial banks.

The purpose of this bill is to create a means whereby he may secure loans upon long terms at the lowest possible rate of interest and payable in small amortization payments.

It is only in exceptional cases where a farmer can borrow money at commercial rates, buy a farm, and pay his note within the time usually granted by commercial banks. If crops fail and he is unable to meet the interest and the installment when due, the mortgage is foreclosed and he loses his initial payment, together with the time and work he has expended upon it.

This bill makes it possible for him to secure money as a loan for 5 to 36 years and enables him to get it at a low rate of interest. If thrifty and industrious, he will be able to make the payments and ultimately own his home free from all incumbrances.

FARMING IS THE GREATEST INDUSTRY WE HAVE.

The census of 1910 shows the total area of the United States to be 1,903,269,000 acres, and of this 878,789,000 acres, or 46.2 per cent, is given as productive land. The amount actually cultivated is given as 478,451,750 acres. The total number of farmers is about 6,500,000. The size of the average farm is 138.1 acres, and of this the average acreage of improved farm land is 75.2 acres and the average of the unimproved is 62.9 acres.

The last census gives the number of farms in Oklahoma as 190,192 and the number of acres of farm land as 28,859,353. The size of the average farm in the State is 151.7 acres, and of this the number of productive acres is given as 92. The total value of farm property in Oklahoma in 1910 was $918,198,882.

The census shows the mortgage debt for the entire United States to be $1,726,172,851 for 1910, but exact figures are not thought to be available. The entire debt is variously estimated at between four and five billion dollars.

The rate of interest upon land mortgages varies in the different sections of the country, ranging from 6 to 10 per cent, including commissions. The average is given at 7.5 per cent. Dr. C. W. Thompson, in charge of rural organization in the Department of Agriculture, gives the average in Oklahoma, including commissions, as 8.4 per cent.

These figures impress us with the very great importance of enacting rural-credits legislation.

NECESSITY FOR LEGISLATION.

The Federal reserve act, approved December 23, 1913, encouraged short-time six months' loans to farmers and permitted national banks to make a limited amount of loans on first farm mortgage security for a period not to exceed five years. The time is too short, renewals are too frequent, and the interest rates of commercial banks are too high. The threat of foreclosure is always hanging over the farmer, who is dependent upon the seasons. In the event of a drought, a total or a partial failure follows. Excessive rains cause a loss of time, and often subject him to great damage and financial loss by ruining his grain. Every one who grew up on the farm as I have, has an intimate knowledge of farm life. He knows that the farmer runs more risk of losing his year's labor than any other class of producers. He works longer hours and gets smaller compensation.

During the consideration of the Agricultural appropriation bill it was stated that the average farmer, after deducting 5 per cent upon his investment, received only $402 per annum for an average family of 4.6 persons, and yet the prosperity of the entire country is dependent upon him. Let there be a shortage in the wheat crop or an unusual demand for it, such as was occasioned by the European war, and the price of flour goes up. The increased cost is felt in every home throughout the land. On the other hand, let there be an abundant supply of all farm products, and the entire Nation is benefited.

The value of all farm products for the year 1914 aggregated the staggering total of $9,873,000,000, and the value of all the crops for 1915 perhaps exceeds this sum. These facts conclusively show the necessity for legislation to encourage and assist the farmer.

Reflect for a moment that only 46.2 per cent of the land in the United States—less than one-half capable of being cultivated—is actually producing. Because of insufficient improvements, poor live stock, lack of machinery, and other things necessary to make a crop, the land only yields one-half of what it is capable of producing. In other words, four times as much could be produced as is actually raised, or farm products of the value of $40,000,000,000 could be harvested yearly. This vast wealth turned into the channels of trade would bring unparalleled prosperity to the country and be felt by every citizen of this Republic. To help bring this condition about is the object of this legislation.

I would rather be the author of a real rural-credits bill, one that would meet the needs of the actual producers of this country, than of any other legislation.

Without financial assistance it is difficult to succeed in any occupation or profession. Every laborer must have tools. Every physician or lawyer must have instruments, books, and office equipment. No merchant can do business without money. The same is true of the farmer. [Applause.]

OTHER APPROPRIATIONS COMPARED.

We appropriate large sums of money for various purposes—more than a billion dollars for the present fiscal year ending June 30, 1916. There is now pending in this House a bill authorizing the expenditure of $45,000,000 for flood control. I am not criticising these appropriations, but only invite attention to them. This bill only appropriates $100,000 to pay the salaries and expenses of a part of the officers provided for, in addition to authorizing the Secretary of the Treasury to advance the initial capital of $750,000 for each of the 12 Federal land banks, to be repaid as the loans are made and the stock is subscribed for by the borrowers. To be more definite and lest I may not be understood, after subscriptions from national farm-loan associations to any Federal farm-land bank aggregate $750,000, thereafter 25 per cent of all subsequent subscriptions shall be semiannually applied to the retirement of the capital stock subscribed by the Government.

Complaint is voiced by a comparatively few against this small initial encouragement by the Government to the greatest

industry of the country. We appropriated $39,608,410 for rivers and harbors a few days ago. Perhaps it was all justified. I am not an expert on such matters. We will soon be called upon to appropriate large sums for other purposes. The small amount authorized, expended and advanced, by this bill is trifling, as compared with other appropriations and the beneficial results that will follow.

PROVISIONS OF THE BILL.

The administrative features of this bill are patterned after the Federal reserve act.

FEDERAL FARM-LOAN BOARD.

A nonpartisan Federal farm-loan board consisting of three members appointed by the President and confirmed by the Senate, with a salary of $7,500 each, having offices in the city of Washington, is charged with the general supervision of the system.

FEDERAL LAND BANKS.

The entire United States is to be divided by the farm-loan board into 12 Federal land-bank districts, and a temporary organization of the banks is provided for with a capital of $750,000 each, which is divided into shares of $5 each. In the event all or any part of this amount is not subscribed for within 90 days after the opening of the books for subscription, it is made the duty of the Secretary of the Treasury to subscribe for the balance of the stock unsubscribed for on behalf of the United States.

After $100,000 of the stock is subscribed for by national farm-loan associations, the bank is permanently organized with nine directors. Six directors are elected by the national farm-

41538—15651

loan associations and three are appointed by the Federal farm-loan board to represent the public interest. Their salary and expenses are fixed by the directors subject to the approval of the board.

NATIONAL FARM-LOAN ASSOCIATIONS.

Local corporations known as national farm-loan associations are authorized to be organized and chartered upon the application of not less than 10 natural persons, who desire to borrow not less than $100 each and not more than $10,000, providing the aggregate amount desired to be borrowed is not less than $20,000. Each local association elects not less than five directors and a secretary-treasurer, none of whom receive any compensation except the secretary-treasurer, who is to be paid only such salary as the board of directors may determine. The other officers are a president, vice president, and a loan committee of three members, all serving without pay, except their actual expenses may be paid. Nobody but a borrower can become a member, and when his loan is paid he ceases to be a member.

HOW TO SECURE A LOAN.

There are three ways of securing a loan:

First. From Federal land banks through national farm-loan associations.

Second. From Federal land banks through agents.

Third. From joint-stock land banks.

Let us take them up in their order.

To secure a loan through a national farm-loan association the prospective borrower must become a member, either as a charter member or by a two-third vote of the directors, after the association is organized and chartered. In any event, he must be a prospective borrower. The members may borrow 60 per cent of the value of their farm lands and 20 per cent of their insured permanent inprovements through the association by subscribing for stock in the local association to the amount of 5 per cent of the desired loan. The local association in turn subscribes for a like amount in the Federal land bank. This stock is capable of paying dividends, and is paid off at par when the loan is paid. The stock held by the Government receives no dividends and is paid off as the stock is subscribed for by local associations by applying 25 per cent of the subscriptions after $750,000 has been subscribed. Ultimately all the stock in the Federal land bank will be owned by the local associations.

The application for a loan must be made out in proper form, prepared by the Federal farm-loan board, and must be accompanied by the abstract or evidence of title, as well as by an appraisement signed by the members of the loan committee of the local association and approved by the local directors. This application goes to the Federal land bank and an appraiser is sent to view the land. If the application is in proper form, the title good, and the appraiser's report favorable, the loan is made. Each loan must be indorsed by the local association.

To illustrate: If a farmer wants to borrow $500, he joins a local association, makes an application on proper form to the secretary-treasurer of the local association for a loan, and subscribes for 5 per cent, or $25 worth, of stock. This application is referred to the loan committee, who view the land and who must make a unanimous written detailed report to the directors of the local association. If they approve it, the loan is indorsed by the local association, the application is forwarded to the Federal land bank, and the local association subscribes for $25 worth of stock in the Federal land bank. The title is examined, and an appraiser is sent to view the land. If this report is favorable, the loan is made.

Each farmer will want to know to what extent he will become liable. His land will stand security for the amount of his loan, and he will be personally liable for all loans of the local association to an amount double the stock he holds, just as a director of any bank is now liable for the indebtedness of the bank.

No member need fear this liability, when it is remembered that no one can borrow more than 60 per cent of the value of his land and 20 per cent of the value of his insured permanent improvements; that the character of each borrower is vouched for by the association; that his land is appraised by the local loan committee of three; that their report must be unanimous; that it must be approved by the directors of the local association; that the proposed loans must receive favorable reports from the Government appraiser; and that the loans must meet with the approval of the directors of the Federal land bank.

It must be kept in mind that the cooperative spirit which will be developed by the formation of these local associations will be of great value to the farmer.

FOR WHAT PURPOSES LOANS ARE MADE.

Loans are only made on first mortgages on farm land for the following purposes:

To purchase land for agricultural uses, equipment and live stock necessary for the operation of the farm, and to provide buildings, and for the improvement of farm lands, and to liquidate existing indebtedness. The purpose of this legislation is to help real farmers and not speculators.

THE TERMS AND INTEREST.

The bill provides that loans may be made for 5 to 36 years, payable on the amortization plan. The rate of interest will be governed by the rate charged on bonds sold. The bill provides that the Federal land banks shall not charge more than 1 per cent upon farm loans in excess of the rate of interest borne on the last series of bonds sold. This 1 per cent is for administrative expenses. It is thought this much will not be needed, and that the rate will soon be greatly reduced. The bill provides that in no event shall interest be charged in excess of 6 per cent. Experts familiar with the price of securities testify that in their judgment the bonds authorized to be issued by Federal land banks will be so safeguarded that a 4 per cent bond will find ready sale at par. By adding not to exceed 1 per cent for administrative purposes and 1 per cent for the amortization payment the interest charged the farmer would be 6 per cent, which, in 36 years, would liquidate both the principal and interest.

The average rate of interest in Oklahoma, including commissions on mortgage loans, is 8.4 per cent. This bill would enable the farmers of Oklahoma to borrow money upon their farm lands and repay both principal and interest at 6 per cent.

When it is enacted into law the rate of interest throughout the United States will be uniform, because each Federal land bank is liable for the bonds of the other. Therefore, the bond of one land bank will be as attractive and secure and sell at as low a rate of interest as the bond of any other land bank. Hence, the farmers of Oklahoma would be able to borrow money at as low a rate of interest as those of New England.

The farmers not only want low rates of interest but they want a place where they can get money. This bill provides for both.

Any loan can be repaid in whole or in sums of $25, or any multiple thereof, after five years, at any interest-bearing date.

WHERE THE MONEY IS SECURED TO LOAN FARMERS.

One question that will be asked by every farmer throughout the country is, "Where will you get the money to loan farmers?"

In the first place, this bill authorizes the organization of 12 Federal land banks, with a capital stock of $750,000 each, and in the event this stock is not subscribed for in whole or in part the Secretary of the Treasury subscribes for the amount unsubscribed for on behalf of the United States. Loans are made upon farm lands to the amount of $50,000. Bonds may then be issued by the Federal land bank, and these bonds are secured, first, by first mortgages on land; second, the stock of the local loan associations; third, by the Federal land bank; fourth, by all the other 11 Federal land banks; and, fifth, by knowledge of the fact that authority for the issuance of these bonds was granted by the Federal farm-loan board, and they were regularly and legally issued, and that all of the requirements of the

law were complied with. This last will inspire confidence on behalf of investors.

It is believed that a ready market would be found for an unlimited amount of such bonds at a rate of interest not to exceed 4 per cent. In no event can the bonds bear a greater rate of interest than 5 per cent. In my judgment they would be as safe as Government bonds. It would bring the small investor in the East in touch with the borrowers throughout the country. The bonds are issued in denominations of from $20 to $1,000. As rapidly as loans to the amount of $50,000 were made bonds would be issued and sold, and the proceeds would then be used to make additional loans. In this way, ample funds would be secured to meet all the requirements of the farmers.

AGENTS.

Section 15 of this bill provides that in the event local associations are not formed in any locality the Federal farm-loan board may, in its discretion, authorize the appointment of State banks, trust companies, and mortgage companies to act as agents for the Federal land bank. They would be required to indorse each loan and become liable therefor and would be authorized to receive as compensation for their services not to exceed one-half of 1 per cent. It is not seriously contended by anyone that an agent under the terms of this bill would ever be appointed.

I attempted to amend this section in the committee by making it mandatory upon the Federal farm-loan board to appoint postmasters of the first, second, and third class agents in the various localities where local associations were not formed within 90 days after the organization of the Federal land bank of any district, giving the agents authority to administer oaths and attest their acts with a seal as well as to forward applications for loans without charge to the Federal land bank.

My fear has been that the farmers of Oklahoma would not readily understand the organization of local associations and that there might be delays incident to the organization of these associations, as well as in securing loans. If each prospective borrower could, through some local person appointed for the purpose, submit his application upon a form prescribed by the Federal farm-loan board, accompanied by a note and mortgage, with the affidavits of two of his neighbors acquainted with the land, whose reputation was vouched for by some responsible person, such as the postmaster, loans could be initiated in this way and forwarded to the Federal land bank. They would thereafter take the same course as if forwarded by a national farm-loan association. The abstract of title accompanying the application would be examined, and if found good the application for a loan would be submitted to an appraiser appointed by the Government, who would view and appraise the land before a loan was finally made, as is required where the application for the loan is forwarded through the local association.

I advocated the appointment of the postmaster, because he is a responsible Government official already paid a salary. He is acquainted with everyone in the community and could be required to perform this extra service free of charge to the farmers. What is most desired is to do away with the expense of conducting the local association and the delay. If this amendment is adopted, it will do both.

JOINT-STOCK LAND BANKS.

The bill also provides for the organization of joint-stock land banks. The stock in these corporations would be privately owned. Their capital could not be less than $250,000, and they would be authorized to make loans upon first mortgages and to issue bonds based upon said loans upon a form prescribed by the Federal farm-loan board. These banks can not charge the farmers more than 1 per cent in excess of the rate of interest established for the last series of farm-loan bonds issued by them.

It is urged by some that the joint-stock land banks will compete with the Federal land banks and that they should not be established. It is also contended that they would loan at a lower rate of interest than the Federal land banks, and in this way prevent the organization of the local loan associations.

What I am interested in is to get cheap accommodations for the farmers—whether they get it through the Federal land banks or the joint-stock land banks, as provided in this bill. For this reason I am willing to have both. They have both in Europe.

EXEMPTION FROM TAXATION.

The stock of the national farm-loan associations and Federal land banks, including reserve and surplus, and the mortgages executed to Federal land banks and to joint-stock land banks, as well as farm-loan bonds issued by them, are exempt from Federal, State, and local taxation. This is in the interest of the farmer.

The more secure and attractive you make the bond to the investor the more ready market the bonds will find, and the lower the interest for which the bonds will sell, the lower will be the rate at which the loans will be made to the farmers. For this reason I favor exempting them from taxation.

The question of the constitutionality of this provision has been argued at great length in the Senate. Upon the authorities there cited I have no doubt as to the constitutionality of the provision. See Owensboro National Bank against Owensboro, One hundred and seventy-third United States, page 664, and cases cited.

WHAT HELP THE GOVERNMENT GIVES THE FARMER IN THIS BILL.

It may be asked "What assistance does this bill give to the farmers of the country?" In the first place, it provides an agency by means of which the borrower and the investor are brought together. It enables the borrower to secure a loan upon long terms at a low rate of interest payable on the amortization plan. It provides initial capital of $9,000,000, or $750,000 for each of the 12 farm-land banks, to organize and begin making loans. It appropriates $100,000 to pay the salaries and expenses of the Federal farm-loan board, as well as all other officers whose salaries and expenses are provided in the bill to be paid by the Government. It exempts the stock of the local associations and Federal land banks and the mortgages and bonds of the Federal land banks and joint-stock land banks from taxation.

WILL AID FARMERS TO SECURE HOMES.

My earnest desire is to assist the man of small means to own his own home and to encourage and aid him in every way to buy a tract of land. When he becomes the owner of the land, he will necessarily become more deeply interested in permanently improving it. Crops will be rotated, fertilizers will be used, and the land will be made more productive. Every foot of it will be tilled, and nothing will go to waste about the premises.

He knows that good roads add value to the land and will feel justified in spending more time and money upon them. The same is true of schoolhouses and churches. As the country becomes more permanently settled and thickly populated there is more demand for rural mail delivery. Other conveniences will follow and all will have a tendency to stop the movement away from the farm to the towns and cities, greatly strengthening the citizenship of this Nation.

How will this bill assist the man without any money or land to secure a home? This question is an important one, and it will be asked by many, especially in a new State like Oklahoma.

Anyone who desires to purchase a home under the terms of this bill can borrow 60 per cent of the appraised value of the land on a long-time first mortgage at a low rate of interest, payable upon the amortization plan; and if he has a reputation for being honest, industrious, and economical, he can secure enough additional money on a second mortgage or other security from other sources to pay the balance of the purchase price. In this way this bill will assist the tenant farmer or the man without land to own a home.

SAVING TO FARMERS OF OKLAHOMA.

The total farm-mortgage debt of Oklahoma is given as $73,129,000. The interest on this sum at 8.4 per cent, the average farm-mortgage rate in Oklahoma, amounts annually to $6,142,836. Pass this bill and the farmers of Oklahoma, by paying $4,387,740 annually, or 6 per cent of the above amount, will save $1,755,096 each year in interest. In addition, they will pay the principal with the interest. If the bonds sell under 4 per cent the interest rate would be lower and a greater amount would be saved to the farmer. The certainty of being able to pay the debt when due, and the gradual reduction of the principal by including it in the interest, and providing an agency through which the farmers can get the money, will greatly relieve them in Oklahoma.

CONCLUSION.

On the whole, I think this is a splendid bill. With the exception of section 15, providing for the appointment of agents, and some other amendments which will be offered, it meets with my most hearty approval.

It is new legislation so far as this country is concerned. Its imperfections, if there be any, will soon be discovered and corrected by Congress. Every safeguard is thrown around the bonds. They are as good as Government bonds and should find as ready a market. The proceeds derived from their sale should amply meet the requirements of all prospective borrowers. The safer the bonds the lower will be the rate of interest they will bear, and a corresponding low rate will be given the farmer.

Rural-credits legislation was recommended by President Wilson and the principles of this bill are understood to meet his approval. It passed the Senate by a vote of 58 to 5. When it passes the House and finally becomes a law, history will record the verdict that this is the greatest piece of constructive legis-

lation enacted by this or any other Congress within the last half century. [Applause.]

OTHER LEGISLATION BY THIS CONGRESS.

No other Congress has considered or will have enacted so much beneficial legislation for the farmers of the country. The House has passed and there are pending in the Senate:

(1) A bill appropriating $25,000,000 in aid of good roads, and this bill has passed the Senate with amendments.

(2) The Post Office appropriation bill making an adequate appropriation for the parcel post and increasing the amount for the Rural Mail Delivery Service.

(3) The Agricultural appropriation bill appropriating $24,501,093 to enable the Department of Agriculture to experiment with every subject affecting farm life, including animal diseases, the testing of seeds and soils, and diseases of plant life, including cotton, corn, potatoes, wheat and forage crops, and the studying of diseases of fruit trees. Finally through bulletins, yearbooks, reports, books of various kinds, agricultural journals, and the press, as well as through farm demonstrators, the department will give this information to farmers for their use, so that great results will be obtained.

In addition, the Agricultural appropriation bill contains:

(a) An appropriation for a bureau of marketing, to assist the farmer in marketing his crops to the best advantage.

(b) The cotton-futures act is reenacted, to make its validity certain.

(c) The grain-grades act, to insure the uniform grading of grain, so that the farmer may sell his farm products upon the same grade for which they are sold elsewhere in the markets of the world.

(d) The warehouse act providing for establishing and licensing warehouses, the storing of grain, and the issuance of warehouse receipts in such a way as to enable the farmer to store and hold his crops for a better market and to use his receipts as collateral security.

(4) And this bill providing for a system of rural credits, which I have been attempting to analyze, and the importance of which I have been attempting to emphasize. [Applause.]

Mr. GLASS. Does my colleague Mr. HAYES desire to use any time right now?

Mr. HAYES. I can use time if the gentleman desires, but we have consumed considerably more of our time than the gentleman's side have consumed of their time.

Mr. GLASS. Very well. I yield 10 minutes to the gentleman from Alabama [Mr. STEAGALL].

Mr. STEAGALL. Mr. Chairman, there is nothing that more vitally affects our prosperity than a highly developed agriculture. This interest not only lies deep at the foundation of our industrial progress and economic independence but it is inseparably interwoven with the promotion of that morality and patriotism, indispensable to a great civilization. [Applause.]

Let us look briefly into the tendencies that confront us. The rural population of the United States decreased from 70.5 per cent in 1880 to 53.7 per cent in 1910. The tenant farmers, in 1880 constituting 25 per cent of the total, in 1910 had increased to 37 per cent. No thoughtful man, solicitous for our future prosperity and happiness can look upon these figures without alarm. Indeed, they constitute an unerring prophecy of approaching evils that challenge the best effort of combined wisdom and patriotism, if we are to hand down to our children the freedom and independence we now enjoy. The lessons taught by these figures are embodied in the history of many of the greatest nations the world has known, but which, lacking the power to correct these tendencies, have passed away or sunk into comparative weakness and decay. As long as they had an enduring agriculture and independent rural citizenship they grew and prospered, drawing their strength in wealth and men from the farm; but as cities were built they drew from the farms the sturdiest and strongest characters; the products of the soil decreased; the cost of living ran higher and higher; and as idleness, and extravagance, and waste, and vice multiplied in the great centers of population, the nation, through inherent weakness—always more deadly and dangerous than any foreign foe—sickened and died or fell before some stronger people fresh in activity and free from the infirmities of age.

The young man who would attain his highest possibilities in life does well to inaugurate early the practice of conserving his physical, moral, mental, and financial resources. Only by steadfast adherence to this course of conduct may he hope to develop well-rounded strength or hold commanding station among his fellows. The prudent man keeps watch on his physical well-being. If dangers threaten, he seeks the cause, then applies a remedy. Even so, we who are charged with responsibility in this period of our country's youth and strength, seeking the conservation of the moral and material resources with which God has so abundantly blessed us, should extend our vision across the unfolding years of the future in search of every threatening danger, then seek in patience and prudence to apply a permanent remedy. [Applause.] The tendencies in our economic life to which I have pointed present an unhealthy symptom, manifestly serious and portentous.

Before seeking a remedy let us examine causes. Thus we may hope more directly to find a way of relief. A number of influences may have contributed to the growth of these unhealthy conditions. But undoubtedly they are chiefly the result of economic evils and injustice. It is estimated that the aggregate wealth of the farmers of the United States is about $40,000,000,000 and that their indebtedness totals about $6,000,000,000, approximately half of this amount being secured by mortgages. The estimated interest rate paid by the farmer averages about 8½ per cent, making a total of something like $500,000,000. Figures show that the fair earning capacity of money in this country is about 4 per cent. So we see that the farmer pays more than twice the rate at which it is possible for him to prosper. In other words, the farmers of the country pay in interest about one-quarter of a billion dollars more than they can successfully carry. One cause of this comparative injustice is found in the provision of the law by which the resources of the national banks have been denied to the farmers. The total resources of our national banks are about $10,000,000,000. This amount comprises about one-half of the banking funds of the country. This vast credit resource has by arbitrary provision of law been practically denied to the man having only land to offer as security.

Again, under the banking laws as they have existed the reserves provided for have been carried to the large financial centers and withheld from the great agricultural sections of the South and West. As a legitimate result of these unwise and unfair provisions of law the farmers in the vast undeveloped sections of our country—in the South and West—that stand most in need of capital with which to develop their marvelous resources, pay an interest rate vastly in excess of the older and less needful sections contiguous to financial centers where banking reserves are assembled. It can not be denied that it lies in our power to correct these inequalities and remedy these conditions. Just here it is only fair to say that this administration, in the passage of the great Federal reserve act—that splendid achievement that freed the banking and commercial interests of the Nation from the domination of the coterie of financiers who formerly controlled our supply of money—made provisions permitting loans by national banks on real estate. This measure, in a limited way, strikes down the discrimination against the farmer, but in the very nature of things complete and adequate relief is not afforded. The national-bank system after all remains a commercial system, not adapted to the practical use of the farmer offering real estate as security.

The farmer needs a system of credit adapted to agricultural development. This is not possible under the terms and customs that govern commercial transactions. His business is not the buy and sell sort where rapid exchanges take place, but is a sort of buy and build enterprise. The products of the soil are not forthcoming except at yearly stated periods. Whether the farmer's crop be grain or cotton or fruit or food or live stock, his business is not such as is suited to short-term and fast-maturing loans. He is entitled to a system adapted to his needs just as is provided for other classes; and he is entitled to have counted in the consideration the investment in land which is necessary to enable him to ply his trade. There can be no insistence that the farmer offering land upon reasonable valuation and limitation has not as good security as may be found. Moreover, it is indisputably true that as population increases, and the demands for the products of the soil multiply, land security must become stronger and stronger with the years. The commercial interests of the Nation are cared for under the laws by which security held by the banks are hypothecated to the Government, and currency issued upon it to the banks as middlemen. As for my part, I do not hesitate to say that it is the part of wisdom and statesmanship for the Government to lend its aid and control to a system that will make available to the farmer offering land and its improvement as security the same resources of credit now open to others.

Far-seeing men, who saw the unfortunate conditions to which I have alluded, began the agitation of a rural-credits system that would remove discrimination and give to the farmer the credit resources indispensable to his prosperity. This agitation began with us in 1912. In that year the Democratic Party, in its national convention, declared in favor of permitting national banks to loan a reasonable portion of their funds on real estate, and

pledged the people that, if intrusted with power, it would investigate the rural-credits system of the Old World with a view of establishing here a system suitable to conditions in the United States. In fulfillment of this promise an act was passed in 1913 authorizing the President to appoint such a commission. They conducted careful and extensive investigations in a number of the leading foreign countries and submitted reports to Congress. The bill now under consideration is in large part the product of that investigation.

The countries of the Old World have demonstrated that long-term land credits, such as is embodied in the landschaft of Germany and other systems can be made available to farmers at 3 and 4 per cent interest. If the farmers of those countries enjoy such a rate of interest, the farmers of this great Nation are not unreasonable in expecting their representatives to provide a system that will do the same for them. There is no difficulty in finding available capital in the United States at low rate of interest. There are $4,000,000,000 on deposit in the savings banks of the country drawing less than 4 per cent interest. In the State of New York depositors have loaned nearly $2,000,000,000 at less than 4 per cent. There are $3,000,000,000 invested in bonds and other securities that do not pay as much as 4 per cent. The farmer, whose security, if properly assembled and systematized, would be safer and more stable than these, pays an average of nearly 9 per cent, and in some sections often 10 and 15.

The bill under consideration seeks to vitalize and standardize the security of the landowner. The plan provides for the organization of 12 regional land banks with a capital of $750,000 subscribed by the Government. These banks are to be under rigid Government control and supervision through a Federal farm-loan board to be appointed by the President. In pursuance of the cooperative feature running through the plan, and to secure uniformity of rates throughout the different sections of the country, each of the 12 banks established is responsible for the obligations of all.

The bill provides for the organization of farm-loan associations whose capital stock shall be not less than $10,000 and whose stockholders shall be not less than 10 in number. No loan can be made for more than 60 per cent of the value of the land. The borrower executes to the farm-loan association a mortgage upon his land, and the farm-loan association indorses the mortgage to the land bank. Each borrower subscribes and pays 5 per cent of the amount of his loan to the capital stock of the Federal land bank, and is liable for a like amount in addition, just as are stockholders in national banks. The loan must be approved by the board of directors of the farm-loan association, by the appraiser, and by the Federal land bank. It is recognized that in order to obtain funds at the low rate desired the utmost caution and care prevail in the granting of loans. Upon these mortgages as security, the Federal land banks issue bonds, each Federal land bank, as before stated, being responsible for the bonds of the other Federal land banks. It seems to me that every possible safeguard short of Government indorsement has been thrown around these securities.

In Germany, in France, in Great Britain, such bonds have ranked in the money markets close to the Government bonds themselves. We often hear objection to the cooperative provisions of the bill, because one borrower is involved in the security for the debts of another, and, strange to say, this objection usually comes from those who insist that the bonds of the land banks should be secured by the Government. This is rather a remarkable argument. If the securities are not properly safeguarded, certainly the Government ought not to indorse them; and if they are safeguarded, no harm can come to the individual borrower by reason of his joint liability. Moreover, under the cooperative plan, the securities put on the market will be guarded by the judgment of individual borrowers in every community, who are in position to judge of the character of the applicant and the quality of his security. For my part, I believe in Government aid, but I would not advocate such a course unless convinced that the securities offered were absolutely sound. I represent a constituency among whom the need for credit of this character is so accentuated that I believe in the most liberal system consistent with safety, with the greatest amount of Government aid and encouragement.

The gentleman from Oklahoma [Mr. FERRIS] makes inquiry regarding the section of the bill which provides for loans to individuals without the organization and intervention of farm-loan associations. I will say to the gentleman that I have given careful study to this section of the bill, and my views are these: If the Government is to be involved in further liability than is provided by the bill as reported, I think the system ought to be limited in granting loans only through farm-loan associations. If there is to be no Government liability added to the provisions of the bill as framed, I should be glad to see the section providing for individual loans liberalized and made practicable. I am fully aware that as that section reads it can not meet the views of those who contend for a system providing for direct loans without the intervention of farm-loan associations. However, it is clearly erroneous to insist that there are no benefits whatsoever to come from that section of the bill. In the State of Alabama—and I have no doubt the same conditions exist in other States—there is such great demand for money and the banks are so strained in the effort to accommodate their customers that I have no doubt many of them would gladly avail themselves of the provisions of this section in order to enable their patrons to secure additional accommodations. The truth is, speaking for the section that I represent, I believe this bill will carry benefits that will be felt by the small bankers. I have no doubt they will welcome its passage.

Not only the safeguards enumerated have been thrown around the bonds of the land banks, but the bill exempts the bonds from taxation of every sort. This makes the difference of fully 1 per cent in itself. It is thought not unreasonable to expect that under the practical operation of the system the bonds will find ready sale at less than 4 per cent. If this be true, the farmer will be enabled to borrow money at less than 5 per cent, because the bill provides that the farmer can not be charged more than 1 per cent above the rate on the bond. In no case can the interest rate exceed 6 per cent. The minimum loan permitted is $100 and the maximum $10,000, and improvements on land are recognized in the valuation to be taken.

Not only does the farmer need a reasonable interest rate as compared to others, but in the very nature of things any system to afford relief must provide for long-term credit. The bill before the House provides for the amortization plan of payment, the minimum period being 5 and the maximum 36 years. Under this plan it is estimated that a loan of $1,000 at 5 per cent would be extinguished in 20 years by payment of $80.24 each year. If the rate to the farmer is as low as 5 per cent, which it is hoped may be the case, the farmers of the district that I represent could by paying 8½ per cent annually—which is less than the amount of interest at which they are now permitted to obtain money—extinguish the entire debt, including principal and interest, in 20 years.

The long-term provision eliminates the expenses involved in annual payment and renewal, removes the constant dread of foreclosure, gives a permanent basis upon which to base calculations and activities, and will stimulate hope, economy, and thrift.

A most serious aspect of agricultural conditions is found in the swelling swarm of tenants, now numbering nearly 3,000,000, the percentage of whom is increasing with such alarming rapidity. It is not unusual to hear expressions of concern for the welfare of the negro here in these parts. I do not object to that, though I believe with all my heart that many men who would be his friends have proven his worst enemies; but all good men everywhere are desirous of his improvement. The greatest man that race has ever given to the world taught his people just as their white neighbors have always contended—that their proper sphere of real growth and usefulness lies along industrial lines and in their increased capacity in the production of wealth. A large percentage of our tenants are negroes. No man, white or black, living upon another's land, sleeping under another's roof, and whose toil is sold or mortgaged in advance can ever find heart and hope and stimulus to build a permanent prosperity or an enduring civilization. I know of no legislation ever attempted for the negro's uplift that carried so much of practical benefit to him as will, in my judgment, be accomplished by the passage of this bill. It will throw the light of hope across the darkened path of every tenant in this land, white or black, and quicken the step and brighten the face of every man who tills the soil and bring to the American people a richer yield from every field and farm. This system will constitute an effective call upon every man who toils to put forth his best effort and practice utmost economy. It will point the way by which, when once able to make the beginning, he may borrow money at low rates upon long terms and complete his plan for becoming an independent landowner.

The opposition to the bill is based in large part upon inconsistent and antagonistic contentions. On the one hand we find those who tremble at the suggestion of paternalism, and at the same time objection is made because the bill does not go far enough in its provisions for Government aid. For my part, I think there is much greater support for the latter view. The cry of paternalism has lost much of its force. The Government in the Federal reserve act provides for loaning its credit to the banks. Government credit and Government funds are expended

in the organization of the Bureau of War-Risk Insurance. The Government has been using its funds in the construction of a railroad in Alaska and the development of the Panama Railway, and it is proposed that the Government shall purchase ships for the development of a merchant marine. These efforts, like the purpose of the rural-credits bill, are the promotion of the welfare of the people as a whole.

But, after all, the measure before the House does not seriously involve the Government in gifts nor make it a lender. It only provides the machinery to organize and vitalize the security of the farmer to enable him to compete upon fair terms with others in reaching the money supply of the country. I do not suppose the present bill embodies entirely the views of any man on the subject of rural credits. Even the pioneers in this great work, the learned gentlemen of the recess committee, were never able to agree as to all details of any particular bill. The measure is, in plain truth, like every great scheme of its kind, a compromise. It is not to be expected that in a matter to us new and untried Congress could in its first attempt construct a bill free from every imperfection. But the passage of the present bill will insure rural-credits legislation by the present Congress. It is at least a long step in the right direction. To defeat it would defer this reform indefinitely and disappoint deeply those who expect relief at our hands. If the system proposed shall prove destructive in its operation, as feared by some, I believe we may trust the wisdom and patriotism of a subsequent Congress to repeal it. If it shall prove unsatisfactory and insufficient in the measure of relief sought to be accomplished, we may trust those who come after us to amend and perfect it. I repeat that it is at least a good beginning, a step in the right direction, that ought not to be defeated or delayed. The passage of the Federal reserve act has freed the banking and commercial interests from the few so-called financiers, too long allowed to control the supply of money and, under threats of panic, dictate legislation or defeat the administration of law. A greater achievement will crown our efforts in the passage of this bill that will enable the farmers of the country to secure credit upon equal advantages with the commercial, industrial, and manufacturing interests.

This step must be taken not only out of consideration for the future of the farmer; general economic necessity demands it. If delayed, the time will come when the interests of our population not engaged in agricultural pursuits must compel it.

From 1900 to 1910 the crop production in the United States increased only 10 per cent, while the population increased more than twice that rate. The cost of food increased 80 per cent from 1896 to 1912. Every rule of common sense and economic necessity calls upon us to open the way for the highest agricultural productiveness. There can be no doubt that Germany's military efficiency, of which we hear so much, is in large part the outgrowth of her agricultural forces, through which her powers of production have been perfected. This forms the basis of her military superiority. Under her splendid system of agricultural development and intensification her crop yields are 80 per cent more to the acre than the same crops in the United States. This Nation's greatest asset is peace, and her greatest source of defense in war is her army of skilled, educated, independent farmers. Their products command the world's gold in time of peace and sustain those who defend the flag in time of war.

Some one has said that "the man who kindles a fire upon a free and independent hearthstone burns the best incense to liberty." Domestic environment is a controlling factor in the development of character; love of home constitutes the basis of real patriotism; and from the home life of the masses spring the lofty ideals upon which must rest the perpetuity of our institutions. As the years come and go, with the swelling tide of irresponsible immigration sweeping upon our shores, as our cities grow and multiply, with their vexing problems of want and vice, it is from the pure sunlight and free fresh air of the farm that must come the strong young men who are to sustain this Republic. In promoting their interest and providing for their future we further the fulfillment of its mission. [Applause.]

Mr. GLASS. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. HENRY].

Mr. HENRY. Mr. Chairman, I am glad of the opportunity to address the committee for a few moments touching the merits of this bill. In my opinion, the Federal reserve act will stand as a monument to the constructive wisdom and patriotism of the Democratic Party. [Applause on the Democratic side.]

This measure will prove to be an efficient system in behalf of the farmers of the country if certain amendments are adopted. When we passed the Federal reserve act it was then promised by this administration that a rural-credit bill would be given to the agricultural population of the country, and now such measure is pending before this body. The fundamental principles are good, and I regard it as most admirable in many features. It does not contain all that I would have in such a measure, but the underlying principles of it are sound.

Let us analyze it. In the first place it, provides a separate and distinct system for the benefit of the farmer. That is essential, because the commercial banking system is not adequate to the needs of the farmer. The farmer requires a long-time loan. Here we have a measure modeled after the Federal reserve act. It is constructed on the same foundation and around that framework. We have the Federal farm-loan board to supervise this system, and it is set up separately from the banking system. [Applause.]

Mr. Chairman, that is a feature commending itself to me. Another good thing is that it provides for 12 Federal land banks. The Government comes to the aid of the farmers here. It is provided that the Government shall supply the capital for the farmers, and extends Government aid and provides for the capitalization of $750,000 for each one of the banks. This is Government aid, but, in my opinion, does not go quite far enough. I believe in addition to the Government providing the capital for the 12 Federal land banks and allowing them to issue debentures or farm-loan bonds, we should go further and provide that the Federal Government guarantee every one of these farm-loan bonds issued by each and every one of the 12 Federal land banks.

In my opinion we would do no more than we have for the business world, because when we set up the Federal Reserve System we provided that the merchant, the business man, the corporation could bring their assets to the 12 Federal reserve banks and deposit them as collateral and have advanced on the collateral by the Federal reserve banks obligations of the United States redeemable in gold—Federal reserve notes. Therefore I say that by the same logic we should place the credit of this Government behind the farmers' system, and we should guarantee every one of the farm-loan bonds issued upon the farm mortgages of the country, just as we have guaranteed every Federal reserve note issued against the assets of the bankers and merchants and business men of the country.

And I believe the time will come when we will pursue the same course in regard to this system pursued for the benefit of the commercial world. Individually I would go further than that. I would provide that this Government should purchase every year at least $50,000,000 of these farm-loan bonds, so as to give them a marketable status throughout the world. In my opinion under the system as it is drawn here these bonds will be salable and this system will be workable; but I would make "assurance doubly sure" by writing into the law that the Federal Government will purchase $50,000,000 or $100,000,000 of these bonds every year, and then they will sell throughout the world and never go below par. [Applause.] I shall certainly vote for such an amendment. I would vote for the proposition to guarantee all of these bonds.

Another splendid feature is the provision for the national farm-loan associations, the initial units to be organized with Federal charters for the benefit of the farmers, in order that they may begin the operation of the system and assemble the mortgages given on farm lands and such mortgages to be deposited in the 12 Federal land banks and on which the loans are to be advanced by those banks. I think that is a workable plan and believe the bill, after the Government has supplied the capital to organize the 12 banks, will from the beginning prove a practical and efficient measure with the suggested amendments. [Applause.] We should have no doubt upon that subject. We should at least do as much for the farmer as we have done for the business world. The farmer asks no more at the hands of this Government.

When we placed the credit of the Government behind the commercial world we made it possible for the farmer to knock at the doors of the American Congress for legislation in his behalf, and we should give him no less than we have given the business world. [Applause.]

This bill is a thing of tremendous importance and will be of great benefit to the American farmer. *It undoubtedly reduces the rate of interest to 6 per cent on long-time loans.* It ought to go below that, but that is the maximum rate fixed here. At the present time in many States of the Union the interest rate ranges from 6 per cent up and in some States the average rate is over 8 per cent on long-time loans. Indeed the average in all of the States in the Union is more than 8 per cent on long-time loans. This is a crying shame and a disgrace. In Europe the farmer can have his needs financed, and they never think of paying more than 3 per cent on long-time loans.

And I am glad we can hail the day when the interest rate is to be reduced for the benefit of the farmer. [Applause.] I predict that after this bill is passed under this administration, and the system is organized, it will be perfected and will prove to be a worthy companion piece to that other great constructive legislation, the Federal reserve act, and bring untold blessings to the farmers of America.

And, Mr. Chairman, this bill should be further amended by raising the capital stock of the 12 Federal land banks to $1,000,000 each, and thus require the Government to subscribe the $12,000,000 capital stock and place Government aid of substantial value in the act. We should also make these farm-loan bonds rediscountable at the Federal reserve banks.

The postal savings funds to a very liberal degree should be made available for investment in the farm-loan bonds.

And, Mr. Chairman, I would provide that immediately the Government should deposit $12,000,000 public funds from the United States Treasury in the Federal land banks—$1,000,000 in each land bank.

With these amendments we will establish a very strong farm-loan banking system. I hope and believe the bill will be thus bettered and perfected.

The day of reckoning is here, and I shall continue to fight for the toiler, the producer, and the farmer until he is placed on an equality with every other citizen.

Mr. HAYES. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. PLATT].

Mr. PLATT. Mr. Chairman, the bill before us is comparatively simple in its main outlines, though it creates a rather complicated cooperative system fostered by Government capital, and also authorizes alongside of it a system of joint-stock mortgage banks, direct and plain in their operation. The joint-stock banks make loans directly to the farmers and sell their own bonds based on the mortgages taken. They may not operate, however, beyond State lines. The Federal land banks of the cooperative system are to be 12 in number, one for each district, the districts to be similar to but not coterminous with the Federal reserve districts. The Government is authorized to furnish $750,000 to each of these Federal land banks for so long a time as may be necessary without dividends or interest, but no money may be paid to any Federal land bank until at least 10 farm-loan associations have been organized in its district. The Federal farm-loan associations are expected to be organized in small districts, perhaps one for each county, and are to be wholly associations of borrowers, every borrower subscribing an amount equal to 5 per cent of the amount of his loan to the stock of the association, which in turn subscribes to the stock of the Federal land bank of its district to which it passes up its mortgages after indorsing them and from which it receives the money to be loaned. The land bank sells bonds, based on the mortgages, to get more money, and that in turn is loaned again. This process it may repeat up to twenty times its capital of $750,000. Theoretically, each Federal land bank might, therefore, loan $15,000,000 without increasing its capital, but when the subscriptions from borrowers reach $750,000, the capital subscribed by the Government or by private individuals or corporations shall begin to be refunded and their stock canceled, so that ultimately the borrowers shall be in full control.

The salient features of the system are the exemptions from taxation, the long-time amortized loans, and the selling of bonds based on the mortgages received, so that the money first loaned comes back and can be loaned over and over again.

Mr. Chairman, it seems to me that a brief story of the evolution of this bill may be of service. President Taft started the ball rolling when he called upon American representatives abroad to report upon European institutions that make a specialty of the financial needs of the farmers and landowners. One of our representatives, Hon. Myron T. Herrick, ambassador to France, became greatly interested, and wrote what is probably the best book on the subject. The discussion in our own country practically began with the publication of the reports received, and was gathering much force when President Wilson's administration began. As a first result two commissions went abroad in 1913 to study further the foreign farm-credit institutions. Senator FLETCHER of Florida and Representative RALPH Moss of Indiana were members of the United States commission, and on their return began the preparation of bills providing for a new system of farm-mortgage banks. Senator FLETCHER was at first strongly in favor of a central banking institution, and a bill was drawn embodying that idea. This bill, with some modifications, has been introduced in the House by the gentleman from Georgia [Mr. HOWARD]. It deserves more attention than it has received from the various committees and joint commissions that have worked upon the question since. The United States commission itself, however, soon abandoned the central-bank plan, and the final ideas of the commission were embodied in the report of January 29, 1914, Senate Document No. 389, and in the Moss-Fletcher bill of the Sixty-third Congress—an excellent measure worked out in its details by the gentleman from Indiana [Mr. Moss].

This Moss bill I still believe the best rural-credits bill that has been presented to Congress. It provided for a simple system of joint-stock mortgage banks under supervision of the United States Government, the banks to issue bonds upon the security of the mortgages taken, with provision for the exemption of the mortgages and the bonds from taxation. There were some rather serious defects in the plan, defects clearly recognized by Mr. Moss, and afterwards corrected by him, the chief of which was the small minimum capitalization of the banks. These defects could easily have been remedied, but instead of trying to remedy them the joint subcommittees of the House and Senate Banking and Currency Committees of the Sixty-third Congress started, de novo and without consulting Mr. Moss, in the construction of a bill, the chairman of the subcommittee of which I was made a member being Mr. Bulkley, of Cleveland, Ohio. This subcommittee had the almost constant advice and expert help of Mr. Willis, now secretary of the Federal Reserve Board, and it was he who embodied in writing many, if not most, of the ideas developed at the discussions. In a general way the Moss bill was used as a starting point, but the Bulkley-Hollis bill developed into something very different. It created small incorporated farm-credit associations—the idea being that one would be located in each county—but following the too easy analogy of the new Federal Reserve System made them subsidiary to central land banks, one in each of the Federal reserve districts. These land banks were private corporations, but again on the too easy analogy of the Federal Reserve System the Government was to subscribe to the capital—$500,000 for each—if private capital should not be forthcoming.

In the original Moss bill there was only one set of institutions, which might be organized with as small a capital as $10,000, but they were not expected to remain small in capitalization. In the Bulkley bill the farm-loan associations were capitalized as separate institutions at the same minimum but were expected to remain small and were not allowed to sell bonds. They were required to send their mortgages up to the land banks, which in turn were to sell the bonds. The farm-loan associations might be cooperative, but were not compelled to be. The whole system under the terms of the bill might have been conducted by private capital under Government supervision. Private capital was welcomed. This plan was workable, but in order to satisfy the agitators for Government aid a section was added permitting, practically requiring, the Government to purchase not to exceed $50,000,000 of the bonds issued by the land banks each year. To that the Secretary of Agriculture and President Wilson objected—rightly in my judgment—and the sound-money Democrats and Republicans in the House committee stood together and prevented the reporting of the bill.

The matter came before the House nevertheless in the closing days of the long session through a freak Government-aid bill passed with very little consideration in the Senate, as a rider on the Agricultural appropriation bill, and was only sidetracked by the authorization of the appointment of the joint commission which prepared the main outlines of the bill now before us.

Right here I want to say a few words about the predicaments that good people sometimes get into by compromising with evil. The way of the transgressor is hard, and the Democratic Party has brought upon itself the difficulties it has encountered in formulating and passing a sound rural-credits bill by its transgressions in framing and passing the Federal reserve act. That act by its express terms gives, or appears to give, an enormous special privilege to the commercial national banks. Section 16 provides that Federal reserve notes are to be issued "for the purpose of making advances to Federal reserve banks," by which they are in turn advanced to the member banks. "The said notes shall be the obligations of the United States." They are by these words made practically greenbacks to be loaned to the banks upon collateral security, and to the extent that applications for these greenbacks are granted by the Government "the Federal Reserve Board shall supply Federal reserve notes so issued to the bank so applying, and such banks shall be charged with the amount of such notes, and shall pay such rate of interest on said amount as may be established by the Federal Reserve Board." One draft of the bill said at not less than one-half of 1 per cent. There you have what appears on its face to be an enormous special privilege for the bankers and great moneyed interests of the country. Naturally every farm-credit agitator

and many politicians ask why the same privilege can not be extended to the farmers. I pointed out in some remarks made when the Federal reserve bill was under discussion in September, 1913, that the farmers would ask just that question, and stated that they would be entirely justified in so doing. And they have asked it. We heard it just now from the gentleman from Texas [Mr. HENRY].

The only defense anyone can make with regard to the words quoted about the Federal reserve notes is that they are false words put into the act to deceive that great and good man, William Jennings Bryan, without whose support the bill never could have been put through the Democratic caucus. The Federal reserve notes, whatever the act may say of them, are not greenbacks but are bank notes and some day, when the Republicans get into power, we are going to amend the act so as to make it say what it means, and take the deception out of it.

Mr. PHELAN. Mr. Chairman, will the gentleman yield?

Mr. PLATT. I can not yield just now to my Democratic colleague on the committee. I know what the gentleman wants to say, and I know that he agrees with me.

Mr. PHELAN. I was just going to ask if he would not have that remedy applied sooner than when the Republicans get into power?

Mr. MANN. Oh, that would not be practicable; we will be in so soon.

Mr. PLATT. I should be very glad to cooperate with my colleague from Massachusetts in amending the Federal reserve act now, if he thinks it can be done in a Democratic Congress.

One of the immediate results of the false statement in the Federal reserve act was the introduction of a great crop of bills, calculated to make the Government "do for the farmers what it has done for Wall Street and the bankers." One of these bills introduced in the last Congress by Hon. Elsworth R. Bathrick, a Democrat from Ohio, a bald scheme for loaning money from the Treasury of the United States to the farmers, was given very wide circulation and was indorsed by the National Grange, by the Farmers' Union, and by nearly every farmers' organization in the country. That bill did more, perhaps, to poison the public mind on the subject of rural credits than any other, and the Bulkley-Hollis bill with its Government bond purchase feature added to the disturbance.

It was with this accumulation of difficulties, and after fighting off—with the aid of Republicans near the close of the last Congress—the McCumber scheme, which was about as bad as either of the others, that the joint rural credits commission, appointed then, began its work, and I must frankly say that it deserves some credit for making the bill before us as good as it is.

If it remains as it is I intend to vote for it, although I disagree with some of its provisions and believe that it would be much wiser to enact the United States commission or Moss bill, as reintroduced by Mr. Moss in January, 1915, than to attempt to enact at this time such an elaborate scheme of Government-forced cooperation.

The bill before us establishes a cooperative system, not under the Federal Reserve Board but under a new board, which will give at least two deserving Democrats and presumably one deserving Republican $10,000 jobs, with a whole army of subordinates—examiners and appraisers—all to be appointed without civil-service examination.

Mr. MADDEN. And all paid out of the Federal Treasury.

Mr. PLATT. Most of them. The Federal land banks are to be organized with Government capital, which is to receive no dividends, unlike the similar institutions of the Bulkley bill. Private capital is discouraged from participation, as it is given no voice in the management whatever. Now, I do not subscribe at all to the distrust of private capital shown in the provisions with regard to the Federal land banks. I believe that economic laws are superior to statute laws in the long run, and I think that the joint-stock banks, which are also provided for in this bill, with the exemptions from taxation of mortgages and of bonds, would work a solution of the whole question of land credits.

After all, it is largely a question of taxation. Many States require high interest rates by law. What, you say, do not all States have usury laws to prevent high interest rates? Oh, yes; they have usury laws, which are easily evaded, and then they turn right around and compel high interest rates by taxing mortgages and other instruments of credit at local general property rates. If money is normally worth 5 per cent on good security and I borrow $1,000 from a man who lives in a place where the local tax rate is 2½ per cent, the lender would net only 2½ per cent on the loan if he has to pay the full tax on the note or mortgage. Naturally he would not loan money at such a ridiculously low rate. There are too many other profitable ways for the employment of his money. If he has to pay such a tax he will make his loan at 7½ per cent, which is the average rate on farm mortgages in this country, according to the gentleman from Indiana [Mr. Moss].

Mr. SLOAN. Mr. Chairman, will the gentleman yield?

Mr. PLATT. Yes; I yield to the gentleman from Nebraska.

Mr. SLOAN. I would like to ask the gentleman from New York if the average farm rates are as high as 7½ per cent in this country for long-time loans?

Mr. PLATT. There are no long-time loans now to any extent.

Mr. SLOAN. On five-year loans.

Mr. PLATT. Those are the figures which the gentleman from Indiana [Mr. Moss] obtained from the Department of Agriculture.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. PLATT. Yes; I yield to my colleague on the Banking and Currency Committee.

Mr. MOSS of Indiana. Those are the figures given by Prof. Thompson, of the Department of Agriculture, who has just made a study of that matter, and he gave them before the joint committee in his report. Of course, I arrived at the figures by adding together the rates in the different States to get the average rate. I did not take the amount of loans in each State.

Mr. SLOAN. That is the point I desire to make—that that is an average of the State rates rather than an average of the loan rates.

Mr. PLATT. Yes; I think that is true. The average rate is probably a little lower on the total of nearly $4,000,000,000 of farm mortgages in the country.

Mr. SLOAN. It leaves a wide way open for a difference.

Mr. PLATT. That is true. Now, apart from the risks of depreciation of value, this matter of local taxation is about all there is of it. If the exemptions from taxation in this bill are constitutional they will work great good in forcing the States to abolish antiquated uneconomic systems of taxation. We do not tax mortgages in New York, and that is one chief reason for our low interest rates.

The joint-stock land banks provided for in this bill will pay their fair share of taxation in the localities in which they will be established. Their stock will be taxable, while the stock of the Federal land banks will go free, and I believe they will be able to serve the farmers just as well as the more elaborate cooperative Government-forced Federal land banks. They are not required to pry into the reasons why a farmer wants a loan. They are far simpler in organization and will go after business instead of waiting for business to come to them. When once fairly established, probably their bonds will sell as well as those of the Federal land banks, because there will be less red tape about collecting their money. In my opinion they will be in many sections the most valuable institutions established under this bill and will render excellent service to the farmers.

Certainly there can be no valid objection to the inclusion of this system of joint-stock banks, adapted from the original Moss-Fletcher bill, in this bill. To say that they will interfere with the establishment of the larger cooperative system, which has the enormous and really unfair advantage of Government capital furnished without interest, is idiotic. The cooperative system provided is carefully safeguarded, and in my opinion is wholly workable. If the farmers of any section do not organize under it, it will be because they can obtain equally low rates elsewhere or because they do not want to cooperate. What can they ask more than the free loan of $9,000,000 from the Government to start the system? What right have they really to ask that? It is an enormous special privilege, and given to a class which does not need it. There never was a time, Mr. Chariman, when agriculture in this country was more prosperous than it is at the present time. The very fact that the average rate on farm mortgages in this country is 7½ per cent—if that really is a fact—is evidence of prosperity. Generally speaking, farming is most profitable in the sections where the interest rates are highest. It is in our hilly, rocky eastern country—a country won from the woods with infinite labor in clearing—that farming is least prosperous and that interest rates are lowest. I greatly doubt whether any system of farm-mortgage banks can be of much influence in lowering interest rates in the East; but I do believe that it may be a marked advantage to popularize long-time loans, to be paid on an amortization plan. To some extent this has already been done by the savings and loan associations. They are purely cooperative, and might cover the field; but the competition of the institutions created under this bill may be of some assistance. Then, I believe, further, that the farm-loan and joint-stock bonds created under this bill may become a popular form of investment, and in some sections of the country, notably in the Middle West, the real problem of farm

credits is to find some safe and popular form of investment for the farmer's savings.

For the reasons stated I shall vote for the House bill, which is not unreasonably unsound for a Democratic measure. If, however, any of the sound features should be stricken out, or if any of the foolishness of the Senate bill should be put in, I shall vote against the final passage and urge others to do the same. [Applause.]

Mr. HAYES. Mr. Chairman, I yield 15 minutes to the gentleman from Pennsylvania [Mr. McFADDEN]. [Applause.]

Mr. McFADDEN. Mr. Chairman, the present bill, S. 2986, which has been reported from the Committee on Banking and Currency, is created for the purpose of providing capital for agricultural development, to create standard forms of investment based upon farm mortgages, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create financial agents for the United States, and for other purposes.

These epitomes contain two opposite proposals—of providing capital for farm-credit purposes and to furnish a market for United States bonds. They are competitors in the world of finance, and it is difficult to see how their interests can be served by the same agency, and it is an undisputed fact that the United States Government will be furnishing aid to the farmer at the expense of the Government, its Treasury, and its bonded indebtedness, and this money, therefore, is derived from taxes paid by the whole people. This bill is subject to criticism in the following respects. It creates a separate system of banks in the United States devoted entirely to the interests of the farmer.

The operation of the system in its present form has many complications and might, under certain conditions, become unworkable. In its present form the Federal reserve system of establishing 12 district banks throughout the United States has been copied, and it will only benefit well-to-do farmers but furnish no help for the worthy farmer who has no capital and desires to follow farming as an occupation, and thus divides the farming community into two classes.

There is no crying need among the farmers, who are to be benefited most, for this kind of legislation. The operation of the system as proposed might develop into a political machine.

Nothing, in my opinion, could work greater injury to the progress that agriculture is making than to legalize any plan which would make easy the obtaining of credit or money through Government aid. I wish to be understood as favoring legislation which will positively aid the farmers of our country and those who desire to engage in agriculture to finance their operations on as favorable a basis as possible, for their highest success, but to preserve for them their integrity and their independence. In other words, the real credit system, to render satisfactory service, should have for its purpose the creation of more individually owned farms. The men who own their farms are seldom in need of long-time credit, and what credit they do need is usually available through their banks.

The trouble about rural-credit plans heretofore, and even now, is that the idea developed is usually too lofty. Practically any farmer in good standing in his community can borrow 50 per cent of the value of his own land on very reasonable terms at any time that he wishes to do so; but if an effective rural-credit plan is to be devised it must come upon a more liberal basis to reach the nonlandowner who wishes to acquire his farm for a home and livelihood. This bill, in my judgment, does not answer this question, and I challenge anyone to prove that it does.

And if this present bill is adopted I am practically certain now that it will not open a way for landless men without capital to become landowners; and the real important thing is to stimulate and encourage the acquirement of land, to make more home-owning farmers, and thus increase the number of farmers and the tilling of the soil.

Section 1 of this bill provides for the administration of this act under the direction and control of the Federal farm-loan board and contemplates the creation of an agency similar in form to the Federal Reserve Board, of which it is a direct imitation. The difference between the two creations is this: The Federal Reserve Board was created upon the superstructure of six thousand and odd prosperous national banks.

On the other hand, this farm-loan act proposes to begin by creating a head resting upon nothing tangible. This head must produce its own body by using the funds of the United States Government to create Federal land banks and then this body must create its foundation.

There can be no farm loans until there are farmers' local societies. There can not be adequate support for that body until there is an adequate number of farmers' societies carrying on business of sufficient volume to bear the weight of the burden first created.

The Federal Reserve System was built upon an existing foundation. This bill is an experiment and has no foundation. A genuine foundation is a prospective contingency. This, however, is certain—once it is created with the United States money to the extent of $9,000,000, or $750,000 for each of the 12 district banks, it is bound to remain a burden on the United States Government; and the wisdom or need of 12 district banks, with their separate and expensive organizations, has never been explained satisfactorily and is entirely uncalled for. One bank would be sufficient for its purposes and less expensive to operate, and should be centrally located.

If the United States Government can and should afford the expense of conducting the Federal farm-loan board, and go without a dividend or any interest whatever upon its $9,000,000 investment in the capital of the proposed land bank for an indefinite period of time, while national farm-loan associations are being organized, and in addition pay the salaries and expenses of many lawyers, appraisers, courts, and laborers in all States of the Union, there might be no criticism. It would seem to me, however, that if proper consideration could be given, that some system could be devised that would be less expensive, and that some plan might be worked out whereby present organizations or banks or societies, of which there are a very large number in this country in existence at the present time, and some plan might be worked out that would parallel the Federal reserve law as a superstructure upon the national-bank foundation; some such plan is outlined in the Hill bill recently introduced in Congress.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. For a question.

Mr. GREEN of Iowa. If I understand the gentleman correctly, he does not think the scheme is workable, or would the gentleman go to that extent?

Mr. McFADDEN. I do not know I would go to that extent entirely; no, sir.

Mr. GREEN of Iowa. Well, if the plan was worked out, does the gentleman think it would reduce the rate of interest to the farmer?

Mr. McFADDEN. On the average it might.

Mr. GREEN of Iowa. Would it reduce the rate of interest relatively? The gentleman is in the banking business, I understand. Now, has the Federal Reserve System decreased the rate of interest relatively between the East and the West, or has it remained substantially the same difference in interest rates?

Mr. McFADDEN. Why, I think they are probably the same. Of course rates at the present time are low, because of the fact there is an overabundance of available funds for loaning purposes. I think this, in answer to the gentleman's question, that the probabilities are that the South and the West might be helped somewhat in the rate of interest.

Mr. MOORE of Pennsylvania. Will my colleague yield?

Mr. McFADDEN. For a question.

Mr. MOORE of Pennsylvania. Under this plan will Government funds be used to pay the overhead—that is to say, the maintenance of the various institutions, clerk hire, and things of that kind?

Mr. McFADDEN. They will; and if the gentleman will wait a moment I can make that perfectly clear to him.

The present situation as regards the need for a land credit system is not much different than when the Federal Reserve System was created. All farmers are not suffering any more than all business men were suffering, and the Federal Reserve System was created simply to meet those conditions that needed correction, and the existing machinery was utilized for this correction. It would seem to me that some of the existing systems could be adapted in a corrective way for the operation of a proper rural-credit system.

Now, if this act becomes a law, a grave situation arises. The United States Government is about to engage in one feature of the banking business of this country, and is bound under this bill to pay the overhead charges, which at a conservative estimate will cost the United States annually $500,000. The query might well arise, How long will it be before it engages in other forms of business and commerce? And the question might properly be raised, Is this country preparing to pay the overhead charges of all the various industries of the country? And will such other institutions as are injured by this novel institution have no redress, when the money to pay the expenses of this institution is procured from revenues derived from taxes paid by the people, and is it not a bad practice and tendency to expect so much from the Federal Government, and

are we not drifting away from the real functions of government?

Independent shareholders have no voice in the management of these Federal land banks, notwithstanding the fact that the Government of the United States must furnish the capital of these land banks. While the Government funds are in control its own appointees will hold office. It is therefore clear that the managers of these institutions will so conduct the business that as much as possible of the capital stock shall be permanently held by the United States Government and as little of the capital as possible shall be entitled to dividends. And the institution remains a political factor. While under this bill having consideration by this House at this time it is not permissible to receive deposits from the public, it does appear that the Federal land banks are to be permitted, under certain conditions, to hold Government funds. And under what conditions and for what purpose are these funds to be so used? We are assured that these Government funds are not to be asked for except in an emergency. It would therefore seem perfectly logical that if the Federal land banks are permitted to call upon the Treasury of the United States for funds in an emergency, that the United States is bound to respond. And the query naturally arises, in view of this fact, whether or not the United States is not assuming a further burden and responsibility in addition to the $9,000,000 appropriation provided for in this bill.

Mr. MOSS of Indiana. What provision of the House bill asks for deposits from the Treasury?

Mr. McFADDEN. That provision permitting deposits by the Secretary of the Treasury.

Mr. MOSS of Indiana. But not at any solicitation on the part of the system. It is only in case the Secretary of the Treasury requests them to do it.

Mr. McFADDEN. That is very true; but when Wall Street has been in trouble it has generally been quite apt to come down and ask Washington to help out, and I think that case will apply as much to this bank as the other permits already given.

And whether by this very action, in case of a crisis, the United States will be not only morally but legally bound to protect and maintain the credit and stability of these 12 land banks. And might not this also include the responsibility of maintaining the market value of the securities sold to the public, or redeem such securities during a critical period? No provision is outlined in this measure, and the act is not clear in this respect, whether or not any portion of these funds shall be used to erect beautiful office buildings to house these institutions.

It is true that these banks are required to pay only such interest as the Secretary of the Treasury may require. And if the Government is paying the overhead charges and expenses and receives no interest or remuneration on its capital-stock investment, is it not fair to assume that it will be treated in respect to interest upon the same liberal plan? And is it not a fact that Government money at 2 per cent will be used to buy farm-land bonds and the money loaned to farmers at from 4 to 6 per cent? And if that is the case, why not loan the Government money direct to the farmers at 3 or 4 per cent?

The Federal land banks must create "national farm-loan associations" as channels for investment, and by the terms of the act these societies "may be organized by persons desiring to borrow money on farm-mortgage security." It is quite clear that the effect will be a speculative rise in farm-land prices as a result of this inflation. Inflation it is, when the entire country is covered by the agents of the Federal land banks, engaged as a business in urging farmers to organize associations for the purpose of putting themselves in debt.

Mr. MOON. Mr. Chairman, will the gentleman yield for a question?

Mr. McFADDEN I have only a limited time and prefer not to yield.

Mr. MOON. Very well.

Mr. McFADDEN. I shall not consider details of the management of these farm-loan associations and the irresponsible character of their officers and directors, naturally selected politically. The power granted these associations to levy an assessment on "members and prospective members" to liquidate the debts and current expenses of the concern should and probably will be its death stroke.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. McFADDEN. I have only a few minutes remaining.

Mr. MOSS of Indiana. But the gentleman does not want to state a provision in the bill that is not in there. There is no provision in the House bill to levy assessments on prospective members. The gentleman is well aware of that.

Mr. McFADDEN. There is a provision permitting the levying of assessments for expenses of investigation of land.

Mr. MOSS of Indiana. There is a provision for assessment of members, but not of prospective members.

Mr. CANNON. Mr. Chairman, this is very interesting, but I wish the gentlemen would either whisper lower or elevate their voices.

Mr. MOORE of Pennsylvania. The gentleman is making an interesting speech.

Mr. CANNON. Yes.

Mr. McFADDEN. What sensible man would borrow from it under such circumstances? If the alternative be followed, the Federal land banks will pay the current expenses of the associations, and the cost will ultimately fall upon the United States Government or its nondividend receiving capital. It is quite clear that with such backing the expenses of these associations will not be curbed, there being Federal supervision over no such expense except the salaries of its officers.

The membership of these farm-loan associations is confined to farmers, prospective farmers, and speculative owners of farm lands. Anyone acquainted with the qualifications for banking possessed by this class of our people must be aware that the organizations will be permanently in the hands of the speculators and manipulators of farm lands. The other capable men of the community are excluded.

The qualifications for membership are further reduced. Membership is confined to farmers, prospective farmers, speculators, and munipulators of farm lands who are borrowers from the Federal land bank. The prosperous, capable, businesslike farmer is excluded.

Then follows a peculiar provision. Every borrower from the Federal land bank is compelled to apply for and receive, include in his mortgage, and pay interest upon, a larger sum of money than he actually needs. This is vicious inflation. The section requires that every borrower shall pay in cash through the association to the capital stock of the Federal land bank to remain there "as collateral security for the payment of said loan" 5 per cent of its amount.

What will happen in practice is this: The borrower does not have 5 per cent in cash and must borrow it in addition to his need. That is, if the borrower needs $10,000 and must pay $500 to the capital of the land bank, he will borrow it in excess of $10,000. This additional loan may be added to the mortgage, increasing it to $10,500; at least this seems to be the meaning of the provision of section 12 which reads: "The borrower may use part of said loan to repay any sum borrowed to pay for his stock in the farm-loan association."

It is self-evident, therefore, that if he needed $10,000 and could not pay 5 per cent to the capital stock of the land bank, he would borrow $10,500. The so-called "collateral security" of this stock is therefore a fiction. It is a forced increase of the amount of the loan, and nothing more. It is based upon a misconception of facts, a false doctrine exploded when the so-called "national building-loan associations" were swept out of existence by their unwise methods of inflation. To bolster up the proposition with some sort of color, it is provided that "in the discretion of the directors" such stock "may be paid off at par and retired," but whether this can be done during the lifetime of the loan is doubtful. It is not likely to be done so long as it pays the land bank to make the farmer pay interest on $10,500 when he has received only $10,000.

As a matter of simple fact, the land is the sole collateral security for the loan, and it is a plain proposition that the mortgage on a farm for $10,000 and interest is a better collateral security than one for $10,500 and interest, nothwithstanding the fact that $500 has not been paid over to the borrower. Either way you look at it the value of the land is not increased, and no fiction regarding shares of capital can increase its value intrinsically or as collateral security. The man is a plain, ordinary debtor of the land bank, and his debt can not be diminished by manipulation. He is not a capitalist, nor will any transaction of this sort do anything more than confuse the individual. The fiction of his holding a share of stock and the land bank itself providing the money to give him some shadow of title to it is an absurdity.

The land bank must provide its own capital. The idea that after the land bank has provided its capital funds it lends them to the stockholders so that they must pay interest upon them and then takes these funds back so that the names of the borrowers may be registered as stockholders is a technical way of making a great show, but getting nowhere. It runs contrary to all sound banking.

It would occur to the casual observer that the machinery to be set in motion by this bill is complicated and hard to understand by the average farmer, and the necessary time consumed after the farmer has made up his mind to enjoy the benefits under this act will be found to be quite discouraging to the

average farmer; and, when it is taken into consideration that loans to the extent of $20,000 must be applied for, and that Federal land banks can not be established until 10 associations have been formed, might it not prove that many worthy borrowers would become discouraged and abandon their hope of relief? Might they not also become discouraged when they must subscribe to the stock of loan associations to the extent of 5 per cent when making an application for a loan, and when also informed that they must pay interest on this amount or run the chance of receiving dividends on this amount, providing the bank earns a dividend over and above the operating expenses?

Might not the right of the associations to levy additional assessments or collect fees from the members of the association for necessary operating expenses also prove disconcerting to the timid or prospective borrower, and the fact that the applicants are to be held as permanent stockholders, and that many complications would arise in case of a sale or transfer of these mortgaged lands?

The methods proposed defining the powers of the association under certain regulations, referring solely to the Federal land banks, and under it the farm-loan associations, have the practical power, first, to sell land-bank bonds and receive other moneys and deliver the same to the Federal land banks; and, second, to indorse mortgages which they have no power either to make or prevent the making, and thus the indorsement would become questionable. And whether or not any official responsibility is present is a question.

And the methods proposed of handling the funds by and between the association under the amortization plans of payments might work out a decided hardship. And the method of redemption of bonds or the cancellation of mortgages by payment might also well be questioned. And there can be no substantial reason why the cancellation of the mortgage would not be effected by the free purchase of any bond by the land bank upon the same basis as their purchase and tender by the mortgagor. Authority is also given to the Federal land bank to engage others than farm-loan associations and joint-stock associations to act as duly authorized agents, and various powers and authorities are given in this respect. The agents are, however, to be empowered to collect and immediately pay over to said bank the dues, interest, amortization instalments, and so forth, under the terms and conditions under which the loans are made. A broad construction of this special clause of this bill might mean that the mortgagor could be burdened with a good many legal fees and charges.

In my judgment the whole labored effort to create farm-loan associations is most feeble. They are endowed with many features condemned by sound banking judgment, such as irresponsible dummy directors, the powers to exact undefined sums of money in excess of the interest rate, provided it is stipulated in the mortgages, and the power to assess its members. The whole routine is very cumbersome, and, in my judgment, few borrowers will wait the length of time contemplated in this act. There is altogether too much red tape, and, in my judgment, the system will be found to be useless except to aid well-to-do farmers and expensive to operate, and is without corresponding practical value to the poor farmer, who is the real man that we are trying to help.

The farm-loan-association scheme herein proposed is a useless proposition. It has no real earning power or responsibility, and it subserves no useful purpose; and, in my judgment, the joint-stock part of this bill so far outshines the association plan that if any portion of this act becomes operative it will be the joint-stock system or that portion operated under the agency plan. I believe that no mortgage taken by these land banks should be permitted to exact any payment beyond principal, interest, taxes, and insurance, and that the regulations regarding the securities of both Federal land banks and joint-stock land banks should be similar. And it must be borne in mind at all times that all of the expenses and charges of the farm-loan commissioner, farm-loan board, farm-loan registrar, special appraisers, attorneys, special attorneys, experts, assistants, clerks, laborers, other employees, examiners, printing, appraising, and, in fact, all other expenses, amounting in all to an excess of $500,000 a year, is to be paid by the United States, to say nothing of loss of interest on $9,000,000 invested, thus making a total cost to the United States annually of about $1,000,000. And there can be no justification for the use of Government funds as capital in these Federal land banks without a participation, at least, in the dividends, if the banks earn a dividend.

The United States is entitled to its share, and the dividend so earned should not be used to swell the returns upon the private capital invested side by side with it.

One of the most serious features of this measure is the fact that the laws regarding land titles and foreclosures, and so forth, affecting the security back of the bonds which are proposed to be sold to the investing public, are so varied, unsatisfactory, uncertain in the various States that it might become a serious menace to the whole stability of the security back of these bonds. And, in my judgment, a uniform system of laws should be enacted throughout this country before an institution of this kind is authorized to do business, because no investor wants to feel when he buys a bond for investment purposes that he is buying a lawsuit or a litigation. And it would therefore seem to me that if loans are made under existing laws, that it might be that the United States was assuming a still further burden—that of the guaranteeing of titles—and as a defender in the courts defending its banks in litigation suits of foreclosure, titles, and so forth, and as the laws of the various States now exist, this act is an unwarranted interference with the land laws of the various States, wherein the farm-loan board is charged with the duty of challenging and interfering with these laws. The use of United States Government money in banking in competition with that of its citizens is revolutionary. And when it is further provided that Government money may be used as capital in that competition and without just compensation, the whole banking world is put in jeopardy.

I do not believe there can ever be a thoroughly safe credit system based upon the special-class idea; and the greatest need which it is sought to correct by this bill is the personal-credit system, because I fully believe that the farmers of this country who will be benefited by this bill are not seeking this special privilege, but are fully capable and able with the facilities at hand, to take care of their needs quite satisfactorily; and I believe that these bills now before Congress have not inspired a definite or well-defined demand either for or against; and I believe it would be much better to postpone action now than to force a system upon the people before the laws of our country have been unified or are ready for it. And I believe there are plenty of facilities afforded by the Federal reserve act and existing institutions, already equipped when properly understood and fully worked out, to take care of the pressing needs of the farmers of the United States. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. McFADDEN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania? [After a pause.] The Chair hears none.

Mr. GLASS. Mr. Chairman, I yield 10 minutes to the gentleman from Kansas [Mr. SHOUSE].

Mr. SHOUSE. Mr. Chairman, the rural-credits bill, or the Federal land-bank act as it will be called, is the most important new legislation before the present Congress. Indeed, when passed, and its passage is assured, it will take rank with the Federal reserve act, and the two will be considered in history the most important pieces of constructive legislation in 50 years.

For two decades the need of a comprehensive system of rural credits in this country has been strikingly apparent. During 16 years of that time the Republican Party was in power. It got no further in its alleged efforts to take care of land credits than it got in its promised reform of the antiquated and inadequate currency system, and it has remained for the Democratic Party to give the people of the Nation the relief they have needed so seriously along both lines.

A number of diverse rural-credits bills were presented in the Sixty-third Congress. No agreement was had on any one, and it was finally determined to appoint a joint committee from the Senate and House to devote themselves to framing, for presentation to the Sixty-fourth Congress, a measure that would embody the best ideas that had been advanced on the subject. That committee agreed on a bill that was introduced into the House by Mr. Moss of Indiana and into the Senate by Senator HOLLIS, of New Hampshire. It was reported by the Senate committee and passed the Senate last week practically as introduced. In the House, however, a different course has been pursued. Our Committee on Banking and Currency held daily meetings for three months, devoting itself exclusively to this bill, and then a subcommittee of five was named to rewrite the measure entirely. As a member of that subcommittee, I can attest that its task was well performed. We worked day and night, eliminating, condensing, improving, elaborating, developing the matter that the bill contained, and when final draft of the bill was reported out by our committee it was in many essentials an entirely new measure and admittedly in all respects a great improvement over the original bill.

It will be noted that the bill provides a Federal farm-loan board at Washington, which is directed to divide the Conti-

nental United States, exclusive of Alaska, into 12 districts and to establish in each of these district a Federal land bank—a plan similar to that followed in the Federal reserve act, which provided for the establishment of 12 reserve banks. Each of these banks must have in the beginning a capital of $750,000, to be subscribed by the Government pending the development of the system which provides for ultimate and absolute control by the borrowers themselves. The borrowers will band themselves together into organizations knows as national farm-loan associations, and through these local association will apply for loans to the Federal land bank established for the territory in which they are respectively located. The Federal land bank will issue bonds based on the first-mortgage security taken from the borrowers.

In order that existing agencies may not be injured and, further, that the farmer may have a choice of methods whereby to secure a loan, the bill provides for the organization and charter of joint-stock land banks under Government supervision, but owned and controlled by private capital. These joint-stock land banks also are authorized to issue bonds based on first-mortgage securities.

The provisions of this bill and a summary of it have been outlined by several members of the Committee on Banking and Currency. It is not necessary to go over the ground already well covered by Mr. Moss of Indiana for the majority and Mr. HAYES, of California, for the minority, and I shall attempt to devote the time allotted to me to answering some of the objections that have been raised against the bill and to making clear as best I can the provisions of the bill, which of themselves, in my judgment, entirely overcome those objections.

The gentleman from New York [Mr. PLATT], who has been one of the most valuable members of the Banking and Currency Committee in framing this measure, raised an objection a while ago on the ground that the Government subscription to these various Federal land banks will discriminate against private capital and will shut out the possibility of the investment of private capital. It was so intended, and I believe that is one of the wisest provisions of this bill, because if we did not shut out private capital from the original subscription to the stock of these Federal land banks we could not possibly place the system under the control and in the hands of the borrowers themselves, and that is one of the very strongest features of the system. The provisions of the bill make it possible, make it mandatory, indeed, for the Government to organize the system, but just as soon as the borrowers themselves have sufficient capital of the banks to control the system, the entire control is passed from the Government into the hands of the borrowers, and there is no opportunity for private capital to reap the benefits which it might attempt to reap at the expense of the borrowers.

The gentleman from Pennsylvania [Mr. MCFADDEN], another member of the committee, who just addressed the House, raised various objections. One of them was that the bill would help only the well-to-do farmer. In answer to that I want to call attention to the fact that under the Federal land-bank plan, worked out for the individual communities through the national farm-loan associations, it is not possible for one individual to borrow more than $10,000, and the objects for which that money may be used are very specifically set forth in the bill and the use of the money confined entirely to those objects, which must be stated by the borrower in his application for the loan. Instead of helping only the well-to-do farmer, this cooperative feature of the bill, extended through the local associations and the Federal land bank, is intended to help the farmer who is not well to do; is intended to help the tenant farmer to get a home; is intended to help the man who is struggling to gain a foothold and to put live stock on his farm. It discriminates not on behalf of the well-to-do farmer, but, on the contrary, it discriminates against the well-to-do farmer, because a large number of the well-to-do farmers of the country, if they want to borrow money at all, want to borrow more than $10,000.

Yet I want to direct attention to the fact that there is no discrimination in the bill itself against any class of farmers. The bill provides two agencies through which money may be loaned, both of them under Government supervision. For the class to which I have referred there is the Federal land bank and the local association—the national farm-loan association. For the other class there are the joint-stock land banks, which are organizations of private capital to be run by private capital for profit, and this private capital, against which the gentleman from New York [Mr. PLATT] said the bill discriminated, has every opportunity to come in under the provisions of the bill, and to come under it, we believe, in a way which will prove vastly beneficial to the farmers of the country; because a man, for instance, who wants to borrow $20,000 or $25,000 or $50,000, as the case may be, shut out as he is from joining a national farm-loan association and from getting the benefits of the cooperative features of the bill through the Federal land bank, has every opportunity to borrow through the joint-stock bank.

Mr. MOORE of Pennsylvania. Mr. Chairman——

The CHAIRMAN. Will the gentleman yield to the gentleman from Pennsylvania?

Mr. SHOUSE. My time is limited and I prefer not to yield.

There is another consideration in connection with these joint-stock land banks that I will try to make clear. We have now a large number of existing agencies through which money is being loaned to the farmers. The joint-stock land-bank feature of the bill will take care of those existing agencies and will make it possible for every one of them, if they so desire, to come under the provisions of this bill, to continue their business along the lines on which it is now being conducted, and to continue it under Government supervision, with certain very distinct and very marked benefits which these joint-stock banks do not have now.

On account of those benefits, particularly the exemption of the bonds from taxation, the joint-stock land bank will be enabled to make a very much lower rate of interest than it is at present enabled to do, and in order to get the business it will be compelled to make a lower rate of interest, because it will be directly in competition with the system which is operated through the Federal land banks.

Now, the gentleman from Pennsylvania [Mr. MCFADDEN] raises objection to the fact that there are going to be 12 Federal land banks under this system instead of just 1. I would call his attention, and I would call the attention of the House, to the reason in the minds of the authors of the bill. It is obvious that this is a new system, practically a new thing, a thing up to which the farmers of the country have to be educated. The closer you can bring the system down to the individual farmer, the more interest the individual farmer is going to take in it and the sooner the individual farmer is going to take advantage of it; and it was with the very definite idea of spreading and propagating the system over the entire country that the committee agreed that 12 Federal land banks are in every way infinitely more to be desired than 1.

The gentleman from Pennsylvania [Mr. MCFADDEN] also raises various other objections to the bill. He states that all the overhead charges of the system are to be borne by the Government. He asserts that these charges will amount to more than a half million dollars annually, and that they, together with loss of interest on $9,000,000 subscribed to the capital of the land banks, will make the cost to the Government about $1,000,000 a year. Surely the gentleman can not intend such an alleged estimate to be taken seriously. The only salary expenses borne by the Government are for members of the farm-loan board at Washington, the 12 farm-loan registrars, and the examiners appointed by the board. The various other employees are paid by the individual banks with which they are connected or in the territory of which they perform their duties. For my own part I think it a wise provision that the Government should pay such salaries as it will pay under this bill.

The Federal reserve act, in my judgment, would be strengthened if the salaries of the Federal Reserve Board were a Government expense instead of being placed on the member banks with which the board deals. Nor do I feel that the Government is doing one whit more than its duty when it bears this part of the expense involved in the establishment of a credit system for the great agricultural interests of the country.

The gentleman from Pennsylvania takes alarm at the possibilities of inflated land values which will follow the passage of this measure. If through some wise instrumentality interest rates on farm land can be reduced one-half, if the possibility of profit to the farmer can thus be greatly increased, if his condition can be made more tolerable and his future more promising, if the tenant can be given legitimate assistance toward the ownership of land, and if, as a result, land values increase, as they assuredly will, is the gentleman justified in designating such increase as an alarming inflation? I say, let us have such inflation, if inflation it be, and let it extend to every corner of these United States.

The gentleman also decries the provision which enables the farmer to add to the face of his loan the 5 per cent necessary to pay for his stock in the Federal land bank. Mr. Chairman, I think I may claim entire responsibility for the insertion of that provision in this bill. I am proud of its authorship. I have desired from the beginning to make it as easy as possible for the man with small resources to take advantage of this proposed new system and that is a liberalizing feature which will be of real service to many borrowers.

Some even find fault with the requirement of a 5 per cent stock subscription by the borrowers, claiming it is a hardship

which should not be imposed. Now, what is this provision? If a farmer wishes to borrow $1,000 he gives his note for $1,050; he receives $1,000 in cash and stock in the land bank for $50. This $50 is secured to the bank by the sale of bonds precisely as the $1,000 which is loaned to the farmer. In other words, the bank sells $1,050 worth of bonds; it gives the farmer $1,000 of the proceeds and keeps $50 in its treasury. This $50 is invested in interest-bearing securities and the farmer who holds the stock receives the dividends. As the land bonds will bear a lower rate of interest than the securities in which the $50 is invested, the bank will make a profit on the transaction. The farmer loses nothing, because he pays interest on his note and receives dividends on his bank stock. The one offsets the other. When he pays off his thousand-dollar note the bank cancels the mortgage and cancels the bank stock at the same time. The farmer has borrowed $1,000 and has paid back the same sum. He did not pay in the $50 which the bank holds, and he does not get the $50 when he pays his debt in full.

This $50 represents the proportion of control which the farmer has over the management of the bank; it makes it a mutual system; it places the control absolutely in the hands of the borrowers. Admittedly some one must control the system. The authors of the bill believe that control should be lodged in the borrowers. Through what means other than the ownership of stock by the borrowers could that result be brought about? If there be a better plan, let some man suggest it. But let him withhold criticism until he can improve upon the method outlined.

Other critics claim that the borrowers who form the local associations, which we call national farm-loan associations, should not be liable for twice the amount of their stock, or 10 per cent of their respective loans, for the debts of these associations. Do these gentlemen realize that under the German system, conceded to be the most successful land-credit system in the world, there is unlimited liability among all borrowers? Have they taken into account the necessity for a check, a safeguard against the admission of undesirable parties into the local associations? Entirely apart from these two features, let us see just how great is the risk. The local association, through its loan committee, first makes appraisal of the land on which a loan is sought. Report of that appraisal is sent to the Federal land bank. An employee of the bank then visits the land and submits his report. The bank finally decides how large a loan it will grant after checking over all this information. In no case can the loan be in excess of 60 per cent of the appraisal. Suppose the farmer defaults in his interest. Immediate foreclosure is neither desired nor attempted. The bank has a reserve account out of which it can pay interest on its bonds pending the receipt of interest due to it. The farmer is encouraged and assisted to adjust his affairs so that he can meet his obligations. If in spite of the help given him no satisfactory adjustment can be arranged and foreclosure becomes necessary, the land bank acquires a farm on which not more than 60 per cent of a fair valuation was loaned in the beginning, with the face of the loan reduced by every payment that has subsequently been made. The farm need not be sold immediately. It can be kept by the bank for five years if desired. And only in case it is finally disposed of for less than the amount of the loan and interest due and unpaid at the time of foreclosure, will the other members of the local association suffer loss through their liability for a fellow member. If this system is properly and honestly managed, as it will be, the possibility of such loss is so small as to be negligible.

The very basis of the bill is cooperation among farm borrowers. We seek to create an agency, under benevolent Government supervision, which is owned and controlled absolutely by the borrowers, an agency which can work to promote only the interests of its owners—the borrowers—to whom all the benefits accrue and to whom every cent of dividends earned must be paid. Some gentlemen claim that the cooperative feature will not appeal to the farmers; that they are suspicious of and unfamiliar with cooperative methods, and hence will not care to join the organization. Little do these gentlemen realize to what extent cooperative agencies have already been established nor what excellent results have been achieved through cooperation. In the United States to-day there are more than 11,000 farm organizations, conducting a mutual business for their membership, and in the year 1914 this business amounted approximately to $1,400,000,000, as shown by the testimony of Mr. Bassett before the Agricultural Committee of the House in the present Congress.

Along cooperative lines will come the greatest development and the greatest benefit to the farmer in the future, and I, for one, believe that among the strongest features of our bill is its cooperative foundation. No system could be more strictly mutual than the one we propose. No individual can own a share of stock in the land bank, cast a vote in its management, or draw a cent of its dividends except he be an actual farm borrower. The borrowers will employ the help, the borrowers will receive the benefits—in short, the borrowers have absolute control from bottom to top, from beginning to end.

Now, Mr. Chairman, it is an old but a very true proverb that the proof of the pudding is in the eating. This bill is valuable only as it will work out to the benefit of the farmers of the country. If it helps them it does what we claim for it. If it does not help them it fails of its object. The encouragement of cooperation, with whatever indirect benefits that may carry, will be conceded. Let us see whether the bill will reduce interest charges. In conjunction with the gentleman from Indiana [Mr. Moss], with whom it has been a pleasure and a great benefit to be associated in the work of the Banking and Currency Committee, I have outlined the practical application of this bill to my own home State, the State of Kansas. The last census gives the mortgage indebtedness of Kansas as $70,819,736. This is only a partial estimate, as all farms in the State are not included in the computation.

The average rate of interest on these mortgages, including commissions, is estimated by the Department of Agriculture as 6.9 per cent. These figures were obtained by Prof. Thompson after special inquiry and study of this subject during the past year. Accepting both estimates as nearest the actual condition, the farmers of Kansas are paying annually $4,886,561 in interest charges, with no reduction in the principal sum. I feel perfectly confident that these estimates are too small. President Taft stated that the average rate of interest on all farm mortgages in the United States, including commissions, was 8.5 per cent, and he was nearer right than is Prof. Thompson.

Our bill has been drawn so as to secure a national rate of interest below 5 per cent, with earnings on all annual payments computed at compound interest rates and returned to the borrower to shorten his debt-paying period. Assuming that the rate is maintained at 5 per cent to the borrower, and the amortization payments are compounded according to standard tables of amortization, what will be the actual result to a Kansas borrower as compared with his present system? Accepting Prof. Thompson's estimate of an average interest rate of 6.9 per cent and a mortgage indebtedness of $70,819,736, Kansas farmers, as stated above, are now paying annually $4,886,561, with no reduction in their principal; but if this debt were to be refunded under the proposed plan of our bill at 5 per cent interest, and the farmers of Kansas would continue to pay annually the same amount as at present, $4,886,561, they would pay off the entire sum, interest and principal, in 26 years. This is no mere estimate or guess—it is a computation made from Fisher's tables of amortization. Any Kansas school boy or girl who has learned to compute simple interest will tell you that this is giving a rate of interest only a shade above 3 per cent—to be exact, 3.1 per cent—if the computation is made as we now compute payments on mortgage indebtedness. This reduction from a nominal rate of 5 per cent to the real rate of 3 per cent is what is meant by the investment of the interest payments at compound interest by what is technically known as the "amortization" plan of making mortgage loans.

The basic rate of 5 per cent depends upon the sale of land bonds at 4 per cent. These bonds are made free from all forms of taxation—income, State, and local. They are made legal investments for all trust funds. They are secured by the mortgaged real estate, by the capital of the land bank issuing them, and by the combined assets of all 12 land banks in the United States. These bonds will be as safe as our Government bonds. They are as free from taxation. They are made security for all trust funds where Government bonds can be tendered as collateral. In every other country such bonds are sold at as low a rate of interest as Government bonds, and we have been assured by bankers and other investors in high-grade securities that bonds issued under the safeguards contained in our bill will command a ready and practically unlimited sale at 3½ per cent. The estimate given you, however, is based on bonds at 4 per cent; this will mean the retirement of all Kansas mortgages in 26 years without any increased rate of payment, which is a reduction in rate to a 3 per cent basis. If the bonds command the more favorable price—that is, if they should sell for par at 3½ per cent rate, as many expert financiers think is possible—it will mean a corresponding reduction in the rate. It will mean that the debt would be paid off in 23 years instead of 26.

This result is absolutely assured if the bill becomes a law. Is it a fair statement to call such a bill a "fake rural-credit" measure? If enacted into law, it will reduce the annual interest charge now paid by Kansas farmers from $4,886,561 to $2,241,281. If the computation be extended to include the 48 States

of the Union, the results are truly staggering. Is it any wonder that we find certain powerful interests opposed to the bill? Is it surprising that those who have selfish ambitions to serve are attempting to cast discredit upon it and to fool the farmers into believing that they are not getting what they should? Were a more liberal bill introduced, these gentlemen would be the first to oppose it. The plain truth is that they want no system of rural credits, but they lack the courage to say so.

It is true that this bill does not go as far in some respects as it might. I may say that it does not go as far as I would have it if I could consider only my own personal views and predilections. But beyond doubt it is a great piece of constructive legislation, a measure that will work to the vast benefit of the agricultural sections of the country and thereby will add to the prosperity of every other interest of the Nation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SHOUSE. Mr. Chairman, may I have two minutes more?

Mr. GLASS. Mr. Chairman, I yield two minutes more to the gentleman.

Mr. SHOUSE. Now let me summarize briefly what the bill will accomplish:

It will reduce interest rates on farm loans by an average of 50 per cent or more throughout the United States.

It will provide loans for as long as 36 years.

It will offer a system of amortization payments for the steady reduction of the principal on each interest payment date.

It will place in the hands of the borrowers themselves absolute control over the system.

It will teach the value of cooperation among farmers and will encourage all undertakings for mutual benefit.

It will standardize the farm loans of the country.

It will provide a uniform rate of interest for all sections of each State.

It will reduce the weight of debt upon the farmers of the country, will offer hope to the man who is struggling for a foothold, will hold out promise to the tenant who would acquire land of his own, and will add vastly to the prosperity of the entire Nation, which, in the last analysis, always depends upon the prosperity of the farmer.

Mr. Chairman, the easiest thing in the world is to criticize, to find fault, to tear down. This bill is not perfect. True, it represents the best thought, the most diligent and devoted and prolonged work of one of the important committees of this House. True, it embodies the ideas and the study and the development of rural credits during the past quarter of a century. And yet, no doubt, within the next decade amendments will be added which will make it of greater value. It is not perfect. We do not say that it is. But we know it will accomplish what we claim for it. If any man can improve it, let him come forward. If any man has a better plan, let him present it. But let us have no more of the carping criticism which would attempt merely to destroy without offering any sure foundation on which to build. [Applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. SAUNDERS having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had disagreed to the second report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, had further insisted upon its amendments and asked a further conference with the House on the disagreeing votes thereon, and had appointed Mr. ASHURST, Mr. MYERS, and Mr. CLAPP as the conferees on the part of the Senate at the further conference.

The message also announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 7617. An act to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

The message also announced that the President had approved and signed bills and joint resolution of the following titles:

On May 4, 1916:

S. 3769. An act to amend section 3 of an act entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," approved March 4, 1907; and

S. 4876. An act to provide for an increase in the number of cadets at the United States Military Academy.

On May 8, 1916:

S. J. Res. 63. Joint resolution authorizing the erection on the public grounds in the city of Washington, D. C., of a memorial fountain to Alfred Noble; and

S. 2290. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Elsie McCaulley from Glenwood Cemetery, District of Columbia, to Philadelphia, Pa.

RURAL CREDITS.

The committee resumed its session.

Mr. HAYES. I yield 20 minutes to the gentleman from Oregon [Mr. HAWLEY].

The CHAIRMAN. The gentleman from Oregon [Mr. HAWLEY] is recognized for 20 minutes.

Mr. HAWLEY. Mr. Chairman and gentlemen of the committee, it is my intention during the time I shall speak to discuss the bond features of the bill. The success of the system as at present planned depends upon the ability of the several banks to sell the bonds which they are authorized to issue.

There has never been—at least in recent years—any system like this undertaken by Congress, by the experience of which we might be guided in determining what features the bonds should possess. So in this matter we are necessarily constrained to turn to the results of experience in the sale of municipal bonds, and to inquire what are the factors in municipal bonds that make them salable—why some sell for 6 per cent in the market and some will sell in the same market at 3 per cent, and with varying prices between.

There are several essentials of a good municipal bond. The first is its physical basis. There must be property in evidence—taxable—which can be assessed and on which taxes can be collected to pay the interest as it accrues and the bonds as they mature. If there is any doubt in the mind of the purchaser whether the physical basis is adequate, that doubt becomes a speculative element and will be reflected in the price of the bonds. They will go down one or more points below par, depending on how great the doubt in the mind of the purchaser is.

There are several kinds of bonds in the market. There are bonds that have a speculative value, but these are not municipal bonds, speaking generally. Such bonds are dependent on the earnings of companies or corporations for the payment of the interest charges and matured bonds. Anyone may buy bonds of that character and earn 6 or 7 or 8 per cent in interest, it may be, depending upon the amount of risk he is willing to assume, both in the possible loss of interest and of a portion of his investment due to decline in price of the bonds. There are municipal bonds that have a speculative element in them, and that is reflected in a higher rate of interest that the sellers of the bonds must offer and a lower price that the buyer will pay. Then there are municipal bonds and school bonds from which the element of speculation or risk has been very largely eliminated; the bonds of great cities, well-established communities, strictly or considerably within the limit fixed by law to which they can incur indebtedness and where the authorized tax levy will amply provide for the payment of the interest charges and the bonds when matured. Such municipal bonds and school bonds will sell in the market on their value with the speculative element eliminated.

Now, in this system we have endeavored to prepare a regular plan by which a good bond will be offered to the investing public without risk. I say "we," and speak in that sense because I have the honor to be a member of the Joint Committee on Rural Credits of the Senate and House that framed the bill which has been used as a basis by the House committee, and I will say in passing that I speak on the subject of bonds because for the past 15 years I have been one of a board of five, and for a considerable period its chairman, buying bonds to the extent of many millions of dollars for the investment of the surplus and reserve funds of a great fraternal association—the Pacific jurisdiction, Woodmen of the World—and I have had experience in buying many millions of bonds and in the selection of those bonds from some hundreds of millions.

Mr. MOORE of Pennsylvania and Mr. GLASS rose.

The CHAIRMAN. Does the gentleman yield; and if so, to whom?

Mr. HAWLEY. I will yield first to the gentleman from Virginia [Mr. GLASS].

Mr. GLASS. I would like to say, with the assent of the House also, that there are few men I have come in contact with who have rendered more valuable service in the solution of this ques-

tion than the gentleman who is now addressing the House. [Applause.]

Mr. HAWLEY. I am grateful to the gentleman for his remark.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. MOORE of Pennsylvania. In view of the gentleman's experience in buying municipal or city bonds, I will ask him whether such a bond, a municipal bond, does not measure the strength of the municipality's credit or strength in property, and so forth? There is tangible property behind that bond, is there not?

Mr. HAWLEY. Yes. I spoke of that a few minutes ago, when I referred to the physical basis; and that physical basis is available for purposes of taxation for the payment of the interest and the bonds as they mature, up to the limit of authority to levy taxes conferred on the municipality by the State. If the tax limit is 7 per cent and the amount necessary required a levy of 9 per cent, a portion of the municipal bonds would go unpaid as they matured and wait until the taxing power might be able to pay them.

Mr. MOORE of Pennsylvania. We have in the municipal bond the strength of the municipality?

Mr. HAWLEY. Yes; the strength of the municipality, up to their authority to levy taxes to pay.

Mr. MOORE of Pennsylvania. And that is the limit?

Mr. HAWLEY. Yes; without further legislation.

Mr. MOORE of Pennsylvania. There is no Government security there at all?

Mr. HAWLEY. No.

Mr. MOORE of Pennsylvania. Now, what is there behind these farm-loan bonds?

Mr. HAWLEY. I will tell the gentleman in the course of my remarks.

Mr. MOORE of Pennsylvania. Is there any Government security behind them?

Mr. HAWLEY. I will tell the gentleman later. I prefer not now to interrupt the course of my remarks further than to say that the bill as reported provides no Government guaranty.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. SMITH of Michigan. I am interested in the experience of the gentleman, which is valuable in the discussion of this question. Has the gentleman ever purchased a bond when he has any question about the principal at all, because it offers a high or low rate of interest?

Mr. HAWLEY. I might for my own personal account, but I would not for a trust fund.

Mr. SMITH of Michigan. Such bonds as those, if there was any question as to the principal, would not be purchased?

Mr. HAWLEY. No.

Mr. SMITH of Michigan. Just a question further.

Mr. HAWLEY. Very well.

Mr. SMITH of Michigan. There are a great number of highway bonds sold throughout the United States at the present time, and they are bringing a rate of 5 per cent. Will these bonds be better secured than the highway bonds that are assessed on the whole property of the township, county, or district?

Mr. HAWLEY. Much better; and I will proceed with that later, if the gentleman will permit. We have endeavored, as I say, to prepare a system under which bonds can be issued that will offer to the investing public a good bond without the element of risk, amply secured in physical basis, legal and regular in issue, and possessing all other requisites of a good bond; bonds that will be the best in the market.

Mr. MOON. Mr. Chairman, will the gentleman allow me to ask him a question?

Mr. HAWLEY. If the gentleman will be brief, I will.

Mr. MOON. I wanted to ask the gentleman what is the maximum rate of interest that can be charged under this bill?

Mr. HAWLEY. The maximum rate of interest under this bill is 5 per cent on the mortgage loan as interest, and 1 per cent on the mortgage loan for purposes of administration. That is, the rate the mortgagor will pay as interest will not exceed 5 per cent, and I expect that it will be materially less than 5 per cent; then he will pay an administration charge of not to exceed 1 per cent. The amortization payment which he will pay, being payment on the principal sum, can not be considered as interest. Also he will pay these rates at any time only on the unpaid portion of his mortgage, as the amortization payments and advance payments are deducted semiannually from the face of the mortgage.

Mr. MOON. Is that all it pays?

Mr. HAWLEY. There is an additional charge to be added to that, not in the nature of interest, but for the amortization of the loan.

Mr. MOON. Does the Government furnish any money to constitute the basis of this loan?

Mr. HAWLEY. The Government advances, or may advance, $750,000 for each of the 12 banks as an initial capital.

Mr. MOON. I want to ask the gentleman if he has considered the fact that money in the greater part of the United States can be obtained by farmers on good farms to the extent of 75 per cent of their value, at 6 per cent per annum.

Mr. HAMILTON of Michigan. I will say to the gentleman that that is true in Michigan.

Mr. MOON. I mention that because I want to suggest to the gentleman that it has occurred to me that this measure, while proper, perhaps, for us to vote for as a beginning of legislation of this sort, will not afford any great relief or benefit to a farmer who under the terms of the bill has to pay 7 per cent for the money that he borrows.

Mr. HAWLEY. I will speak of that in a moment. I would like to continue my argument, as I have it in mind.

The rate of interest is the next essential factor in the sale of a bond. Of two bonds that are equally good, one bearing 4½ per cent and the other 5 per cent, the 5 per cent bond at the same price, of course, would sell more readily; and even on an equalized basis, equalizing the cost as between premiums, the 5 per cent bond would probably sell the best, for the reason that bonds usually have an optional period, and after the beginning of the optional period, the owner receives the rate of interest specified in the face of the bond. In the case of all bonds sold at a premium the interest earning will be greater after the beginning of the optional period than before.

Bonds are known by the periods they run as serial where certain portions of an issue become due at specified times, as without option, where they all become due at one time, and as optional, which may best be explained by an illustration as in the case of a bond called a 20-30, which means that the issuer can not call it for payment nor the holder demand payment for a period of 20 years, except by mutual consent, and that for a period of 10 years the issuer can call any or all of them for payment at his option, but must pay them all at the end of 30 years. After they become optional the rate of interest prescribed in the bond is the only interest that can be earned. After a bond becomes due or optional it never has a premium. I should like to emphasize that fact a little more and make it a little stronger if I can, as it has a very essential bearing on one feature of the bill. A bond never carries a premium after it becomes due or payable. Neither does it sell below par. It goes to par and stays there after the optional period has run.

The essential features of municipal bonds which give them marketable values are good physical basis, rate of interest, length of term before the optional period, where payable, the reputation of the place of issue for paying its obligations, character of the people, sources of prosperity, developments, financial resources of community issuing them, location, transportation facilities, nature and diversity of business enterprises, with other elements. The investor demands, unless he is willing to take speculative risks, certainty in the payment of interest as accrued and principal as the bonds mature, convenient and inexpensive conditions of collection of interest and principal, and then the best possible interest return consistent with the above.

The length of the term of the loan is a factor in the sale of a bond. Corporations and associations desiring to invest trust funds, or persons desiring to make an investment, prefer a bond running for a long period at a fixed rate of interest rather than to buy bonds running five, six, or seven years, with the necessity of reinvesting at the end of a short period, with the probability of finding no satisfactory investment and the loss of interest that would accrue between the termination of one investment and the reinvestment of the funds. Now, applying these last two remarks to the bill before us, it provides in section 19, page 114, of the House print of the bill that the bonds shall run for a maximum and a minimum period—

> They shall run for specified maximum and minimum periods, subject to payment or retirement at the option of the land bank issuing them at any time after five years from the date of issue.

That is, at the end of five years any land bank can call in any series of bonds that it has out, or any bond of any series. That makes the optional period five years. That makes the life of the bond, during which it may bear a premium that may be reflected in the interest rate, five years.

Now, if we provide that there shall be a longer period before any bond can be called we increase its value. A bond running for five years without option, bearing semiannual interest at

the rate of 5 per cent per annum, let us say, sells for 102.22 and earns interest at the rate of 4½ per cent on the investment. In the same market this bond would sell, if it ran for 10 years without option, for 103.99, and would earn 4½ per cent. That is, the additional period of five years before the optional period has increased the value of the bond 1.77 cents for each dollar of the face value of the bond, or would increase the value of a $1,000 bond by $17.70. Take another instance. In the market of last February any municipal bond at all comparable in value with the bonds which will be issued under this system, bearing interest at 5 per cent, running for 10 years, would have sold, I think, at better than 106.06, or on a 4¼ interest-earning basis. The same bond, running for a period of five years to earn the same rate of 4¼ per cent, in such a market would have sold for 103.35. That is, this bond on a 10-year basis was worth $27.10 more than a five-year bond for each $1,000 of face value. This is a conservative statement, and I think the difference would have been greater, as I recall the quotations. If in the above illustrations, the term prior to the optional period were 15 years, in the first case the bonds would have sold for 105.41, or at a premium of $31.90 for each $1,000 bond in excess of that received for the same bond on a five-year basis, and in the second case for 108.26, or at a premium of $49.10 for each $1,000 bond, in excess of that received for a five-year bond. If the term were 20 years, the differences would have been $43.30 and $66.90, respectively. I think these illustrations will suffice to show the extent to which added years, prior to the optional period, increase the value of a bond.

The above figures are taken from standard bond tables. The result is this: By lengthening the period during which the bonds can not be called you increase the value of the bond. This increase in value will enable you to sell the bond for a lower rate of interest, and therefore makes it possible to reduce the rate of interest to be charged under the system to the farmer borrowers. Practical experience proves that investors will take a lower rate of interest on long-term bonds than they will on short-term bonds.

A bond running for a very short period will sell but little, if any, above par, no matter what interest rate it bears, because the time is too short to amortize much premium in the interest rate received. The market is unable to indicate properly the real intrinsic value of the bond. The longer the period the bond has to run prior to being called the more fully the market is able to express by the premium offered the strength and value of the bond.

When a 4½ per cent bond sells for 105.60, to earn 4 per cent prior to the optional period, it is apparent that the same bond, if it had borne 4 per cent interest, would have sold at par. It is desirable that the bonds proposed in this system should be sold at par or nearly at par. Doubtless at times they will bear premiums, owing to fluctuations in the market. Since the interest rate in the mortgages is to be based upon the interest rate at which preceding sales of bonds were floated, if the rate is so high in the bonds as to entitle them to be sold at any considerable premium, then we would be charging the farmers too high an interest rate in their mortgages. There is a great deal of difference between a premium arising out of a high interest rate and one due of the length of the life of the bond. A high interest rate may be an indication of some weakness, and part of that rate is in the nature of insurance against risk or uncertainty of some kind. A long life, prior to the optional period, strengthens the bond. It adds also to its salability. These bonds, I think, will be distributed to the ultimate purchasers, by banks, bond dealers, and others, who must have opportunity to find a market, which they would not have if the period is very short. The market for bonds which mature in short periods is not large or certain enough to be of much value to us in selling bonds under this system.

I believe we can safely provide that the term of the bonds prior to their becoming subject to call shall be 10 or more years.

But the rate of premium on any five-year bond will be very small, for the reason that the time is coming, and not far distant, when the man must take back his money and reinvest it. He runs the risk of having no satisfactory investment at hand, and while waiting to find a satisfactory investment he loses interest during that period, and in a short period but little premium can be amortized in the interest rate.

There are several other objections that I will not take the time at this moment to raise. I want to submit this to the distinguished gentleman from Virginia [Mr. GLASS] and the other members of the Banking and Currency Committee and the Members of the House, that every year you can add to the life of these bonds prior to their optional period you reflect that added year in a decrease of the interest rate. For that very reason it was fixed at 10 years in the bill reported by the joint committee and in the bill passed by the Senate.

The place of payment is an important factor in the price of the bonds. Most municipal bonds are made payable in some great financial center like New York, Chicago, or some other large financial center. They are, however, usually made payable at the place of issue and a great financial center, so that if the bonds are taken up locally, interest and matured bonds can be paid locally; but if they must seek a general market, like the bonds of a State, or road-construction bonds, such as California issued last year, or if they are bonds of a great city like Chicago, Cincinnati, or St. Louis, then they must be payable at a financial center.

The reason for that is this: If I should be fortunate enough to own $50,000 of the bonds of the city of St. Louis while living in the city of Washington, when the coupons for accrued interest were cut off I could take them to a bank to be collected through the regular channels, and they would charge me with collection charges, express, and insurance, because the coupons are like money. They can be collected by anyone into whose possession they may chance to fall. Consequently they must go by insured express, and those charges would be a reduction from the amount I would receive in interest, and in the course of a year, on any considerable sum, those charges amount to a very great deal. Or I could take them myself to the express office and send them to the bank in St. Louis or to the city treasurer in St. Louis, pay the express charges and insurance myself, and have the money sent back to me in the form of a draft. The same conditions apply also to the collection of matured bonds. And in any event the insurance, express, and collection charges must be paid. So that large issues of bonds are usually made payable at some large financial center. To provide otherwise would decrease their desirability.

The bill provides that the coupons, accrued interest on registered bonds, and matured bonds are payable by any bank in the Federal land-bank system without collection charges, express or insurance charges. It is an excellent provision. The purpose of that is this: The great proportion of the bonds sold in the United States are purchased by buyers living in the territory east of the Mississippi River, north of the Ohio, to the Atlantic Ocean. If this system works, a great proportion of the bonds will be absorbed by an investing public in that section of the country.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. HAYES. I yield the gentleman five minutes more.

Mr. HAWLEY. For instance, there is a widow living in New England who has received $10,000 insurance money on account of the death of her husband. The bonds of the rural-credit system, being recommended to her as safe bonds and earning more than the savings bank will pay, will cause her to invest her $10,000 in these bonds. If she can take these bonds to the nearest correspondent of the Federal land bank and get the face value of them as they mature and of the interest coupons as they mature, she will be more strongly than ever induced to purchase the bonds. But if she must pay collection, express, and insurance charges, the reduction on the amount she expects to receive from her investment will disincline her to make the purchase. The bill provides that these should be paid for at the bank in the locality where presented, and lets the 12 banks iron out the difficulties and settle the balances between themselves.

And it must be always remembered that these bonds must be sold in competition in the market with all other kinds of bonds and with rates paid by banks on deposits.

Now, during the two or three minutes that remain I want to speak of the character of the bonds. Who will buy them? Who can afford to buy them? Can a business man intrusted with the administration of trust funds, a trustee appointed by the court, boards engaged in the management of insurance organizations, houses dealing in bonds, the men engaged in the management of banks which have surplus funds from time to time they need to invest in order to keep them working, and others—can they safely buy the bonds? What is back of the bonds? Beginning with the way in which it will appeal to the person who has money to invest, this is the situation.

Suppose I should own $50,000 of these rural-credit bonds. I go to the land bank which issued the bonds and present my coupons or matured bonds. I know that they have coming in in interest on mortgages and mortgages maturing an amount equal to or in excess of the interest and principal sums due me and all bondholders; that these mortgages are on land the loan on which was made at 60 per cent of the appraised value, with a 40 per cent surplus over in the real value of the land and an

80 per cent surplus over in the value of the improvements; that they are not subject to taxation; that there is an association of individuals which have 5 per cent of the face of their loans put up in stock of the bank, with an equal additional liability that can be taken to meet the payment of coupons and bonds if not paid when due; that if the bank to which I apply can not pay them out of the interest and amortization payments they have received, then the capital, surplus, earnings, and all other funds of that bank are liable for the payment of these interest coupons and bonds that I have presented. If that does not suffice to pay what I have presented, an equal general liability to pay exists on the other 11 banks. So that behind any issue stands the individual liability of the bank of issue, the general liability of the other 11 banks, the certificate of the board in Washington that the physical basis is good, that the bonds are legal and regular in form and issue, the liability of members of the local association, the liability of the farm lands on which mortgages have been taken; that for every $60,000,000 of mortgages there are $100,000,000 of real estate at a fair appraisement, and for every $20,000,000 of improvements on which mortgages are based there are $100,000,000 improvements standing behind the mortgages.

So it seems to me, and I have thought it over very carefully, that, as a member of a board charged with great responsibility, I would be willing to buy the bonds provided for in this system as a perfectly safe investment for trust funds. [Applause.] It would be difficult to conceive of a safer bond or one offering a more attractive investment, subject to the suggestions I have made.

Under the provisions of the bill as they now stand the interest rate in each Federal land-bank district will depend upon the success that bank has in marketing its bonds. And under this arrangement there is likely to be a difference of interest rates in the 12 districts. The newer and less developed sections of the country may have to pay higher rates of interest. It is important, if it can be arranged, that the interest rates to farmers should be as nearly uniform as possible over the entire country. For this reason the board in Washington is given control of interest rates that they may be made as nearly uniform as possible. [Applause.]

The CHAIRMAN. The time of the gentleman from Oregon has again expired.

Mr. GLASS. Mr. Chairman, I yield five minutes to the gentleman from Tennessee [Mr. MCKELLAR].

Mr. MCKELLAR. Mr. Chairman, I am going to vote for this bill, regardless of the form it may take, because it will at least be a first step toward an American rural credits system, so much needed by the farmers of our country. The bill as it has been reported by the committee does not have my unqualified approval, and there are some defects in it that I desire very briefly to point out, with the hope that they may be corrected by amendment before the bill is finally passed.

Since I have been in Congress the subject of rural credits has greatly interested me, and I have given to it considerable study. Having been a farmer in early life myself, naturally I have looked at the question from the farmer's standpoint. I still look at it from the farmer's point of view, and I believe after an examination of this bill that it is seriously defective, and I sincerely hope that we may so amend it as to make it of genuine value to the farmers of the United States.

The provisions providing for a Federal farm-loan board at Washington, for 12 regional banks, for the Government to buy stock in these land banks, for the exemption from all kinds of taxes are essentially all right and have my approval. But the provisions creating national farm-loan associations, joint-stock banks, other profit-making governmental agencies, and the provisions requiring 5 per cent stock subscriptions by borrowers and binding each borrower for 10 per cent of his loan to secure better other loans of his neighbors are, in my judgment, cumbersome, impracticable, and not to the best interest of the farmers, and I hope these provisions will be stricken out by amendment. I am not going into these matters in detail, because I have not the time, but I want to discuss the glaring defects.

The provision requiring the farmer to buy 5 per cent of the amount of his loan in the national farm-loan association and pay for it in cash, or have it deducted from his loan, is not to the best interest of the farmer. It is too much like private loan companies, of which it has been said, it takes 15 minutes to get in, 15 per cent to stay in, and 15 years to get out. The farmer wants a simple method of borrowing money. He will be perfectly willing to pay the expense of having his lands examined and appraised, and having the titles to the same examined. This bill ought to provide that these things should be done in the most direct and in the cheapest way, and charge the farmer for them and for nothing else. When you require him to take stock, which may or may not be valuable, he will look upon it as a charge of commission for letting him have the money. It is a tax on him that is unnecessary to levy and it ought not to be levied.

In the next place, the provision requiring him to guarantee to the extent of 10 per cent of his loan, all the loans in his association, is one that he will not want to agree to, and one that he should not be required to agree to. I am fully aware that this system of cooperative associations has worked well in Germany and in other European countries, but I do not believe it will work well in this country. Individualism is so strong in this country, and especially so with the farmers, that any system that makes them bound for each others debt, in whole or in part, will not, in my judgment, be a workable measure, and that when it is explained to the farmer that he has not only to buy stock to the extent of 5 per cent of his loan, but he has to become obligated for his neighbor's debt to the extent of 10 per cent of his loan, I do not believe that the great mass of them will be willing to go into such a scheme. If we enact these provisions into law they will have, in my judgment, to be changed, and if they are not voted out, while I will vote for the measure, I hope in the future to change them by amendment. What we want to do is to make a start on this law, and if this or other provisions are found to be erroneous, we should change them.

In the next place, I am opposed to building up a large number of corporations in our country, whether they be called national farm-loan associations, joint-stock banks, or agencies; all of which will make money out of the funds that we intend to provide for the farmers. Of course, I know that there must be agencies, but I believe that these agencies should be the direct agencies of the land banks, and not intermediate profit-making corporations or agencies. There is no demand in this country for more banks.

The country is not demanding the building up of a new system of profit-making banks. What we want to do is to provide the simplest means by which farmers can get long-time loans on the amortization plan at low rates of interest, and with the least possible red tape. Every other consideration should be made secondary to this main purpose if we want to make the rural-credits system a success. If the land banks are authorized to issue bonds upon the security of farm first-mortgages, taken after inspection, appraisal, examination of title, and further guaranteed by the capital and surplus of the land banks, as provided in this bill, they will be amply secured, and there will be no trouble about obtaining purchasers therefor. The guarantee of farm-loan associations will not add anything to their market value, and these farm-loan associations will be very expensive if practical at all. If they are found impracticable and the joint-stock banks found practicable, then the Government will be placed in the attitude of building up a large system of joint-stock banks at its own expense, or at the expense of the farmers, because, whatever profits are made by these farm-loan associations, or joint-stock banks, or the agencies provided for in the bill, will be made out of the money furnished by the Government to the farmers.

I approve very heartily the provision exempting these bonds from National, State, and local taxation, because it will make the bonds more easily salable and at a low rate of interest; so that the farmers will in turn get their money at a smaller rate of interest. [Applause.]

I would much prefer that the details of the agencies through which these mortgages are taken should be left to the several farm-loan banks, allowing them to take the mortgage agents in their employ or through creating nonprofit-making branch banks in each State if they saw fit to do so. This would be a much simpler plan, and would do away with the necessity of the farmers taking stock in the national farm-loan associations and becoming liable in part for his neighbor's debts. It would also greatly lessen the cost of the system.

Mr. Chairman, in our platform we promised the farmers a rural-credits system, and they undestood this meant money on long time at small rates of interest. They thought it meant a system for the farmers and not one for the benefit of the banks. Let us give them what we promised. Let us not institute a system that will create a large number of banking associations at the expense of the Government or at the expense of the farmers. But, let us institute a simple system, making it as direct as possible, make it as plain as possible, make it as individual as possible. Take out all the red tape; take out all requirements about buying stock; take out all requirements about guaranteeing in part his neighbor's debts; take out every middleman possible, and let us make this a real farmer's measure, not a banker's measure. Then, and not till then, will we have fully

complied with out promise to furnish a rural-credits system for the farmers. [Applause.]

Mr. GLASS. Mr. Chairman, I yield to the gentleman from Mississippi, Mr. VENABLE.

Mr. VENABLE. Mr. Chairman, in any kind of legislation we have to make compromises. In a sense, all legislation is the result of a compromise of individual opinions. I intend to support this measure even though it is not modified, for the reason that I believe it is the beginning of a policy of aid to the agricultural interests of this country which have been neglected for a long time. I trust that I can say that without any charge of demagogy being brought against me.

There are some features of the bill, however, that I would like to see changed, or some features added. I personally would be in favor of the Government guaranteeing the payment of the land-bank bonds. I can see no objection to this either in principle or in policy. It is absolutely no new thing for the Government to lend financial aid to various interests when it is considered to be to the interest of the entire body of the citizenship so to do. We have countless illustrations of that in the economic history of this country. In fact, this very bill itself provides that the Government, to the extent of practically $9,000,000, shall extend aid to those land banks which are to be established. Another thing that I do not think is wise is the establishment of two sets of machinery, the public banking system of the national land banks and the private land associations. I understood that the gentleman from New York said that anyone who had the idea that these two institutions might militate the one against the other was *guilty of* a piece of idiocy or asininity. I do not remember which word was used, but if it be that such a charge can be brought, I solace myself with the reflection that we have the authority of Holy Writ that at least on one occasion the ass was wiser than the prophet.

I do not see how two institutions can occupy the same field at the same time, imposing different liabilities on those who deal with them, without the stronger eventually hurting the weaker. It seems to me that is true according to the laws of competition. The borrower, for instance, who can go to the private land association and borrow money without assuming the 10 per cent liability will certainly go there in preference to your land banks where he does assume such a liability. Be that as it may, however, it seems to me to be wiser, or would be wiser, to concentrate all of our efforts on constructing one piece of machinery, surrounding that with wise regulations, making that universal in its operation and making it efficient to do the work in hand. However, as I said, regardless of these two objections, and others which have arisen in my mind and which I believe can be sustained by at least plausible argument, I shall support the measure even if unmodified, because it is a very far step, in my opinion, in the economic practice and theory of this Government. [Applause.]

The conditions out of which the demand for a rural-credit system arose are well known. From the very nature of the case the commercial banks of the country were unable to extend the credit to the agricultural interests that is necessary to prosperity. By reason of the fact that the commercial bank must pay each depositor on demand, it is necessary that the assets of the bank be kept in the most liquid form and that the credits extended be short as to term. In addition to this, in many parts of the country, the commercial interests could and now do use almost the entire amount of money commanded by the commercial banks; and since the collateral security which they are in a position to offer is more liquid than that which can be offered by the agricultural interests it is but natural that the commercial interests are taken care of to the exclusion of the agricultural.

In addition to this, the commercial bank being an institution designed to make money for its stockholders, charges the rate of interest that is current in the local market, and this is almost always prohibitive, as far as profitable borrowing for the farmer is concerned, even if the farmer felt justified in borrowing the money for the short period of time that the bank demands as one of the conditions of lending. This being true, the farmer who desires money for the improvement of his farm and the equipment of his farm plant for profitable production is forced to seek funds from individual lenders, with the result that he finds conditions in many parts of the country in no wise improved.

The individual lender, being in business for profit, charges the highest rate of interest obtainable, as they have the right to do, and loans are necessarily made for short periods—so short, in fact, that the farmer can not from his improved plant make the profit to discharge the debt and keep up the interest, and always has the fear before him that at the expiration of the short term, if unable to reborrow the money or to negotiate a new loan from another, with all of its expense for abstract fees, and so forth, his mortgage will be foreclosed.

This situation has resulted in a stagnation of agricultural progress in the proper equipment of farm plants for profitable production. And out of this condition has grown the need for some system which would supply a simple and inexpensive method by which the farmer can borrow money at a low rate of interest and for long terms for farm improvement or farm purchase.

It is apparent that when anyone has something that he wishes to dispose of the price at which he can sell it depends upon the ratio of his anxiety to sell to the purchaser's anxiety to buy. If a farmer wishes to give security in the form of a farm mortgage and his promise to pay interest at certain periods on money borrowed, the rate of interest that will be charged depends upon the degree of anxiety of lenders to invest. In short, where money is plentiful and is seeking investment the rate of interest is less than where money is scarce and the borrowers many. Under present conditions the individual farmer can not take his security to the cheapest money market. The security is too far away for inspection and suspicion of title and the very human inertia that we are all heir to prevents the lender from making the loan, the security for which he is not familiar with and with which he could not become familiar without expense and trouble. As a result from these and other conditions not necessary to mention the farmer is confined in his borrowing to his local community where capital is scarce and interest rates high.

It is thus apparent that if any relief is to be given the farmer a system must be devised whereby money can be obtained at a low rate of interest for a long term.

Since the high rate of interest that has been demanded is due to the fact that the farmer has been confined to his local community for his borrowing, where the money was either entirely or nearly absent and where the interest rates were high and the terms of lending short, it is apparent that the remedy lies in devising a scheme whereby the security that the farmer offers may be sold in the market where money is cheapest and investors most anxious to invest and also whereby the security may be surrounded with such guaranties of soundness that the interest rate will be low. It is a well-known economic principle that the higher the risk the higher the interest, and vice versa. In short, the problem is to transmute the farmers' security that now has only a local market and is subject to suspicion on the part of the foreign investor into such form as to make it marketable everywhere and to make it so sound and secure that it will be taken and money advanced thereon at low interest rates.

In this bill this is sought to be done by providing a system of national land banks, not less than 12 in number, under Government control through a general board, capitalized at not less than $750,000 each, the stock of which shall be owned eventually by national farm-loan associations composed as to membership of borrowers who shall own the stock of the association to an amount equal to 5 per cent of the amount borrowed. The national land banks have power to issue bonds equal to twenty times their capital and to sell these in the market for the purpose of procuring additional money to lend to farmers. Each loan made is secured by a first mortgage on real estate, and the loan is not to exceed 60 per cent of the value of the land and 20 per cent of the value of permanent improvements. Each Federal farm-loan bond is secured by the capital, reserves, and earnings of the land bank which issued it; by the capital, reserves, and earnings of all the other land banks; by the collective security of all the mortgages pledged, which must be equal in amount to the outstanding bonds unless replaced by United States bonds or cash. Each land bank issuing a bond is protected, and hence the bond is protected by the personal undertaking of the borrower; by the security of the mortgaged land; by the capital, reserves, and earnings of the local association of borrowers indorsing the loan; and by the individual liability of the members of the farm-loan association, which is fixed at twice the amount of their stock in the association, or 10 per cent of their loans.

It is thus seen that the scheme is to establish land banks with a stipulated minimum capital, stock in which shall be owned by various farm-loan associations, and the stock of these farm-loan associations shall be owned by borrowers who compose the membership. Each borrower who joins a farm-loan association takes stock in it to the amount of 5 per cent of the amount that he borrows from the Federal land bank, the amount being deducted from his loan, and the farm-loan association in turn takes the same amount of stock in the Federal land bank. The sum borrowed is secured by a first mortgage given to the farm-loan association, appraised by it, and approved

by a Federal appraiser, and subject to such regulations as the Federal farm-loan board shall prescribe and such as are prescribed by this bill.

It is thus seen that a cooperative system is provided, the work being done largely by borrowers, expenses reduced, and all profits being returned eventually to the borrowers. In short, the securities of the various individual farmers is collected, surrounded by guaranties, and the credit thus provided is transmuted into the form of bonds with the purpose that the security in this form may be salable anywhere in the United States where money is cheapest, with the result that money for lending to the farmer may be obtained at the lowest possible rate of interest for long terms; the greatest length of time allowed being 36 years on the amortization plan. That is, that the borrower may pay in installments, principal and interest, by such yearly payments that at the expiration of the term of the loan both principal and interest are discharged, thus enabling him from his improved plant to make the money with which to discharge the debt—a result impossible with a short-term loan.

So far, so good. The principle of the bill is good. It is a sound method to collect credit and to make it mobile. But, Mr. Chairman, my objection is that it does not go far enough. I do not mean to say that as a matter of fact it is not sufficient. I do not know. I think that possibly it is. This is a question that the actual operation of the measure can alone disclose. But I wish to make assurance doubly sure.

Mr. Chairman, no measure before the House at the present session of Congress is as important, in my opinion, as is this. The need of a rural-credits system is imperative, and we wish to provide one that will be efficient to accomplish the purposes sought. The farmers of the country need it. Justice demands that we give it to them. Not only justice, but our own interests dictate its enactment. When we make the farmer prosperous, we make the Nation prosperous.

I believe that there is a virtue of honesty and strength in the soil that is infused into those who live near to it. The rural communities are the great reservoir from which we must draw the man power so needed and to be needed in this Government. That our citizens shall stay in the rural communities, rural life must be made prosperous and happy. Maybe I am radical on this subject. I try not to be radical about anything, but I believe that we should omit no step to make this bill the means for the establishment of a rural-credits system that will be successful without doubt.

The bill provides a method by which the individual security of the individual farmer is collected, merged, transformed into bonds, and thus made mobile enough to travel for purposes of sale to any part of the United States where money is cheapest.

It is seen from the provisions of this measure that the method by which money additional to the capital of the various land banks is to be obtained for lending to the farmer is by the sale of these bonds. So it is not enough that the security of the farmers' lands should be made mobile by transmutation into bonds, but, if the money is to be obtained, it is further necessary that the bonds should be made so secure as to be in demand for investment purposes and should bear a low rate of interest. The higher the rate that the bonds bear, the higher the rate that must be charged the farmer for the money lent to him by the banks. It is said that the bonds, secured as they are under the provisions of this bill, are so secure that the demand for them will be instant and immediate, and that the interest rate will be low. As I have said, this may be. Experience alone can demonstrate this. It yet remains to be seen whether the land-bank bonds will compete successfully with the bonds of private corporations, municipalities, and so forth, which are considered as good investments by the investing public. Under the provisions of this bill the Federal land banks are really private cooperative lending corporations, under Government supervision, it is true, but still having no greater strength than would any other corporation whose business was surrounded with equally wise regulations. This being true, the investing public will consider investments in the bonds of this corporation from the same viewpoint as it would other private corporations in whose management and securities it has confidence.

This being true, from the very nature of the case the purchasers of securities will not buy the land-bank bonds at a low rate of interest when they can buy the bonds of some private corporation in whose financial integrity they have equal or almost equal confidence. This will force the land-bank bonds to bear the same rate of interest as the bonds of those corporations, which means a higher rate than would be required by the purchasers if the safety of the bonds were beyond all doubt.

It seems thus apparent that if these land-bank bonds are to be made salable at the lowest possible rate of interest, and thus enabling the banks to lend to the farmer at a correspondingly low rate, and also, if the money is to be provided instantly by the sale of bonds when needed, it is apparent that this requisite certainty of soundness should be supplied.

As far as I know, there is one way, and one way only, to do this, and that is for the Federal Government to guarantee the payment of these obligations. This would mean that the Federal land-bank bond would sell instantly as soon as placed upon the market, and since it would be a perfectly secure investment, it would bear a very low rate of interest. The result would be that those investors who desire certainty rather than large profits would buy. The millions of fiduciary funds of the Nation would seek this investment, as well as those millions of other characters who desire certainty and safety rather than large profits.

It would provide money in unlimited quantities, as far as the ability of each bank to issue bonds on mortgage securities, and so forth, was concerned, for lending to the farmer; and, indeed, the land-bank bond would be the standard investment of this country.

It is urged, however, that for the Federal Government to guarantee the land-bank bonds would do violence to what is called a sound governmental theory that no direct aid should be extended to a particular class of persons; that so to do is essentially unjust and an invidious discrimination against others. If there be such a sound governmental theory, it is already violated in this measure, for we are possibly appropriating approximately $9,000,000 toward the capital of the several land banks in the provision that the Secretary of the Treasury shall subscribe for all of the capital stock to this amount not taken by individuals or others authorized to subscribe. There is no such theory, however, nor is any such rule demanded by a sound governmental policy. All Governments, in all ages, this one included, have extended governmental aid to particular classes of people whenever so to do was thought to be beneficial to all the people of the Nation. Our Republican friends can not complain, for they advocate a protective tariff, a system of direct aid or, rather, gift to that class of citizenship engaged in manufacture. The sending of garden seed to the farmer is a direct Government aid, as likewise river and harbor improvement is in the sense that it directly benefits those people owning lands adjoining these waterways. The illustrations and precedents of direct Government aid are countless, or nearly so, and it is needless to enumerate them.

But assuming that direct Government aid to a particular class is generally wrong and that a sound public policy should, as a rule, preclude it, it is nevertheless true, in my opinion, that it should be extended as far as guaranteeing the land-bank bonds are concerned. All rules of life are the outgrowth of the usual and the ordinary; they are the precepts that experience, with constantly recurring phenomena or happenings, has fashioned into guides for conduct. This is true, and for the very reason that these rules are the outgrowth of the usual and the ordinary they can have no application as guides when we are confronted with the unusual and the occasional. In emergencies and in the face of necessities the general rule must give way. Recognizing this rule, those who oppose direct Government aid in any form as a general rule have agreed to support that provision of this bill providing that the Government, if necessary, should take stock in the land banks, for the reason that such a provision was necessary to guarantee the institution of the system. I say that the necessity goes further than this. It is not only necessary to institute the system but it is necessary to make the system adequate to do the work; and to absolutely assure this the Government should guarantee the bonds of the various banks. Even though we be opposed to direct Federal aid, as a rule, if such be our position, the need is vital to furnish the farmers a system under which they may obtain money on the security of farm lands for a long term at a low rate of interest for farm improvement, and this necessity justifies the action on the part of the Government that I advocate.

Normal rules of life can not be applied in emergencies. He who seeks to do so meets with disaster or causes it. An Englishman with a monocle in his eye stood on a swimming raft, and, stooping over, saw a companion go down three times and never come up. A hardy swimmer trying to reach and save the drowning man finally reached the raft, but too late. "My God!" said he, "couldn't you save the man?" "Ah, I rawther think I could, old top, but really I had never been introduced to the gentleman, and of course could take no liberties with his person."

Mr. Chairman, the farmer has gone down twice; he now has his hands in the air and is sinking for the third time. I trust

that we will not stand with our monocles in our eyes and see him drown simply because some of us are trying to apply a normal rule to an abnormal situation.

Permit me to say, in conclusion, that what I have said is not in criticism of the especially able committee who prepared this measure. They doubtless have brought in the measure which they thought that current sentiment would sustain. It may do all that they claim for it. This nothing but actual experience can demonstrate, but these considerations do not relieve me of the duty of contending for and supporting that amendment which, in my opinion, will place the success of the rural-credits system beyond doubt of success. It is said that the land bonds are so secure that the Government's guaranty is unnecessary. May be not, as far as the question of security is concerned, but the bonds to sell must not only be secure as a matter of fact, but the public must believe them so. Government guaranty supplies this public confidence. If they be secure, and I believe they are, the Government can not suffer loss. It simply lends its credit without danger of having to pay its money.

I have not the time to discuss the other objection to the bill that I have mentioned, and permit me to say that even though the measure is passed without the amendments that I favor, I will rejoice, for, as I have said, it is a recognition of the need of the farmer and an attempt to meet it—a far step in the economic progress of our country.

Mr. GLASS. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. EAGLE].

Mr. EAGLE. Mr. Chairman, I really wish I had an hour, so that I might thoroughly discuss this bill, the general principles which, in my opinion, ought to underlie a proper system of rural-credits legislation, the history of the movement during the Sixty-third and Sixty-fourth Congresses, and the facts and figures upon which the committee which framed the bill has been acting, as a basis of stating the particular reasons why I intend to give my whole-hearted and undivided support to this particular measure. But at least in these five minutes I can say that I have no divided allegiance and make no conditions upon which I propose to vote for this measure, but will wholeheartedly give it my support. It is so much a better measure, in the interest of the farmers, than I ever heretofore hoped would be formulated by a committee of this House that I am deeply gratified by the opportunity to vote for it. [Applause.]

Mr. Chairman, it is easy enough for me or for any other Member of this House to point out particular reasons why we should object to a measure and to suggest amendments here and amendments there; and in due course we hope we shall have opportunity to vote for those amendments which seem to us to make it better. But I want to say that during the Sixty-third Congress the Federal reserve act, which was framed by the committee on which I have the honor to serve—the Banking and Currency Committee—received painstaking, deliberate, earnest attention; and while a hundred changes were proposed by as many men, mutual concessions resulted in a measure so splendid that, in the wreck and chaos of international war, in the confusion of industrial and financial conditions the like of which this world has not heretofore seen, it was so noble a measure as it finally went through the House of Representatives, with finally a few i's dotted and t's crossed by the Senate, without amending in any material respect what the Banking and Currency Committee of the House, and later the caucus, and later still the House of Representatives did, that it has enabled this country to withstand the shock of war and its financial institutions to stand steady like the Rock of Gibraltar. And I want to say that my deliberate judgment is that the Banking and Currency Committee of the House of Representatives in the Sixty-fourth Congress have labored with not only the same zeal but with the same intelligence, and the same industry, and the same common sense, and the same mastery of national agricultural needs and conditions in the formation of this rural-credits bill that it did with reference to the Federal reserve act. [Applause.] There is not a man in this House on any side of the Chamber, from any section of the country, whether he be a representative of a rural constituency or a representative of the great industrial, manufacturing, and financial cities of the country, who may not feel, in justice to his judgment and in justice to his conscience, that he will do no harm to any interest in this Nation by voting unreservedly for this bill, but that he will thereby help lift the oppressive burden from the shoulders of the farming and producing classes of this Nation, who owe now between four and five billions of dollars of farm-mortgage debt bearing more than 9 per cent interest every year, and that he will make it possible for the farmers of the United States, within 10 or 15 years, to change that present gigantic total of debt, bearing such present oppressive burdens of interest, into a bonded indebtedness with amortization features, so that it may be paid in due course by an annual payment of not exceeding 6 per cent, to include payment of both principal and interest. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GLASS. Mr. Chairman, I yield five minutes to the gentleman from Arkansas [Mr. CARAWAY].

Mr. CARAWAY. Mr. Chairman, the Democratic Party in its platform adopted at Baltimore pledged the farmers an adequate and just rural-credits law. Relying on that promise, they returned our party to power. To-day we are endeavoring to redeem that pledge. It is, however, with much misgiving that I shall support this bill, unless it is amended in many particulars. I should not do so at all were it not that in some respects it may tend to relieve the farmers of this country of burdens and discriminations from which they have long suffered. I feel certain that the farmers will not accept this proposed measure in full satisfaction of our promise. I am frank to say that I should cast my vote against this bill were it possible at this session of Congress to secure consideration of any other dealing with this subject. With all deference to the Committee on Banking and Currency, which reported out this measure, I feel that it has not been altogether sympathetic with the farmers in drafting this proposed law. If so, I know it did not understand the difficulties under which the farmers of my section labor, and it can not, therefore, know the disappointment which they will feel when asked to accept this instead of the law for which they had long labored and hoped. I am sure that no farm organization anywhere—I know no farm organization in the section from whence I come—was consulted in the drafting of the provisions of this bill. I know that no one who appreciates the difficulties that have for long beset the southern farmer will ask him to accept this bill as an adequate and comprehensive rural-credits law.

I shall refer but briefly in the time allowed me to some of its many defects, the most glaring and unjust, as they appear to me. Then I shall with pleasure set out some of its many splendid provisions. I shall point out its defects with no desire to criticize either the measure or its proponents, but solely with the hope that its framers may consent to modifications that will to some extent, at least, make it the more acceptable to the people in whose interest it was framed. In the beginning I am pleased to say that this is a much better bill than the one prepared and introduced on behalf of the special committee appointed at the conclusion of the Sixty-third Congress to investigate this subject, and it is by far a better bill than the one recently passed by the Senate. I shall, therefore, vote for it, notwithstanding the misgivings I entertain and the objections which I shall endeavor to point out.

In the first place, this bill has too much machinery. There are too many provisions which serve no purpose except to puzzle, confuse, and discourage farmers seeking relief under its provisions. As a consequence there are too many places to be filled by high-salaried officials, the burden of which eventually must fall upon the farmer. It seems to me the makers of this bill have ignored the fact that a rural credits system has nothing in common with banking. A rural credits system, as the term implies, is a system of credits devised to meet the needs of agriculture. These are a low rate of interest and a long-time repayment plan. There are no necessities for the organization of banks, and the system is only crippled and weighed down by these provisions, and they confer no corresponding benefits.

This bill provides that there shall be organized a board to be known as the Federal farm-loan board. It shall consist of three members, who are to be appointed by the President, by and with the consent of the Senate. Each member is to receive a salary of $10,000 per annum. Neither is required to possess any knowledge of agriculture or the conditions which confront farmers. These commissioners, when organized into a board, are to divide the continental United States, excluding Alaska, into 12 districts. In each of these districts is to be organized a Federal land bank. Each of these Federal land banks is to be controlled by a board of directors of nine members. Six of these are to be elected by the stockholders and three to be appointed by the Federal farm-loan board. These directors shall receive such salaries as the Federal farm-loan board may approve. They are to have the power to employ attorneys, clerks, agents, appraisers, and all necessary help to transact the business of the Federal land bank over which they preside. Incidentally the salaries and the expenses of all these employees will rest upon the farmers, who become borrowers under the system. Farmers who seek to borrow money under the organization must form what is known as a national farm-loan association. This is to be a corporation. It is to be controlled by a board of directors of not less than five members. This board of directors shall elect their officers and appoint a loan committee of three members. It shall also employ a secretary-treasurer, whose duties

it shall be to keep the books, have charge of all papers and securities, collect all moneys due the association, and transmit the same to the Federal land bank, to see that no borrower shall appropriate the money for any other purpose than that for which it was borrowed, and to do all the things necessary in the interest of the Federal farm association. Of course, he is to receive a salary and expenses. This salary and these expenses are to be paid by the farmers who form the association.

No association will be formed having less than 10 members, and they must in the aggregate borrow not less than $20,000. Each borrower must subscribe and pay for stock in the association equal to 5 per cent of the amount that he wishes to borrow. This stock he must carry as long as he is indebted to the association. When he shall have paid his debt and canceled out his mortgage, the stock is canceled, and he is returned its par value. It is true the bill provides that he shall share in the dividends on this stock. However, another provision of the bill makes it apparent there can be no dividends. In the first place, the Federal land bank is allowed for the purpose of administration and other expenses a sum not in excess of 1 per cent per annum on the amount borrowed. After all the expenses are paid 25 per cent of the net earnings is carried to the reserve until that reserve shall equal 20 per cent of the capital stock of the bank, which is never to be less than $750,000. When the individual farmer cancels out his loan he is not to be permitted to share in this reserve. There are other provisions that are required to be met also before any dividends can be paid, and I think a careful reading of the bill will convince anyone that no dividend will ever be paid on the stock held by the farmer.

In addition to this, when a farmer applies for a loan the three appraisers appointed by his association appraise the lands and furnish to the Federal land bank of his district a written and comprehensive report. The Federal land bank thereupon sends down one or more appraisers to reappraise the lands and make a written report thereon. Unless all these appraisements agree that the farmer is entitled to borrow, his application is rejected. If it is accepted, he must furnish an abstract of title, for which, of course, he must pay. The Federal land bank will have the abstract examined, for which the farmer is to pay. If all these are approved, then a mortgage will be made out, for which the farmer must pay, and will be recorded, for which the farmer also must pay. The expense incident to a loan is apparently burdensome. For illustration, let us suppose a farmer wishes to borrow $1,000, to run for a period of 36 years. He must take out stock in the farm association of $50—which, by the way, is never delivered to him—and carry that for a period of 36 years. He must then have the lands appraised by the local appraisement committee, consisting of three men. He must bear the expense of this. Then the Federal land bank will send down one or more appraisers from the Federal land bank, which is located in some city, possibly 500 miles away. The appraiser or appraisers will again appraise his lands, the expense of which he must bear. I think we might reasonably say that will not be less than $50.

The farmer must then have prepared an abstract of title at whatever exorbitant price the abstractor may see fit to charge him—I should think not less than $25. An attorney appointed by the Federal land bank must then pass upon this abstract. For this service the farmer must pay, and I should think not less than $10. The farmer must then pay for the execution of a mortgage and its recording—I should think not less than $5. To sum it up, he would pay $50 for stock, $50 for appraisement, $25 for the abstract, $10 for the examination of the abstract, and $5 for executing and recording the mortgage, making a total of $140. This will be taken from his $1,000, or he will receive, we will say, $860. He must pay interest, however, on the entire $1,000, which is not to be in excess of 5 per cent. That will be $50. Then he is compelled to contribute toward the expense of the Federal land bank, which is not to be in excess of 1 per cent, or $10, per annum on his $1,000. Then he must bear his proportional part of maintaining and paying a secretary-treasurer, which will possibly be not less than 1 per cent, or $10, per year. The farmer, therefore, will receive $860, which is $1,000 less the expense incident to making the loan. He will be compelled to pay on this $70 per annum as interest, which is a rate of little more than 8½ per cent per annum. This he can not afford to pay, and should not be asked to do so.

In addition to all this he is compelled to assume a liability of twice his stock for all other members of his association. This is to guarantee that all other subscribers will pay their interest and debt upon maturity. He should not be required to become responsible for another's default. No one supposes that when you go to a bank to borrow money you ought to be compelled to subscribe for any part of its stock or to become liable for the obligations of anyone else who may also be a borrower of the bank in order to procure a loan. No merchant would do business with a bank that restricted him in any such way. Why, then, should the farmer be required, if he is to receive any of the benefits of this law, to subject himself to such unjust burdens and discriminations?

The bill provides the uses for which money may be borrowed under its provisions. First, to purchase farm lands. Second, to buy equipment for the farm. Third, to erect buildings and make improvements. Fourth, to liquidate any debt owing by the borrower at the time the first Federal farm association within and for his county was organized. This right named in the fourth subdivision is denied him if the debt he wishes to pay has been contracted after the organization of first farm loan association in his county. In other words, after the farm association had been organized the farmer can borrow money only for the first three purposes, and is denied the right to borrow on his lands for any other purpose. I feel that this is an unjust and unnecessary restriction. Farmers are intelligent and certainly they are as much entitled to the use of their credit based on their lands for any legitimate purpose as the business or professional man is to his. Yet under the provisions of this bill, even if the farmer be honest, intelligent, economical, and progressive, he can use his lands only to borrow money for the purpose of purchasing farm lands, buying equipment, and to erect buildings and make improvements thereon. He can not use it, for instance, to educate his children, contribute to any public benefit, to have the care and skill of a physician, or for any other legitimate purpose for which farmers, like other people, may find it necessary to borrow money.

There is a provision in the bill, and with it I am in thorough accord, that prohibits anyone from borrowing money under this system unless he is a farmer or shortly to become one. The system is devised to promote the ownership of lands by farmers, not the building up of vast estates by the speculators. This certainly is a most desired result, for no country has ever prospered as it should where the lands are held by the few and the great masses of the people are tenants. Not that tenants are not good men, but the very conditions under which they labor prevent them from developing the best there is within them and withholds from their families the fruits of their toil. Now, under this system, however, which permits no one but a farmer to borrow, and he not more than $10,000, and permits him to sell the lands to whomsoever he pleases, and the purchaser, though he be a nonresident, a corporation, or a speculator, may within 60 days make known his intention of carrying out the provisions of the loan and thereby secure all the advantages that the original borrower possessed. By this means of evasion the speculator has but to use an agent to be able to do what he is denied to do directly—that is, to borrow money under the provisions of this bill and build up large estates, on which he does not live, and thereby, instead of reducing the number of tenants, increase them. I believe this section should be amended so that when the lands pass into the hands of one not a farmer the sum for which the lands are mortgaged should at once become due and payable, or if one who is a farmer should acquire lands on which the aggregate loans are in excess of $10,000 that this excess should be due and payable. The result of this law, if it succeeds in bringing cheap money, will increase rather than decrease the number of tenants. It will foster the building up of larger landed estates instead of placing the lands in the hands of the small farmers, which is, or should be, the end sought.

Another provision equally unfair and dangerous is that upon a farmer's failure to pay the interest or any other obligation when due, whether the failure is the result of his own misconduct or an act of God, the bank has the power to declare the entire debt due and payable, and the farmer may be dispossessed of his lands, although the amount that he was in arrears may be but a few dollars. I know it is within the discretion of the bank to waive this forfeiture, and in many instances, and perhaps in most of them, the bank will do so. However, there are possibilities under the very organization of the scheme that will make temptation sometimes great and the consequences disastrous. For instance, some borrower under the system becomes distasteful to the others of his association. They dislike either his religion or his politics, or for any other reason. Misfortune overtakes him, his crops are blighted, or his health fails, unlooked for and unforeseen expenses are laid upon him. He makes default in some payment, possibly but a trifle. The opportunity is at hand to get rid of him. The directors of the association make representation to the Federal farm bank. A forfeiture is declared. All of his obligations are required to be met at once when, in fact, he is unable to meet even a part thereof. The result is his lands are sold at a forced sale.

They bring but possibly a fraction of what they are worth. The unfortunate man is from that day homeless. The accumulations of a lifetime are swept away in an hour. You say this will not happen. It may not, but that possibility is in the law. It should not be.

There are many other provisions with which I do not agree. However, I do not think they are more serious than the ones pointed out.

I shall not discuss at all the purpose of the joint-stock land banks. I do not believe that any under this system will be organized. I am sure none will be in the section with which I am familiar.

I shall not undertake to refer to some of the wholesome provisions of this bill, and some of the conditions they are meant to remedy. This is an effort to mobilize the credits of the farmers and to provide them an avenue through which they may sell these credits in a market where there is money seeking an investment at a low rate of interest and long-time repayment if the security is ample. If it meets the expectation of those who drew it, it will bring to the farmer money at a rate sufficiently low for him to pay and prosper. I know it would do it if it were so amended as to get rid of the unnecessary burdens and expenses incident to its administration. Its intention to make it possible for tenants to become farm owners meets with the approval of all of us, and if it is so amended as suggested it will accomplish this result.

A further provision, which provides a loan value on the buildings, is also to be commended. Both of these provisions were contained for the first time in any rural-credits bills, so far as I know, in the one I introduced in the Sixty-third Congress. I think that the most important provision of the bill. While 40 acres of land, or any other number, will produce as much corn or as many bushels of wheat or pounds of cotton, with a shed in which a family may exist, and without any shelter for live stock, yet it does not meet the requirements nor the deserts of the producers of America's wealth. Therefore, not only to encourage the erection of comfortable homes and adequate outbuildings but to make possible these improvements, a loan value for that purpose is provided in this measure.

There are other features of the bill that I approve. However, these are the ones most to be commended. This bill is evidently a compromise between those who favor governmental aid to establish and maintain a system of rural credits and those who oppose that assistance. I have believed that the Government is as much obligated to support agriculture by this method as it it is to promote trade and industry. The reasons for its doing so to me are most apparent. To the makers of this bill, however, I am sure those reasons did not appeal. The measure, as I have said, is a compromise between the two. It provides that the Government may subscribe to the capital stock of the 12 Federal loan banks all or any part thereof. Should the Government subscribe and pay for all this stock, it would have invested in the system $9,000,000. A provision of the bill, however, provides that after the borrowers—that is, the farmers—have subscribed for the capital stock equal to the $750,000 necessary to be subscribed before the banks are opened for business, 25 per cent of all sums paid in for stock thereafter shall be applied to cancel out all of the original stock. Under that provision the Government will at once go out of the system—I feel certain within a year after its organization. It is true after that it contributes toward the expense of the administration by paying the salaries of the members of the Federal farm commission and certain other employees. This may require $100,000 per annum, but very likely not exceeding 50 per cent of that amount. This is a much less contribution than it makes to the Federal Reserve Banking System. In addition to that, it guarantees the redemption in gold of all the circulating medium of the regional banks under the Federal reserve act, while it guarantees nothing for this system under this bill.

In other words, for commercial banking the credit of the United States is available, while for farm credits there is nothing. I know that those who oppose governmental aid for a rural-credit system think that we who advocate it are seeking undue advantages, and special legislation for farmers. They forget, or seem to forget, what we have done for the bankers, the merchants, and the manufacturers. Since I have been a Member of this Congress we have provided by law for commercial agents at big salaries to tour the world and hunt out markets for the merchants and the manufacturers. The salaries and expenses are paid by the Federal Government. We have poured millions of dollars into industrial centers to prevent panics, and have deposited other millions in banks without interest, and we are now about to appropriate other millions to build or buy ships to transport the goods and wares of the merchants and manufacturers to the markets beyond the seas, and all of these are thought to be entirely proper expenditures for the Federal Government. No one declaimed against them, nor do I, but on the other hand, when we seek to have included the laborer and farmer in the same class, and to share the same benefits, we are denounced upon the floor of the House as if we were seeking to despoil the Treasury. I contend that legislation that promotes agriculture is the only legislation that is free of any taint of class legislation. All that men eat or wear, wherever they may live, or whatever occupation they may follow, is produced by farmers. This cost of production depends to some extent on the interest rate the farmer has to pay. Since then the cost to the consumer is affected by the interest rate charged farmers for production, necessarily the lowering of the interest rate will result in a lower cost of living, and therefore all will share alike, be he farmer or man of any other calling. Therefore it is not class legislation to directly appropriate public moneys to establish and maintain a rural-credit system that would give the farmer an interest rate so low that he could pay it and prosper.

There are 12,000,000 farmers in these United States. Their aggregate wealth, including all property, is $41,000,000,000. They owe $6,000,000,000. Their farms are mortgaged for $3,000,000,000 of this sum. Annually they pay interest amounting to $510,000,000, an average interest rate of 8½ per cent. Statistics show they can pay only 5½ per cent and prosper. They could pay, therefore, if they are to prosper, instead of $510,000,000 annually for interest, only $330,000,000 on their borrowed money. In other words, there is wrung from the farmers an annual interest charge of $180,000,000 in excess of what they can afford to pay. Industrial 5 per cent bonds now sell at par. Panama 3 per cent bonds are quoted at 99. The farmer, notwithstanding he produces all the wealth, and in the last analysis possesses it, pays 8½ per cent interest. This he can not afford to do, and under just economic laws would not be required to do. For that reason they demand of us, their Representatives in the American Congress, and have the right to demand of us, the enactment of a law to right this wrong. I myself am glad to acknowledge this obligation, and here and now pledge myself to that service. When we shall have dealt justly with the farmers of this country they will have had their interest rate for agricultural enterprises reduced from 8½ per cent, the present rate, to not to exceed 3½ per cent, and thereby retain for themselves and their families $300,000,000 annually which they now unjustly are compelled to pay as excess interest on this borrowed money. This is the sum they now pay to a system which is not adapted to their needs and which the enactment of a just rural-credit law would avoid.

Of all persons the farmer is the most exposed to conditions over which he has no control. He plants and cultivates his crop subject to conditions of season; he markets it at the mercy of the speculator. And so great has been this burden that the number who own the land they till have considerably decreased until now more than 37 per cent of our farmers are tenants. Let us so amend this bill that it will make it possible for every man to own the field that he tills. When he shall have done this we shall have discharged our duty to the farmers of this country, and until we have done that this great body of American citizens will have just cause for complaint.

Mr. GLASS. Mr. Chairman, I yield five minutes to the gentleman from South Carolina [Mr. RAGSDALE].

Mr. RAGSDALE. Mr. Chairman, four years ago when the Democratic Party wrote the plank in its platform promising the people of this country to bring about rural-credits legislation I think it was one of the promises that made us as strong as we were before the country. It was a matter that had not been fully discussed at that time, and when I became a Member of this body it was practically an unknown subject here. My efforts at that time, along with the efforts of other gentlemen, to secure congressional aid for a project of this kind seemed to meet with general disfavor, and it was only after a long effort here that people became even partially reconciled to the idea of governmental aid. This bill that we have before us today does not go as far in some sections as I would like to see it, but certainly it does more for the farmer in furnishing long-time loans at a reasonable rate of interest than any piece of legislation that has ever been written upon the statute books of our country [Applause.] While I should like to see it amended in some particulars, still even without any amendment if this bill, or the Senate bill that is under the same cover here, comes to a final vote, with or without amendments, I will vote for it. To my mind we all want to see these bonds made safe. The safety of the bonds, the security of the bonds in the public mind is of prime importance.

One of the things in my mind that we ought to do to make them safe is to require the sum of $1,000,000 dollars per annum

to be deposited in each one of these 12 land banks in order that, if there be a drought, if there be good reason for holding crops, if there be reason for taking the commodities, the products of the farmer, off the market for a period of time, the Government may make these deposits in these land banks just as they do in Federal reserve banks when there are great disturbances in New York and elsewhere, and thereby guarantee that those banks will annually pay the sums of money that may be due by way of interest on these bonds. I wish to congratulate the gentleman who prepared this report [Mr. PHELAN] upon his splendid presentation of this bill, the real necessity for this legislation, and the justification of governmental aid.

Mr. HAUGEN. Will the gentleman yield for one question?

Mr. RAGSDALE. I have only five minutes. I am very sorry, but I can not yield. In his report, Mr. PHELAN has called attention to the absolute safety of these bonds. There can be no loss, as he wisely points out, on the part of the holders. There is only the possibility that there may come times when this interest payment may not be made promptly by individuals. That, to my mind, is the only consideration the public is going to have in the purchase of these bonds. If commercial corporations, electric-light plants, municipalities, and great railroad companies have a falling off in earnings they can issue their own short-time notes and get the amount necessary, but this could not be true in reference to these mortgaged farmers; they would be put in a position where they might default and thereby create necessity for foreclosure. If these deposits can be made and the interest payments tided over, they could meet them later, and thereby the whole system would be strengthened. We realize that the stronger the bonds the greater the certainty of prompt payment of interest, the greater would be the demand for them, and the more readily they would be absorbed by the public, and necessarily, therefore, the lower would be the interest rate to the borrowing farmer and the greater the benefit he would enjoy.

It seems to me that there ought to be a provision by which the Government could make these deposits in these 12 regional land banks in order that they might take care temporarily of these default payments that come due. The same security would be held by them. The same mortgages would be held by them. There would not be any greater risk anywhere. It would merely provide an absolute certainty that this interest, falling due year after year, would be paid promptly. These bonds would certainly then be salable, and if we provide a safe and salable bond it seems to me we are going to reduce the rates of interest in rural communities, and make it possible for men who are now tenants to be landowners, make it possible for this country to be a greater producer of the things on the farm than it ever has been, and create an economic condition that this country certainly needs in view of the conditions that now exist throughout the world. [Applause.]

Mr. GLASS. Mr. Chairman, I yield to the gentleman from Oklahoma [Mr. FERRIS].

Mr. FERRIS. Mr. Chairman, there are many weird rural-credit proposals now pending before the Congress. There is much misinformation abroad both here and elsewhere about this subject. Still in the wide discussion which has been given rural credits there has developed no serious disagreement as to the urgent necessity for legislation that will, first, reduce the interest rates to the farmer, and second, make it possible for him to secure loans for long tenure, which will enable him to repay without bankruptcy and foreclosure.

I am convinced that I am speaking for every thoughtful citizen of my State, who is not in some way selfishly interested, when I say that the farmers of Oklahoma need and deserve, first, lower rates of interest; second, longer tenure to repay the loan; and that they need this relief not next year but now.

SYNOPSIS OF PENDING BILL.

What is it we ask the Congress to do this day? Simply to do what every civilized country of the world has done—establish an adequate, workable, feasible, sensible, rural-credit system that will enable the American farmer with adequate security to borrow money on liberal terms at a low rate of interest with which to remove his present indebtedness and relieve him from exorbitant rates of interest, and to better enable him to purchase a home that he can exist upon while here and to bequeath to the loved ones who are to follow him when he has gone.

You ask me if rural credits and agitation about it is not new in this country, and I answer you that in this country it is new. The agitation concerning it has covered a period of from four to eight years, but in Europe it began in 1848 and both there and elsewhere it has grown like a weed in fallow soil.

You ask me if the bill under consideration is a perfect bill. I answer you, with such limited information as I have at my command, it is not. You ask me if the rural routes provided for in 1890 with an appropriation of $40,000 were adequate and free from fault at that time. I answer you they were not, but they were the beginning of a great system that has grown and developed and scattered its blessings generally throughout the homes of the 100,000,000 American citizens more than any other governmental agency.

What does this bill actually do that will be of benefit to the American farmer? What are its provisions that shall serve as a foundation of a great system that will be of help to all our people and lend strength and lift aloft the welfare of the producer and all other citizens? Stripped of all details, stripped of all complications, the salient features of the bill now before us are as follows:

First. It establishes 12 farm-land banks equitably distributed over the United States, whose duty it shall be to lend money to the American farmers on farms or for the purpose of purchasing farms upon which they are to reside.

Second. The bill before us appropriates and provides for the disposition of Government money out of the Treasury of the United States of $750,000 in each of the 12 land banks to install them, start them off, and to make the transaction of business possible at the beginning.

Third. The bill we are now considering, and that I hope we will to-day pass by an overwhelming majority, exempts all mortgages and bonds issued upon such mortgages from taxation of any sort. This is a distinct help to the farmer; this is a great advantage given to the system; this will help beat down interest rates on loans made through these institutions.

Fourth. The farm-loan board, the members of which are appointed by the President and who are Government men, determines the rate of interest to be charged and the price at which the bonds shall be sold. This insures to the farmer a decent rate of interest and assures him that the bonds issued upon the mortgages shall not be sacrificed.

Fifth. Loans may be made in amounts ranging from $1,000 to $10,000.

Sixth. Banks may loan only 60 per cent of the farm value. This is thought to be a proper amount on a fair valuation. No good man wants the Government to lose its money or its confidence in the American farmers, and this makes due allowance for depreciation in farms from lack of management, fire, floods, and other disasters that may sweep away farm values.

Seventh. These banks may make loans for periods of time ranging from 5 to 36 years.

Eighth. These 12 banks may make loans for four purposes only: (a) Mortgages on farm lands; (b) money with which to buy land; (c) to make permanent improvements, such as buildings, fences, orchards, and so forth; (d) to buy live stock to stock the farms, to the amount of 50 per cent of their value.

Ninth. Each of the 12 Federal land banks indorse every bond issued upon the mortgages as they are collected in, and this is thought to be a highly desirable feature of the legislation, due to the fact that it will make uniform the value of the bonds and make a bond issued on Oklahoma or Texas mortgages as valuable as one issued on Illinois or Ohio mortgages, and it is thought this will make uniform the farm-loan rate throughout the United States. This will put an end to 10 per cent in Oklahoma and 5 per cent in Ohio and Vermont. This will equalize the rate as it should be.

TENANTRY INCREASING TO ALARMING DEGREE.

In 1880, 25.6 per cent of the farms of this Nation were farmed by tenants; in 1890, 28.4 per cent of the farms were farmed by tenants; in 1900, 35.3 per cent of the farms were farmed by tenants; in 1910, 37.1 per cent were farmed by tenants. These facts can to the thoughtful man leave but one thought behind, and that is that the farmers of the country are gradually withdrawing from the farm and engaging in a more lucrative business and the still less unfortunate man who has no more lucrative business to engage in must of necessity become an actual farmer and farm the farm. I maintain in earnestness and good faith that these figures disclose a somber fact which should appeal to every thoughtful Congressman and Senator that something should be done to prevent this most undesirable trend of affairs.

OKLAHOMA'S TENANTRY NEEDS ATTENTION.

For example, in my own State, which was formed and made up from the twin Territories of Oklahoma Territory and the Indian Territory, respectively, and was formally admitted to the Union on November 16, 1907, the startling facts regarding tenantry are as follows: The total number of farms is 190,192; the total number of farms occupied by owners is 85,404; the total number of farms occupied by tenants is 104,137. These amazing figures regarding my own State come from the fact that the great bulk of the State is Indian land and by Federal statutes

exempted from sale, and much of it exempted from taxation; but I present the figures for what they are worth and assert them to be no less than astounding.

TENANTRY ON INCREASE—HOME OWNERSHIP AT STANDSTILL.

From 1890 to 1910 tenantry in the United States increased 16.3 per cent and home ownership increased only eight-tenths of 1 per cent. Can figures so conclusive as these go unnoticed? Can we close our eyes to the fact that this condition of affairs needs and deserves attention? Can Members from the city districts in the East, who consume more than they produce, longer insist that the farmer has had more than his share? I can not believe that Members from the East who represent manufacturing districts and consuming districts, as distinguished from producing districts, can afford to longer stand in the way of legislation that will right and adjust this great wrong. To do so longer is but to stand in their own light; to prevent us of the producing section from this just recognition is but to cripple and hamper your own endeavors, though they be in an independent and different field. We of the West are proud of you and your factories, and delight to see you prosper and improve, but in humbleness and in simplicity we insist that neither your cities nor your factories would long thrive were it not for the products of the mine, the field, and the forest.

MORTGAGES INCREASING ON AMERICAN FARMS.

In 1890 only 28.2 per cent of American farms carried mortgages; in 1900, 31.6 per cent carried mortgages; in 1910, 33.6 per cent of the farms carried mortgages. Let us pause for a moment and consider what is the real reason for this undesirable trend. Can it be said that the American farmer is mortgaging his farm for reasons other than necessity? In the main, I can not believe that such is the case. I full well appreciate that there will be notable exceptions where farmers mortgage their farms as a result of indolence, idleness, lack of thrift, and management. I full well understand there will be other notable cases where farmers mortgage their farms for extravagance and luxuries that are not necessary for the station in which he lives. I am also full well aware that there will be some exceptions in certain sections of the country which are due to drouth, hot winds, crop failure, and other disasters that befall a properly planted and cultivated crop. But I still insist that these cases are exceptions to the rule rather than the rule.

While it is eminently true that no legislation that this Congress can pass can legislate away indolence, extravagance, or crop failure occasioned by climatic conditions, still this Congress has in its power and, I believe, the solemn duty resting upon it to help, in so far as possible, to reduce the interest the farmer must pay and liberalize the loans that he must execute, to the end that he may retain his homestead, educate his children, and properly care for himself and his family in the station in which the American farmer deserves to live.

IN 20 YEARS MORTGAGES ON FARMS INCREASED $640,257,001.

The total amount of mortgages on farms in 1890 was $1,085,915,850; in 1910 it was $1,726,172,851. This discloses an increase in the mortgages on American farms in a single 20-year period of $640,257,001. I can not believe that I am in error in thinking that this increase in the mortgage debt is but an increase of the farmer's burden, is but an additional load for him to carry, is but a further bending him down under a load that is already too heavy for him to carry. For me and for mine, I would much prefer to use the strength, the credit, the stability, and even, if necessary, the revenues, of the Government to reduce, to lower, and, if necessary, to sweep away this John Bunyon load upon the back of the American farmer than to bond the Nation for arms and armament that is not now and in all probability will not be needed. The one will instill hope, comfort, education, and prosperity in the American citizen, while the other, at best, can only be defended as a burden that necessity drives us to endure. The man or the political party who can emancipate the American farmer from this turmoil of exorbitant interest and debt is greater and will live longer in the hearts of the people than will he who engulfs them in debt and bondage for fears of an imaginary war and conflict that are not well grounded and scepticism of intrigue that will never come true.

AVERAGE LOAN PER FARM LARGER EACH YEAR.

The population of this Republic in 1890 was 62,947,714, but the average mortgage of the several farms covered thereby in that year was $1,224, while in 1910, with a population of 91,972,266, it had increased to $1,715 per farm. Those opposed to this legislation will assert and do assert that farm lands have increased in value, and therefore may properly carry the increased burden. No successful denial can be made of this statement; but away and beyond all this is the incontrovertible fact that the mortgage debt, both in the aggregate and per farm, is gradually increasing. This, I assert, is not as it should be; this, I assert, deserves the attention of this Congress; this, I assert, demands renewed energy and activity on the part of Congress; this should even tug at the heartstrings of the gentlemen in and out of this House who are opposing this measure by means fair or foul. These stubborn facts should at least ameliorate your feelings, and let us remedy this unhealthy trend of affairs that abides among us.

ACREAGE PER FARM DECREASING.

The average acreage of the 5,737,372 farms in the United States in 1900 was 146.2, while in 1910 it was diminished to 138.1 acres to each of the 6,361,502 farms of the American Republic. Can we close our eyes to the fact that while the acreage is diminishing the mortgages are increasing? Unless something is done to equalize interest rates and reduce the same as well I fear this unwholesome and abnormal situation will go on and on to the very great impairment of home ownership. Can a true American, full of hope, patriotism, and love of country, sit idly by, unabashed and inactive? For me and mine, as one who loves the Republic well and as one who would uphold the flag and the country in all that upholding it means, I say these ills shall not go on without attention, these conditions shall not prevail without protest and restraint.

CITY POPULATION INCREASES 100 PER CENT WHILE FARM POPULATION INCREASES ONLY 20 PER CENT.

From 1890 to 1910, a short period of 20 years, within the memory of every man who sits in this Hall to-day, cities increased in population 100 per cent, while the farm population increased only 20 per cent. This makes the growth of the Republic produce five men who are destined to reside within the city for every man who shall reside upon the farm. I assert the fact to be that all that our Republic is to-day, all that it can ever hope to be, must in one form or another spring from the very loins of the field, forest, and mine. [Applause.] This trend of American boyhood rushing to the city and abandoning the farm renders it necessary for one farmer to produce enough to support five residents of the city, which is all out of proportion, all wrong, and should be remedied by this Congress, as distinguished from the next. You of the East—of the crowded centers engaged in business other than agriculture—complain of the high cost of living and assert that your living expenses are more than you can bear. Can there be a better panacea for this ill than to improve the conditions on the farm, enable the farmer to secure better credit and enable him to enjoy more of the good things of life, so that the boy who has abandoned the homestead and gone to the city may return and again take up his abode in the rural community? Can you of the East and you Congressmen representing manufacturing districts longer be upheld even in your own districts, much less in the Republic, by thwarting and opposing us in legislation that we believe will improve us, will help us? I again assert that this rural-credit legislation before Congress is not a local matter, is not a sectional matter, is not class legislation, but is strictly in the interest of the development of a great Republic, whose teeming millions only ask a chance at the race of life and a willingness to help provide for this Republic in peace and to defend her in case of adversity. These, and many things more, are some of the things that make me so hopeful that we may secure now rural-credit legislation that will be of benefit not alone to the farmer but to the health, wealth, and progress of this great and prosperous Nation in its entirety, and that she may go on in peace, prosperity, and development until she is the foremost nation in all the world.

RURAL-CREDIT SYSTEM WILL SAVE ANNUALLY $120,000,000 IN INTEREST TO AMERICAN FARMERS.

The total farm mortgages on American farms to-day amount to almost $4,000,000,000. The interest on this amount at 8 per cent would amount to $320,000,000. I pause to note that the exacting of this enormous sum annually from the American farmers denies many promising boys and girls education, and is a load extremely hard to bear. If by the legislation under consideration we can reduce the interest rate to 5 per cent, the drain in interest upon American farmers would be only $200,000,000, a saving to them of $120,000,000 annually. Who is there present who would not delight if he could help to save the American farmer this $120,000,000 annually? Who is there present who would not be willing to say that the lifting of this partial load from the back of the farmer would be an inducement to the boy who has left the farm to return to it and try again?

To withhold credit from a business man is but to stifle his efforts and bankrupt both him and his business. To withhold credit from the American farmer by extortionate rates of interest on loans has been but to pile up his burdens, to press down

upon his hopes and ambitions, and make life on the farm more intolerable than attractive as the years have sped by.

The average rate of interest in Vermont is 5 per cent, and this low rate largely prevails in the other Eastern States. The rate of interest in Montana is 10 per cent, and throughout the West that is but little, if any, in excess of the amount the western and southern farmers pay. I know of no good reason why one section should be favored with 5 per cent and another tortured with 10 per cent. Surely our patriotism, our industry, our love of country is equal to that of Vermont and the East. Surely our farm lands, that are not depleted by centuries of use, are as valuable and as good a risk as theirs. Surely, then, the legislation provided for in this bill would tend to make the mortgages and the bonds issued upon them uniform in value and make the rate of interest uniform, which is bound to be of help to all States suffering from extortionate rates of interest.

I want to say that section 23, which makes the bonds exempt from taxation, is a distinct recognition of the farmer's claim and will be a distinct help to him. This can not be questioned by anyone. No one can deny it is a help to the farmer; no one can deny it is an aid to the system.

The 36-year period is a long-time credit. In order to accomplish anything the farmer must have a long time in which to pay the original debt. He, of necessity, earns slowly and must have a long time to repay the principal. Now, the $9,000,000 provided for maintains firm the principle of Government aid. There may be more polite names for it than that, but it is the name I will give it, and I am heartily in favor of it. The only trouble with it is that it is not enough to satisfy me. It is more than the Senate allowed—the Senate provided only $6,000,000. I think it ought to be amended so as to make it $25,000,000. I know the chairman of the committee will say it is useless to try to have that much put in this bill. I see that the gentleman from Indiana [Mr. Moss] is indulging in great glee at such a suggestion, but I call his attention to something that I think will make him change his mind about that. We appropriated on yesterday $20,000,000 for a nitrate plant on one branch of one river in one State, and which I presume was necessary and all right. We appropriated $40,000,000 for river and harbor improvement this year, which a great majority of the House voted for, and probably properly, but it only affected a small part of the people.

Mr. MOSS of Indiana. And the gentleman will remember that we appropriated $25,000,000 on the Agricultural bill.

Mr. FERRIS. Yes; and we appropriated $40,000,000 for rivers and harbors, and $20,000,000 for a nitrate plant, and we have a bill pending, which will be considered to-morrow by the Flood Committee, appropriating about $55,000,000 for flood control on the Mississippi River.

Mr. RUSSELL. But that is in five years.

Mr. FERRIS. I understand. Who is there here in the face of those appropriations who will say that $9,000,000, as provided for by the House bill, or $6,000,000, as provided for by the Senate bill, is enough to start off a great national system like this? Now, you can not say that is not a fair comparison, because it is one. Within the last few days we have, and within the next few days we will, appropriate for more specific propositions, affecting only a few of the people, four or five times what we appropriate for this great system, affecting all the people.

Mr. CALLAWAY. Does not the gentleman think that we ought to save this and put it into battleships? We only appropriate about $400,000,000 for those things.

Mr. FERRIS. The gentleman will pardon me for not going into that. It involves the question of national defense that I do not wish to refer to. I presume the gentleman from Texas and I are not so far apart in our views on battleships.

During this debate many Members hostile to this legislation have asserted that it was unsound to have the Government lend its credit and deposit its money in these 12 land banks, to the end that it might be loaned to farmers. I can not agree with these gentlemen in either their analysis or their logic. Since the birth of the Republic Government funds have from time to time been deposited in commercial banks, usually without security, and until recently without interest. If this has been done for 140 years with safety and impunity, why is it now so unsound and unsafe to loan faith and credit to these farm-loan banks, which in turn are to loan to farmers only upon the most stable of all security, the soil itself? How can it be so safe and sound to lend to commercial banks without security and without interest and so totally wanting in soundness and feasibility to lend to these land banks for interest and with the very best of security? No; I can not think it is unsound; I can not think your objections are other than the usual objections made to any new Government agency, however just and beneficial that agency may be. For me and for mine, I believe this is an earnest, honest effort on the part of an honest Congress to afford to the American people a system of rural credits that will benefit the farmers and the farms; that will beget farmers with farms; that will instill greater hope in the hopeful, greater zeal in the zealous, and bring good results to the teeming millions of America. The American farmer, who cries aloud for this legislation, has been the true builder of the proudest Republic in all the world, and I can not in justice remain silent while his cause is in the balance. Each year I have journeyed among the industrious, brave, and heroic people of my district, have journeyed among these builders of an empire, and each time I have faithfully promised them to help them secure a system of rural credits that would help them beat down interest rates and give them ample time for repayment. I am so happy that I have lived long enough and remained their servant long enough to be able this day, first, to speak in their behalf, and, second, to cast one vote in their behalf, for a bill that I believe will be of towering strength and help to them. It pleases me more than I am able to tell to be able to aid in doing in office the thing I promised to do while securing office—the enactment of a feasible, reasonable, sensible, workable rural-credits law. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GLASS. Mr. Chairman, I yield five minutes to the gentleman from North Carolina [Mr. DOUGHTON].

Mr. DOUGHTON. Mr. Chairman, to-day will witness in this House the fulfillment of another very important pledge made to the American farmer in the last national Democratic platform. In that platform, legislation, giving to the agricultural classes of America a system of rural credits, was pledged.

It has been stated by a Member on the Republican side of the House that this is not a party measure. Of course it is not, and it should be considered in an entirely nonpartisan manner. However, the fact will neither be overlooked nor forgotten that the Democratic Party is responsible for legislation in this Congress, and it is the first party ever to make manifest in substantial form and to recognize the need of this legislation, which the farmer has so often requested and for which he has waited so long and patiently.

It will be remembered that in considering the Federal reserve act, at the first session of the Sixty-third Congress, its passage was long delayed by those on that side of the aisle and especially by the Republicans at the other end of the Capitol. It was filibustered against for months and when a vote was finally taken only 35 Republicans could be found in this body and only three at the other end of the Capitol who would give it their support. Yet, it is now admitted by all sane, fair-minded men everywhere, in Europe as well as in America, that the Federal reserve act is the greatest masterpiece of financial legislation ever enacted by any legislative body. [Applause.] It has been characterized as a miracle in legislation. Under its wholesome operation money panics are impossible and the control of credit is removed from Wall Street, where it had been left by the Republican Party for 50 years, and is now placed in the hands of the Government and the people.

When the legislation which we are to-day considering is placed upon the statute books and the farmers are given the same opportunity for obtaining credit that the commercial interests of the country have, agriculture will celebrate its emancipation and henceforth be free from the thraldom that has kept it enslaved so long. Since the time when the memory of man runneth not to the contrary, the Republican Party has told the farmer that if the Democratic Party should come into power and apply its policies the farmer would be ruined. Yes; the farmer was told that if the high protective tariff was lowered the price of his crops—produce, live stock, and so forth—would drop to nothing; that his land values would depreciate; that he would be reduced to the state of the common beggar and walk the earth in poverty's embrace, and many honest farmers believed this fabrication. They believed that in some way the tariff and the value of farm products were inseparably linked together and that lower customs duties meant a corresponding lowering of farm products and stagnation and death to the farming industry. But that deception can no longer control. The farmer has been shown by actual results that he has too long been the victim of misrepresentation. He is to-day receiving larger prices for his products than ever before in the history of the country and enjoying the greatest season of prosperity. But what is now coming his way is only an earnest of the additional advantages and blessings that are to be his when our entire legislative program for his benefit has been completed.

Farming is as much a business as manufacturing or merchandising is a business, and can only be successfully operated and managed when given adequate facilities for credit, such as are

necessary for the successful operation of any other business. While there are a few individuals here and there who have ample funds for the operation of their business enterprises, yet the undeniable fact remains that practically all business is done on a credit. Deny manufacturing, merchandising, railroading, or any other business adequate credit facilities and you plunge the dagger to its heart. Credit is the foundation of our whole commercial and industrial structure, and the same is true of agriculture. Therefore it can not develop and flourish without adequate credit.

This bill is intended to provide Federal land banks whose sole purpose and function shall be to serve the farmer and furnish him money on long time, at a low rate of interest, and payable on the installment or amortization plan. The farmer has the best of all security with which to make safe his loans—something that fire can not consume, rogues can not steal, nor floods wash away. Therefore he should be able to procure the use of money on the same terms and at as low rate of interest as any corporation or even the Government of the United States itself.

Under the present conditions, when the farmer can borrow money at all, the terms are so unreasonable and work such extreme hardships upon him that once he becomes a victim of the policy he remains a slave to it the remainder of his natural life. Interest rates are so high and the time of maturity of his paper so short and often the uncertainty of being able to renew is so great that it is impossible for him to save himself from the viciousness of the system, and weaker he grows and poorer he becomes until he finally winds up in bankruptcy. The last state of the man is worse than the first. But under the system that we are soon to write upon the statute books, the man who has land and character can secure long-time, low-rate loans, payable on the amortization plan—that is, the interest and a certain part of the principal annually, making his payments small and due only as his crops are ready for market. He will be free from the ever-present nightmare of foreclosure, which obtains under the present system. No longer will he be at the mercy of the heartless Shylock, who would arbitrarily and mercilessly sell him into poverty's bondage.

This system provides an American plan of finance, adapted and dedicated especially to the peculiar needs of agriculture and for the direct needs of the American farmer. It is so arranged as to give immediate and permanent relief to our struggling agricultural population. Of course the system will not be perfect to begin with, but it is the result of the combined wisdom and thought of the best American experts on the subject.

At the inception of his administration, President Wilson appointed a commission to work in conjunction with the committees appointed in the various States to make a study of the subject of rural credits in all of the countries of Europe. Then a special subcommittee in both the House and the Senate were appointed and after careful study of the report made by the commission appointed by the President and after months of careful investigation evolved the plan now presented to Congress. When it is written into law, as it soon will be, and the test of operation is applied and such amendments as experience demonstrates to be necessary are added, a blessing will come to agriculture, such as the American farmers have never known.

Added to this legislation and to its benefits is a bill providing for Federal aid to good roads and also the Smith-Lever bill, which appropriates thousands of dollars annually for farm demonstration work, and carries direct to the farmer all the scientific discoveries made by the various specialists of the Department of Agriculture. In addition to this, the Democratic Party has given the parcel-post legislation, which carries to rural life the benefits of transportation as well as greatly extending the Rural Free Delivery System throughout the country. And the farming classes who are intelligent and have long memories are not apt soon to forget what party brought them these substantial reforms in the way of legislation, nor, on the other hand, what party it was that fed them so long on promises and hypocrisy. [Applause.]

Mr. GLASS. Mr. Chairman, I yield to the gentleman from Mississippi [Mr. QUIN].

Mr. QUIN. Mr. Chairman, the farmers of this country have been knocking at the doors of Congress for a long time trying to get a rural-credit bill. They asked for fish and were always handed a serpent. I am proud that this committee has brought them out at least an eel, and I hope in the course of a few years that Congress will develop it into a speckled trout, because we realize that the proposition is going to help the farmers of this country. I know that the poor farmer of this country is not going to get money under this bill, because there is too much machinery about organizing banks and associations, but it is a recognition of a system that will develop into a rural-credit bill that will let the 40-acre farmer get money from this Government at a low rate of interest for a long term of years. That is what the American farmer must have.

The gentleman from Michigan [Mr. SMITH] the other afternoon stated that the banks in his country, three-fourths of them, loan money at long time at a low rate of interest. It is not true in the southern portion of this Union. I do not think it is true in the southwestern portion. We can not get money there except for a short period of time and at a high rate of interest, and it is proper, because the commercial banks of this country are not presumed to make long-time loans at a low rate of interest. It is not in their line.

Under those circumstances, the Government ought to back the rural-credit system with national aid. I favor the Government of the United States being responsible for every dollar of the bonds. Then the farmer could get his money at a decent rate of interest. If the Government of the United States stands behind the national banks, if we have the Federal Government backing the national reserve banks for $800,000,000 under the currency act, why is it not proper for the Government itself to be behind the great rural-credit system of this country, to back the farm, the best security on earth? [Applause.]

It strikes me that the $9,000,000 proposed in this bill is nothing but a bagatelle. Still it is a good start. Nine million dollars is a mere trifle compared with the Army and Navy expenses, and yet for the great industrial business of the Republic the agricultural class must depend for its starter upon this bill, and it is finally going to develop into a real rural-credit bill, under which the average farmer can go and get his money at a low rate of interest for a long term of years up to 50 per cent of the value of his farm.

I congratulate the Committee on Banking and Currency for bringing out what it has. The great banking interests of this country have never wanted a rural-credit system put in operation. This committee, as I say, has brought in a bill that is a starter, and to the credit of this committee be it said that they have done more than any other committee has ever done in aiding the farmer to get a credit-banking system. We can not hope that the farmer will compete with the commercial enterprises, because the rate of interest for 90 days or 60 days is low.

The farmer must have his money for no shorter period than 12 months, and he needs it for several years, during a period of amortization, where he can make a small payment and an interest payment that will not hamper his business. But no business can succeed that must borrow half of its capital for 12 months at 8 or 12 per cent interest and pay it back at the end of the year. He can not pay it back unless he sells some of his resources. If the farmer could get the profit of his farm and pay back half the value of that farm in 12 months, all of us would be engaged in that business.

I am in favor of the McCumber bill in the interest of the farmers of this country. [Applause.] That bill has a simple method by which the farmer could get his money direct from the Government—the Government guaranteeing the bonds that would be issued for every deed-of-trust note up to half the value of the land covered by the deed of trust. Gentlemen talk about paternalism, but you forget that the agricultural business is the backbone of our Nation. All other types of industry and enterprise depend at last on the products of the farm. You can have no prosperity in this country unless the agricultural business is prosperous.

It has always been my contention that the Federal Government, even from the standpoint of economic reasons, ought to do more for the farmers than any other class in our country. Ask yourself the simple question, How can farm products necessary to feed and clothe the people be secured unless you have the requisite number of people engaged in farming to produce what our people must have? How do you expect to keep people engaged in the farming business if that business continues to prove unprofitable? Congress is doing a great deal in teaching the farmers scientific methods of farming—how to enrich impoverished soil and crop diversification, all of which is very valuable. We are also on the road to help him sell his products under a national marketing system, but we have not given him the benefit of any banking system adapted to his business. The farmer must have aid through some system to finance his farming operations. The bill we are considering to-day is intended for that purpose. I feel that it will not be of any especial benefit to the small farmers. Mr. Chairman, I voted for the McCumber bill in the closing days of the last Congress, and was sorry we failed to get it enacted into law.

The present bill, the joint work of the committees, is the best that could be reported, and if it fails to work after it becomes

a law public sentiment throughout this great country will force Congress to pass a rural-credit bill with sure enough Government aid in it. I am going to vote to amend this bill, and if we fail, then I will stand by the measure in its present form and do all I can to secure its passage, because I realize it is a long step in the right direction and an unmistakable recognition of the principle of Government aid in a banking system for the American farmer.

Gentlemen, I feel that sentiment is going to ripen, and in a very few years Congress will pass the real rural-credit bill, which the farmers need and to which they are entitled. This bill we are discussing is only the beginning of the legislation which I see in sight. The great city banks of America have been standing in the way of a rural-credit bill. We have knocked down their barriers and started on the road to rural-credit legislation. The farmers are not going to let Congress stop. They are going to elect men to this body from all over the country who will stand up for their rights. It took them a long time to overcome the forces of the railroads and express companies in the fight for the parcel post. Yet they finally won; but they still have a fight to keep that splendid blessing in operation.

By some great power the Madden amendment was tacked on the Post Office appropriation bill that reduced the weight from 100 to 50 pounds for a package. I was greatly surprised when the vote was announced that the amendment had carried. I did not criticize anyone for voting that way. I was simply astounded, and wondered why the people had such a hard time getting and maintaining their rights in legislative bodies.

Mr. Chairman, while this bill may not be of much real value to the farmer in need of money, yet it is the first thing of its kind ever passed by Congress, and marks the dawn of a brighter day for the American farmer. All of the real friends of the farmer know that we will keep improving on it until in a very few years we will get through this body the bill we know the farmers ought to have. I for one shall keep on fighting his battles. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. GLASS. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. DOOLITTLE].

The CHAIRMAN. The gentleman from Kansas [Mr. DOOLITTLE] is recognized for five minutes.

Mr. DOOLITTLE. Mr. Chairman and gentlemen, I am an exponent of direct Government loans. I have talked that in this House during the time I have been in Congress.

This bill, while it does not provide for a direct loan, and has an amount of machinery in it which, in my opinion, is not a matter of necessity, nevertheless recognizes the feature which those believers in Government loans have thought necessary to reduce the interest rate paid by borrowers in that this bill recognizes and incorporates the Government-aid feature. The bill is a compromise between direct Government-loan advocates and private-capital advocates. If we can not get a whole loaf, we better take a half and continue our efforts toward a perfect measure.

The people of the State of Kansas, a part of whom I have the honor to represent on this floor, have gone on record, through a joint resolution of the House of Representatives and Senate of the State of Kansas, as favoring direct loans. And when the bill is read for amendment I shall offer the so-called Doolittle farm-loan bill as a substitute. I can foresee now that you will reject it, but the advocacy of direct loans as provided by my bill has not been all in vain. It is one extreme—and the proper one, I think—and the private-capital bills without any Federal aid are the other extreme.

It is a purely nonpartisan proposition, this matter of rural credits, and the resolution I have just referred to was passed by a Republican house of representatives and by a Democratic senate and was signed by a Republican governor.

It has been, indeed, a gratification and a pleasure to me to listen during the hours of debate on the measure before us to statements made by Representatives on this floor who at a former time had denounced or favored other rural-credit bills which had appeared before the House for consideration, but who to-day and on other days when this bill was under consideration have, I believe, unanimously expressed themselves as favoring the bill now under consideration. This is the best rural-credit bill ever favorably reported by the committee, and is the first one to contain any Federal-aid feature. At this time, Mr. Chairman, it looks as though this measure will pass the House unanimously—a wonderful expression of confidence in the Committee on Banking and Currency. I shall support the measure. It does not meet my approval in whole, but——

Mr. HAUGEN. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Kansas yield to the gentleman from Iowa?

Mr. DOOLITTLE. I yield to the gentleman.

Mr. HAUGEN. The gentleman has given this subject a great deal of study, and his judgment I greatly respect. In what respect is our section of the country to be benefited by this bill? That is, the gentleman's State and the State of Iowa, or the corn belt, where money is loaned at a low rate of interest?

Mr. DOOLITTLE. I will be candid in the expression of my opinion by saying that the eastern part of Kansas and the State of Iowa, as I understand the State to be developed in an agricultural way, will not materially benefit, so far as the rate of interest is concerned. There is much 5 per cent money to be had there now, but it may advance again. Other States and in the western part of Kansas, where the interest rate is higher than it is in the gentleman's State and in the eastern part of Kansas, will benefit in that respect.

Mr. HAUGEN. The high rate of interest is due, however, to the security offered?

Mr. DOOLITTLE. In a way; yes.

Mr. HAUGEN. And the productiveness of the soil and the safety of the guarantee are taken into consideration?

Mr. DOOLITTLE. Yes. But under this bill we will have this advantage that we do not now have under the private loaning system, namely, the amortization and the long time [applause], and those two items alone, coupled up with the Federal aid features of this bill, will be, in my opinion, sufficient to make it appeal to the vote of every man in this House who wants something better for the borrower than the private loan companies. [Applause.]

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. GLASS. I yield two minutes to the gentleman from Missouri [Mr. RUSSELL].

Mr. RUSSELL of Missouri. Mr. Chairman, there is a great demand throughout the country, and especially among farmers, for the enactment by this Congress of a rural-credit or a farm-loan bill, and I am glad to know that President Wilson desires and has asked Congress to pass such a bill as promptly as possible.

I am not a member of the Currency Committee, that has reported this bill to the House, but as a member of four other important committees I have been so very busy considering bills before them that I have not been able to give to this proposed legislation as careful attention as I would like to have done under different circumstances. I have great confidence in the chairman, in fact all of the members of the Currency Committee that have considered and approved this bill, and especially have great confidence in the judgment of the gentleman from Indiana [Mr. Moss], who is himself a practical farmer and who is, as I understand, the author of the bill now before the House. He has given much time and attention to this important question from the standpoint of the farmers and for the protection of their best interests. The bill as it is written may not be perfect, and I think probably should be amended in some particulars. However, it is a step in the right direction, and I will be glad to give it my support, but will be glad to vote for such amendments as may be offered that I think will improve its present provisions.

This and the last Congress have made splendid records for constructive legislation in the interest of the people, and I know of none that is more desirable or that will do more good to a greater number than a reasonable, a practical, and an effective farm-loan law, that we hope will enable the farmers of the country to borrow money for longer terms and at a lower rate of interest than they can at this time.

The Federal reserve act passed by the last Congress is and, I believe, will be a fitting monument to the efficiency and the wisdom of that Democratic Congress, and that law is to-day almost universally approved by the business and commercial interests of the country. This bill, if it becomes a law, will be a fitting companion to the currency law, and we hope and believe will give great assistance to many people.

I sincerely hope the bill will pass and prove to be a great benefit to the entire country, and especially to the farmers of the country, many of whom are among the constituency that I have the honor to represent. [Applause.]

Mr. GLASS. I yield one minute to the gentleman from Missouri [Mr. ALEXANDER].

[Mr. ALEXANDER addressed the committee. See Appendix.]

Mr. GLASS. Will the other side use some of their time?

Mr. MANN. How does the time stand, Mr. Chairman?

The CHAIRMAN (Mr. FOSTER). The gentleman from Virginia has 39 minutes and the gentleman from California 19 minutes.

Mr. GLASS. There will be only one more speech on this side.

Mr. MANN. I yield nine minutes to the gentleman from Washington [Mr. LA FOLLETTE].

Mr. LA FOLLETTE. Mr. Chairman, I am in favor of a rural credit bill. I have listened to the gentlemen on the other side felicitating themselves that they are about to carry out the Democratic platform; but I am a little fearful that the farmers will find that the gentlemen who are giving them this rural credit bill, instead of giving bread to the farmers are handing them a stone. I hope it may be amended and materially perfected.

I realize that this is bound to be to some extent experimental legislation. We have not had anything of this character in this country. Probably the country is to be congratulated that it has not had anything of exactly this kind. There are a great many different features of this bill that are worthy of consideration, and no man can digest it and it can not be argued and all the points brought out in five or six hours' debate.

I will say for this particular bill that I think it is one of the best that has been introduced into the Congress since I have been a Member of the House. I have studied all the bills with some degree of care, but I am afraid that this will not be workable, and that you have put in a private banking provision that is going to militate against the success of your principal plan. You will start a lot of banks that, for the sake of making profit, will make concessions to the best people of the particular neighborhood in which they have established their bank, and will in that way prevent a great many neighborhoods from forming associations and getting the benefit of the new law. I do not consider it wise or expedient to inaugurate a business that is largely experimental and make provision under the same bill for establishing competition against the enterprise, and that is what the joint-stock land bank does.

It would naturally cater to the better and most prosperous would-be borrowers, and leave the less desirable risks for the Federal land banks to serve. The ability of the wealthier farmer to procure money at practically as low a rate through the joint-stock bank without buying stock or assuming any liability will induce him to do so, thus preventing in many instances the formation of associations that would have served his less fortunate neighbors.

Mr. TILSON. Will the gentleman yield for a question?

Mr. LA FOLLETTE. I will.

Mr. TILSON. From the gentleman's study of the bill does he conclude that farmers generally will be able to get money more readily and at a better rate than they are already able to secure money now?

Mr. LA FOLLETTE. I think the farmers in the better localities of the East and Middle West can get money more cheaply and to better advantage now than they can get it under this bill.

Mr. TILSON. Then the thing that it surely does is that it provides very expensive machinery and some very high-priced officials, and so far as we can be to any degree certain it will not benefit the farmer at all.

Mr. LA FOLLETTE. I would not go that far. I think it will benefit some farmers and in some localities, but I think it is not going to help the class of farmers who really need the help, because these private banks will take the best risks, and that will prevent those who can not get money easily from forming associations and getting the benefit of this principal plan. I think, if they are going to have this private banking feature, they should at least wait until they have established the principal banking plan, and then if they see that the other is needed provide it later. There has for many years been a demand and a need for rural-credit legislation, and, in my judgment, each year we have neglected and delayed the passage of a practical and efficient rural-credit law has added to the number of our tenant farmers, and is fast perpetuating a system that is extremely unwise and deleterious to the best interests of our country. No nation can have as high an order of citizenship or the same degree of patriotism in a land tilled by tenant farmers as it would have from a land of home owners, and I think the children raised under the two conditions would develop very different ideals and conceptions of country surrounded by the two environments. God grant that tenantry will never predominate in our beloved country.

Mr. MILLER of Pennsylvania. Will the gentleman permit a question?

Mr. LA FOLLETTE. I will.

Mr. MILLER of Pennsylvania. I have heard it spoken of that this will benefit the tenant farmer. If a tenant farmer has nothing but his team and farm implements, how can he borrow money under this bill?

Mr. LA FOLLETTE. He may.

Mr. MILLER of Pennsylvania. How?

Mr. LA FOLLETTE. If he can get some one to agree to sell him a piece of land, and then if his neighbors will take him into the association, and he is satisfactory to the board of appraisers, and all of the rest of the red tape that has to be cut before he can borrow the money, why, he will get it.

Mr. MILLER of Pennsylvania. He can only get 60 per cent, then, of the value. What becomes of the other 40 per cent?

Mr. LA FOLLETTE. He gets 60 per cent of the value of the land, and he can borrow 20 per cent on such improvement as he can carry full insurance on. The landowner can take the money thus borrowed as first payment and take a second mortgage to secure him on the balance.

Mr. MILLER of Pennsylvania. I should like to know how this bill benefits the tenant farmer, who has not got anything.

Mr. LA FOLLETTE. I think that is one of the weaknesses of this bill—that it does not look after the man who really needs assistance.

Mr. GLASS. I will say that if the gentleman will devise some scheme that will give something to a man who has not got anything I will be obliged to him if he will tell how to do it.

Mr. LA FOLLETTE. That would, of course, be a hard proposition; but I think it can be made possible for men with but very small holdings in property to become home owners and acquire that independence and feeling of security in their present and future that only abide with those "who can sit under their own vine and fig tree and no man can make them afraid." It is a difficult matter to help those who have nothing.

Mr. MILLER of Pennsylvania. If a man has got nothing, he can get nothing.

Mr. LA FOLLETTE. I will say to the gentleman that we have got to devise some plan in this country to assist those who practically have but little or else we will be a land of tenant farmers in a short time, and the country will be in the condition that some of the old countries in Europe were a few years ago.

Mr. CLINE. Does not the gentleman think that the bank where anybody could get something for nothing would be the best patronized bank in the country?

Mr. LA FOLLETTE. Yes; but if anybody can borrow money on land at a reasonable appraisement of its value, the loaner is liable to come out safe in the long run. What the Government needs to-day is to make provision for taking care of those who really need assistance and not to fix it so that people who do not need assistance can get money on land at any time. I realize that there has been a lot of study and investigation given to this matter by the framers of the bill, and that the intention of the proponents is good, but I am inclined to think that it will not work out for the benefit of the class of farmers that I mention and that the rate of interest is not going to be as low in the near future as gentlemen think it will be.

Mr. SWITZER. Will the gentleman yield?

Mr. LA FOLLETTE. Certainly.

Mr. SWITZER. What rate of interest does the gentleman think has to be paid under this bill.

Mr. LA FOLLETTE. Well, the gentleman from Arkansas [Mr. CARAWAY] figured out that it would cost the farmer 7 per cent, and I agree with him fully. The committee figures on 6 per cent as the maximum.

Mr. Chairman, I have had many letters in regard to this bill as it was originally introduced into the House. Many have asked me to vote against it, saying it would be of no practical benefit. I am loth to do that.

I have said that I hope this bill may be amended, although I am afraid that the committee, through pride of authorship, will be slow to accept amendment. The committee lays great stress on the time it has taken to investigate the various propositions incident to the legislation and the deep study given to the matter. Its members forget that other gentlemen have likewise given much thought to the subject and that more than two score of rural-credit bills have been introduced into the two branches of Congress, all of them containing more or less of real merit.

Mr. Chairman, I am not one of those who would turn down a measure, even though it had merit, because it had originated in committee where the control rested with my opponents politically. I have never been that narrow; I hope I may never be. Neither will I vote against a proposition that has merit simply because I think it does not go far enough in the right direction. I think it wiser to enact the law and trust it to be amended for the better after there has been some chance to demonstrate its shortcomings by its operation. He who expects

or waits for perfection before enactment is doomed to wait forever.

Mr. Chairman, I think it is time for this country to enact some rural-credit legislation. I can but think it will eventually prove to be of great benefit to our country. Some localities will naturally benefit more than others, because the relief is needed to a much larger degree in some sections of our country than it is in other communities. If it is beneficial to any considerable proportion of the United States, it is indirectly beneficial to all parts. I hope that by rural-credit legislation we may add to our home owners and to our rural prosperity.

If the investing public once acquires confidence in the securities offered by the Federal land bank, there is no doubt but that their bonds will be taken readily; and it is to be hoped that the bonds can be placed at 4 per cent or lower in a short time, and in all probability they will find a ready market in time at as low a rate as 3 per cent. This would give the borrower a maximum rate, covering all expenses, not exceeding 4 per cent. It will be that low, and, in my opinion, lower in time, but not in the near future. The main thing is to get the system firmly established; improvements and betterments will then naturally follow.

Mr. MANN. Mr. Chairman, I yield to the gentleman from Nebraska [Mr. KINKAID].

Mr. KINKAID. Mr. Chairman, the friends of a rural-credit system, for the last three Congresses, including the present, each successive session, have been promised an opportunity to vote upon such a measure. I am glad that finally we are to realize the privilege long delayed.

Mr. Chairman, I shall vote for the bill in order that rural-credits legislation, so important to the farming industry, shall be accorded a commencement. The bill is not acceptable to me, but I trust amendments may be secured before it shall be passed which will make it less objectionable. I shall work and vote for amendments which, in my judgment, are calculated to improve its provisions, and, in the end, shall vote for the bill on the ground that it will be the best measure now obtainable. My objection, in the main, is to the kind of a rural-credits system provided for rather than to the construction of the bill as a matter of form. I am frank to say, if the system or basic principle were acceptable to me I should not cavil about the form; in fact, I think the committee is entitled to credit so far as construction goes, and I wish to accord special credit to the distinguished and able gentleman from Indiana [Mr. Moss], who has performed so large a part in the make-up of the measure, as he was entitled to do, being a member of the commission sent to European countries to investigate rural-credit systems there. But the gentleman from Indiana was peculiarly well adapted for the great task independently of the trip made by the commission.

Mr. Chairman, the fundamentals of the bill, I fear, will not be acceptable to my constituents and the farmers in general throughout the United States. A very conspicuous objection to me is the top-heaviness of the system; the official machinery is too much extended, too complex, too many smaller wheels within the larger wheels, all of which amounts necessarily to the making of many steps to reach the goal of the granting of a loan. For instance, the intended borrower must first get himself initiated a member of a national farm-loan association, which will be attended with perhaps as much routine and scrutiny as if he were joining a fraternal or insurance society. He must first pass the requirements of this organization, then that of the Federal land bank, and even then the consummation, including the issuance of the bonds, must be approved by the Federal farm-loan board.

Mr. Chairman, why make the process of securing a loan so extended? In the first place, why have 12 regional Federal land banks? One would do better and cost less. In any event, before bonds can be issued the action of the Federal farm-loan board, sitting in Washington, will be required. Why not cut across the lots and allow the application to go direct to the final authority at the start? It is plain that much time would be saved in this way. It is now a matter of legislative and administrative history, well established by many years of experience which was very expensive to the Government, that the former policy of establishing district pension agencies here and there throughout the United States to cooperate with the Bureau of Pensions at Washington was uneconomical. It became so manifest that these district agencies were cumbersome and superfluous that session after session this body voted a repeal of the law creating them, but for many years the repeal was not adopted by the Senate. While the district pension agencies lasted it took longer to secure the payment of pensions than it does now, because now the bureau here at Washington communicates directly with the pensioner, while under the district system the Washington bureau first reported to the district agency and then the agency to the pensioner. It will be apparent to anyone that the time in which the pensioner would ordinarily receive his quarterly pay was at least doubled, and I have personal knowledge of many instances where, by reason of this complicated system, mistakes arose resulting in weeks and months of delay in the pensioner receiving his pension, which would not have occurred had he been communicated with directly by the bureau from Washington. It was a waste of time and money, with the likelihood of mistakes increased. I maintain there is even less excuse for the maintaining of the 12 regional banks than there was for the keeping up of these district pension agencies.

Assuming the bill will become law, I anticipate it will soon become the practice that the commercial banks will dispose of the bonds. It will be found as a fact that they will find most of the buyers of the bonds. One strong reason for this is that the business in general of the communities is transacted with commercial banks, while the province of the Federal land banks is so narrow and restricted as not to bring them in close touch with many persons having money with which to buy the bonds. It is very plain that if they should receive deposits subject to check, which very properly they will not be permitted to do, this would place them on a more nearly equal footing with the banks doing a commercial business with would-be bond investors.

The scheme is, of course, European and not American, in that it operates so directly against the single effort of one borrower. Individualism has been a strong characteristic of our American people, and, in my judgment, it has been one of the principal causes of the greater relative advancement made in our country than in European countries in all the walks of life. Under the system provided by the bill this single handedness, this individual independence concerning one's business transactions must be greatly impaired. The borrower can not make a start toward a loan without combining with nine of his neighbors and knowledge of the transaction becomes the common property of the whole neighborhood before anything has been accomplished. The news will travel from Dan to Beersheba before the loan has gotten started. The loan accomplished, it constitutes a very tangling alliance, for the borrower has tied himself up with nine other borrowers, and, while their interdependency is complete, the benefits and responsibilities are not necessarily to be equal; the loans are certain to differ greatly in amount. This combination of loans essentially creates a community of interest between the mutual borrowers; each is interested in the prosperity of the other nine, to the end that the loans may be paid and the legal individual liability therefor thereby become discharged. I do not argue that there is anything morally wrong in such a system, but it will constitute a great change fundamentally in the manner of doing business in our United States of America. It will inculcate and operate for dependence and against independent endeavor.

Mr. Chairman, so far I have not referred to the joint-stock banks provided for by the bill. These banks are not to be capitalized by Government funds, as are the Federal land banks. Ten or more individuals may secure a charter for one of these banks when they have paid in capital of at least $250,000. In some respects these banks are provided the same advantages and privileges as are accorded the Federal land banks, likewise in some respects are subject to the same restrictions, but in the main the two systems differ materially. Under the joint-stock bank system each borrower constitutes a tub standing on its own bottom, secures his own loan, and is responsible for the payment thereof independently of third persons. Like the Federal land bank, joint-stock banks are entitled to issue bonds representing the mortgages they hold and to place the same in the markets, the bonds not to draw interest at a greater rate than 5 per cent and, in effect, the mortgage made by the borrower to draw interest at a rate not to exceed 6 per cent. But much greater latitude is allowed these banks, and consequently a greater latitude will be afforded borrowers than is permitted Federal land banks. For this reason some of the Members view it that the joint-stock bank will militate against the successful operation of the Federal land bank; therefore, that it is not wise to create the joint-stock bank system, assuming that the Federal land bank is to be preferred as a system.

Mr. Chairman, why originate two different systems at the same time? Why not experiment with one system singly to begin with? It is plain to me as a mathematical proposition that the securing of a trial of the merits of the Federal land banks is diminished at least 50 per cent, maybe 75 per cent, by placing them in competition with the joint-stock land-bank system provided for in this bill.

Mr. Chairman, I beg to recall to the memory of the membership the McCumber bill, which was adopted in the Senate as an amendment to the Federal reserve act passed in 1913, but which the joint conference discarded. The essential part of the first section of that bill reads as follows:

*Be it enacted, etc.,* That there is hereby created in the Treasury Department a bureau to be known as the bureau of farm credits.

Mr. Chairman, these two lines constitute the foundation of a rural-credits system which it would be so easy for farmers to avail themselves of. It would establish a bureau of farm credits here in Washington to be presided over by an officer to be designated commissioner of farm credits. The bill further provides that National and State banks may become the agents of the bureau in taking applications for loans, examining and appraising farms, and examining the abstracts and sending all such papers to the commissioner here in Washington. Ten million dollars was to be appropriated for the purpose of purchasing the mortgages given, and the issuance of bonds representing the amount of the mortgages was authorized. The provisions of the bill are brief, simple, and practicable and easy of administration, mutually to borrowers and to the Government.

Mr. Chairman, the McCumber bill, instead of providing for a complicated system, is simplicity itself. Instead of employing language covering 60 pages, like the pending bill, the foundation of the bill is contained in 2 lines, and, with all details, covers but 8 pages. Instead of providing for 12 regional farm-land banks and authorizing in addition thereto joint-stock banks and providing national farm-loan associations, in addition to the farm-loan board to be established at Washington to govern all, the McCumber bill provides for only a farm-loan bureau, which would constitute a branch of the Treasury Department, with one chief officer at the head, to be named farm-loan commissioner. Instead of farm-loan applications having to pass the muster of two separate appraisals, action by two separate loan committees, and still await the final action of the farm-loan board at Washington, under the McCumber bill the application could be made to the nearest National or State bank acting as the agent of the bureau of farm credits at Washington; and the application being found acceptable, it would be forwarded by the bank to the bureau and the loan there consummated without further red tape or routine. Instead of paying 6 per cent interest semiannually, as the present bill provides, the McCumber bill requires the payment of but 4½ per cent annually. And instead of being tied up with nine other borrowers, each holden for each and all, under the McCumber bill each borrower acts independently of all others and he, individually, and his property are holden only for the amount he borrows. This bill was offered in the Senate as a substitute for the pending bill, but was voted down; and, without going into details, all the membership know it would not be practicable to secure its adoption in this body.

Mr. Chairman, I said at the start that I was going to vote for the bill in order to secure a commencement of rural-credits legislation, and I contemplate that the experience with the operation of the law which will be passed will commend further legislation as improvements upon the system. I shall vote for every amendment offered which I think will improve the bill as now formed and shall finally vote for the passage of the bill, because I am convinced of the great necessity for providing for the farming industry a means of securing long-time loans at low rates of interest to be paid on the amortization plan. Any amendments which may simplify the operation of the act or which may tend to add value to the bonds issued, anything which may improve their negotiability, to make them a gilt-edge security, in the estimation of the buyer, I shall deem it my duty to vote for for the mutual interests of both borrowers and the purchasers of the bonds. The more reliable the investment the easier it will be to sell the bonds and the bigger prices they will bring; hence the lower rate of interest it will be necessary for borrowers to pay. [Applause.]

Mr. MANN. Mr. Chairman, how much time remains to this side?

The CHAIRMAN. Ten minutes.

Mr. MANN. Mr. Chairman, I had not intended to discuss this bill at this time, not having been allowed any time, but one or two gentlemen who have been promised time are not here, and the gentleman from California turned the time over to me.

I want to ask a question or two of some one who has the knowledge and can answer. I will ask the gentleman from Virginia what rate of interest under this bill can be charged on the farm mortgages provided for in the bill?

Mr. GLASS. The limit of interest is 6 per cent.

Mr. MANN. Very well. I read in the bill, in reference to bonds, that the bonds shall bear a rate of interest not to exceed 5 per cent per annum. That seems very clear. That is on page 115:

Second. Every such mortgage shall contain an agreement providing for the repayment of the loan on an amortization plan by means of a given number of annual or semiannual installments sufficient in amount to cover, first, interest on the loan at a rate which shall be the same as that of the last series of farm-loan bonds issued by the bank making the loan.

The limit of interest on the bonds being 5 per cent, the last series could not have exceeded 5 per cent; and, as the bill says, the rate of interest on mortgages can not exceed that of the rate of interest on the last series of farm-loan bonds, apparently it would provide that the rate of interest on the mortgage could not exceed 5 per cent. This is as clear as can be. It is true that there is a provision for a charge for administration of 1 per cent, but that is not interest.

Mr. PHELAN. I can explain that, if the gentleman desires me to in his time.

Mr. MANN. If the gentleman will be brief; I can not yield for a speech.

Mr. PHELAN. I will point out that the first money that is loaned is not determined as to its rate, because no bonds will be issued. So it is possible to loan under the bill at 6 per cent.

Mr. MANN. Before any bonds are issued?

Mr. PHELAN. Yes.

Mr. MANN. Why did not somebody say that instead of saying that the rate of interest on the mortgages might be 6 per cent?

Mr. PHELAN. I will explain that, but it will take too long now.

Mr. MANN. It could not be 6 per cent.

Mr. GLASS. What it was intended to mean was that the rate of interest and the expense charges involved would be 6 per cent.

Mr. MANN. That is an explanation. I think the gentleman from Virginia is correct that that was what was meant to be said, but what was said was something different, because the two provisions are as contradictory as 5 and 6 trying to be made equal each other.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. MANN. Briefly.

Mr. MOSS of Indiana. The point that the gentleman raises is not a new one in the committee.

Mr. MANN. I had hoped that it was.

Mr. MOSS of Indiana. The best information that we can get is that the rate of interest includes not only the rate of interest but that which the bank charges for expenses.

Mr. MANN. That is no explanation. That does not explain, because the bill says that the rate of interest shall not exceed that on the last series of farm-loan bonds issued by the bank. That rate of interest could not exceed 5 per cent. According to the gentleman from Indiana [Mr. Moss] the 5 per cent includes 1 per cent administration charges, which would bring the real rate of interest down to 4 per cent, and nobody has claimed that.

Mr. MOSS of Indiana. The gentleman from Indiana never said any such thing.

Mr. MANN. That is exactly what the gentleman just said. He said that the rate of interest was supposed to include the administration charges—at least that is what I understood him to say.

Mr. MOSS of Indiana. I said that on the subject of mortgage banking Prof. Thompson——

Mr. MANN. Oh, I am not discussing mortgage banking. I am discussing this bill. There is one other thing to which I desire to call attention, because it seems to me to be amusing, and there is nothing like getting a little fun as you go along. How much time have I left, Mr. Chairman?

The CHAIRMAN. The gentleman has used six minutes.

Mr. MANN. Good. I can do this in four minutes. There is a provision for agents of Federal land banks. The Federal land bank can employ an agent to loan money. The Federal land bank may pay to the agent the actual money expended by him for expenses, and, in addition, may allow said agent not to exceed one-half of 1 per cent per annum upon the unpaid principal of the loan. That is the commission—one-half of 1 per cent per annum upon the unpaid principal of said loan. That is not an excessive rate of commission, just for attending to the business, but the agent, in addition to that, must collect the interest and the principal and forward it without charge, which probably would not entice the agents to do it, and, in addition to that, any agent negotiating any such loan shall indorse the same and become liable for the payment thereof. [Laughter.] I can just imagine these bankers in the country, who are intended to be the agents, lining up in solid phalanx, pushing to get into a Federal land bank for the opportunity to make a loan, attend to all

of the business for one-half of 1 per cent, and guarantee the payment of the loan!

Mr. MILLER of Pennsylvania. Supposing the agent is worth nothing, then what?

Mr. MANN. That is the only kind that would ever guarantee the loan. [Laughter.] How anyone could expect to find an agent who would attend to the business of loaning money on farm mortgages, investigating the security, drawing the papers, looking after the title, for one-half of 1 per cent, and then in addition to that collecting the interest twice a year and forwarding it without expense—if there be any expense he pays the charges—and in addition indorsing the paper and guaranteeing its payment, beats me. I would like to find that kind of "suckers" in Chicago. [Laughter.] It may be that nobody will ever borrow money in this way—I do not know; that is not the only method provided, and it may be that my distinguished friend from Indiana [Mr. Moss], who has given great study to this subject, can fully explain the matter, which I hope he will do when we reach it under the five-minute rule.

Mr. MOSS of Indiana. There are plenty of banks that do that for one-third of 1 per cent, who do not charge the one-half.

Mr. MANN. There may be. I would like to know some of them.

Mr. MOSS of Indiana. The Crédit Français, in France.

Mr. MANN. Oh, in some other country! Always when you can not give the information cite some place where you can not go. It is a wonder to me that they have not told us that that is the way they do it in heaven, for some day we may go there; but we can not get the information now.

Mr. GOOD. Does the gentleman from Illinois think that the indorsement of a person who would accept that kind of employment would add anything to the value of the paper?

Mr. MANN. I do not think that anybody will ever guarantee such paper who has any care at all for his own reputation, much less his own property.

Mr. MILLER of Pennsylvania. If he had nothing, he could afford to do it.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. GLASS. Mr. Chairman, do I understand that all time on that side has expired?

The CHAIRMAN. Yes.

Mr. GLASS. I yield the balance of my time to the gentleman from Massachusetts [Mr. PHELAN]. [Applause.]

The CHAIRMAN. The gentleman from Massachusetts is recognized for 39 minutes.

[Mr. PHELAN addressed the committee. See Appendix.]

The CHAIRMAN. General debate being concluded, the Clerk will read the bill.

Mr. LA FOLLETTE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LA FOLLETTE. At what time can we offer a substitute for the committee amendment?

The CHAIRMAN. By a rule which the House adopted, the Chair understands that we will now read the House bill section by section for amendment.

Mr. MANN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. As I recollect, the other day while I was eating lunch with the Speaker the rule was changed so as to provide that the House substitute should be read section by section, but I think nothing was said in reference to the status of it, whether it should be read section by section as an original bill or section by section as an amendment, to which only one other amendment could be offered. It seems to me that it ought to be considered as though it were an original bill, so that an amendment to it might itself be amended.

Mr. WINGO. I think if the gentleman from Illinois will refer to the agreement that was adopted by unanimous consent——

Mr. MANN. I have referred to it.

Mr. WINGO. It provides for doing the very thing that the gentleman suggests.

Mr. MANN. I think not.

The CHAIRMAN. The Chair has examined this rule, and evidently the intention of the House was that we should read the House bill as an original proposition.

Mr. MANN. It did not so state. Let us have an understanding about it.

Mr. GLASS. I hope that will be done.

Mr. MANN. Let us agree by unanimous consent.

The CHAIRMAN. Without objection, the bill will be considered as an original proposition.

Mr. MANN. To be read section by section.

The CHAIRMAN. The Chair hears no objection.

Mr. MANN. That was not what the rule stated.

The CHAIRMAN. The Chair hears no objection, and it is so ordered.

Mr. MORGAN of Oklahoma. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MORGAN of Oklahoma. Will it be proper for me to offer an amendment?

The CHAIRMAN. At the end of the section.

The Clerk read as follows:

*Be it enacted, etc.*, That the short title of this act shall be "The Federal farm-loan act." Its administration shall be under the direction and control of the Federal farm-loan board hereinafter created.

Mr. DOOLITTLE. Mr. Chairman, I offer a substitute for the section just read.

The Clerk read as follows:

Strike out the section read and substitute the following:

That a bureau is hereby created to be known as the bureau of farm loans, which is to be conducted under the control and direction of the Secretary of the Treasury, for the purpose of loaning money to bona fide tillers of the soil, taking as security for the repayment of said loans farm mortgages. Said Secretary of the Treasury is hereby authorized to prescribe and publish such rules and regulations, not inconsistent with the provisions of this act, as are necessary to put into force and effect the purposes and intent of this act.

SEC. 2. That the President of the United States shall, by and with the advice and consent of the Senate, appoint for a term of four years, at a salary of $6,000 per annum, a commissioner, who shall have, with the limitations herein stipulated, full charge of said bureau. The commissioner is hereby authorized to appoint one assistant commissioner, at an annual salary of $4,000 per annum, engage other employees, and incur other expenses necessary to establish, organize, and maintain said bureau, but the total preliminary and other expenditures for the fiscal year next succeeding the passage of this act shall not exceed the sum appropriated herein.

SEC. 3. That the President of the United States shall, by and with the advice and consent of the Senate, appoint an assistant commissioner for each State of the Union, whose term of office shall be for four years, or until his successor shall have been appointed and qualified, and his compensation shall be $4,000 per annum. The official title of such assistant commissioner shall be assistant commissioner of the bureau of farm loans, and the said assistant commissioner shall be a citizen of the State in which he is to serve as such assistant commissioner at the time of his appointment. He shall be well acquainted with the farming interests and the farm-land values of the State, and he shall maintain an office at the capital of said State. He is hereby authorized to employ such persons to aid him in and about the duties of his office as shall be actually necessary to carry on and perform the duties of his office.

SEC. 4. That whenever the said assistant commissioner of any State shall have ascertained that the value of the farm land offered as security is sufficient, and that the applicant or applicants are possessed of a good and sufficient title to the said property and are otherwise legally competent to execute a mortgage deed thereto, he shall, in writing, recommend to the commissioner of the bureau of farm loans at Washington, D. C., that the loan be made to said applicant or applicants, and thereupon the said commissioner of the bureau of farm loans, if he shall find that all the proceedings had in connection with the application for said loan were had and done in due form, shall, upon receipt of the mortgage deed properly drawn in favor of the Treasurer of the United States, pay over to the mortgagor or mortgagors the sum specified in said mortgage deed, but no loan shall be made in excess of 65 per cent of the value of the property, and the rate of interest on said loans shall not exceed 3 per cent per annum: *Provided*, That all loans shall be made for a period of 50 years, payable at the expiration of said time, or at any interest-paying period prior thereto at the option of the borrower: *Provided further*, That the borrower shall have the option of paying 2 per cent of the whole loan each year, and interest shall cease on the sums so paid from the date of payment, and at the expiration of said loan period of 50 years or upon repayment of all of said loan and interest the Secretary of the Treasury shall execute and deliver to the said mortgagor, his successor, heirs, administrators, devisees, trustees, or assigns, a good and sufficient receipt and release of said mortgage, provided all the conditions of said mortgage shall have been fulfilled by said mortgagor, his successors, heirs, executors, administrators, devisees, trustees, or assigns: *And provided further*, That no loans under this act shall be made for any other purpose than for the purchase of real estate to be actually occupied and used as indicated in section 1 by the borrower as a home, or for the erection, maintenance, or repair of permanent improvements on real estate owned by the borrower and occupied by him as a home, or for the repayment of prior outstanding indebtedness contracted for the purchase price of the real estate or for permanent improvements thereon.

SEC. 5. That each applicant for loans under the provisions of this act shall make written application therefor to the assistant farm-loan commissioner of the State where the land is situated and where the applicant is a resident, and shall state under oath in writing the true purpose for which said loan is desired. The taxable value as stated in the last local assessment of the land shall be considered the actual value thereof for the purposes of this act. Any false statement in the application for said loan shall, at the option of said assistant commissioner, notwithstanding any contract previously entered into, render the whole principal and interest on said loan immediately due and payable and subject to all legal processes for collection: *Provided*, That no person shall be permitted to borrow more than $12,000 regardless of the value of his land.

SEC. 6. That in order to provide the funds for said loans the Secretary of the Treasury of the United States of America is hereby authorized to have engraved and printed Treasury certificates to be designated Government currency of the United States, payable to bearer, which is hereby declared lawful money and legal tender in payment of all debts, public and private, taxes, excises, and dues to the United States, except duties on imports, and also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States, except interest on the public debt. The quantity and amounts of said Government cur-

rency shall be equal to the loans made under the provisions of this act, and in such denominations as may be determined by the Secretary of the Treasury: *Provided*, That as said loans and mortgages are repaid said Treasury certificates issued under this act shall be retired and canceled by the Secretary of the Treasury in amounts equal to the loans and parts thereof repaid. The mortgage deeds to farm lands accepted by the bureau of farm loans shall be held and deposited with the Secretary of the Treasury of the United States as security for said Treasury certificates.

SEC. 7. That any person or persons who shall make false representations respecting the value or title of any property with intent to procure a loan from said bureau of farm loans for more than 65 per cent of the value of the land or any person making a false statement as to the uses for which the funds borrowed under this act are to be employed shall be subject to a fine to be paid into the farm-loan fund of not exceeding $5,000 or subject to imprisonment for a term not exceeding five years at hard labor, or both such fine and imprisonment, within the discretion of the court.

SEC. 8. That the sum of $500,000 is hereby appropriated from any unexpended balance in the Treasury of the United States for the purpose of carrying out the provisions of this act.

Mr. MORGAN of Oklahoma. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MORGAN of Oklahoma. Is this a substitute for the section or for the entire bill?

The CHAIRMAN. The gentleman from Kansas offers it as a substitute for section 1.

Mr. DOOLITTLE. I will say to the gentleman that if the substitute is accepted, I shall move to strike out the rest of the committee bill.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this proposition be closed in 5 minutes.

Mr. DOOLITTLE. Reserving the right to object, Mr. Chairman, it might not be that any further discussion will be desired, but will not the gentleman withhold the request until after the 5 minutes have expired.

Mr. GLASS. I will.

Mr. DOOLITTLE. Mr. Chairman, during the time in the last two sessions of Congress when this House has been considering rural-credit legislation there has been a demand for direct Government loans and to do away with cumbersome and what some gentlemen deem unnecessary machinery, for the enactment of a bill that will reduce the interest rates to the borrower. This bill, in almost precisely its same form, was introduced by me during the Sixty-third Congress (H. R. 11755). It was reintroduced in this Congress last December (H. R. 4697).

The bill provides, as you have heard read from the Clerk's desk, for the establishment of a bureau of farm loans in the Treasury Department of the Government, to make loans on real estate as security to benefit the tillers and prospective tillers of the soil.

It is a home builder's bill, and will put a family on every quarter section in the Middle West, and insists that borrowers shall be residents of the farm to obtain the benefits of its provisions. It provides for the appointment of an assistant farm loan commissioner in each State, whose office shall be at the State capital. This is done to make the department easier of access and to expedite business. This commissioner is to pass on the title and see that all applications are made in due form; if he finds everything correct, he recommends the making of the loan to the bureau in Washington, who in turn instructs the preparation of the funds, and the money is sent to the borrower through the proper State commissioner. The loan can not exceed 65 per cent of the taxable value of the land nor more than $12,000 in any event. This limitation is made for safety, and the tax value is taken as the real value to do away with the necessity of a lot of appraisers and the chance for any favoritism. The loan can only be made for the purposes of purchasing land, permanently improving it, or paying off indebtedness for prior incumbrances contracted for the purchase price or improvements. This limitation is to prevent speculation. All loans are made for 50 years at not exceeding 3 per cent interest, payable at any time, and provides that 2 per cent per year may be paid on the principal sum—amortization it is called—thus wiping out the whole debt by paying 5 per cent, which includes interest and principal each year. As the mortgages are paid, just so is the currency issued on them retired and canceled. When the mortgage is all paid it is canceled and release recorded. And in the concluding section a penalty is provided for false statements and breach of conditions.

Could anything be more simple or of more merit?

Gentlemen, we have had a contest for many months during the last two sessions of Congress between those gentlemen opposed to any sort of Federal aid and those who believe in direct loans or some sort of Federal aid that will decrease the rates of interest. It has been my contention, and I believe the contention is still good, that so long as we have to rely on private capital to loan to borrowers, that the interest rate will not be materially lessened. It is nothing more than natural that a man or a company fortunate enough to have money to loan will loan it at the best rate of interest that he can get.

The money loaner is entitled to a reasonable rate of interest, and when the Government itself borrows money at 2 per cent, and these same capitalists furnish it, is it not time that we make a successful effort to have the United States to do this kind of loaning? There are more than enough other opportunities for the investment of capital. Good bonds and stocks are plentiful. If the facilities for procuring the cheapest loans are in the Government, as they are, why can not the citizens who compose it use it to supply their needs? Personally I am opposed to bonding the Government to raise funds for any purpose when it is possible to realize funds from any other legitimate source. We can make it unnecessary for the Government to issue bonds to loan to home builders. To avoid a bond issue, or, in other words, to avoid the necessity of the Government borrowing money to loan again, why not let the borrower execute his first mortgage to the Government and the Government issue the money required to him direct or through the proper intermediaries, and hold the mortgage for security? Is there any better security? I know of none. When any person desires to go to the farm to farm or to make improvements on his farm is there any reason why the interest rates should be so high that he can not, with all his effort and good seasons, make ends meet? And when the harvest comes after the year of toil and waiting should he not have the right to pay off so much of this mortgage as he wants to? And if he can not pay, because of crop failure or sickness or other misfortune, should he not have such a long-time loan that he need not be worried? And should not he be able to pay it off in installments without paying as much altogether as he now has to pay for interest alone? Of course. And this is brought about in my substitute. It is what we need. People the country over are interested in Government loans. It is before you now.

My bill provides for a larger scope. It goes on the theory that profit to the lender is not the prime consideration. It takes into consideration the welfare of the man who is to borrow, and the question of profit is not a consideration in the bill. I hope, Mr. Chairman, to have the expression from the House as to whether we are in favor of a direct loan or whether we are not in favor of a direct loan——

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. DOOLITTLE. Mr. Chairman, I ask for three minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. HOWARD. Will the gentleman yield?

Mr. DOOLITTLE. Yes.

Mr. HOWARD. If under your bill we give the farmers the right to take their land mortgages to the Federal Treasury and get money on them, by what process of reasoning can you deprive the industrial toiler from bringing up his security, his little house and lot he owns in the city, and getting his money from the Treasury?

Mr. DOOLITTLE. That has been a question which it will take some time to answer; but to be brief, I will say that other countries recognize that the farmer is at the mercy of the elements always.

Mr. HOWARD. Not any more than the industrial toiler.

Mr. DOOLITTLE. I have the resolution of the Kansas Legislature I referred to a while ago in my pocket—and I propose to put it into the RECORD—favoring this legislation and this particular bill:

House concurrent resolution No. 23.

A resolution requesting the Senators and Representatives from the State of Kansas in the United States Congress to vote for and to use their influence to secure the passage of a resolution entitled "A bill to establish a Government bureau to loan money on agricultural land as security," by Hon. DUDLEY DOOLITTLE.

Whereas the Hon. DUDLEY DOOLITTLE, Representative from the fourth congressional district of the State of Kansas, introduced in the National House of Representatives on January 16, 1914, H. R. 11755, a resolution entitled "A bill to establish a Government bureau to loan money on agricultural lands as security"; and

Whereas the said resolution or bill is in the interests of the agricultural classes of Kansas; and

Whereas this State prospers as the farm interests prosper: Therefore be it

*Resolved, by the House of Representatives of the State of Kansas, the senate concurring therein:*

SECTION 1. That the Senators and Representatives in Congress from the State of Kansas are requested and urged to give not only their votes but their undivided support and entire influence to this measure, and to inform the people of Kansas and the members of this legislature

of anything that can be done, either by the people or by their representative law-making bodies, to secure the passage of this beneficent legislation.

SEC. 2. That the Kansas delegation in Congress are hereby requested to unite in an energetic and vigorous effort to secure from the Congress of the United States this just recognition of the great agricultural interests of this State.

SEC. 3. That the chief clerk of the house and the secretary of the senate be instructed to prepare certified copies of this resolution and send one of such copies to each Member from the State of Kansas in the House of the National Congress.

SEC. 4. That a copy of this resolution be spread upon the journal of the house and of the senate.

I hereby certify that the above concurrent resolution originated in the house and passed that body February 5, 1915.

ROBERT STONE,
*Speaker of the House.*
I. E. LAMBERT,
*Chief Clerk of the House.*

Passed the senate March 12, 1915, as amended.

W. Y. MORGAN,
*President of the Senate.*
BURT E. BROWN,
*Secretary of the Senate.*

House concurred in senate amendment March 13, 1915.
Approved March 17, 1915.

ARTHUR CAPPER, *Governor.*

The bill appeals to these Members of Congress who would have the welfare of the borrower at heart as distinct from the matter of profit for the lender. It provides a sure and simple and an absolute way of reducing the interest rate, so that the farmer, or the man who would go to farming, may sometime be able to own his home. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas.

The question was taken, and the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read, it being in the nature of a substitute for the bill.

Mr. GLASS. Mr. Chairman, the amendment is very long, and I suggest that the gentleman from Oklahoma might take up a reasonable amount of time to explain his bill. As I have examined it, about 90 per cent of it is the verbiage of the bill reported by the Committee on Banking and Currency, and I think that we would make progress if he would explain the differences between his bill and that before the committee.

The CHAIRMAN. Does the Chair understand that the gentleman desires to ask unanimous consent that the amendment be not read but printed in the RECORD and that the gentleman from Oklahoma explain his amendment?

Mr. GLASS. I would like to take that course.

Mr. MANN. Mr. Chairman, I am not willing to vote against an amendment without first hearing it read.

Mr. MADDEN. I think it ought to be read.

Mr. MORGAN of Oklahoma. I would be very glad to do that.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that the amendment referred to be printed in the RECORD and be considered as read pending the explanation of the gentleman from Oklahoma. Is there objection?

Mr. MANN. Mr. Chairman, I ask for the reading of the amendment.

The CHAIRMAN. The gentleman from Illinois objects, and the Clerk will read.

Mr. SMITH of Michigan. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SMITH of Michigan. During the reading of this amendment, which is a long bill, is it to be subject to the five-minute rule?

The CHAIRMAN. It is but one amendment, and the amendment must be reported.

The Clerk read as follows:

That the short title of this act shall be "The Federal land-credit act."

DEFINITIONS.

SEC. 2. That wherever the word "county" is used in this act it shall be held to include any civil division of a State corresponding to a county. The term "Federal land-bank bonds" shall be held to include all bonds secured by farm mortgages or other collateral deposited with a Federal fiduciary agent under the provisions of this act. Wherever the term "first mortgage" is used in this act it shall be held to include any instrument in writing which gives a Federal land bank a first lien upon a farm to secure a loan thereon, together with the notes or other credit instruments secured thereby.

FEDERAL FARM-LOAN BOARD.

SEC. 3. That there is hereby created at Washington, D. C., a Federal farm-loan board, which shall be charged with the administration and execution of this act and of all acts supplementary or amendatory thereof.

The Federal farm-loan board shall consist of three members, who shall be appointed by the President of the United States, by and with the advice and consent of the Senate. Before appointing said board the President shall divide continental United States, excluding Alaska, into five districts, which he shall designate by number. He shall certify said districts to said board, which shall cause the same to be made of record. One member of said board shall be appointed for each of said districts, and the person so appointed shall have been an actual resident of said district at the time of his appointment for more than two years immediately prior thereto. Thereafter not more than one member of said board shall be a resident of any one of said districts. Not more than three of said members shall be appointed from one political party. They shall be citizens of the United States and shall devote their entire time to the business of the Federal farm-loan board and shall each receive an annual salary of $7,500, payable monthly, together with actual necessary traveling expenses.

One member of said board shall be designated by the President to serve for 2 years, one for 4 years, and one for 6 years, and thereafter each member so appointed shall serve for a term of 10 years, unless sooner removed for cause by the President. One of the members shall be designated by the President as the farm-loan commissioner, who shall be the chairman and the active executive officer of said board. Each member of the Federal farm-loan board shall within 15 days after notice of his appointment take and subscribe to the oath of office.

The first meeting of the Federal farm-loan board shall be held in Washington as soon as may be after the passage of this act, at a date and place to be fixed by the chairman of said board.

No member of the Federal farm-loan board shall be an officer or director of any institution, association, or partnership engaged in banking. Before entering upon his duties as a member of the Federal farm-loan board, each member shall certify under oath to the President that he is eligible under this section.

The President shall have the power, by and with the advice and consent of the Senate, to fill any vacancy occurring in the membership of the Federal farm-loan board; if such vacancy shall be filled during the recess of the Senate a commission shall be granted, which shall expire 30 days after the Senate convenes.

The Federal farm-loan board shall appoint one Federal fiduciary agent, one or more Federal land-bank appraisers for each land-bank district and as many special appraisers as it shall deem necessary. Federal fiduciary agents and Federal land-bank appraisers and special appraisers appointed under this section shall be public officials and shall have no connection with or interest in any institution, association, or partnership engaged in banking.

The salaries and expenses of the Federal farm-loan board and of Federal fiduciary agents and special appraisers authorized under this section shall be paid out of any moneys in the Treasury of the United States not otherwise appropriated. Federal land-bank appraisers shall receive such compensation as the Federal farm-loan board shall fix, and shall be paid by the Federal lank banks which they serve in such proportion and in such manner as the Federal farm-loan board shall order.

The Federal farm-loan board shall be authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as it may deem necessary to conduct the business of said board. All salaries and fees authorized in this section and not otherwise provided for shall be fixed in advance by said board and shall be paid in the same manner as the salaries of the Federal farm-loan board. All such attorneys, experts, assistants, clerks, laborers, and other employees, and all appraisers, shall be appointed without regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance thereof: *Provided,* That nothing herein shall prevent the President from placing said employees in the classified service.

Every Federal land bank shall semiannually submit to the Federal farm-loan board a schedule showing the salaries or rates of compensation paid to its officers and employees, and said board shall have power to disapprove such schedule or any item in it and to alter any or all salaries therein shown.

The Federal farm-loan board shall from time to time require examinations and reports of condition of all Federal land banks established under the provisions of this act, and shall publish consolidated statements of the results thereof. It shall cause to be made appraisals of farm lands as provided by this act, and shall prepare and publish amortization tables which shall be used by banks under its supervision.

The Federal farm-loan board shall prescribe a form for the statement of condition of banks under its supervision, which shall be filled out quarterly by each such bank and transmitted to said board.

POWERS OF FEDERAL FARM-LOAN BOARD.

SEC. 4. That the Federal farm-loan board shall have power—

(a) To organize and charter the united Federal land bank, Federal land banks, and national farm-loan associations, subject to the provisions of this act.

(b) To establish, in connection with the united Federal land bank, the rate of interest to be charged by Federal land banks for loans made by them under the provisions of this act and the rate of interest farm-loan bonds shall bear.

(c) To grant or refuse to Federal land banks authority to make any specific issue of farm-loan bonds.

(d) To make rules and regulations respecting the charges made to borrowers on loans under this act for expenses in appraisal, examining title, drawing legal papers, recording, and similar services.

(e) To require reports and statements of condition and to make examinations of all banks or associations doing business under the provisions of this act.

(f) To prescribe the form and terms of farm-loan bonds, and the form, terms, and penal sum of all surety bonds required under this act and of such other surety bonds as they shall deem necessary, such surety bonds to cover financial loss as well as faithful performance of duty.

(g) To exercise such incidental powers as shall be necessary or requisite to fulfill their duties and carry out the purposes of this act.

THE UNITED FEDERAL LAND BANK.

SEC. 5. That the united Federal land bank is hereby created. It shall be located in such State and at such city as shall be determined by the board of directors of such bank, subject to the approval of the Federal farm-loan board. Said bank shall have no capital stock or shareholders and no funds except such as shall be contributed by Federal land banks. It shall not be conducted for profit. Its chief work shall be to issue Federal farm-loan bonds for and in behalf of Federal land banks, to aid Federal land banks in the sale of their bonds, and to act for such banks, subject to the approval of the Federal farm-loan board, in all matters which will contribute to the unity of such banks, to the standardization of their business methods, to their economical administration, to the strengthening of their credit, or to the success in general of the land-credit system hereby established. The united Federal land bank shall be controlled by a board of 12 directors. Each Federal land bank shall elect one of said di-

rectors. At the time of his election such director must be a director of the bank by which he is elected. Should a director of the united Federal land bank cease to be a director of the bank by which he was elected, he shall thereby cease to be a director of the united Federal land bank. The terms of office of such directors and the officers of such bank shall be fixed by the Federal farm-loan board. The board of directors of the united Federal land bank shall elect a president, vice president, secretary, and treasurer. Such officers shall be directors of such bank at the time of their election.

The officers of such bank shall give their entire time to the business thereof, and shall receive such compensation as shall be fixed by the Federal farm-loan board. The board of directors may employ all the necessary assistants for the proper transaction of the business of such bank and fix their compensation, subject to the approval of the Federal farm-loan board. Within 90 days after its organization each Federal land bank, through its board of directors, shall elect one of its directors as a director of the united Federal land bank. Such directors, under a call or notice issued by the farm-loan commissioner, shall under their hands forthwith make an organization certificate containing such statements as shall be prescribed by the Federal farm-loan board, and file the same with said board, where it shall be preserved and made of record. The certificate shall be acknowledged before the judge of a court of record or a notary public.

Upon duly making and filing such organization certificate the bank shall become, as from the date of the execution of its organization certificate, a body corporate, and as such, and in the name designated in the organization certificate, it shall have power—

First. To adopt and use a corporate seal.

Second. To have succession until it is dissolved by act of Congress, or under the provisions of this act.

Third. To make contracts.

Fourth. To sue and be sued, complain and defend, in any court of law or equity, as fully as natural persons.

Fifth. To elect a president and a vice president, appoint a secretary and a treasurer and other officers and employees, define their duties, require bonds of them and fix the penalty thereof; by action of its board of directors dismiss such officers and employees, or any of them, at pleasure, and appoint others to fill their places.

Sixth. To prescribe, by its board of directors, subject to the supervision and regulation of the Federal farm-loan board, by-laws not inconsistent with law, regulating the manner in which its officers shall be elected or appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

Seventh. To establish a uniform rate of interest which every Federal land bank shall charge upon farm loans for the ensuing year and until otherwise ordered by said bank; to fix a uniform rate of interest which Federal farm-loan bonds issued under the provisions of this act shall bear, and a uniform rate of discount at which such bonds may be sold by any Federal land bank until otherwise changed by said bank, and to fix uniform fees or commissions which Federal land banks shall pay agents for receiving applications for farm loans and services connected therewith, and for the sale of farm-loan bonds, all of which shall be subject to the approval of the Federal farm-loan board and within the limitation and restrictions of the law.

Eighth. It shall have power, subject to the approval of the Federal farm-loan board, to act upon all propositions which will aid the Federal land banks to cooperate in conducting the business which they are authorized by this act to perform, with a view to standardizing business methods, appraisements, bookkeeping, forms, records, and any other things which will contribute to the economical administration of such banks, the welfare of borrowers, the security of investors, and to the prosperity of agriculture.

Ninth. To exercise, by its board of directors or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business herein described.

The funds necessary for the operation of the united Federal land bank shall be contributed by the Federal land banks in such proportions as shall be fixed by the Federal farm-loan board, based upon the amount of loans made by such bank.

FEDERAL LAND BANKS.

SEC. 6. That within 30 days after the passage of this act the Federal farm-loan board shall divide the continental United States, excluding Alaska, into 12 districts, which shall be known as Federal land-bank districts, and shall be designated by number. Said districts shall be apportioned with due regard to the farm-loan needs of the country, the conveniences of borrowers, and the economical administration of Federal land banks. No such district shall contain a fractional part of any State. Said districts may be changed by an act of Congress.

The Federal farm-loan board shall establish in each Federal land-bank district a Federal land bank, with its principal office located in such city within the district as said board shall designate. Each land bank shall include in its title the number of the district in which it is located, as Federal land bank No. 1, Federal land bank No. 2, and so on, and there shall be no other distinguishing feature in the names of Federal land banks.

Each Federal land bank shall be managed by nine directors. Three of these shall be appointed by the Federal farm-loan board and shall be known as public directors; three shall be elected by the shareholders of the founders' capital stock and shall be known as founders' directors; and three shall be elected by the advisory council of each Federal land bank and shall be known as borrowers' directors: *Provided*, That borrowers' directors shall be appointed in the first instance by the Federal farm-loan board and shall continue in office until their successors shall be elected by the advisory council of each Federal land bank. Not more than one borrowers' director or one public director shall be a resident, when appointed, of any one State, except in case a Federal land-bank district shall contain less than three States.

No person shall be eligible to the office of borrowers' director unless he shall be experienced in practical farming and at the time of his appointment actually engaged in farming operations within the State of which he is a resident. No director of a Federal land bank shall act as an officer, director, or employee of any other bank.

Directors of Federal land banks shall receive, in addition to any compensation otherwise provided, a reasonable allowance for necessary expenses in attending meetings of their respective boards, to be paid by the respective Federal land banks. Any compensation that may be provided by boards of directors of Federal land banks for directors, officers, or employees shall be subject to the approval of the Federal farm-loan board.

When $500,000 shall have been subscribed to the founders' shares of the operating capital stock of a Federal land bank, the Federal farm-loan board shall appoint three of such subscribers to constitute an organization committee, one of whom said board shall designate as chairman and another as secretary of such committee. The chairman shall call a meeting of the persons whose subscriptions to such stock shall have been accepted by the Federal farm-loan board and give notice to each subscriber by registered letter, addressed to the post office given in making such subscription. Such letter shall be mailed at least 10 days before the time set for such meeting. The chairman and secretary of such organization committee shall act as chairman and secretary, respectively, of the meeting of subscribers to such capital stock. Every subscriber shall have votes in proportion to the number of shares of stock for which he has subscribed. At such meeting the subscribers shall elect three directors of such bank. Within 10 days after the election and appointment of said nine directors they shall meet at such time and place as shall be fixed by the Federal farm-loan board and elect, from their number, a president, vice president, secretary, and treasurer.

The organization committee shall receive such compensation as shall be fixed by the Federal farm-loan board and the same shall be paid by the Federal land bank organized by it.

That at any time after its organization any person may make application to the Federal farm-loan board to become subscribers to the founders' shares of the operating capital stock of any Federal land bank at not less than the par value thereof in lieu of any portion of such stock held by the United States. Should such application be approved by the Federal farm-loan board the Secretary of the Treasury shall surrender to such bank such portion of its stock as the applicant applied to purchase, on the payment to such bank the price therefor, which shall be approved by the Federal farm-loan board. Thereupon the stock of the United States to the amount so surrendered shall be canceled, reissued, and delivered to such applicant. The said bank shall thereupon pay to the Secretary of the Treasury the par value of said stock. Any premium paid on said stock to said bank shall be placed in the guaranty capital thereof.

Said directors shall, under their hands, forthwith make an organization certificate, which shall specifically state—

First. The name assumed by such bank.

Second. The district within which its operations are to be carried on, and the particular city in which its principal office is to be located.

Third. The amount of capital stock and the number of shares into which the same is to be divided.

Fourth. The fact that the certificate is made to enable such persons to avail themselves of the advantages of this act.

The organization certificate shall be acknowledged before a judge of some court of record or notary public, and shall be, together with the acknowledgment thereof, authenticated by the seal of such court or notary, transmitted to the farm-loan commissioner, who shall record and carefully preserve the same in his office, where it shall be at all times open to public inspection.

The Federal farm-loan board is authorized to direct such changes in or additions to any such organization certificate as it may deem necessary or expedient.

Upon duly making and filing such organization certificate the bank shall become, as from the date of the execution of its organization certificate, a body corporate, and as such, and in the name designated in the organization certificate, it shall have power—

First. To adopt and use a corporate seal.

Second. To have succession until it is dissolved by act of Congress or under the provisions of this act.

Third. To make contracts.

Fourth. To sue and be sued, complain and defend, in any court of law or equity, as fully as natural persons.

Fifth. To elect or appoint directors, and by its board of directors to elect a president and a vice president, appoint a secretary and a treasurer and other officers and employees, define their duties, require bonds of them and fix the penalty thereof; by action of its board of directors dismiss such officers and employees, or any of them, at pleasure, and appoint others to fill their places.

Sixth. To prescribe, by its board of directors, subject to the supervision and regulation of the Federal farm-loan board, by-laws not inconsistent with law, regulating the manner in which its stock shall be transferred, its directors elected, its officers elected or appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

Seventh. To do such other acts as shall be authorized by law and exercise, by its board of directors or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business herein described.

POWERS OF FEDERAL LAND BANKS.

SEC. 7. That every Federal land bank shall have power, subject to the limitations and requirements of this act—

First. To issue through the United Federal Land Bank, subject to the approval of the Federal farm-loan board, and to sell, farm-loan bonds of the kinds authorized in this act, to buy the same for its own account, and to retire the same at or before maturity.

Second. To invest such funds as may be in its possession in the purchase of qualified first mortgages on farm lands situated within the Federal land-bank district within which it is organized or for which it is acting.

Third. To receive and to deposit in trust with the Federal fiduciary agent for the district, to be by him held as collateral security for farm-loan bonds, first mortgages upon farm land qualified under section 12 of this act, and to collect the dues, interest, amortization installments, and other sums payable under the terms, conditions, and covenants of the mortgages and of the bonds secured thereby.

Fourth. To receive and to set apart for expenses and profits the excess of interest payments on mortgages above the interest payments on farm-loan bonds for which said mortgages are held as collateral security.

Fifth. To acquire and dispose of—

(a) Such property, real or personal, as may be necessary or convenient for the transaction of its business, which, however, may be in part leased to others for revenue purposes.

(b) Parcels of land mortgaged to it as security.

(c) Parcels of land acquired in satisfaction of debts or purchased at sales under judgments, decrees, or mortgages held by it. But no such bank shall hold title and possession of any real estate purchased or acquired to secure any debt due to it for a longer period than five years, except with the special approval of the Federal farm-loan board in writing.

Sixth. To deposit its securities and its current funds subject to check with its depository or depositories as prescribed by this act, and to receive interest on the same as may be agreed.

Seventh. To buy and sell United States bonds.

RESTRICTIONS ON FEDERAL LAND BANKS.

SEC. 14. That no Federal land bank shall have power—

First. To accept deposits or to transact any banking or other business not expressly authorized by the provisions of this act.

Second. To loan on first mortgage except as provided in this act.

Third. To accept any mortgages on real estate except first mortgages created subject to all limitations imposed by this act.

CAPITAL OF FEDERAL LAND BANKS.

SEC. 8. That every Federal land bank shall have three kinds of capital, namely: Operating capital, reserve capital, and guaranty capital.

First. Every Federal land bank shall have operating capital stock of $1,000,000, which shall be divided into 100,000 shares of $10 each. Fifty thousand shares shall be known and designated as founders' shares and 50,000 shares shall be known and designated as public shares. Founders' shares may be subscribed for by any individual or by the United States. Public shares may be subscribed for only by the United States. The Secretary of the Treasury is hereby authorized and directed for, and in behalf of, the United States to subscribe for 50,000 public shares in the operating capital stock of every Federal land bank, and pay for the same out of any funds in the Treasury not otherwise appropriated, and there is hereby appropriated $6,000,000 for such purpose.

Within 30 days after organization of the Federal farm-loan board it shall open books of subscription for founders' shares of the operating capital stock of every Federal land bank. If within 90 days thereafter 50,000 shares of such stock shall not have been subscribed, the Secretary of the Treasury, for the United States, shall subscribe for the remainder thereof. He shall pay for the same out of any funds in the Treasury not otherwise appropriated.

No dividends shall be paid upon the public shares of stock owned by the Government of the United States. Dividends upon the founders' shares of stock shall be paid in the same amount as shall be paid upon shares of stock in the reserve capital of each Federal land bank.

The operating capital of any Federal land bank may be increased on petition of its directors and on the approval of the Federal farm-loan board: *Provided*, That said board shall not authorize the increase of the operating capital stock of any such bank to an amount that shall be more than one-twentieth of the reserve capital stock of said bank: *Provided further*, That should said board at any time authorize the increase of the operating capital stock of any Federal land bank, the original subscribers to such stock shall have a preferred right to subscribe for any increase in such stock under such rules and regulations as shall be prescribed by said board.

The Federal farm-loan board is authorized to prescribe the times and conditions of the payment of subscriptions to capital stock, to reject any subscription in its discretion, and to require subscribers to furnish adequate security for the payment thereof.

Founders' shares of stock owned by the United States shall be voted by the farm-loan commissioner, as directed by the Federal farm-loan board.

Second. Every Federal land bank shall have a reserve capital equal to at least 5 per cent of its outstanding loans. Every person applying for a loan from any Federal land bank shall also apply for the purchase of stock in said bank in an amount equal to 5 per cent of the amount of his loan. He shall also authorize the bank to retain out of the proceeds of his loan, in full payment for such stock, a sum of money equal to 5 per cent of the amount of the loan granted under said application and shall authorize the bank to cancel such stock on the payment of his loan. The reserve capital stock of every Federal land bank shall be divided into shares of $1 each, which shall not be assigned or hypothecated in any manner whatever. Said stock shall be held by said bank as collateral security for the payment of said loan and for the payment of the loans of others, as provided in this act. When any loan is paid in full, the reserve stock held by the borrower shall be canceled and retired, and the borrower shall be paid the face value thereof. Semiannual dividends shall be paid on reserve capital stock in an amount equal to the semiannual interest rate on the loan of the holder of the stock, which dividend shall be cumulative.

The reserve capital and the guaranty capital of every Federal land bank shall be managed separately and apart from other funds and shall constitute a trust fund for the use and benefit of the owners of Federal land-bank bonds and to secure the payment of such bonds, together with the interest thereon. Should any borrower fail to pay when due the interest on his loan, or the principal thereof, the Federal land bank in which said borrower holds reserve stock may enforce the lien on the reserve capital stock held by such borrower. Should such borrower at any time thereafter meet his obligations to said bank in full, so far as they may be due at any time, the said bank shall restore to said borrower such portion of his reserve capital stock which had been used to make good his defaults as aforesaid.

The reserve capital stock held by any borrower in a Federal land bank shall not be utilized to meet the default or defaults of other borrowers until said bank shall have first used its entire guaranty capital stock in making good its obligation due on farm-mortgage bonds.

When any portion of the reserve capital or of the guaranty capital of any Federal land bank has been used to pay the interest or principal on any mortgage or mortgages upon which the borrower or borrowers are in default and thereafter such borrower or borrowers shall meet such default or defaults through voluntary payment or foreclosure proceedings, the sum or sums so paid or so recovered shall be credited to the guaranty capital or reserve capital of such bank in proper proportion, and each borrower whose reserve capital stock may have been used in part to meet the original default in such cases shall be given due credit on the reserve capital stock held by him in such bank.

Third. That every Federal land bank shall have guaranty capital as follows:

First. Every Federal land bank shall set aside as a part of its guaranty capital, from the annual interest payment of each borrower, a sum equal to one-fourth of 1 per cent of the amount of each loan until the operating capital, the reserve capital, and the guaranty capital of such bank combined shall be a sum equal to 10 per cent of the outstanding bonds of such bank, and thereafter only when necessary to maintain a like ratio between the outstanding bonds of such bank and the total amount of its operating capital, reserve capital, and guaranty capital.

Second. Six millions of dollars is hereby appropriated, out of any funds not otherwise appropriated, which shall become a part of the guaranty capital of the 12 Federal land banks created by this act, which sum shall be divided equally between said banks. The Secretary of the Treasury is hereby authorized and directed to pay to each Federal land bank $500,000, which shall become a part of the guaranty capital of said bank.

The guaranty capital shall be a trust fund to insure the payment of the farm-mortgage bonds issued by each Federal land bank and for the use and benefit of owners of such bonds who shall have a first and prior lien thereon over all other creditors of such bank. It shall be deposited in one or more of the depositaries of the Federal land bank, secured by an equal amount of farm-loan bonds or United States bonds, and as soon thereafter as possible shall be invested in farm-loan bonds or United States bonds, which shall be deposited for safekeeping in such way as shall be prescribed by the Federal farm-loan board. The funds constituting the reserve capital of any Federal land bank shall be under the joint control of such bank and the Federal fiduciary agent for such bank.

The guaranty capital of every Federal land bank shall constitute the first and primary fund upon which such bank shall draw to meet the payments of any bond or interest thereon issued for it when such payments can not be met through funds otherwise provided herein. After any Federal land bank has exhausted its guaranty capital in the payment of its bonds and interest thereon, it may then use its reserve capital to meet any of its obligations due on farm-mortgage bonds.

It shall be unlawful for any Federal land bank, or any officer, director, or employee thereof, to use or appropriate any part or portion of the funds constituting the reserve capital or the guaranty capital of any Federal land bank for any other purpose than herein provided. It shall be the duty of the Federal land-bank board to provide special rules and regulations for safeguarding the reserve capital and the guaranty capital: *Provided*, That when the reserve capital, the guaranty capital, and the operating capital of any Federal land bank combined shall be equal to 10 per cent of the outstanding bonds of any Federal land bank, and so long as the same shall remain equal to 10 per cent of the outstanding bonds of any Federal land bank, the annual contributions of borrowers to the guaranty capital shall be placed in the general fund of such bank and be used in the payment of dividends on founders' shares and shares in the reserve capital, or for any other purpose for which such fund may be used under the terms of this act.

FEDERAL LAND-BANK ADVISORY BOARDS.

SEC. 9. That an advisory board for each Federal land bank is hereby created. Each State council of Federal land-bank associations shall elect three members of such advisory boards. The advisory board of each Federal land bank shall meet annually at the office of the Federal land bank of such district unless otherwise ordered by such bank and the chairman of the board of directors of such bank, or in his absence some other director of such bank shall act as chairman of the advisory council, and said council shall consider matters which have for their object the success of the land-credit system hereby established and the welfare of the borrowers of such banks. It shall be the special duty of members of said advisory council to present matters which are of special interest or importance to the borrowers in the States they represent. The advisory council may be in session three days, unless additional time be granted by the Federal farm-loan board. The Federal land bank shall pay the reasonable expenses of the members of such council in coming from their homes to attend such meetings, and also in returning thereto, and in addition thereto shall pay to such members a reasonable per diem for the time occupied in attending such meetings.

Should the advisory council make any recommendation to such bank in the interest of the borrowers from said bank which shall not be followed by said bank, the council, through its vice chairman, may appeal the matter to the Federal farm-loan board. If the matter appealed from be within the power of the Federal farm-loan board, or something over which it has jurisdiction, it may by order require the Federal land bank to comply with the recommendation of the advisory council.

FEDERAL LAND-BANK DEPOSITORIES.

SEC. 10. That prior to commencing business as herein provided every Federal land bank shall select one or more Federal reserve banks, or member banks thereof, or other banks or trust companies, to be approved by the Federal farm-loan board, as a depository or depositories, in which the said Federal land bank shall deposit all its funds of every kind and character, and no part or portion of such fund shall be withdrawn from such depository or depositories except on check or order signed by the secretary of such bank and countersigned by the president of such bank: *Provided*, That any funds which are, by the terms of this act, designated as trust funds shall not be withdrawn from any such depository or depositories except on check or order signed by the secretary of such bank and countersigned by both the president of such bank and the Federal fiduciary agent for such Federal land-bank district. From time to time additional depositories may be designated on the approval of the Federal farm-loan board. Every bank or other institution acting as a depository for the funds of any Federal land bank shall pay interest upon such deposits, payable semiannually, based upon the average daily balances. Every such depository shall secure the deposits of Federal land banks by delivering to such banks United States Government bonds, Federal farm-loan bonds, or other collateral security approved by the Federal farm-loan board. Such security in amount shall be such as shall be required by the Federal farm-loan board.

BANKS AUTHORIZED AGENCIES OF FEDERAL LAND BANKS.

SEC. 11. That all national banks and all State banks, including trust companies and savings banks, are hereby authorized to act as agencies for Federal land banks in receiving and transmitting applications for loans, in furnishing information as to the value of lands covered by applications for loans or other information relative thereto; to receive from Federal land banks the proceeds of any loan and pay the same to mortgagors or to the order of mortgagors, to sell Federal farm-loan bonds, and to do such other acts as shall be authorized by any Federal land bank, subject to the approval of the Federal farm-loan board: *Provided*, That every such bank authorized to act as aforesaid as the agent of any Federal land bank shall furnish such security to the Federal land bank for which it may act as shall be prescribed by the Federal farm-loan board.

For services rendered by any bank under the foregoing provisions Federal land banks are authorized to pay to such bank such sum as shall be fixed by the general council of Federal land banks, subject to approval by the Federal farm-loan board.

It shall be unlawful for any director, officer, or employee of any bank to make any charge or to receive or accept any pay whatsoever from

any person who is an applicant for a loan from a Federal land bank in securing such loan.

It shall be unlawful for any director, clerk, officer, or employee of any Federal land bank, either directly or indirectly, to secure loans from any Federal land bank, or to be interested financially therein, or to have any interest whatever in any bond or other security issued under the provisions of this act, or to be in any way personally interested in any of the business transactions of any Federal land bank. No bank shall be held responsible for any information he may give to any Federal land bank as to the value of any tract of land upon which an application for loan is pending, unless it shall be shown that such bank did not furnish such information in good faith, but with the intention of defrauding the Federal land bank for which it was furnished.

FEDERAL FARM-LOAN ASSOCIATIONS.

SEC. 12. That corporations to be known as Federal farm-loan associations shall be organized as hereinafter prescribed. When five or more persons in any county shall have secured loans from any Federal land bank, such bank shall appoint three of such persons as directors of the Federal farm-loan association of such county. Such directors shall hold their offices until their successors shall be duly elected at any regular meeting of the members of such association. The Federal farm-loan board shall prepare a form of an organization certificate to be used in the incorporation of Federal farm-loan associations. At least two of such forms shall be transmitted to the persons so appointed as directors by the Federal land bank. Such directors shall sign such organization certificate and duly acknowledge the same before a notary public or some other officer duly authorized in such county to administer oaths. Such certificate shall be transmitted to the Federal farm-loan board, and a copy thereof shall be transmitted to the Federal land bank of such district.

If the Federal farm-loan board shall find that such organization certificate shall be duly executed and in proper form, it shall approve the same and issue to said association a charter or certificate of its incorporation, and said Federal farm-loan association shall become a corporation as of the date of the acknowledgment of its organization certificate.

Every person who shall obtain a loan from any Federal land bank shall thereby become a member of the Federal farm-loan association of the county in which the land mortgaged to secure such loan shall be located, and in his application for loan he shall accept membership in such association, under the terms and conditions as prescribed in this act. He shall also, in such application, agree to assume all of the responsibilities and liabilities of such membership. He shall be entitled to all the advantages and benefits of membership in such association without the payment of any fee, commission, or assessment of any kind or character, except as provided in this act. His membership in such association shall continue until the payment in full of his loan, at which time his membership therein shall cease.

Federal farm-loan associations shall have no capital stock and shall not be conducted for profit. Their objects shall be to assist in the administration of the system of land credits established by this act, to assist Federal land banks in conducting their business, and to provide an organization through which and by which the members thereof shall cooperate with each other in securing credits, in the payment of their loans and in other proper lines for their mutual benefit and for the promotion of agricultural development.

The directors elected at the first election of any Federal farm-loan association shall hold their offices for one, two, and three years, respectively. Thereafter directors shall hold office for terms of three years each. The directors shall serve without pay. Any Federal land bank may, however, employ any director or member of any Federal farm-loan association and pay him for such service. One of the directors shall be designated as chairman, one as vice chairman, and one as secretary-treasurer. Such officers shall perform such duties as are customary for such officers to perform and such other duties as may be prescribed by such association.

Every Federal farm-loan association shall adopt by-laws and rules for its government on such form as shall be prepared and approved by the Federal farm-loan board.

Every farm-loan association shall appoint one or more appraisement committees consisting of three members, who shall perform such duties in the appraisement of land offered as security for loans in said county as shall be prescribed by the Federal farm-loan board.

Federal farm-loan associations shall have power to adopt and use a corporate seal, to have succession until dissolved by act of Congress or under the provisions of this act, to sue and be sued, complain and defend, in any court of law or equity, as fully as natural persons, to do any other act prescribed by law, and to make such contracts as may be prescribed by the Federal farm-loan board.

The directors of Federal farm-loan associations shall meet at such time and place as shall be designated by the chairman of the board. A majority of such board shall constitute a quorum for the transaction of such business.

The members of every Federal land-bank association shall meet every three months in regular meeting. Special meetings may be called by the chairman of the board of directors. A majority of such members shall constitute a quorum. The officers of the board of directors shall be the officers of the general assembly of the members of the Federal farm-loan association. In all meetings of Federal farm-loan associations each member thereof shall have one vote.

Until such time as borrowers in any county or parish shall be organized as provided in this section, the individual borrowers in such county shall be regarded as a national farm-loan association, and all the provisions in this act in any way referring to national farm-loan associations shall be held to refer to individual borrowers in any county before organized as herein provided.

Where it shall be determined by any Federal land bank that a county includes a larger area than should be included in a single national farm-loan association, such county may be subdivided into more than one district, and a national farm-loan association may be organized in each of said subdivisions, and each of such subdivisions shall be held to constitute a county, so far as the provisions of this act shall relate to the organization and administration of national farm-loan associations and the liabilities of the members thereof.

MUTUAL PROTECTIVE FUND.

SEC. 13. That a separate account shall be kept by every Federal land bank of dividends due to the members of each Federal land-bank association. The dividends due any borrower shall not be paid to him in cash until such dividend shall be an amount equal to 1 per cent of the face value of his loan, but shall be placed to the credit of the member, and also to the credit of such Federal land-bank association, and so remain until the loan of such member shall be paid, unless paid out as herein provided. The amounts so credited shall be known as the mutual protective fund. Such dividends shall draw interest in favor of the member at the annual rate the bank receives thereon from its depository or depositories. Should any member of any Federal land-bank association at any time be in default in the payment of interest due on his loan he may apply to his association for financial assistance, and should the said association by majority vote of its members act favorably thereon said association shall direct the Federal land bank holding such loan to pay the interest in default as aforesaid and charge the same to the mutual protective fund of such association.

ASSOCIATION DISTRICTS.

SEC. 14. That every Federal land bank shall divide each State included in the Federal land-bank district in which it is located into as many divisions as there shall be congressional districts in said State at the time of the passage of this act, and said districts shall be known as "association districts." They shall be formed with a view to the convenience of members of Federal land-bank associations and with a view to providing facilities of transportation for such members in attending meetings of the district council of such associations, but no association district shall contain a fractional part of a county. The chairmen of the board of directors of the Federal land-bank associations within each association district shall constitute the district council of Federal land-bank associations. The district council of each Federal bank association shall meet annually at such time and place as shall be designated by the Federal land bank of the Federal bank district in which such association is located. One of the directors of such Federal land bank shall meet with the district council of Federal land-bank associations and shall act as chairman of such council. Such district council may take under consideration any matter which may aid borrowers in the payment of their obligations to the Federal land bank or that may in any way contribute to the well-being of such borrowers or to the success of the land-credit system established by this act. It shall be the duty of every Federal land bank, through the district councils of Federal land-bank associations, to render every assistance possible to the borrowers of such bank and to encourage and enable such borrowers to use the system of land credit established by this act for the promotion of agricultural expansion and prosperity and to contribute to the welfare of its borrowers.

The Federal land bank of such district shall pay the chairman of the board of directors of each Federal land-bank association his reasonable expenses in attending such meetings and may also pay him reasonable compensation for the time necessarily occupied. District associations may be in session three days.

STATE COUNCILS OF ASSOCIATIONS.

SEC. 15. That there is hereby established in each State a State council of Federal land-bank associations, which shall be composed of two delegates from each district council of Federal land-bank associations. State councils shall be held at such time and place as shall be fixed by the Federal land bank of each district. At the annual meeting of the district councils of Federal land-bank associations such councils shall each elect two delegates to the State council of the Federal land-bank associations of such State. When practicable, one of the directors of the Federal land bank of the district shall attend each State council of Federal land-bank associations, and when so attending shall act as chairman of said council. It shall be the duty of said chairman to bring before the council such matters as in his judgment will contribute to the success of the land-credit system established by this act, that will contribute to the agricultural development of such State, to the prosperity of the borrowers from the Federal land bank, or that will enable such borrowers to meet their obligations to such bank or add to their general welfare. Each State council of Federal land-bank associations shall elect two members of the advisory board of each Federal land bank. The Federal land bank shall pay the reasonable expenses of the delegates to the State council of the Federal land-bank association and allow them a reasonable compensation for the time occupied in attending the meetings of the said association.

RESPONSIBILITY OF BORROWERS.

SEC. 16. That the responsibility of borrowers from Federal land banks shall be as follows:

First. Every borrower from any Federal land bank shall be held individually responsible, equally and ratably and not one for another, for all contracts, debts, and engagements of every other borrower from said land bank to the amount of his stock in the reserve capital thereof. Such stock shall be held as collateral security for the responsibility herein prescribed: *Provided*, That the responsibility of one borrower for another, as prescribed in this section, shall be limited, restricted, and enforced as hereinafter set forth.

Second. Primarily the responsibility of one borrower for another or others as set forth in this section shall be held to apply and shall be enforced as follows:

First, as between members of each Federal land-bank association;

Second, as between members of Federal land-bank associations comprised in each association district;

Third, as between members of Federal land-bank associations in each State;

Fourth, as between members of all the Federal land-bank associations in each Federal land-bank district.

INTEREST ON BONDS AND MORTGAGES.

SEC. 17. That the rate of interest charged by Federal land banks on farm loans shall be uniform throughout the United States. The rate of interest which farm-loan bonds bear shall be uniform.

Before any Federal land bank shall make any farm loan the board of directors of the United Federal Land Bank, with the approval of the Federal farm-loan board, shall establish a uniform rate of interest which every Federal land bank shall charge on farm loans until such time as the said board of directors, with the approval of the Federal farm-loan board, shall establish a different uniform rate of interest which Federal land banks shall charge upon farm loans. Neither the board of directors of the United Federal Land Bank nor the Federal farm-loan board shall have power to authorize any Federal land bank to charge a rate of interest on farm loans which in any way varies from the uniform rate charged by other Federal land banks established under the foregoing provisions.

Before the united Federal land bank shall issue any farm-loan bond the board of directors thereof, with the approval of the Federal farm-loan board, shall establish a uniform rate of interest which all farm mortgage bonds issued for and in behalf of Federal land banks shall bear, until such time as the directors of the united Federal loan bank and said board shall establish another or different rate of interest which farm-loan bonds issued by such bank shall bear. Neither the

board of directors of the united Federal land bank nor the Federal farm-loan board shall have power to authorize any Federal land bank to issue farm-loan bonds bearing any other interest rate than the uniform rate established aforesaid. No farm mortgage bond shall bear interest in excess of 4 per cent per annum.

The annual interest charge, including amortization payments, upon any farm loan made by any Federal land bank shall not exceed 5 per cent upon the face of the loan. Interest shall be paid semiannually. From the annual interest payment of every borrower from any Federal land bank, such bank shall set aside an amount equal to at least one-half of 1 per cent of the face of the loan as a payment on the principal, which amount shall be placed in the sinking fund and used as provided in this act.

From the annual interest payment of every borrower from a Federal land bank an amount equal to one-fourth of 1 per cent of the face of the loan shall be placed in the guaranty capital as provided in this act.

From the annual interest payment of every borrower from a Federal land bank an amount equal to one-fourth of 1 per cent of the face of the loan shall be set aside by such bank to be used in the payment of the administration expenses of such bank, in the payment of dividends, and for any other purpose that may be authorized by law.

No Federal land bank shall sell its farm loan bonds at less than par value unless authorized to do so by the united Federal land bank, with the approval of the Federal farm-loan board.

Should it be necessary at any time, in order to secure the proper sale of farm-loan bonds, that such bonds shall be sold at less than their par value, the united Federal land bank, by its board of directors, may, with the approval of the Federal farm-loan board, establish an uniform rate of discount at which every Federal land bank shall sell farm-loan bonds issued for and in its behalf and thereafter, until otherwise ordered by the united Federal land bank, with the approval of the Federal farm-loan board, every Federal land bank shall sell such bonds so issued for it at the rate of discount so fixed.

SINKING FUND.

SEC. 18. That all amortization payments on the principal of any mortgage shall be set apart into a separate fund, to be known as the sinking fund, and is hereby declared to be a trust fund. The sinking fund shall be used for no purpose except for the payment, redemption, and retirement of the Federal farm-loan bonds issued by Federal land banks. The sinking fund of every Federal land bank shall be deposited in one or more of the depositories thereof, which shall pay interest thereon, payable semiannually, said interest to be paid upon the average daily balances in such fund for the six months immediately preceding the interest payment. Such interest shall be credited to such fund and become a part thereof. Such deposits shall be secured by United States Government bonds or Federal farm-loan bonds equal in amount to the sinking fund on deposit in any such depository.

The Federal farm-loan board shall prescribe rules and regulations which shall control every Federal land bank in its method and manner of selecting Federal farm-loan bonds for retirement or payment.

Every six months every Federal land bank shall call for payment or retirement Federal land-bank bonds equal in amount to the total sinking fund on hand at that time.

FARM-LOAN BONDS.

SEC. 19. That farm-loan bonds shall be issued in the name of the united Federal land bank for and in behalf of the Federal land bank asking for their issue, and the name of such bank shall plainly appear on the face thereof. All farm-loan bonds shall be secured as hereinafter provided in this section, and the facts showing such security shall be clearly stated on the face of said bond.

Farm-loan bonds issued by the united Federal land bank for and in behalf of any Federal land bank shall be secured—

First. By the farm mortgages deposited as collateral security therefor and by the reserve capital, the guaranty capital, and the operating capital of such bank; and the owners of farm-loan bonds issued for and in behalf of any Federal land bank shall have a first and prior lien over all other creditors upon farm mortgages so deposited and subject to the proviso next following, upon such reserve capital, guaranty capital, and operating capital for the payment of said bonds: *Provided*, That the foregoing provision shall be subject to the right of any Federal land bank to use any part or portion of its reserve capital, guaranty capital, and operating capital, or any other fund or asset it may have, except farm mortgages deposited as collateral security for the payment of any issue of farm-mortgage bonds, to meet the default in the interest payment on the bonds of any other Federal land bank and to meet the obligations, contracts, and debts of any other Federal land bank, in case of the insolvency thereof, as provided hereinafter in this section.

Second. By any other fund, capital, or asset of such Federal land bank in common with the claims of other creditors.

Third. By the reserve capital, the guaranty capital, the operating capital, and other assets of all other Federal land banks; and the owners of farm-loan bonds issued for and in behalf of one Federal land bank shall have a first and prior lien over all other creditors, except the owners of the farm-loan bonds of such banks, upon the operating capital, the reserve capital, and the guaranty of all other Federal land banks for the payment of such bonds.

Fourth. Every Federal land bank shall be primarily liable for farm-loan bonds issued for it and in its behalf and shall also be liable, upon presentation of farm-loan bond coupons, for interest payments due upon any farm-loan bonds issued by other Federal land banks and remaining unpaid in consequence of the default of such other land banks; and every such bank shall likewise be liable for such portion of the principal of farm-loan bonds so issued as shall not be paid after the assets of any such other land banks shall have been liquidated and distributed: *Provided*, That such losses, if any, either of interest or of principal, shall be assessed by the Federal farm-loan board against solvent land banks liable therefor in proportion to the amount of farm-loan bonds which each may have outstanding at the time of such assessment.

In the organization certificate of every Federal land bank the subscribers shall set forth that the liabilities prescribed in this section are fully assumed as one of the conditions upon which said bank shall be organized.

Every Federal land bank before commencing business shall, by appropriate action of its board of directors, in such form as shall be prescribed by the Federal farm-loan board, duly recorded in its minutes, obligate itself to become liable on farm-loan bonds as prescribed in this section.

The form of farm-loan bonds issued by a Federal land bank shall include, among other provisions, a copy or synopsis of this section of this act and a statement that the assets of all the Federal land banks are jointly and severally liable for the payment of each bond, and shall further state the physical basis of such bonds in farm lands and such other information as may be prescribed by the Federal farm-loan board.

APPLICATIONS FOR FARM-LOAN BONDS.

SEC. 20. That any Federal land bank which shall have voted to issue farm-loan bonds under this act shall make written application to the Federal farm-loan board, through the Federal fiduciary agent of the district, for approval of such issue. With said application said land bank shall tender to said agent as collateral security first mortgages on farm lands qualified under the provisions of section 12 or section 17 of this act, or United States Government bonds, not less in aggregate amount than the sum of the bonds proposed to be issued. Said bank shall furnish with such mortgages a schedule containing a description thereof and such further information as may be prescribed by the Federal farm-loan board.

Upon receipt of such application said agent shall verify said schedule and shall transmit said application and said schedule to the Federal farm-loan board, giving such further information pertaining thereto as he may possess. The Federal farm-loan board shall forthwith cause one or more special appraisers to make such investigation and appraisement of the securities tendered as it shall deem wise, and upon receiving a report from said special appraiser or appraisers it shall grant in whole or in part, or reject entirely, such application.

The Federal farm-loan board shall promptly transmit its decision as to any issue of farm-loan bonds to the united Federal land bank, to the land bank applying for the same, and to the Federal fiduciary agent of the district. Said agent shall furnish, in writing, such information regarding any issue of farm-loan bonds as the Federal farm-loan board may at any time require.

ISSUE OF FARM-LOAN BONDS.

SEC. 21. That whenever any Federal fiduciary agent shall receive from the Federal farm-loan board notice that it has approved any issue of farm-loan bonds he shall forthwith take such steps as may be necessary, in accordance with the provisions of this act, to insure the prompt execution of said bonds and the delivery of the same to the land bank applying therefor.

Whenever the Federal farm-loan board shall reject entirely any application for an issue of farm-loan bonds, the first mortgages tendered to the Federal fiduciary agent as collateral security therefor shall be forthwith returned to said land bank by him.

Whenever the Federal farm-loan board shall approve an issue of farm-loan bonds, the Federal fiduciary agent having the custody of the first mortgages and bonds tendered as collateral security for such issue of bonds shall retain in his custody those first mortgages and bonds which are to be held as collateral security, and shall return to the bank owning the same any of said mortgages and bonds which are not to be held by him as collateral security. The land bank which is to issue said farm-loan bonds shall transfer to said Federal fiduciary agent, by assignment in trust, all first mortgages and bonds which are to be held by said agent as collateral security, said assignment providing for the right of redemption at any time by payment as provided in this act and reserving the right of substitution of other mortgages qualified under section 12 or section 17 of this act. Said mortgages shall be deposited in such deposit vault or bank as the Federal farm-loan board shall approve, subject to the control of said agent and in his name as trustee for the bank issuing the farm-loan bonds and for the prospective holders of said farm-loan bonds.

No mortgage shall be accepted by a Federal fiduciary agent from a Federal land bank as part of an offering to secure an issue of farm-loan bonds, either originally or by substitution, except grst mortgages made subject to the conditions prescribed in said sections 12 or 17.

It shall be the duty of each Federal fiduciary agent to see that the farm-loan bonds delivered by him and outstanding do not exceed the amount of collateral security pledged therefor. Such agent may, in his discretion, temporarily accept in place of mortgages withdrawn United States Government bonds, farm-loan bonds, or cash.

The Federal farm-loan board may, at any time, call upon any land bank for additional security to protect the bonds issued by it.

FORM OF FARM-LOAN BONDS.

SEC. 22. That all bonds provided for in this act shall be issued under the authority and by the direction of the Federal farm-loan board. They shall be issued in denominations of $25, $50, $100, $500, and $1,000. They shall run for specified minimum and maximum periods, subject to be paid and retired at the option of the land bank at any time after their issue. They shall have interest coupons attached, payable semiannually, and shall be issued in series of not less than $50,000, whose amount and term shall be fixed by the Federal farm-loan board. They shall bear a rate of interest not to exceed 4 per cent per annum.

The Federal farm-loan board shall prescribe rules and regulations concerning the circumstances and manner in which farm-loan bonds shall be paid and retired under the provisions of this act.

Farm-loan bonds shall be delivered through the Federal fiduciary agent of the district to the bank applying for the same.

In order to furnish suitably engraved bonds for delivery to Federal land banks and joint-stock land banks, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved in the best manner to guard against counterfeits and fraudulent alterations, and shall have printed therefrom and numbered such quantities of such bonds of the denominations of $25, $50, $100, $500, and $1,000 as may be required to supply such land banks. Such bonds shall be in form and tenor as directed by the Federal farm-loan board under the provisions of this act, and shall bear the distinctive numbers and names of the several land banks by which they are issued. They may be exchanged into registered bonds of any amount and reexchanged into coupon bonds, at the option of the holder, under rules and regulations to be prescribed by the Federal farm-loan board.

When such bonds have been prepared they shall be deposited in the Treasury, or in the subtreasury or mint of the United States nearest the place of business of each land bank, and shall be held for the use of such bank, subject to the order of the farm-loan registrar of the district.

The plates and dies to be procured by the Comptroller of the Currency for the printing of such bonds shall remain under his control and direction, and the expenses necessarily incurred in executing the laws relating to the preparation of such bonds and all other expenses incidental to their issue and retirement shall be paid by the land banks. The Federal farm-loan board shall levy semiannually against the respective Federal land banks, in proportion to the issue of bonds by each, a sufficient amount to cover such expenses.

The examination of plates, dies, bed pieces, etc., and regulations relating to such examination of plates, dies, etc., of national-bank notes provided for in section 5174, Revised Statutes, are hereby extended to include bonds herein provided for.

Any appropriation heretofore made out of the general fund of the Treasury for engraving plates and dies, for the purchase of distinctive paper, or to cover any other expense in connection with the printing of paper currency, and any distinctive paper that may be on hand at the time of the passage of this act may be used in the discretion of the Secretary of the Treasury for the purposes of this act, and should the appropriations heretofore made be insufficient to meet the requirements of this act, the Secretary is hereby authorized to use so much of any funds in the Treasury not otherwise appropriated as may be required for the purpose of furnishing the bonds aforesaid, adequate reimbursement being duly made therefor under the provisions of this section.

SEC. 23. That the form of farm-loan bonds issued under this act shall be prepared by the Federal farm-loan board.

Each bond shall contain a certificate in the face thereof, signed by the farm-loan commissioner, to the effect that this bond has the approval in form and issue of the Federal farm-loan board and is legal and regular in all respects. It shall be signed by the president of the united Federal land bank and attested by its secretary. It shall contain in the face thereof a certificate, in such form as shall be prescribed by the Federal farm-loan board, signed by the president of the Federal land bank for which and in whose behalf said bond was issued, showing in effect that such bond was issued for and in behalf of said bank, and the said bank is bound primarily as prescribed by law for the payment thereof.

Each Federal land bank shall be held to be bound in all respects by the acts of its president in signing farm-loan bonds as prescribed in the foregoing paragraph and by the acts of the Federal farm-loan board in authorizing their issue, and every Federal land bank shall be held to be bound in all respects by the acts of the president of the united Federal land bank in signing farm-loan bonds.

There shall appear on the face of each farm-loan bond provided in this act the statement that such a bond is not taxable by National, State, or municipal authority.

AMORTIZATION AND INTEREST PAYMENTS.

SEC. 24. That whenever any Federal land bank shall receive any interest, amortization, or other payment upon any first mortgage pledged as collateral security for the issue of farm-loan bonds, it shall forthwith notify the Federal fiduciary agent of the items so received. Said agent shall forthwith cause such payment to be duly credited upon the mortgage entitled to such credit. Whenever any such mortgage is paid in full, said agent shall cause the same to be canceled and delivered to the proper land bank for transmission to the original maker thereof, or his heirs, administrators, or assigns.

Upon written application by any Federal land bank to the Federal fiduciary agent, it may be permitted, in the discretion of said agent, to withdraw any mortgages or bonds pledged as collateral security under this act, and to substitute therefor other mortgages or United States Government bonds not less in amount than the mortgages or bonds desired to be withdrawn, such substituted mortgages being qualified under section 12 or section 17 of this act.

Whenever any farm loan bonds, or coupons, or interest payments of such bonds, are due under their terms, they shall be payable at the land bank by which they were issued, in gold or lawful money, and upon payment shall be duly canceled by said bank. At the discretion of the Federal farm loan board, payment of any farm loan bond or coupon or interest payment may, however, be authorized to be made at any Federal land bank or any other bank under rules and regulations to be prescribed by the Federal farm loan board.

When any Federal land bank shall surrender to the proper Federal fiduciary agent any farm loan bonds of any series, canceled or uncanceled, said land bank shall be entitled to withdraw first mortgages and bonds pledged as collateral security for any of said series of farm loan bonds to an amount equal to the farm loan bonds so surrendered, and it shall be the duty of said agent to permit and direct the delivery of such mortgages and bonds to such land bank.

Interest payments on hypothecated first mortgages shall be at the disposal of the land bank pledging the same, and shall be available for the payment of coupons and the interest of farm loan bonds as they become due.

Whenever any bond matures, or the interest on any registered bond is due, or the coupon on any coupon bond matures, and the same shall be presented for payment as provided in this act, the full face value thereof shall be paid to the holder.

Amortization or other payments on the principal of first mortgages held as collateral security for the issue of farm loan bonds shall constitute a trust fund in the hands of the Federal land bank receiving the same, and shall be applied or employed as follows:

(a) To pay off farm loan bonds issued by said bank as they mature or as they shall be called for payment by any Federal land bank.

(b) To convert said payment into gold or lawful money.

(c) To deposit in the depository or depositories of such bank on interest, subject to the provisions of this act, until the same shall be used in the payment of farm loan bonds.

Federal land banks, in the order of their applications, shall have a preference over other subscribers in purchasing the whole or any part of an issue of farm loan bonds.

Every Federal land bank shall notify the Federal fiduciary agent of the disposition of all payments made on the principal of mortgages held as collateral security for an issue of farm loan bonds, and said agent is authorized, at his discretion, to order any of such payments or the proceeds thereof, wherever deposited or however invested, to be immediately transferred to his account as trustee aforesaid.

SEC. 25. That the board of directors of every Federal farm loan association shall appoint one or more appraisement committees, consisting of three persons, which committees may be designated by number. Every application for a loan must be accompanied with an appraisement of the land offered as security by one of such appraisement committees.

Said appraisement committee shall examine the land which is offered as security for the desired loan and shall make a detailed written report, signed by all three members, giving the appraisal of said land as determined by them and such other information as may be required by rules and regulations to be prescribed by the Federal farm loan board.

The written report of said appraisement committee shall be submitted to the Federal land bank, together with the affidavit provided for in this act, and the directors of said land bank shall examine said written report when they pass upon the loan application which it accompanies, but they shall not be bound by said appraisal.

Before any mortgage loan is made by any Federal land bank it shall refer the application, affidavit, and written report of the loan committee to one or more of the land bank appraisers appointed under the authority of this act, and such appraiser or appraisers shall investigate and make a written report upon the land offered as security for said loan. No such loan shall be made by said land bank unless said written report is favorable.

Whenever any Federal land bank shall desire to issue farm loan bonds under the provisions of this act, the Federal farm loan board shall refer the application of such land bank to one or more of the special appraisers appointed under the authority of section 3 of this act. Such special appraiser or appraisers shall make such examination and appraisal of the mortgages offered as collateral security for such bonds as the Federal farm loan board shall direct, and shall make a written report to said board. No issue of farm loan bonds shall be authorized unless the Federal farm loan board shall approve such issue in writing.

Forms for appraisal reports for farm-loan associations and land banks shall be prescribed by the Federal farm-loan board.

Land-bank appraisers and special appraisers shall make such examinations and appraisals and conduct such investigations, concerning farm-loan bonds and first mortgages, as the Federal farm-loan board shall direct.

No borrower under this act shall be eligible as an appraiser under this section, but borrowers may act as members of an appraisal committee in any case where they are not personally interested in the loan under consideration. When any member of an appraisal committee or of a board of directors is interested, directly or indirectly, in a loan, a majority of the board of directors of any farm-loan association shall appoint a substitute to act in his place in passing upon such loan.

RESTRICTIONS ON LOANS BASED ON FIRST MORTGAGES.

SEC. 26. That no Federal land bank organized under this act shall make loans except upon the following terms and conditions:

First. Said loans shall be secured by duly recorded first mortgages on farm land within the land-bank district in which the bank shall be situated.

Second. Every such mortgage shall contain an agreement for the payment of interest, and for the payment of a fixed number of semiannual installments sufficient to provide for an agreed rate of interest during the term and for the payment of the principal during and at the end of the term, on what is known as the amortization plan.

Third. Every such mortgage shall run for a period of at least 5 years and not exceeding 60 years.

Fourth. Every mortgage loan made under this act, for whatever period, shall provide for its extinguishment, at the option of the borrower, in whole or in part, at any date set for the payment of interest after one year from the date upon which said loan was made, as follows:

(a) By the tender at their face value of farm-loan bonds issued by the land bank holding such mortgage, all unmatured coupons being attached to said bonds.

(b) By advance payments in cash in sums of $25, or any multiple thereof. In such case the Federal land bank receiving such payments shall purchase for its own account, and credit at par upon the mortgage, farm-loan bonds in suitable amounts and of the proper series; said land bank may call, as may be necessary, farm-loan bonds in suitable amounts and of the proper series, and when such calls shall have become effective shall credit such payments on such mortgage.

Fifth. The rate of interest charged for such loans, including the annual amortization payment and all other annual or semiannual charges thereon, shall not exceed 5 per cent per annum.

Sixth. No such loan shall exceed 55 per cent of the value of the land mortgaged, said value to be ascertained by appraisal, as provided in this act.

In making said appraisal the actual earning power of said land shall be a principal factor. A reappraisal may be permitted at any time in the discretion of the Federal land bank, and such additional loan may be granted as such reappraisal will warrant under the provisions of this paragraph. Whenever the amount of the loan applied for exceeds the amount that may be loaned under the appraisal as herein limited, such loan may be granted to the amount permitted under the terms of this paragraph without requiring a new application or appraisal.

Seventh. The amount of loans to any one borrower shall in no case exceed a maximum of $10,000.

Eighth. Every applicant for a loan under the terms of this act shall make application on a form to be prescribed for that purpose by the Federal farm-loan board, and such applicant shall state the objects to which the proceeds of said loan are to be applied and shall afford such other information as may be required.

Ninth. Every borrower shall undertake to pay when due all taxes which may be lawfully assessed against the land mortgaged.

EXEMPTION FROM TAXATION.

SEC. 27. That every Federal land bank and every national farm-loan association, including the capital stock and reserve or surplus therein and the income derived therefrom, shall be exempt from Federal, State, and local taxation, except taxes upon real estate held, purchased, or taken by said bank or association under the provisions of section 11 and section 13 of this act. First mortgages executed to Federal land banks under the provisions of this act shall be deemed and held to be instrumentalities of the Government of the United States, and as such they and the income derived therefrom shall be exempt from Federal, State, and local taxation.

Farm-loan bonds issued under the provisions of this act and the income derived therefrom shall be exempt from Federal, State, and local taxation.

INVESTMENT IN FARM-LOAN BONDS.

SEC. 28. That farm-loan bonds issued under the provisions of this act by Federal land banks shall be a lawful investment for all fiduciary and trust funds, and may be accepted as security for all public deposits.

Any member bank of the Federal Reserve System may buy or sell farm-loan bonds issued under the authority of this act and accept them as collateral security for any loans made.

STATE LEGISLATION.

SEC. 29. That it shall be the duty of the farm-loan commissioner to make examination of the laws of every State of the United States and to inform the Federal farm-loan board as rapidly as may be whether in his judgment the laws of each State relating to the conveying and recording of land titles, and the foreclosure of mortgages or other instruments securing loans, as well as providing homestead and other exemptions and granting the power to waive such exemptions as respects first mortgages, are such as to assure the holder thereof adequate safeguards

against loss in the event of default on loans secured by any such mortgages.

Pending the making of such examination in the case of any State, the Federal farm-loan board may declare first mortgages on farm lands situated within such State ineligible as the basis for an issue of farm-loan bonds; and if said examination shall show that the laws of any such State afford insufficient protection to the holder of first mortgages of the kinds provided in this act, the said Federal farm-loan board may declare said first mortgages on land situated in such State ineligible during the continuance of the laws in question. In making his examination of the laws of the several States and forming his conclusions thereon said farm-loan commissioner may call upon the office of the Attorney General of the United States for any needed legal advice or assistance, or may employ special counsel in any State where he considers such action necessary.

At the request of the executive of any State the Federal farm-loan board shall prepare a statement setting forth in what respects the requirements of said board can not be complied with under the existing laws of such State.

EXAMINATIONS.

SEC. 30. That the Federal farm-loan board shall appoint as many land-bank examiners as in its judgment may be required to make careful examinations of the banks permitted to do business under this act.

Said examiners shall be subject to the same requirements, responsibilities, and penalties as are applicable to national bank examiners under the national bank act, the Federal reserve act, and other provisions of law. Said examiners shall be required to examine and report the condition of every Federal land bank at least twice each year.

Said examiners shall receive salaries to be fixed by the Federal farm-loan board, which shall be paid by the Secretary of the Treasury out of any money in the Treasury not otherwise appropriated.

PENALTIES.

SEC. 31. That any applicant for a loan from a Federal land bank who shall knowingly make any false statements in his application for such loan, and any member of an appraisement committee or any appraiser provided for in this act who shall willfully overvalue any land offered as security for loans under this act, shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than $5,000, or both. Any examiner appointed under this act who shall accept a loan or gratuity from any bank examined by him, or from any person connected with any such bank in any capacity, shall be deemed guilty of a misdemeanor, and shall be imprisoned not exceeding one year or fined not more than $5,000, or both, and may be fined a further sum equal to the money so loaned or gratuity given, and shall forever thereafter be disqualified from holding office as an examiner under the provisions of this act. No examiner shall perform any other service for compensation while holding such office, for any bank or banking or loan association, or for any person connected therewith in any capacity.

Any person who shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting any bond, coupon, or paper in imitation of, or purporting to be in imitation of, the bonds or coupons issued by any Federal land bank, now or hereafter authorized and acting under the laws of the United States; or any person who shall pass, utter, or publish, or attempt to pass, utter, or publish any false, forged, or counterfeited bond, coupon, or paper purporting to be issued by any such bank, knowing the same to be falsely made, forged, or counterfeited; or whoever shall falsely alter, or cause or procure to be falsely altered, or shall willingly aid or assist in falsely altering any such bond, coupon, or paper, or shall pass, utter, or publish as true any falsely altered or spurious bond, coupon, or paper issued, or purporting to have been issued, by any such bank or association, knowing the same to be falsely altered or spurious, shall be deemed guilty of a misdemeanor and shall be fined not exceeding $5,000 or imprisoned not exceeding five years, or both.

Other than the usual salary or director's fee paid to any officer, director, or employee of a national farm-loan association or a Federal land bank, and other than a reasonable fee paid by such association or bank to any officer, director, attorney, or employee for services rendered, no officer, director, attorney, or employee, of an association or bank organized under this act shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of such association or bank. No bank or association organized under this act shall charge or receive any fee, commission, bonus, gift, or other consideration not herein specifically authorized. No examiner, public or private, shall disclose the names of borrowers to other than the proper officers of a Federal land bank without first having obtained express permission in writing from the farm-loan commissioner or from the board of directors of such bank, except when ordered to do so by a court of competent jurisdiction or by direction of the Congress of the United States, or of either House thereof, or any committee of Congress or of either House duly authorized. Any person violating any provision of this paragraph shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding one year, or both.

Any person connected in any capacity with any farm-loan association or Federal land bank who embezzles, abstracts, or willfully misapplies any moneys, funds, or credits, or who without authority from the directors draws any order, assigns any note, bond, draft, mortgage, judgment, or decree, or who makes any false entry in any book, report, or statement of such association or land bank with intent in either case to defraud such institution or any other company, body politic or corporate, or any individual person, or to deceive any officer of a farm-loan association or land bank or any agent appointed to examine into the affairs of any such association or bank, and every person who with like intent aids or abets any officer, clerk, or agent in any violation of this section, shall be deemed guilty of a misdemeanor, and shall be fined not exceeding $5,000 or imprisoned not exceeding five years, or both.

Any person who shall deceive, defraud, or impose upon, or who shall attempt to deceive, defraud, or impose upon, any person, firm, or corporation by making any false pretense or representation regarding the character, issue, security, or terms of any farm-loan bond, or coupon, issued under the terms of this act; or by falsely pretending or representing that any farm-loan bond, or coupon, issued under the terms of this act by one class of land banks is a farm-loan bond, or coupon, issued by another class of banks; or by falsely pretending or representing that any farm-loan bond, or coupon, issued under the terms of this act, or anything contained in said farm-loan bond, or coupon, is anything other than, or different from, what it purports to be on the face of said bond, or coupon, shall be deemed guilty of a misdemeanor, and shall be fined not exceeding $5,000 or imprisoned not exceeding five years, or both.

DISSOLUTION AND APPOINTMENT OF RECEIVERS.

SEC. 32. That upon becoming satisfied that any Federal land bank has failed to meet its outstanding obligations of any description whatever when due, and is in default, the Federal farm-loan board may forthwith declare such bank insolvent and appoint a receiver and require of him such bond and security as it deems proper. Such receiver, under the direction of the Federal farm-loan board, shall take possession of the books, records, and assets of every description of such bank, collect all debts, dues, and claims belonging to it, and, with the approval of the Federal farm-loan board, or upon the order of a court of record of competent jurisdiction, may sell or compound all bad or doubtful debts, and, on a like approval or order, may sell all the real and personal property of such bank, on such terms as the Federal farm-loan board or said court shall direct. Such receiver shall pay over all money so collected to the Treasurer of the United States, subject to the order of the Federal farm-loan board, and also make report to said board of all his acts and proceedings.

No national farm-loan association, Federal land bank, or joint-stock land bank shall be dissolved without the written consent of the Federal farm-loan board.

ORGANIZATION EXPENSES.

SEC. 33. That the sum of $100,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended under the direction of the Federal farm-loan board for the purpose of carrying into effect the provisions of this act.

LIMITATION OF COURT DECISIONS.

SEC. 34. That if any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

REPEALING CLAUSE.

SEC. 35. That all acts or parts of acts inconsistent with this act are hereby repealed, and this act shall take effect upon its passage. The right to amend, alter, or repeal this act is hereby expressly reserved.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma.

Mr. MORGAN of Oklahoma. Mr. Chairman, I ask unanimous consent that I may proceed for 30 minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that he may address the committee for 30 minutes. Is there objection?

Mr. GLASS. Mr. Chairman, I object.

Mr. MORGAN of Oklahoma. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Oklahoma makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and three members present, a quorum.

Mr. MORGAN of Oklahoma. Mr. Chairman, I regret very much that I could not have been granted 30 minutes in which to explain this measure.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that the gentleman from Oklahoma may proceed for 10 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Oklahoma may proceed for 10 minutes. Is there objection.

There was no objection.

Mr. MORGAN of Oklahoma. Mr. Chairman, I am very glad, while we are under the five-minute rule, to have been allotted even 10 minutes in which to explain this bill. I called attention a few weeks ago to the fact that the Committee on Banking and Currency had made no report, although it had had the bill reported by the joint committee for several months, and if I remember correctly the chairman of the Banking and Currency Committee said at that time that there would be ample time for debate. Under the special rule adopted for this bill we were given only three hours on a side for general debate. I do not think there has been ample time given for discussion of this great problem.

Mr. MADDEN. How much time would the gentleman consider proper for an important matter like this?

Mr. MORGAN of Oklahoma. Mr. Chairman, so far as that is concerned, when we considered the bill to provide for the banking, commercial, and financial interests of the country a new currency and a new banking system, we had almost unlimited time. If I remember, the majority were weeks in the preparation of the bill in caucus, and we had a week, I think, for general debate—ample time. We considered the bill at a special session of Congress, when no other matters were before the Congress. The Members of the House had an abundance of time to study the bill. Now, when we have a bill in the interest of agriculture, in the interest of 6,500,000 farmers, we are cut off from proper time for discussion. The bill is taken up only a few days after it has been reported. We are given only six hours of general debate. We are then placed under the five-minute rule. We are allowed only five minutes to discuss an important amendment. Do you tell me that is ample time

for deliberation? Do you tell me that is sufficient time for proper consideration? Do you tell me that is fair to the farmers of the Nation? Not at all. It looks to me as though an effort was being made here to put through this bill without giving proper time in which to discuss it and to point out its defects. Why was not this bill reported here months ago?

When the Senate bill was sent over here a few days ago immediately the Committee on Banking and Currency comes into the House with a report substituting the Banking and Currency Committee's bill for the Senate bill. The committee could not have had time to give any serious thought to the important provisions in the Senate bill. So after months of delay the bill is to be rushed through the House without careful and deliberate discussion. I do not care for myself individually, I care nothing about this bill so far as my party is concerned. I have given the very best effort I could to contribute my mite to the proper solution of this great problem—not in the interest of my party or myself—and not alone in the interest of the farmer, but, as I believe, in the interest of the whole country. [Applause.] Yet when I ask for 30 minutes the chairman of the Banking and Currency Committee objected, which, under the rule, he has the right to do, but I say that that is not giving proper time for the explanation of the bill which I have offered as a substitute for the committee bill, neither is it giving the time that a subject of this importance deserves.

Mr. GLASS. Will the gentleman permit an interruption?

Mr. MORGAN of Oklahoma. Certainly; I will be very glad to do so.

Mr. GLASS. I will say to the gentleman that he has had more time than any gentleman on the Republican side. He has had 20 minutes more than the chairman of the Banking and Currency Committee, and furthermore I will say to the gentleman that when the question of time originally came up I consulted, as I always do, the senior Republican member of the Banking and Currency Committee and he suggested that three hours was ample time for general debate. Instead of three hours I asked for eight hours, and the Committee on Rules gave six hours, which is twice what the senior Republican member thought was sufficient. [Applause on the Democratic side.]

Mr. MORGAN of Oklahoma. I do not know, but I would like to hear from the senior member of the Banking and Currency Committee on the Republican side, who can answer for himself, and if he thought three hours was sufficient for the entire debate I differ from him very materially.

Mr. HEFLIN. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I will be glad to do so.

Mr. HEFLIN. The gentleman complains about not having time enough to discuss the bill. We have given the gentleman by unanimous consent 10 minutes, and the gentleman seems to be opposing the bill and not telling anything about its provisions or anything that is to take the place of them.

Mr. MORGAN of Oklahoma. Well, if I knew no more about it than some gentlemen I could tell all I knew in five minutes. [Applause on Republican side.]

Mr. HEFLIN. I judge that the gentleman knows very little about it because he is not now telling us anything about it.

Mr. MORGAN of Oklahoma. I can not yield further. I have offered a substitute here for the bill. In the few minutes I have left I will try to explain what it is. In the first place there is no provision which authorizes the formation of joint-stock banks. As you know, I think that is one of the great defects in the bill reported by the committee, and I hope when the proper time comes some gentleman will move to strike it out, and if no other person does so I shall try to do so myself, and I hope that provision will be stricken out. I believe with the provision stricken out the bill on the whole is a good measure and I expect to vote for this bill [applause], even if it is not amended in any particular. I think it can be amended in many particulars to help it, and I hope as we go along I will be able to show some of those points.

In the first place, I would strike out the profit-sharing joint-stock banks and give to the farmers of this Nation an institution which they will own and to whom all the profits will go, if there are any profits. This bill proposes that the Government shall help the farmers establish a great land-credit system. It proposes—and I think wisely—to use Government funds to aid in establishing these institutions. I believe if you will eliminate the joint-stock banks you will give to the farmers of this Nation a land-credit system that is surpassed by the land-credit system of no other nation in the world. Still, I think there are other important amendments which should be made. The bill which I have offered as a substitute for the committee bill creates the 12 district banks, following the system provided in the committee bill, and in addition to that it creates a central bank called the united Federal land bank.

Mr. HOWARD. Will the gentleman yield there?

Mr. MORGAN of Oklahoma. I will.

Mr. HOWARD. Why does the gentleman adopt the 12 regional banks for land-mortgage credit? What was the gentleman's object in doing so?

Mr. MORGAN of Oklahoma. Here is the point: I think the gentleman from Georgia and I have always agreed upon one thing, namely, that the bond-issuing power should be centralized in one institution; that is what I believe. But when the proposition was made to create 12 banks and make them responsible for each other's obligations, each other's bonds, I accepted the proposition as meeting the idea of centralization in the bond-issuing power.

Mr. HOWARD. Will the gentleman yield right there? Does not the gentleman think if that is true he has created eleven times more machinery than is necessary to run this system, and has made it much more expensive than it should be?

Mr. MORGAN of Oklahoma. I thought I would go that far with them, but my bill creates the united Federal land bank, which would be controlled by 12 directors, each one of those 12 banks electing one of the directors. Now, this united Federal land bank would not have any capital stock. It would not be a money-making institution, but it would be a legal corporation through which and by which and with which these 12 banks could carry out the purposes for which they are created.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN of Oklahoma. I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to proceed for five minutes. Is there objection?

Mr. GLASS. I was just about to make the same request.

The CHAIRMAN. The Chair hears no objection and the gentleman is recognized for five additional minutes.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I will.

Mr. MOSS of Indiana. The gentleman also in his bill adopts the farm loan association?

Mr. MORGAN of Oklahoma. Yes, sir.

Mr. MOSS of Indiana. Will the gentleman kindly tell the committee why he adopts the farm loan association?

Mr. MORGAN of Oklahoma. The gentleman wants to know why I adopt the farm loan association. My bill does provide for this association, but there is a very important difference between the farm loan association in my bill and the committee bill. In my bill these farm loan associations do not make loans. They are organizations by which and through which the borrowers can act in their own interests and for their own mutual benefit and to help the Federal land banks carry on their work. They have no power to make loans. They can not employ salaried officials. They are not allowed to make assessments and fines, as they are allowed to do in the committee bill; and, in other words, they are an organization which will accomplish all the farm loan associations will accomplish as constituted under the committee bill, and without any expense. And I warn the gentleman that the farm loan associations under his bill will be expensive to operate and largely increase the expense of the Government in their supervision.

Mr. MOSS of Indiana. Now, do you understand that the farm-loan association has the power to make any loans?

Mr. MORGAN of Oklahoma. I know this——

Mr. MOSS of Indiana. Does not the gentleman know that they do not have the power to make any loans?

Mr. MORGAN of Oklahoma. I know this, that in the bill the application to make loans is to the local association. I know that the money is transmitted through the local association. I know the profits that are made are transmitted to the stockholders of those associations. I know those associations are allowed to employ a salaried secretary and treasurer. I know they are allowed to make an assessment and a fine upon the members of that association. I know there is no limit to the expense which those associations may be to the borrowers, while under my bill there can be no expense. [Applause.] There is simplicity, there is economy; and one of the real objections to this 12-district bank system, with their farm-loan associations, is that it can not be economically administered.

Mr. MOSS of Indiana. How can the land bank, under your bill, make a loan, providing one of the national banks or State banks should refuse to act as agent?

Mr. MORGAN of Oklahoma. Under my bill all that is necessary is for the farmer in the least improved county of Indiana, or in that splendid county which the gentleman so ably represents in this House, or out on the prairies of northwestern Okla-

homa, or in New Mexico, to sit down at his table, around his own fireside, and address a postal card to the Federal bank, and it will bring a blank application for a loan. He will not need to intercede through a local association.

Mr. MOSS of Indiana. Do you mean to tell me that you can get the loan to the borrower without the intervention of an agent?

Mr. MORGAN of Oklahoma. I make that assertion. Cut out this red tape, cut out these formalities. Give the right to the bank to send an appraiser down there and appraise that land.

Mr. MOSS of Indiana. I am afraid the gentleman is not familiar with his own bill; that is all.

Mr. MORGAN of Oklahoma. Now, let us take the question of Government aid. There is more Government aid in my bill than in the bill that is pending.

Mr. MADDEN. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I will.

Mr. MADDEN. The advantage of the gentleman's bill over the bill pending in the House would be that all the man who wanted to make a loan would have to have would be a postal card, pen and ink, and a fireside? [Laughter.]

Mr. MORGAN of Oklahoma. Before he could get that loan he would have to furnish the required security.

I provide for three kinds of capital stock—operating capital stock, and reserve capital stock, and a guaranty capital stock. The operating capital of each bank will be $1,000,000, one-half furnished by the Government and one-half by private individuals.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMITH of Michigan. Mr. Chairman, I ask that the gentleman have 10 minutes more. He has devoted months to this, where other people have devoted hours.

Mr. MADDEN. To the substitute?

Mr. SMITH of Michigan. To the one that we are considering. It was introduced last Saturday only.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that the gentleman from Oklahoma may proceed for 10 minutes. Is there objection?

Mr. GLASS. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended 10 minutes and that at the end of 10 minutes we vote on the proposition.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this proposition close in 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MORGAN of Oklahoma. Mr. Chairman, I certainly thank the gentleman, the chairman of the committee.

The guaranty capital of each bank is to consist, first, of $520,000 subscribed by the Government.

Mr. MADDEN. In which bank? The one referred to in the gentleman's bill?

Mr. MORGAN of Oklahoma. Yes. Five hundred thousand dollars contributed to each bank by the Government.

Mr. MOORE of Pennsylvania. And that means a total of $6,000,000?

Mr. MORGAN of Oklahoma. Then I provide that there shall be $500,000 additional operating capital, which shall be subscribed by individuals and, if not subscribed by individuals, to be subscribed by the Government, but I give them representation on the board under such conditions that I believe private capital would subscribe that other $500,000.

Mr. MADDEN. The gentleman stated a moment ago that the capital in each one of the regional banks in his bill would be $500,000?

Mr. MORGAN of Oklahoma. It would be $1,000,000.

Mr. MADDEN. But the Government contribution?

Mr. MORGAN of Oklahoma. Yes; $500,000.

Mr. MADDEN. Whereas in the pending bill it is $750,000?

Mr. MORGAN of Oklahoma. It is just a loan in the present bill. There is no gift at all.

Mr. MADDEN. It will be a gift. There is no question about that.

In the gentleman's bill the regional banks save $12,000,000 to the people to start off with.

Mr. CARAWAY. The gentleman from Illinois says that under the pending bill $750,000 would be a gift. He overlooks the provision in the bill where private capital comes into the system, and 25 per cent of other stock subscribed is devoted to retire the Government loan.

Mr. MORGAN of Oklahoma. There is $1,000,000 in each bank for operating the bank. We have them make the loan and sell the bonds and turn the money over and over. I provide in my bill that when a man applies for a loan he shall also apply to purchase stock in the Federal land bank equal to 5 per cent of his loan. In that respect, while my system is more direct and plain, it really corresponds with what they contend for in this system. I require the farmer to put up 5 per cent, and that is what I call a reserve capital; and I require it to be set aside and be invested in Government bonds and be placed in trust funds to guarantee the payment of the bonds of the bank.

Mr. SMITH of Michigan. I am very much interested in the furnishing of this money. They have already stated in the pending measure that the Government is to furnish $9,000,000. Is that right?

Mr. MORGAN of Oklahoma. Yes, sir.

Mr. SMITH of Michigan. Now, I would like to inquire whether that is the Government's money or the people's money?

Mr. MORGAN of Oklahoma. The Government loaned it to start on.

Mr. SMITH of Michigan. Whose money is it—the Government's or the people's?

Mr. MORGAN of Oklahoma. The people gave it to the Government—paid it in.

Now, then, I provide, in addition to the operating capital, the reserve capital, which would always equal 5 per cent of the loans and 5 per cent of the bonds. Then I would provide for a guarantee capital. The guarantee capital is secured in this way: Every borrower out of his annual interest sets aside one-fourth of 1 per cent, which is placed in the guarantee capital. In addition to that I require the National Government to contribute $500,000 to the guarantee capital of each Federal land bank. Then I provide that that one-fourth of 1 per cent shall be continually paid until the operating capital, the reserve capital, and the guarantee capital shall equal 10 per cent of the bonds in circulation.

Now, gentlemen, after all is said and done, the most important feature of our land credit system is——

Mr. MADDEN. Mr. Chairman, will the gentlemen yield there?

The CHAIRMAN. Does the gentleman from Oklahoma yield to the gentleman from Illinois?

Mr. MORGAN of Oklahoma. Yes.

Mr. MADDEN. What will become of the 10 per cent, and how will it be utilized?

Mr. MORGAN of Oklahoma. That will be invested in farm-mortgage bonds or Government bonds, and held as a trust fund to secure the payment.

Now, what I was going to say is, that after all the most important feature for the success of this system is that the bonds shall be secured beyond the peradventure of a doubt. I do not care what other fault your bill may have, what other imperfections there may be in it, if your bond issue is secured beyond doubt, and if there are proper reserves for its protection and payment, then your system of land credit is bound to be a success. You go back to the old Landschaften, the oldest institution of its kind in the world, running for 150 years. The fact that their bonds are absolutely secure is the one thing that gave them the best credit that has ever been secured by a land-credit institution.

I believe the one great defect of this bill is that you have not properly safeguarded the reserves. I believe the reserves in your bill are not sufficient. I believe you are building up here an extension of credit that is not sound, and I shall try, as amendments are offered, to point out those defects, not to destroy the bill, not to prevent its passage, but to contribute all I can to make our land-credit system secure and sound, because when we are creating instruments of credit, manufacturing securities to go out and represent the farmers of this country, we owe it to the farmers that these securities shall be good beyond all question. And, on the other hand, in the interest of our Nation, in the interest of the thousands of investors, rich people and poor people, widows and orphans, whose funds will go into those bonds, we owe it to them that these bonds shall be made secure, and we can hardly go too far in creating a reserve fund that shall be ample to meet every loss. While it will take a little more funds and not be quite so active or productive, the benefits of that will be reflected back in the form of lower interest rates given to millions of farmers that will borrow money under this system. I believe, if you create these Federal land banks, if you take from the farm-loan association the power to make loans and make expenses that are bound to come through their operation, and increase to a certain extent the amount of funds to be furnished by the Government for operating capital, you will strengthen the reserve and make a better bill and confer more credit on Congress and on the party in power.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield there?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. As a student of economics and banking, the gentleman ought to know that under this bill the loan

associations have no power to make loans, and therefore you can not take that power away from them.

Mr. MORGAN of Oklahoma. I have heard it repeatedly stated, and I think the gentleman himself stated to me, that loan associations have no power to make loans; and yet I have read that section over and over again, and I still believe I am right. I will take the opportunity to read it when we come to that section. Is it not a fact that they make collections?

Mr. MOSS of Indiana. Not the farm-loan associations. The secretary-treasurer may, as he may be authorized by the land bank.

Mr. MORGAN of Oklahoma. Does not the farm-loan association distribute whatever dividends the borrowers get?

Mr MOSS of Indiana. The farm-loan association distributes dividends on its own stock.

Mr. MORGAN of Oklahoma. That is all there is to distribute dividends on—their own stock.

Mr. MOSS of Indiana. The only function that the farm-loan association has under this bill in making a loan is that the farm-loan association, through its directors, passes upon the character of the borrower, and through the loan committee makes the first estimate on the value of the land. It has nothing more to do but to transmit that information, and the whole subsequent transaction is with the land bank.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. MORGAN of Oklahoma. Mr. Chairman, I want to thank the committee for its indulgence and courtesy.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

The question was taken, and the Chairman announced that the "noes" seemed to have it.

Mr. MORGAN of Oklahoma. I ask for a division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 25, noes 59.

So the amendment was rejected.

Mr. NORTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from North Dakota [Mr. NORTON].

The Clerk read as follows:

Mr. NORTON offers as a substitute the following:

"A bill for the establishment of a farm credit bureau in the Department of Agriculture, to reduce the rate of interest of farm mortgages, and to encourage agriculture and the ownership of farm homes.

"*Be it enacted, etc.*, That there is hereby established in the Department of Agriculture a bureau to be known as the farm credit bureau. The said bureau shall be in charge of a commissioner, to be appointed by the President of the United States, by and with the consent of the Senate. The commissioner shall hold office for a term of 10 years, and shall be removed from office during such term only for cause. He shall receive a salary of $8,000 per annum. The commissioner may be removed from office by the Secretary of Agriculture for violation of law or neglect of duty, but only after a public charge duly made, of which he shall have reasonable notice, and then only upon approval in writing by the President of the United States."

Mr. GLASS. Mr. Chairman, I ask unanimous consent that the further reading of the bill be dispensed with, and that it be printed in the RECORD, and that the gentleman from North Dakota [Mr. NORTON] be permitted in 10 minutes to state the substance of it.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent to dispense with the further reading of the amendment, and that the gentleman from North Dakota [Mr. NORTON] be permitted for 10 minutes to discuss the amendment. Is there amendment?

Mr. MANN. Reserving the right to object, Mr. Chairman——

Mr. MADDEN. I object, Mr. Chairman. I would not want to vote against an amendment which had not been read.

The CHAIRMAN. The gentleman from Illinois objects.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. CULLOP having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed without amendment bill of the following title:

H. R. 6099. An act to amend section 72 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12766) entitled "An act to increase the Military Establishment of the United States," and had further insisted upon its amendments to the bill, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CHAMBERLAIN, Mr. BECKHAM, Mr. BROUSSARD, Mr. DU PONT, and Mr. WARREN as the conferees on the part of the Senate.

RURAL CREDITS.

The committee resumed its session.

The Clerk read as follows:

There shall also be in said bureau a chief clerk and such other clerks, agents, and employees as are provided for in this act, or as may be hereafter authorized by law or as may be authorized by the farm-credit board hereinafter provided for.

SEC. 2. That the said commissioner shall appoint a chief clerk, chief examiner, and a treasurer as officers of the bureau. This chief clerk shall receive a salary of $5,000 per year. The treasurer shall receive a salary of $4,000 per year, and each shall give bond in such sum and terms as shall be prescribed by the board hereinafter provided for. The commissioner shall engage such employees as shall be necessary, appoint appraisers and administrative agents of the bureau, and shall have charge of all employees and conduct of the business of the bureau. The commissioner shall have power to dismiss any of said officers, and is hereby authorized to incur all expenses necessary to the establishment, organization, and maintenance of the said bureau.

In the absence or disability of the commissioner the chief clerk shall act as deputy commissioner, and during the time he so acts shall perform the duties of the said commissioner, and no legal action shall rest upon a question of the authority of the said deputy commissioner to perform such duties.

Mr. MOORES of Indiana. Mr. Chairman, I ask unanimous consent that the further reading of this amendment be discontinued, and that the gentleman from North Dakota be given 10 minutes.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to discontinue the reading and that the gentleman from North Dakota [Mr. NORTON] be given 10 minutes. Is there objection?

Mr. MANN. Reserving the right to object, I do not think the crime of seventy-three ought to be repeated.

Mr. COX. I object to dispensing with the reading.

The CHAIRMAN. The gentleman from Indiana objects.

The Clerk read as follows:

SEC. 3. That the purpose of this act shall be to loan money upon the security of farm first mortgages direct to farmers, to farmers through the agency of farm credit associations, or as hereinafter provided. The term "farmer" for the purpose of this act shall be construed to mean any person, firm, or corporation engaged exclusively in the business of tilling the soil and raising farm products, or that shall hereafter engage in the said business.

The term "farm credit association" shall be construed to mean any association of farmers who actually reside upon and operate farms organized for the purpose of procuring better credit facilities with which to conduct the business of raising farm produce, and which shall comply with regulations prescribed by the board hereinafter created.

SEC. 4. That there is hereby created a board to be known as the farm credit board, hereinafter referred to as the board. This board shall consist of the Secretary of the Treasury, the Secretary of Agriculture, and the Postmaster General of the United States, who shall act without additional compensation, and two citizens of the United States, who are farmers within the meaning of this act, and who shall fairly represent the agricultural interest of the different sections of the country. The said farmers shall be appointed by the President, by and with the consent of the Senate, for a term of three years. Said farmers shall receive a per diem of $20 for each day their services are required by the board, together with their actual necessary traveling expenses between their homes and the place where the board may convene.

The board is hereby authorized and directed to prescribe procedure, regulations, and forms, not otherwise herein prescribed, and to provide, if at any time found necessary, for the establishment of branch bureaus in each of the several States for the best means of carrying out this act.

The Secretary of Agriculture shall be president of the board. Within 30 days after appointment, as hereinbefore provided, of the commissioner and chief clerk of the bureau, the board shall meet in the city of Washington, D. C., at a place designated by its president, and perform the duties herein provided, and shall hold further meetings upon the call of its president. The chief clerk of the bureau shall be secretary of the board without additional compensation. The secretary of the board shall keep a record of all its proceedings, and all rules and regulations which shall be preserved in the archives of the Department of Agriculture, and copies thereof shall be transmitted to the commissioner of the bureau. All decisions on matters coming before the board shall be by vote of the majority, each member having one vote, and three members present shall constitute a quorum for the transaction of business.

SEC. 5. That the commissioner of the bureau shall receive applications for loans, supervise collections, keep a correct registry of all securities, and, by his direction, all disbursements from the funds of the bureau necessary to carry out this act shall be made. He shall keep correct account of the loans, sales, investments, receipts, expenditures, profit and loss, and make a report of these and other work of the bureau to Congress at the end of the fiscal year.

SEC. 6. That the commissioner, chief clerk, and the treasurer of the bureau shall constitute the staff of the bureau before which all applicants for loans may appear personally or by attorney, and present additional evidence if their application shall have been denied in whole or in part. The decision of the majority of the said staff shall be final.

SEC. 7. That the commissioner of the bureau, by himself or his agent, duly appointed for such purpose, for and on behalf of the Government of the United States, is hereby authorized and empowered to appear in any United States court, or State, Territory, or District court in the United States in any legal procedure on any question arising from the making or collecting of loans, sales, or purchase made under the provisions of this act. The said commissioner may designate, under regulations prescribed by the board, any farm credit or financial association as loan agent, but farm credit association shall be preferred.

SEC. 8. That to secure money for the purpose of making the loans, as herein provided, and for the carrying out of the provisions of this act, the Secretary of the Treasury is hereby authorized and directed to

borrow money on the credit of the United States, as may be directed and under the terms and conditions prescribed by the board, and from time to time he shall, as may be requested, issue registered bonds to the United States, which shall be duly countersigned by the Comptroller of the Treasury. If so directed by the board the said Secretary of the Treasury shall issue registered bonds of one series to redeem the bonds of another series. All the bonds provided by this act shall bear interest not in excess of 3½ per cent per annum, payable semiannually, and shall be exempt from taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. The bonds issued under this act shall be issued for a term of 20 years and with the privilege of paying the same upon the date of maturity of any interest payment after 5 years. The bonds so issued shall not be sold at less than par, and shall be of such maximum and minimum denominations and terms not herein provided for as shall appear to the board to secure the best market among all the citizens of the United States, and the Treasurer shall give notice of his intention to issue bonds, and shall invite from the public generally subscriptions to said bonds. If the amount of said subscriptions shall exceed the amount of bonds to be issued, he shall give preference in accepting money for said bonds to those offered in the smallest amounts, the intention being to give as wide circulation and distribution to said bonds throughout the country as possible: *Provided*, That the total sum of bonds outstanding shall bear as close relation as possible to the sum of securities and accepted applications for loans held by the bureau: *Provided*, That after this act shall have been in active operation for one year said board shall have authority to reduce the rate of interest charged for farm loans thereafter made, and so also reduce the rate of interest upon the bonds herein provided for thereafter issued. It being the object of this act to pay as low a rate of interest upon said bonds as will float said bonds at par and to charge as low a rate of interest upon the farm loans herein provided for as will bring a sufficient revenue to pay said bonds, the interest thereon, and expenses connected with the making of said loans and losses, if any, incurred therein.

SEC. 9. That each day all sums of money procured by the sale of bonds, together with all receipts of the bureau, shall be covered into the Treasury of the United States, and it shall be the duty of the Treasurer of the United States to keep an account of such sums in his charge, and they shall not be used for any purpose other than as herein provided. With the exception of such part of this fund as shall be required to pay the running expenses of the bureau, the accrued interest on outstanding bonds, and the amount of bonds as they may mature, the fund so provided shall constitute a loan fund which shall be loaned or invested with as little delay as possible as herein provided.

SEC. 10. That the treasurer of the bureau is hereby authorized to draw warrants, which shall be countersigned by the commissioner, against the said loan fund, and the said treasurer shall keep account of such moneys in manner as shall be prescribed by the commissioner, and all accounts of the bureau shall be audited by the Auditor for the Department of Agriculture in the Department of the Treasury.

SEC. 11. That the bureau shall make to farmers loans on farm lands located in any of the States in the Union or in the District of Columbia, under rules and regulations made by the board and in accordance with the provisions herein. Said loans shall be secured by first mortgages made payable to the bureau, and shall bear interest at the rate of 4 per cent per annum, payable annually. That the terms of every loan extending for more than five years shall contain a mandatory provision for its amortization or reduction by annual or semiannual payments on account of the principal, and the terms of every loan shall provide that at any interest-due date the mortgagor or his grantee shall have the right to pay the entire loan or to make payment of $100 or any multiple thereof on the principal thereof, and upon such payment being made the interest on the amount so paid shall thereon cease. Said mortgage shall provide that both the principal and interest shall draw interest at the rate of 6 per cent per annum from maturity.

That the bureau shall make loans to farmers upon farms (first mortgages), through farm-credit associations or designated financial associations acting as agents of the bureau, under regulations prescribed by the board, upon the same terms as prescribed in the preceding paragraph of this section, and the commissioner shall pay to the said association a commission annually of not in excess of one-half of 1 per cent on said loans: *Provided*, That said associations shall become security for all mortgages upon which loans are made through them.

SEC. 12. That no person shall be entitled to a loan of money from the bureau until he has made application therefor under oath upon blanks to be furnished by the bureau. Such application can be sworn to before any person authorized to administer an oath, and all postmasters and their deputies in the United States are hereby authorized to administer oaths to applicants making application for loans under this act, and to administer oaths to such applicants or other persons to any other affidavits made necessary by the rules and regulations of the board. Whenever any oath is administered by a postmaster or deputy postmaster no charge shall be made therefor. No person shall be entitled to a loan under this act who is not of good moral character and who does not establish to the satisfaction of said bureau that he is honest and bears a good reputation in the neighborhood where he resides. No loan shall be made to any person who is not an actual resident and engaged in the cultivation of the land offered as security: *Provided*, That where the applicant for the loan is endeavoring to secure the money for the purpose of building a house upon the land, or for the purpose of making part payment upon the purchase price thereof, the bureau can waive the stipulation if convinced that it is the intention of the applicant as soon as possible to reside upon the land and to cultivate the same, the intention of this act being to provide money only for persons who intend to reside upon and cultivate the land which they offer as security. No loans shall be made for more than 60 per cent of the value of the land offered as security, and only for one or more of the following purposes:

First. To make practical improvements on the land to be mortgaged.

Second. To aid in increased production of said land.

Third. To make payment of the part of the purchase money of the land to be mortgaged, or to pay off an indebtedness already existing against said land: *Provided*, That 50 per cent of any loan may be used for the purchase of stock and farm implements. No loan shall be made upon the security of a single mortgage for an amount in excess of $15,000 and no loan shall be made for less than $200, and loans upon single mortgages for amounts less than $6,000 shall receive the preference. No loans shall be made in any case for an amount in excess of 60 per cent of the value of the property offered as security.

SEC. 13. That it shall be the duty of every postmaster, deputy postmaster, or other employee or official of the Government, without fee or pay therefor, to make confidential reports to said bureau, upon request therefor, upon anything pertaining to any loan and upon the character or standing of any applicant or witness. Such postmaster, deputy postmaster, or other officer shall also, when requested by said bureau, appoint appraisers to appraise the land offered for security under the regulations of and upon the blanks furnished by said bureau.

SEC. 14. That any person applying for a loan shall furnish to said bureau an abstract of title to the land offered as security and shall pay all the necessary expenses connected with the making of said loan. Such applicant shall furnish conveyance for the appraisers appointed to fix a value upon the land offered for the loan, or shall pay for the transportation of said appraisers to and from said land, and if required by said appraisers he shall pay a fee to each of them, not exceeding two in all, which fee shall be ascertained in advance and fixed by the official appointing said appraisers. It shall be the duty of said bureau and the officials appointing said appraisers to select efficient, qualified, and unbiased persons, but at the same time to regulate any fee that they may charge for such service so as to make the same as small as possible. Such appraisers shall make return upon blanks provided by the bureau, and shall swear to the same before some person qualified under this act to administer an oath.

SEC. 15. That it shall be the duty of every United States district attorney or deputy district attorney, upon request from said bureau, to examine the abstract of title to any land offered as security under this act, and to make return thereof to the said bureau. It shall likewise be the duty of any district attorney or deputy district attorney, when requested by the bureau, to foreclose any mortgage taken as security for a loan under this act and to prosecute the same to final judgment. All such services so rendered by an attorney connected with the Department of Justice shall be a part of his official duty and shall be rendered without pay, but said bureau shall pay in all cases the actual expenses of any such attorney in connection with such litigation.

SEC. 16. That it shall be the duty of any post-office inspector, United States marshal, deputy United States marshal, or other employee or inspector of any other department when engaged in official business in the vicinity of any land mortgaged to said bureau, upon request of said bureau, to make a personal inspection of the same and to report thereon to said bureau. Such inspection shall be made without charge, but said bureau shall pay the actual expenses, if any, made necessary thereby. It shall likewise be the duty of any postmaster, deputy postmaster, or other governmental official residing or doing business in the vicinity of any land that has been mortgaged to said bureau, upon requestion of said bureau, to make a report upon said loan or as to whether the money borrowed upon said land has been expended or is being expended in accordance with the purposes for which the same was loaned, and in making any loan under this act the said bureau can withhold, under such rules and regulations as the board may prescribe, any part of the same for the purpose of insuring the application of said loan to the purposes for which the same was made.

SEC. 17. That should the owner of any land mortgaged to said bureau fail or neglect to pay the interest thereon at or before the time when the same is due, or permit the taxes on the land to become delinquent, or neglect or refuse, without the consent of the bureau, to apply the money borrowed in accordance with the statements made in the application for the loan, or if he has made any false statement as to the material matter in said application, or if he neglects to properly care for the improvements on said land, or if he do any other act that materially injures the value of the security, either by overt act or by neglect and inattention, or should said land, without the consent of the bureau, cease to be farmed and cultivated, then the said bureau shall have the right at its election and without notice to declare the entire amount secured by said mortgage due and payable, and may take any steps necessary for the foreclosure of said mortgage and the collection of said loan, and from and after said election so made by the bureau the amount secured by said mortgage shall bear interest at the rate of 6 per cent per annum.

That in making any payment of interest or payment of the principal, or part payment of the same, upon any loan made under this act the person making such payment can pay the same to any postmaster designated by said bureau, and such postmaster shall immediately notify the bureau of such payment, and the transmission of the money so paid, and thereupon credit shall be given for the payment of such money as of the date the same was paid to the postmaster. The said bureau shall notify each person to whom a loan has been made as to the post office where payments upon this loan can be made. The bureau may make such designation by general circular or by specific notice in writing, and can designate by such notice a post office within a county or other district to which all payments within such district can be made.

SEC. 18. That the bureau shall have power to sue and to be sued, to complain and defend in any court of law or equity having jurisdiction of the subject matter in litigation. To protect any loan it may pay the taxes or any other prior lien due and unpaid against the land securing said loan, and in such case the amount paid in liquidation of such taxes or lien shall be added to and become a part of its mortgage on said real estate, and from the date of such payment shall bear interest at the rate of 6 per cent per annum. It shall have the right and authority to purchase at sale under judgments or decrees of court rendered in foreclosure proceedings of any mortgage it owns the land so mortgaged, but in such case it shall not bid a greater amount for such land at such sale than the amount due in such proceedings, together with costs and expenses expended in relation to said loan. In case the bureau obtains title as set forth in this section to any real estate, it shall have authority to sell the same at such price as may be for the best interests of said bureau, in the judgment of the commissioner, and to convey title to the purchaser thereof by deed signed and acknowledged by the commissioner. In making such sale it shall be authorized to make a return mortgage from the purchaser for part of the purchase price thereof in accordance with the provision of this act.

SEC. 19. That it shall be unlawful for any Senator, Member of the House of Representatives, or any other official of the Government of the United States to use or attempt to use political or any other influence to induce said bureau to make or refuse to make any loan or loans. Any person found guilty of the conduct in this section prohibited shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $2,000, and in addition thereto shall be removed from office.

That it shall be unlawful for any official of any State or any officer or member of any political committee to use or attempt to use any political or other influence to induce said bureau to make or refuse

to make any loan or loans. Any person found guilty of the conduct in this section prohibited shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not exceeding $1,000 or be imprisoned for a term of not exceeding one year, or both such fine and imprisonment, in the discretion of the court.

SEC. 20. That any person or persons who shall make any false representation to said bureau in connection with the making of any loan or in connection with the investigation of any application for a loan, shall be guilty of a felony, and upon conviction shall be fined not more than $5,000, which fine shall be paid into the loan fund, or shall be imprisoned for a term of not exceeding five years, or shall be sentenced to both such fine and imprisonment, in the discretion of the court.

SEC. 21. That there is hereby appropriated from any unexpended balance in the Treasury of the United States, the sum of $100,000 for the purpose of carrying out the provisions of this act pertaining to preliminary expenses and organization.

Mr. NORTON. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from North Dakota asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. GLASS. Reserving the right to object, I ask unanimous consent that debate on this section and all amendments thereto conclude in 10 minutes.

Mr. CARAWAY. Make it 25 minutes.

Mr. MANN. This is the day we long have waited for, you know.

Mr. GLASS. At the request of several gentlemen I revise my request and ask unanimous consent that debate on this section and all amendments thereto close in 25 minutes.

Mr. MANN. I hope the gentleman will make his request as to this amendment only. Other Members want to offer amendments, and it will be of some advantage to them.

Mr. GLASS. I will ask the gentleman from Illinois how long does he think we are to be—well, I will not say afflicted with this sort of thing—how long is it to go on?

Mr. MANN. I do not think it will be very long.

Mr. GLASS. It may be that I am too serious a man, but I have not much toleration for quixotic performances.

Mr. MANN. The gentleman is in favor of this bill?

Mr. GLASS. Yes; I am.

Mr. MANN. I do not know whether that it quixotic or not.

Mr. GLASS. I rather think not.

Mr. MANN. I think the gentleman and I have about the same impression, but I will not ask him to state what he really thinks.

Mr. GLASS. I want to know how long this is to continue.

Mr. MANN. Let us try it for a little while and see.

Mr. GLASS. Very well, Mr. Chairman, I will test it a little longer. I ask that all debate on this particular amendment close in 10 minutes.

Mr. MADDEN. May I ask the gentleman a question?

Mr. GLASS. Certainly.

Mr. MADDEN. Does the gentleman from Virginia want to cut off amendments to this section of the bill?

Mr. GLASS. The gentleman knows very well that I do not want to cut off any serious amendment to this section of the bill, or to any other section of the bill for that matter, but we want to get to work on this bill. That is what we want to do.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia that debate on this amendment close in 10 minutes?

There was no objection.

Mr. MANN. Now, I ask unanimous consent that the gentleman from North Dakota [Mr. NORTON] have the entire 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. NORTON. Mr. Chairman and gentlemen of the committee, in my judgment this legislation that we are now considering is the most important legislation that has been before this or any Congress during the past quarter of a century. I have offered this substitute in all seriousness, realizing, with regret, however, that it will not be adopted by the committee.

This substitute includes what I believe would be the most desirable character of Federal legislation on this subject, as far as the interest of the farmer is concerned. Gentlemen of the committee know there are in this country two quite distinct schools of thought on the subject of Federal rural-credit legislation. One proposes that the loans be made directly by the Government from a fund supplied by the issuance and sale of bonds of the Government. That is not a new idea. It is a system that is being carried out to-day and one that has been carried out for several years by other nations. It is a system that has, after years of trial, proven itself highly successful in its operation and in its beneficial results; but after the consideration that has been given this subject by the present and the preceding Congress it has been determined by the committees of the House and Senate that such a system shall not be adopted by this Government at this time.

Legislation for a system of rural credits providing for direct loans by the Government out of a fund provided by the issuance and sale of Government bonds has been opposed in this Congress by a majority of the Banking and Currency Committees of both the House and the Senate, and has in this and in the Sixty-third Congress met with the determined and unyielding opposition of President Wilson.

The other school of thought on the question of Federal rural-credit legislation is opposed to direct Government aid to the system, and maintains that the problem of a safe and efficient rural-credit system can be best solved by a system of private land banks under Government supervision and without assistance of Government funds or Government credit.

The bill introduced by Representative Moss, which the House Committee on Banking and Currency has reported favorably as a substitute for the bill introduced by Senator HOLLIS—Senate 2986—which was passed by the Senate last Thursday, is a cumbersome compromise between the direct government-aid system and the private land-bank system for rural credits. The organization provided in the Moss bill for its operation is unnecessarily complex and costly and will tend in a large measure to defeat the fundamental purpose of this legislation.

The substitute that I have offered for the Moss bill is based on the idea of direct Government aid. The organization provided for carrying out the purposes of the legislation is safe, simple, and comparatively inexpensive. The substitute is the same as the bill which I introduced on this subject in the Sixty-third Congress and which I at another time discussed at length before the House. Under its provisions Government bonds bearing a rate of 3½ per cent would be issued and sold to provide a fund for making loans direct to farmers through agents of the Government or through cooperative farm-loan associations at a rate of 4 per cent per annum. While I have no mere personal pride or desire to have the legislation which I have proposed enacted into law, my study of this important economic question had led me firmly to believe that the adoption of a system of rural credits, such as provided for in the substitute I have offered, would, with all proper degree of safety to the interests of the Federal Government, better and more satisfactorily and efficiently meet the needs of the farmers of this country for a rural-credit system than the legislation proposed in the pending bill and recommended by the Committee on Banking and Currency. I was particularly interested in the question that was asked by the gentleman from Illinois [Mr. CANNON], "Why should not the present bill be enlarged so as to take in workers in factories, those who live in the cities, and provide aid for them in the erection of their homes, and so forth?" As to that, I must say that I feel that one who asks that question misses the very gist and purpose of this legislation, at least as I undertand it. I undertand this legislation to be intended to increase the number of our population who are engaged in farming, in producing the things we eat and the material for the things we wear—to aid in having those things produced in larger quantities, thereby reducing the cost of living for all our people and making more permanent and stable our Government.

The farming industry in this country, as in any country, is of the greatest importance. It is the industry upon which all others are founded.

Mr. MADDEN. Will the gentleman yield?

Mr. NORTON. I will.

Mr. MADDEN. Has the factory worker anything to do with the economical production of agricultural products?

Mr. NORTON. Why, Mr. Chairman, I will say to the gentleman from Illinois that I recognize that he has. But does the gentleman from Illinois think that this country or any country could exist solely with the manufacturing industry? This country and other countries could exist, while not in the highly developed condition we have to-day, still with the farming industry alone. There is a very clear distinction between the importance of the industries of manufacturing and farming.

Mr. MADDEN. The gentleman would not want to go back to that period?

Mr. NORTON. No; I would not want to go back to that period. I maintain, however, that if this Nation owes assistance to any of the industries of the country, it owes it to the farming industry more than to any other.

Mr. STEENERSON. Will the gentleman yield?

Mr. NORTON. I shall be pleased to yield to the gentleman.

Mr. STEENERSON. Does the gentleman think that the farmers of North Dakota are interested in reducing the cost of living?

Mr. NORTON. I will say to the gentleman from Minnesota that the farmers of North Dakota are very much interested in reducing the cost of living.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. NORTON. Certainly.

Mr. SMITH of Michigan. I take it that the gentleman has had considerable experience in loaning money on real estate.

Mr. NORTON. Yes; I have had some experience in making farm loans.

Mr. SMITH of Michigan. Would the gentleman make it a rule to loan money on real estate on 60 per cent of the value plus 20 per cent of the value of the buildings? Would he make that a rule, or does anyone else who loans money that he knows of make as broad a rule as that?

Mr. NORTON. I think that as a rule that loans in my section of the country, the Northwest, are made for the most part to equal about 50 per cent of the value of the farm property, including buildings. In the richer and more prosperous parts of the State the loans run sometimes as high as 80 or 90 per cent of the value of the farm property.

Mr. CULLOP. Will the gentleman yield?

Mr. NORTON. I shall be pleased to yield to the gentleman.

Mr. CULLOP. Does not the gentleman in determining the amount loaned take into consideration the way and manner in which the value of the property has been fixed?

Mr. NORTON. Certainly; that must always be taken into consideration.

I observe that my time has expired and I regret that the gentleman in charge of the bill [Mr. GLASS] is not disposed to grant more time for present discussion of the bill before us. I shall, however, discuss different objectional features of the bill recommended by the Banking and Currency Committee when the several paragraphs of the bill are read.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota [Mr. NORTON].

The question was taken, and the amendment was rejected.

Mr. CARAWAY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Insert the following as a substitute for the first section:

"That the short title of this act shall be 'A rural-credits act.'

"SEC. 2. That there is hereby created in the Department of the Treasury at Washington, D. C., a commission to be known as a rural-credits commission, said commission to be composed of five members appointed by the President, by and with the advice and consent of the Senate. These commissioners shall be selected from the various sections of the United States, and three of whom shall be actual bona fide farmers, who reside upon their farms and have no other occupations. Two shall be men of business affairs and recognized financial ability. The said rural-credits commission shall herein be referred to as the commission. They shall elect one of their members chairman.

"SEC. 3. That at first said commissioners shall be appointed for one, two, three, four, and five years, respectively, and after that their terms of office shall be for five years each unless removed by the President for cause. The salary shall be $6,000 each, payable quarterly.

"SEC. 4. That the Secretary of the Treasury shall assign them rooms for the conduct of their business, and they shall have power to appoint clerks and employ assistants that may be necessary for the transaction of the business of the department.

"SEC. 5. That said commission shall have power to prescribe all rules and regulations necessary for carrying into effect the provisions of this act and for the conduct of the business of the department.

Mr. GLASS. Mr. Chairman, I ask that the further reading of the amendment be dispensed with and that the gentleman from Arkansas have 10 minutes to explain the difference in the bill.

The CHAIRMAN. The gentleman from Virginia asks unanimouse consent that the further reading of the amendment be dispensed with and that the gentleman from Arkansas have 10 minutes to explain the provisions of the amendment. Is there objection?

Mr. TRIBBLE. Reserving the right to object, Mr. Chairman, I urge the passage of this bill as a substitute. I think it is well enough for the House to know that this is a bill that was framed by the Farmers' Union, Charles S. Barrett, president. I am for this bill and insist upon a vote. The bill should be read, and I insist upon reading and voting on it. Therefore, I object.

The CHAIRMAN. The gentleman from Georgia objects, and the Clerk will continue.

The Clerk continued the reading of the amendment, as follows:

SEC. 6. That all postmasters throughout the United States and Territories thereof and the District of Columbia, for the purpose of carrying this act into effect, and for the proper conduct of its business, shall be the agents of the commission and perform whatever services may be required of them without pay.

SEC. 7. That the purpose of this act shall be to enable farmers to procure long-time loans at low rate of interest to purchase farms or to develop and extend their agricultural productiveness. The word "farmer" as herein used shall mean one who actually resides upon his farm and is engaged in the business of farming, and the benefits of this bill shall be applicable to farmers residing in any State or Territory of the United States of America or the District of Columbia. The loans herein contemplated shall run in series of 5, 10, 15, 20, 25, and 30 years, at the option of the borrower, interest to be payable annually. The terms of such loan shall provide that at any interest-paying date beyond five years the borrower shall have the option to pay the principal, or to make payment of $100, or any multiple thereof, and upon such payment being made the interest on the amount so paid shall cease. Payment may be made at any post office or national bank. No person shall be entitled to a loan unless he actually resides upon his farm, or shall use the loan in payment of lands upon which he shall immediately fix his home. The amount of the loan shall be determined by the commission herein created, except anyone applying who is entitled to the loan, shall, if he desires, receives a loan as much as 50 per cent of the actual value of the improvements thereon, and as much more as may, in the judgment of the commission, be safe and prudent to extend him.

SEC. 8. That all securities or deeds of trust executed by anyone to secure a loan hereunder shall be made payable to the chairman of the commission as the trustee for the United States of America. Said instrument shall recite the amount of the loan and date of maturity, but shall not name the rate of interest to be paid thereon. Said instrument must be executed by the borrower according to forms of the State or Territory in which the lands are situated and in conformity with the rules and regulations prescribed by the commission. In addition to executing the said instrument herein referred to the borrower shall execute notes with coupons attached for interest periods named in said deed of trust and in the form that may be prescribed by the commission. These coupons are redeemable or payable at any national bank or any post office of the first, second, or third class. These notes, securities, coupons, and obligations and funds shall not be subject to taxation, municipal, State or national. The title to said lands shall be shown by a suitable abstract, which shall be forwarded with the application for the loan, except in those States where the Torrens system may prevail, and in those States the certificate of the State shall be sufficient evidence of title. There shall be proper officers appointed for the examination of titles, for which services no fee shall be charged.

SEC. 9. That a farmer desiring to avail himself of the provisions of this act shall file with the local postmaster a written application under oath, setting forth the security he has to offer, the amount of the loan he desires, and the purposes for which he desires it, and such other facts as may be desired by the commission. Whereupon the postmaster shall appoint two committees consisting of three members each; the first named of each shall act as chairman of his committee. The first committee shall consist of three farmers residing in the immediate vicinity of the farm upon which the loan is desired and who shall be familiar with its value, and they shall make an appraisement of the value of the lands and the improvements thereon separately. Said appraisements shall be under oath and secret and shall be filed with the postmaster appointing said committee. The second committee shall consist of three men of affairs who are familiar with the land and improvements upon which the loan is sought and with the general conditions in that vicinity, as to whether values of real estate are advancing or declining, and whether the applicant is a progressive farmer or otherwise. They shall likewise appraise the farm and improvements and give whatever other information may be necessary to determine the hazard of the loan. These appraisements shall likewise be secret and made under oath and filed with the postmaster appointing said committees. When these appraisements are received by the postmaster, the postmaster and the chairmen of the two committees shall proceed to open the appraisements and to make therefrom a just and accurate appraisement of the property, both lands and improvements, and transmit the same to the chairman of the said commission at Washington, together with whatever other information may be necessary with reference to the applicant in the loan sought to enable the commission to determine the amount to be loaned, if any. When the application is received and approved by the said commission it shall cause to be forwarded to the postmaster from whom it was received the necessary notes and instruments to be executed by the borrower, who shall execute them in the manner prescribed by the commission and return to said commission. Thereupon said notes and instruments for the loan shall be sold in the open market for par at the lowest rate of interest procurable. The proceeds of said sale shall be transmitted to the borrower. The borrower shall not only pay the rate of interest agreed upon in said sale but shall pay whatever per cent may be necessary for the amortization of said loan at maturity thereof. The per cent of amortization shall be fixed by the commission.

SEC. 10. That the moneys paid in under amortization herein provided for shall be a trust fund available for the payment of any interest that may be due and unpaid on any loan made under the provisions of this act, and shall be deposited in the Treasury of the United States or put out at interest, as may be determined by said commission.

SEC. 11. That if any borrower shall make default in the payment of principal or interest under the provisions of his loan, then, under such rules and regulations as the commission may prescribe, his lands shall be seized and sold subject to the terms of the loan, and for the purpose of said seizure and sale suit may be brought in the name of the commission, and all district attorneys are hereby authorized and commanded to prosecute said suits without fee. Said suits shall be in the United States district court for the district in which the lands are situated. From the proceeds of said sale all costs shall be first paid and accrued interest and principal, if due, and the residue, if any, shall be paid to the borrower. Real estate sold under the provisions of this act may be redeemed from said sale by anyone holding the equity therein within one year from the date of sale.

SEC. 12. That the United States of America shall guarantee the payment of all interest and principal of loans procured under the provisions of this act.

SEC. 13. That no loan shall be in excess of $5,000. If the premises mortgaged under the provisions of this act shall pass into the ownership of anyone who is not a bona fide farmer, the indebtedness shall at once become due and payable. If anyone shall acquire lands upon which there is a loan under the provisions of this act in excess of $5,000, the excess of $5,000 shall at once become due and payable.

SEC. 14. That this act shall be in force from and after its passage.

Mr. WINGO. Mr. Chairman, I ask unanimous consent that my colleague [Mr. CARAWAY] may proceed for 10 minutes.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent that the gentleman from Arkansas [Mr. CARAWAY] may proceed for 10 minutes. Is there objection?

There was no objection.

Mr. CARAWAY. Mr. Chairman and gentlemen of the committee, I realize that all the bankers and all the "shade-tree" farmers in this House will oppose my amendment. I am conscious they will oppose any amendment that will give to the farmers of this country any kind of assistance from the Federal Government. The present bill that we are considering is proof of that. While apparently it contains Government aid, it is only in appearance. We have extended aid to practically every other line of industry, and it seems with everybody's approval, but the instant anyone seeks to get legislation through this House that is designed directly or indirectly to extend Federal assistance to the farmers somebody rises up and objects.

Most people seem to think the farmer is prosperous, that he needs no assistance, that he has always cared for himself, and that the future offers no greater difficulty than the past. But conditions have changed for the farmer as well as for everyone else. He is now paying interest on $6,000,000,000, and is paying at the rate of 8½ per cent. Investigation has shown that he can not afford to pay in excess of 5 per cent.

Mr. PLATT. Will the gentleman yield?

Mr. CARAWAY. Yes.

Mr. PLATT. How does he manage to pay it if he can not afford it?

Mr. CARAWAY. By providing less for the support of his family than many gentlemen in this House spend for luxuries. No man should compel his family to live under conditions that do not provide equal opportunities of education and other advantages that the children of those in other callings enjoy.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

Mr. CARAWAY. Yes.

Mr. PLATT. How does it happen if that is true there are so many farmers in this House that did not get all of these advantages?

Mr. CARAWAY. Oh, all of the farmers in this House are shade-tree farmers. They farmed with their mouths. They have farmed the farmer. That is the reason.

Mr. MANN. And that is what they are attempting to do now.

Mr. CARAWAY. Yes; and that is what the gentleman from Illinois [Mr. MANN] has been doing ever since I have known him.

Mr. MANN. But the gentleman has not known me very long.

Mr. CARAWAY. I have known him long enough to know that.

Mr. MANN. But I am not doing it now, as the gentleman is.

Mr. CARAWAY. You are not, because I have the floor, and that is the only reason. As I said, all who think a banker is entitled to Federal aid but want a farmer denied the same privilege will oppose my amendment, and I know they are going to vote against it; but I owe an obligation to my people and I am going to represent them here as I think they should be as long as I hold a seat in this House. [Applause.]

I realize that 10 minutes is too short a time in which to explain any rural-credit system, but if you will let me explain one feature of it that is all I can expect to do. Under this proposed bill for which I am offering my substitute every farmer must become a banker. He must organize a corporation. He must subscribe to its capital stock, on which he will never realize a cent. There is no use of all this machinery and expense. I fear under this present bill that no farmer can borrow money at a rate of interest less than 8 per cent. The bill I have offered is stripped of all that machinery. The one provision which I think the most important I can explain, and no other, and that is this: It is a Government guaranty of both the principal and the interest, but in this way: It provides that the board that is appointed by the President shall prepare an amortization table that will show how much is necessary to pay the interest charge and the amortization of these bonds, and take into consideration whatever may be the probable loss to the system. This is done by the same method that insurance companies use in lending money. It is a calculation of the probability that some one may fail to pay. If he does not each of the borrowers has a bonus coming to him at the maturity of his loan. The Government guarantees that the borrower will perform his agreement, and charges to all the borrowers that fraction of a per cent which will produce a fund sufficient to meet any probable loss. It also collects all interest and principal and pays all interest coupons and the bond itself at maturity. It takes the borrower's bond and sells it with this guaranty back of it. All of us know there is magic in the Government's guaranty.

People do not trust private institutions. I do not know why, but they will not do it. For instance, in a town in my district the post office and the First National Bank are situated almost opposite each other. On the window of this national bank is a sign saying that that bank pays 4 per cent interest semiannually on time deposits. The post office pays but 2 per cent, and yet people will deposit in the postal savings bank. They will deposit their money in the post office and get but 2 per cent, and then the postmaster takes it immediately across the street to that bank where the sign says that 4 per cent is paid and redeposit it. The bank is solvent, and we know that and everyone else knows it, but there is something about the Government's guaranty that makes people prefer to have 2 per cent from the Government rather than 4 per cent from a national bank.

Mr. PLATT. Do they really do that in any considerable number in the gentleman's town?

Mr. CARAWAY. They do it in every man's town to the limit of the provisions of the law. It is necessary to place a limit on the amount any one person is permitted to carry in a postal savings bank. They would otherwise strip the banks.

Mr. TRIBBLE. Will the gentleman yield?

Mr. CARAWAY. I will.

Mr. TRIBBLE. As I understand the gentleman's bill, in short it provides that no obligation is assumed by the borrower for a loss?

Mr. CARAWAY. Only in this way——

Mr. TRIBBLE. And that the collateral offered is sold in the markets of the world just the same as the collateral provided for in this bill?

Mr. CARAWAY. That is true, and I hope to explain that. Under the provisions of this bill a bond that rests primarily for the redemption on the land is sold by the agents of the Government in the open market. The interest and amortization fund is paid by the borrower directly to the Federal Treasury. Out of the Federal Treasury the interest and principal is then paid the lender. The lender is not concerned with the borrower or his security. He is paid out of this amortization fund. This would, in my judgment, make the borrower obtain money at almost as low interest rate as the Government. It would also make the interest rate uniform throughout all the States. The necessity for this is illustrated near where I live. I live south of the Missouri line. I have a friend, a man by the name of Hill, who owns a farm that lies on both sides of the State line—Missouri and Arkansas. The State line there runs east and west. We cotton growers, under the belief that sunshine helps open the cotton, run our cotton rows north and south. The rows of this man's cotton cross the State line. You may stand in his field with one foot in Missouri and one in Arkansas. This man has two loans on his land. The one in Arkansas at 8½ per cent on a valuation of $60 an acre, and the one in Missouri, with a valuation of $140, on which he pays but 5½ per cent; and yet there is not any difference in soil or production nor the width of an inch between the land lying in Arkansas and the land lying in Missouri. This difference in valuation and interest rate illustrate the need of a just rural-credits bill. The produce of these lands must be sold in the same market. The difference is not artificial. My amendment would correct this injustice.

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from Arkansas.

The question was taken, and the Chairman announced that the noes appeared to have it.

On a division (demanded by Mr. WINGO) there were—ayes 48, noes 27.

Mr. GLASS. Mr. Chairman, I ask for tellers.

Tellers were ordered.

The committee again divided, and the tellers (Mr. GLASS and Mr. CARAWAY) reported that there were—ayes 28, noes 46.

So the amendment was rejected.

The Clerk began the reading of the bill.

Mr. HAWLEY. Mr. Chairman, I move to correct the spelling of the first word in line 10, page 75.

Mr. CULLOP. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CULLOP. I understand that under the rule the whole section has to be read before an amendment can be offered.

The CHAIRMAN. The Chair did not know but what the section had been read. The Clerk will finish reading the section.

Mr. CANNON. Is that true?

Mr. CULLOP. The section has not been finished yet.

Mr. CANNON. That the special rule so provides?

Mr. CULLOP. The special rule so provides that it shall be read by sections and not by paragraphs.

The Clerk read as follows:

FEDERAL FARM-LOAN BOARD.

SEC. 3. That there shall be established at the seat of government a Federal farm-loan board, which shall be charged with the execution of this act and of all acts amendatory thereof.

The Federal farm-loan board shall consist of three members, who shall be appointed by the President of the United States, by and with the advice and consent of the Senate. Not more than two of said members shall be appointed from one political party. They shall be citizens of the United States and shall devote their entire time to the business of the Federal farm-loan board and shall each receive an annual salary of $10,000, payable monthly, together with actual necessary traveling expenses.

One member of said board shall be designated by the President to serve for three years, one for six years, and one for nine years, and thereafter each member so appointed shall serve for a term of nine years, unless sooner removed for cause by the President. One of the members shall be designated by the President as the farm-loan commissioner, who shall be the chairman and the active executive officer of said board. Each member of the Federal farm-loan board shall within 15 days after notice of his appointment take and subscribe to the oath of office.

The first meeting of the Federal farm-loan board shall be held in Washington as soon as may be after the passage of this act, at a date and place to be fixed by the chairman of said board.

No member of the Federal farm-loan board shall, during his continuance in office, be an officer or director of any other institution, association, or partnership engaged in banking, or in the business of making land-mortgage loans or selling land mortgages. Before entering upon his duties as a member of the Federal farm-loan board each member shall certify under oath to the President that he is eligible under this section.

The President shall have the power, by and with the advice and consent of the Senate, to fill any vacancy occurring in the membership of the Federal farm-loan board; if such vacancy shall be filled during the recess of the Senate a commission shall be granted which shall expire 30 days after the Senate convenes.

The Federal farm-loan board shall appoint a farm-loan registrar in each land-bank district to receive applications for issues of farm-loan bonds and to perform such other services as are prescribed by this act. It shall also appoint one or more appraisers for each land-bank district and as many examiners as it shall deem necessary. Farm-loan registrars, appraisers, and examiners appointed under this section shall be public officials and shall, during their continuance in office, have no connection with or interest in any other institution, association, or partnership engaged in banking or in the business of making land-mortgage loans or selling land mortgages: *Provided*, That this limitation shall not apply to persons employed by the board temporarily to do special work.

The salaries and expenses of the Federal farm-loan board and of farm-loan registrars and examiners authorized under this section shall be paid out of any moneys in the Treasury of the United States not otherwise appropriated. Appraisers shall receive such compensation as the Federal farm-loan board shall fix, and shall be paid by the Federal land banks and the joint-stock land banks created under this act, which they serve, in such proportion and in such manner as the Federal farm-loan board shall order.

The Federal farm-loan board shall be authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as it may deem necessary to conduct the business of said board. All salaries and fees authorized in this section and not otherwise provided for shall be fixed in advance by said board and shall be paid in the same manner as the salaries of the Federal farm-loan board. All such attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars, examiners, and appraisers shall be appointed without regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance thereof: *Provided*, That nothing herein shall prevent the President from placing said employees in the classified service.

The Federal farm-loan board shall from time to time require examinations and reports of condition of all land banks established under the provisions of this act, and shall publish consolidated statements of the results thereof. It shall cause to be made appraisals of farm lands, as provided by this act, and shall prepare and publish amortization tables which shall be used by national farm-loan associations and land banks organized under this act.

The Federal farm-loan board shall prescribe a form for the statement of condition of national farm-loan associations and land banks under its supervision, which shall be filled out quarterly by each such association or bank and transmitted to said board.

Mr. PHELAN, Mr. CULLOP, and Mr. MANN rose.

The CHAIRMAN. The gentleman from Massachusetts [Mr. PHELAN].

Mr. PHELAN. Mr. Chairman, I desire to offer a committee amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 75, lines 23 and 24, amend by striking out all after the word "expire," in line 23, and insert the following: "at the end of their next session."

Mr. PHELAN. Mr. Chairman, it was called to the attention of the committee that the wording there provides if the commission given by the President during the recess of the Senate should expire 30 days after the Senate convenes it would not be consistent with the provision in the United States Constitution, so those words are copied out of the Constitution of the United States in order that no question may be raised.

Mr. MURRAY. In other words, the gentleman wants to ratify the Constitution.

Mr. MANN. Mr. Chairman, the amendment offered by the gentleman from Massachusetts is quite proper, although I am not at all sure it remedies all the defects of this paragraph. The provision of the Constitution is that the President shall have power to fill all vacancies which may occur during a recess of the Senate by granting a commission which shall expire at the end of their next session. It is not necessary to put anything in this bill on the subject at all.

I think what the gentleman ought to do is to strike out the whole paragraph. The President would have power, by and with the advice and consent of the Senate, to fill any vacancies by nomination to the Senate, without anything in the bill on the subject at all. Now, the paragraph undertakes to say that the President shall have the power, by and with the advice and consent of the Senate, to fill any vacancy occurring in the membership of the board, and so forth. That would appear to be by the terms of the bill an exclusive power, that he could only fill vacancies by and with the advice and consent of the Senate, but that is contrary to the Constitution, because the Constitution provides that he can fill vacancies without regard to the consent of the Senate until the Senate has had a chance to meet. I do not suppose that putting this in the bill would change the Constitution.

Mr. CULLOP. Will the gentleman yield?

Mr. MANN. But there is no occasion for putting it in at all. I yield to the gentleman from Indiana.

Mr. CULLOP. There would not be any necessity for having the Senate confirm the appointee. This is a statutory act, and if the law did not provide that the Senate was to confirm the appointment, that could be made by the President without the advice and consent of the Senate.

Mr. MANN. The gentleman has not read the bill; that is the trouble. The prior part of the bill provides that this board shall be appointed by and with the advice and consent of the Senate. That is already in the bill. Now, to say that vacancies can only be filled by and with the advice and consent of the Senate is contrary to the Constitution, so far as vacancies occur while the Senate is not in session, but at any other time, under the other language of the bill, appointments would have to be made by and with the advice and consent of the Senate. I suppose, Mr. Chairman, the truth is—and I called this to the attention of the gentleman from Massachusetts [Mr. PHELAN] a few days ago, and which I think was quite apt then and is quite apt now—the gentlemen drawing this bill, knowing there was no warrant in the Constitution for most and probably all of its provisions, did not dare to read the Constitution for some time before drawing the bill, and hence they neglected to have called to their attention this provision of the Constitution. I do not wonder that the gentlemen who drew the bill did not want to read the Constitution in connection with it.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Massachusetts.

Mr. CULLOP. Mr. Chairman——

The CHAIRMAN. The gentleman from Indiana is recognized.

Mr. CULLOP. It would not be necessary to have this provision in the bill at all. The Constitution does not require all the officers appointed by the President to be confirmed by the Senate, and I call attention to this paragraph of the Constitution:

> He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur, and he shall nominate and, by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for and which shall be established by law, but the Congress may by law vest the appointment of such inferior officers, as they think proper, in the President alone, in the courts of law, or in the heads of departments.

The appointment of every one of the officers provided for in this bill or any other statute relative to this matter could be made by the President without the advice and consent of the Senate. And it is only such officers as are created by statute that the statute must provide in order to have them confirmed by the Senate. If it does not specifically require it, then it does not have to be so done. Otherwise the President could appoint and fill the office without referring the matter for confirmation to the Senate or without consultation of the Senate at all.

The Constitution expressly provides what officers shall be confirmed by the Senate and all offices created by statute may all be filled, unless it is otherwise provided in the statute creating the office, without the advice and consent of the Senate. So it was not necessary in the creation of these offices for any provision to be placed in the bill whatever. And they can only be referred to the Senate for confirmation by the express provision of the statute creating the offices. Otherwise, the President would have the power to appoint the officer without any action of the Senate whatever, under the Constitution. These are statutory offices and the Constitution does not require the appointments to fill them to be with the advice and consent of the Senate. If it is done, it must be so because of the express provision of the law creating them. We have many offices which can be filled by the President and some by heads of departments which do not have to be confirmed by the Senate and are not because the statute creating them did not require

them to be so made. Doubtless it might tend to the betterment of the public service and the expediting of the same if more offices were exempt from this red-tape method. It was, in my judgment a useless provision here to fix such a requirement; it was not necessary; but doubtless the committee had some good reason for it, and in the end it may prove beneficial, but it was not essential to the appointment and there was no obligation it should be so done. The provision of the Constitution which I have read specifically names the offices for which the President must have the advice and consent of the Senate; all others he can appoint without such advice and consent, unless the statute creating them requires the appointment to be made in that way. It was not necessary to have that provision here.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Massachusetts [Mr. PHELAN].

The question was taken, and the amendment was agreed to.

Mr. CULLOP. Mr. Chairman, I offer the following amendment: On page 74, line 20, strike out "$10,000" and insert "$7,500."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Indiana [Mr. CULLOP].

The Clerk read as follows:

Amend, on page 74, line 20, by striking out "$10,000" and inserting "$7,500."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Indiana.

Mr. CULLOP. Mr. Chairman, I have offered this amendment with the hope that it would be adopted. The expenses of operating this system of rural-credit banks are fixed, so far as these salaries are concerned, unusually high. Competent men can be secured who will administer this law just as efficiently for $7,500 a year as for $10,000 a year.

I do not believe in the contention some have made that efficient men can not be had for these positions unless the salary is fixed at $10,000 per year. The terms of service are for nine years; a long term. There is no expense attached to the position, like an elective office, and it will be an easy matter to secure the very best of talent for these positions at the compensation named in the amendment I have just offered. No one is more interested than I in securing good talent for these positions and in seeing the law a great success.

I would reduce the salaries of officials proposed in the bill for the administration of this law and make the application of the reduction of them to the reduction of the interest rate which the farmer has to pay if the bill remains as it is written. If we are legislating here for the benefit of the farmer, let us by the law itself give him the benefit of it.

Six per cent is an unusually high rate of interest for good farm loans. It is too much, and if it remains in the law at that figure the banks will not be patronized, and the farmer will not be furnished the relief he expects, and the measure will therefore not perform the functions its promoters hope for it. The importance of this measure must not be underestimated, but if it is so written that it will not be patronized because farmers can secure better terms of private concerns, then all this work will be in vain, and the people who expect to be benefited by it will be disappointed, and it will become a matter of injury rather than benefit to those who are responsible for its enactment. We should endeavor, therefore, to work out a law that will stand the test and produce the splendid results expected of it.

The security that will be given to secure the payment of these loans is the best security that is offered in the world. The farm that has a loan upon it of 50 per cent of its actual value is worth 100 cents on the dollar in any market in the world, and if our Government bonds, if our drainage bonds, if our gravel-road bonds will sell on the market above par at 4 per cent annual interest, why will not the bonds upon the rich, fertile farms of this country, at 4 per cent interest, sell at par in any market in the country?

They will do so, will be in demand, as the investor is always looking for a bargain. He well knows such an investment is a good bargain, and he will be anxious to have such an investment. This is a question of great importance, and it is well worth the serious consideration of every man here. Let no one doubt but what every feature of this bill will be carefully scrutinized by the people who are expecting relief from it.

A number of the States issue gravel-road bonds, drainage bonds, which sell, every time they are offered, above par. They draw only 4 per cent interest; some draw less. When put up to the highest bidder the contest is spirited and the demand for them great. They are no better security than is provided for here. They are no better security than the bonds based on the farms of this country at 50 per cent of their value. Another reason: These bonds are exempted from taxation, and when we are putting them on the market at 6 per cent interest per annum it is equivalent to 8 or 9 per cent interest on these loans; and if we fix this rate at 6 per cent, we will find these farm mortgages readily taken at 50 per cent of the value of the farm on which the mortgage is placed if any farmer is so unfortunate as to have to patronize the system. Now, if private concerns will loan at 5 per cent interest, not exempt from taxation, as is being done in many parts of the country, how could anyone conclude that by this legislation any relief or assistance is being furnished the farmer? On the contrary, is it not creating a legalized institution for the money changer to employ to exploit the farmers of the country? Would he not, after its passage, refuse to loan to the farmer, join the organization created by this law and compel the farmer to accept its terms, and harness upon the farmer an additional burden? It seems to me that would be the natural result. If people will loan to banks, as they are doing, for 3 per cent, when such loans are subject to taxation, surely it would be no trouble to secure loans on farm mortgages at 4 per cent when such loans are exempted by law from taxation. No doubt the loan on the farm is just as secure as the one made to the bank.

The farm loan furnishes the best investment, the safest, the speculator can find. There is no better, and no man can anticipate a time when farm property will be worth less than it is to-day.

If the farm loan is exempt from taxation, the rate of interest should not be higher than 4 per cent; if it is, a great injustice is done the farmer, because by such procedure the volume of taxable property is lessened, and as the volume is reduced the rate necessarily must be increased. The farmer's property is visible property; it can not be hidden from the assessor, and hence he would have the burden thus increased to bear. Now, it is plain if the rate of 6 per cent, as written, is to remain in this bill, no help will by the measure be furnished the farmers of this country, and the only person assisted will be the money lender, and he is always prosperous and does not need it.

If we are legislating in the interest of the farmer, let us do it right. Give him a 4 per cent loan here. If we are exempting the mortgage from taxation, they can readily sell the bonds, as they can and do sell the drainage and gravel-road bonds, upon the market. Let us give the farmer the benefit of this, and not the speculator.

I hope the amendment will be adopted, because we can readily get men at $7,500 a year who will perform these duties just as satisfactorily as if they were paid a salary of $10,000. Let us reduce the salaries and reduce the rate of interest and really help the farmer by the adoption of this legislation.

Some will doubtless contend here that to reduce the salaries of the officials will not help the farmer, because all such salaries are paid out of the Public Treasury; but it is well enough to remind all who make such a claim that every dollar of money in the Public Treasury has been collected from the people through some method or another and the farmer has paid his share, and the less taken out of the Treasury the less will have to be paid in, and hence the farmer will be the beneficiary as well as all other business men. One thing certain, every dollar expended in the administration of this law will be charged up to the business by the Government, and the higher the expenses of administration the higher the rate of interest will be, and hence the reverse, the lower the cost of administration the lower the rate of interest can be made. The adoption of this amendment will be a step in the right direction and will inure to the benefit of the farmers, the class it is proposed to assist by the enactment of this legislation.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. HOWARD rose.

The CHAIRMAN. Does the gentleman desire to oppose the amendment?

Mr. HOWARD. I do.

The CHAIRMAN. The gentleman from Georgia [Mr. HOWARD] is recognized.

Mr. HOWARD. Mr. Chairman and gentlemen of the committee, I rise to oppose this amendment for this reason: I think the worst mistake on earth that any government can make is paying niggardly salaries to public officials. The three men who are to have charge of this system will in all probability, if it works as I hope it will, soon have the direct supervision of three to four billion dollars of loans, and probably more. These men ought to be the very highest-class men in the United States. We ought to provide salaries that will attract men of that character to these positions. I have always said when you pay a small salary as a government, or as a city,

or any other governmental institution, you can not attract the best men to these positions, and it is false economy not to obtain the most efficient.

Now, if you reduce this salary from $10,000 to $7,500, I admit you can get men to fill the jobs; but what I will be glad to see is that this system should start off with the very best experts that we can get in this country to take charge of it, because from my reading of this bill I am of opinion that this business is not going to start off with any great rush. There will not be anybody smothered to death around the doors of these banks to start with. [Laughter.] It is going to be a slow growth until our farmers learn to use it and understand it. It is going to take men of exceptional executive ability, men who know something about the finances and financial affairs of this country, to administer this great system that we are to-day inaugurating in the interest of the farmers of this country.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. HOWARD. With pleasure.

Mr. MADDEN. I understood from what the gentleman said who reported this bill that there was so much demand for farm loans that the board of managers would be swamped with business. Does the gentleman wish to have the House understand that they would have to go out and look for business and that the farmers do not want loans?

Mr. HOWARD. This is what I mean by that: This is like every other new thing. When a thing starts in, and it just bursts on the folks all at once as this is going to do, the people are a little inquisitive at first, then they are interested, and then they want to get into it. It is going to take some time to educate American farmers on the question of rural credits, because I am frank to say that I have been discussing this matter here for five years with Members of the House, those who are here now and those of blessed memory who have passed on; and I am frank to say that I have not met over 40 or 50 gentlemen in the House itself who had really devoted very much study to this question, and it is an intricate question.

Mr. MADDEN. I have been led to understand that the farmers all over the country were crying for this thing like children are supposed to cry for Mrs. Winslow's soothing syrup.

Mr. HOWARD. They do want it. The farmers demand a system by which they can mobilize their credit and procure money to meet their capital requirements at lower rates of interest. That is what they are demanding, and I believe this bill will give it to them if it falls into proper managerial hands. Without question the farmer is in great need of some relief from the land sharks and skinflints.

Mr. HEFLIN. Will the gentleman yield?

Mr. HOWARD. Yes; I yield to my friend.

Mr. HEFLIN. I will ask my friend if he does not think this agricultural banking system that we are about to inaugurate is of such great importance that the salaries of this board ought to be sufficient to attract the very best men in the country?

Mr. HOWARD. That is exactly what I said in the outset, that you can not attract men of great financial experience and ability to fill these places by paying them meager salaries.

Mr. MORGAN of Oklahoma. Mr. Chairman, I move to strike out the last word.

Mr. GLASS. I ask unanimous consent that all debate on this amendment be limited to 10 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment close in 10 minutes. Is there objection?

Mr. MORGAN of Oklahoma. Reserving the right to object, may I be allowed five minutes of that?

Mr. GLASS. I have no objection.

The CHAIRMAN. The gentleman from Oklahoma was on his feet and will be recognized by the Chair.

Mr. GREEN of Iowa. Reserving the right to object, I should like at least one minute.

Mr. GLASS. That is with the Chair. There will be 10 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this amendment be limited to 10 minutes. Is there objection?

Mr. MANN. Reserving the right to object—I am not going to object to these requests—will we be likely to quit about half past 5 to-night?

Mr. GLASS. I should think so; yes.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. MORGAN of Oklahoma. Mr. Chairman, I am in favor of this amendment. I believe, of course, that we should have competent men to protect the affairs of the institution which we are here creating, and I believe that such men can be secured at a salary of $7,500 per annum. Look at the salaries paid in the Department of State. The Secretary gets $12,000 a year; but there is only one other officer in the State Department who gets as high as $7,500. Then, there are only two officers who get $5,000, and there are only three who get as high as $4,500.

Take the Treasury Department. The Secretary of the Treasury gets $12,000. There are only three officers who get as high as $5,000 in the Treasury Department.

Take the Department of Justice. The Attorney General gets $12,000 and the Solicitor General $9,000, and the next highest is $3,500, and only two who get as high as $3,500.

In the Department of the Interior the Secretary gets $12,000, the next highest officer $5,000, and only one other gets $4,500, and one other $4,000.

In the Department of Agriculture the Secretary gets $12,000, the next highest officer gets $5,000, and only two get $5,000, and the next highest gets $3,500.

The Secretary of Commerce gets $12,000; only one other officer gets as high as $5,000.

The Department of Labor is the same rate.

Mr. SLOAN. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. SLOAN. Congressmen receive only $7,500.

Mr. MORGAN of Oklahoma. Only that.

Mr. SLOAN. Does the gentleman know of anybody that works harder or is more efficient than Members of Congress?

Mr. MORGAN of Oklahoma. I do not; and I know of no one here that is more efficient than the gentleman from Nebraska.

The judges of the United States circuit courts get $7,000 and judges of the United States district courts get $6,000. It is true that the members of the Federal Reserve Board get $12,000, and I believe the members of the Federal Trade Commission get $10,000. But those salaries were fixed since the Republican Party went out of power. It seems to me that my good friends on the other side of the aisle ought not to continue to create offices with extravagant salaries. I believe it is a bad policy and a bad precedent. My theory is that when a man accepts a high Federal position or a high position in any State, he ought to be like I believe the most of you are—not here entirely for the compensation you receive, but you are here because you want to serve your country and your constituents, and because you appreciate the high honor they have bestowed upon you. [Applause.]

Mr. STEAGALL. I desire to add my indorsement of all the gentleman from Georgia has just said. The salary of the members of the Federal Reserve Board is fixed at $12,000. The system provided for in the bill under consideration for the benefit of the farmers of this country is just as important, if not more so, as the Federal reserve act. I do not believe it unfair to ask that the men to be placed in charge of this great system of the farmers should be paid as much as the members of the Federal Reserve Board, though the bill provides for $2,000 less than is paid members of that board. I do not believe in poorly paid public officials. In my judgment it is a mistaken policy to allow only meager and insufficient salaries for public officials charged with great responsibility and called upon to discharge duties of vast importance. We ought to fix these salaries so as to command the services of the very best men to be had. Certainly the men in charge of this system of the farmers ought to be of the same high class and ought to be paid as high compensation as is the case with the commercial banking system.

I think it is safe to say that the only argument offered that is calculated to win support for the amendment is the suggestion made by the gentleman from Indiana [Mr. CULLOP] that the reduction in salaries sought to be accomplished be used in lowering the interest charges to the farmers on their mortgages. But there is nothing whatever in that argument, for the reason that the salaries of the members of the Federal farm-loan board provided for in this bill are to be paid by the Federal Government. So we see it necessarily follows that the reduction sought by the amendment could not be applied in that way. [Applause.]

Mr. CULLOP. Does the gentleman yield?

Mr. STEAGALL. I shall be glad to yield to my friend from Indiana.

Mr. CULLOP. Is it not true that the farmer pays the taxes that are to take care of the salaries of the members of the Federal farm-loan board; and if so, would they not be benefited by the reduction provided for in the amendment?

Mr. STEAGALL. Of course, it is true that the farmers pay taxes like others; and I am sure in many instances they pay more than their just proportion. But the gentleman sought to convey the impression that the amount attempted to be saved

on the salaries of the Federal farm-loan board would, under the provisions of the amendment offered by him, be expended in the reduction of interest charges to be paid by the farmers on their mortgages, when the fact is that under the provisions of the bill every dollar of these salaries is paid by the Federal Government, and not one single dollar of it could be expended to pay interest on loans to the farmers. [Applause.]

Again, Mr. Chairman, the system we are attempting to establish is new. It has to be inaugurated and set to going. The members of the Federal farm-loan board must put the system into operation and will have to deal with problems in finance not only embracing several billion dollars but extending to every acre of the area of this country. They will be called upon to travel extensively and to meet many demands necessarily incident to the discharge of the duties directly devolving upon them as members of that board. It is true that the bill provides that the Government shall pay their expenses, but no one could anticipate, and no high-minded man holding an important office would care to charge every item of expense that would be unavoidable to one engaged in such activities. The farmers of the country will not object—on the contrary, it is their desire—that the Government in the inauguration of this system place in charge only the best men that can be secured, and they know that the surest way to accomplish that is to make the salaries such as to attract the services of such men. What they really want and expect at the hands of the Government is a system of rural credits that will make available to them the vast credit resources of the Nation upon the same rates at which they are open to other interests, and upon terms suited to the requirements of their business. [Applause.]

Mr. GREEN of Iowa. Mr. Chairman, I favor the amendment, and I favor it because I think I know something about the farm-loan business. I have had something to do with it in years past. What these men have to do is purely administrative. It is laid down by the provisions of the bill, and they have no business to deviate from it. They have but a very little discretion, and that is the discretion of the banker or the manager of the loan business that is carried on to a large extent in my State, where I regret to say we have $450,000,000 of mortgages on Iowa land. There are many men carrying on the land-mortgage business on a large scale who do not get the lower figure mentioned here. There are men who are presidents of great savings banks in New York that have deposits up in the hundreds of millions and who do not get any very large salary.

Mr. HARDY. Will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. HARDY. Would it not be better to start these salaries at $7,500 and then raise them in the future if it is necessary, rather than to start them at $10,000 and then try to cut them down?

Mr. GREEN of Iowa. I think so. I have not been impressed with the success of paying enormous salaries in the beginning. I know of one railroad that went through my State where they made a contract with a man to act as president for $100,000 a year for four years, and after he had run it one year they were glad to pay him any price to get him out. Similar other cases are to be found. The price does not always fix the value of a man with respect to his understanding of his business. [Applause.]

Mr. RAGSDALE. Mr. Chairman, I think this amendment ought not to carry. Certainly it is going to be difficult to successfully inaugurate any farm-loan system. Men are not put in there, like the presidents of banks, to stay for a long period of time and serve as long as their services are satisfactory. These men, by change of administration, will lose their positions. They will give up their positions at home——

Mr. CULLOP. Mr. Chairman, will the gentleman yield?

Mr. RAGSDALE. No. They will give up their positions at home and come to Washington, where it is expensive to live, and they will have to maintain themselves here. They will not know how long they are going to be here. They will have to take up an entirely new idea and put it into use and make it practicable; and I say that by comparison with services being rendered by other men in other departments, that in no single department in the city of Washington will the people of the country, the producers of the raw wealth, the farmers, get more return than they will from this board at this salary.

The CHAIRMAN. The question is on agreeing to the admendment offered by the gentleman from Indiana.

The question was taken, and on a division, demanded by Mr. HOWARD, there were—ayes 50, noes 33.

Mr. GLASS. Mr. Chairman, I demand tellers.

Tellers were ordered, and Mr. CULLOP and Mr. GLASS took their places as tellers.

The committee again divided, and there were—ayes 56, noes 34.

So the amendment was agreed to.

Mr. McKELLAR. Mr. Chairman, I offer the following amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Page 76, line 12, after the word "mortgage" insert "and shall not be pecuniarily interested directly or indirectly in any farm loan applied for under this act or in any farm loan association, joint stock bank, or Government agency provided for by this act."

Mr. McKELLAR. Mr. Chairman, may I have the attention of the chairman of the committee? Does the gentleman have any objection to that amendment?

Mr. GLASS. It is already covered in the bill.

Mr. HAYES. The penal sections cover that.

Mr. McKELLAR. I had overlooked that and I withdraw the amendment.

[Mr. CANNON addressed the committee. See Appendix.]

Mr. GLASS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee had had under consideration the bill S. 2986 and had come to no resolution thereon.

FEDERAL AID TO ROADS.

Mr. SAUNDERS. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Virginia rise?

Mr. SAUNDERS. Mr. Speaker, I would like to have unanimous consent to take from the Speaker's table the bill known as the Federal aid to roads bill, which came over from the Senate this morning, to disagree to the Senate amendment, and ask for a conference.

Mr. STAFFORD. Mr. Speaker, I ask that the gentleman postpone that request until to-morrow.

The SPEAKER. The Clerk informs the Chair that the bill has not come over.

Mr. SAUNDERS. Yes; it came over to-day, Mr. Speaker.

The SPEAKER. The gentleman from Virginia asks unanimous consent——

Mr. SAUNDERS. I withdraw that, Mr. Speaker.

The SPEAKER. The gentleman from Virginia withdraws his request.

EXTENSION OF REMARKS.

Mr. FESS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of our rights upon the seas.

The SPEAKER. The gentleman from Ohio [Mr. FESS] asks unanimous consent to extend his remarks in the RECORD upon the subject of our rights upon the seas. Is there objection? [After a pause.] The Chair hears none.

Mr. McKELLAR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the Army bill, which was before the House on yesterday.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks on the Army bill, which was before the House yesterday. Is there objection? [After a pause.] The Chair hears none.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 5172. An act to exempt from taxation certain property of the Daughters of the American Revolution in Washington, D. C.; to the Committee on the District of Columbia.

S. 1162. An act authorizing the President to appoint Col. James Jackson, United States Army, retired, to the rank of brigadier general on the retired list; to the Committee on Military Affairs.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 30 minutes) the House adjourned to meet to-morrow, Wednesday, May 10, 1916, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of York Harbor, Me. (H. Doc. No. 1088); to the Committee on Rivers and Harbors, and ordered to be printed, with illustration.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Frankfort Harbor, Mich. (H. Doc. No. 1089); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Guadalupe River, Tex., to Victoria, with a view to improvement by locks and dams (H. Doc. No. 1090); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

4. A letter from the Secretary of the Treasury submitting estimates of deficiencies in appropriations required by the Treasury Department to complete the service of the fiscal year ending June 30, 1916, and for prior years (H. Doc. No. 1091); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. ALEXANDER, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States; and for other purposes, reported the same without amendment, accompanied by a report (No. 659), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. MURRAY, from the Committee on Indian Affairs, to which was rreferred the bill (H. R. 10555) referring certain claims against the Choctaw and Chickasaw Nations of Indians to the Court of Claims, reported the same with amendment, accompanied by a report (No. 658), which said bill and report were referred to the Private Calendar.

Mr. SHOUSE, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 15494) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported the same without amendment, accompanied by a report (No. 660), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. CARY: A bill (H. R. 15492) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

By Mr. ADAIR: A bill (H. R. 15493) to authorize the erection of a public building at Decatur, Ind.; to the Committee on Public Buildings and Grounds.

By Mr. EMERSON: Joint resolution (H. J. Res. 221) to instruct the Commissioners of the District of Columbia to forbid the display of "The Birth of a Nation" in the District of Columbia; to the Committee on the District of Columbia.

By Mr. ALMON: Resolution (H. Res. 231) providing for printing additional copies of soil survey of Madison County, Ala.; to the Committee on Printing.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. SHOUSE [from the Committee on Invalid Pensions]: A bill (H. R. 15494) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; to the Committee of the Whole House.

By Mr. ANTHONY: A bill (H. R. 15495) granting an increase of pension to Elmer S. Battin; to the Committee on Invalid Pensions.

By Mr. CANTRILL: A bill (H. R. 15496) granting an increase of pension to Mrs. Bettie Pinnell; to the Committee on Pensions.

By Mr. CARY: A bill (H. R. 15497) granting a pension to John Amberg; to the Committee on Invalid Pensions.

By Mr. SULLOWAY: Petition of W. F. Alger and others, of Manchester, N. H., praying that this country may not be drawn into this war on account of the submarine issue; to the Committee on Foreign Affairs.

By Mr. TAYLOR of Colorado: Memorial of women's clubs, of Denver, Colo., against the Judiciary Committee reporting suffrage amendment; to the Committee on the Judiciary.

Also, petition of citizens of Grand Junction, Colo., favoring House bill 8665 to regulate working conditions of skilled labor on Government work; to the Committee on Labor.

By Mr. TILSON: Petition of New Haven (Conn.) Trades Council, favoring passage of House bill 8828, relative to wage scale on Panama Canal; to the Committee on Appropriations.

## SENATE.

### WEDNESDAY, *May 10, 1916.*

*(Legislative day of Tuesday, May 9, 1916.)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

Mr. CLARKE of Arkansas. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Hitchcock | Martine, N. J. | Smith, S. C. |
| Beckham | Husting | Myers | Smoot |
| Borah | James | Norris | Swanson |
| Broussard | Jones | Owen | Taggart |
| Catron | Kenyon | Page | Thomas |
| Chamberlain | Kern | Phelan | Tillman |
| Clapp | La Follette | Pittman | Underwood |
| Clarke, Ark. | Lane | Poindexter | Vardaman |
| Dillingham | Lea, Tenn. | Ransdell | Wadsworth |
| du Pont | Lee, Md. | Saulsbury | Warren |
| Gallinger | Lodge | Shafroth | Williams |
| Gore | McLean | Sheppard | |
| Gronna | Martin, Va. | Simmons | |

Mr. ASHURST. I have been requested to announce that the following Senators are detained from the Senate in the Judiciary Committee:

The Senator from Texas [Mr. CULBERSON], the Senator from North Carolina [Mr. OVERMAN], the Senator from West Virginia [Mr. CHILTON], the Senator from Florida [Mr. FLETCHER], the Senator from Missouri [Mr. REED], the Senator from Tennessee [Mr. SHIELDS], the Senator from Montana [Mr. WALSH], the Senator from Georgia [Mr. SMITH], the Senator from Min-

nesota [Mr. NELSON], the Senator from Utah [Mr. SUTHERLAND], the Senator from Connecticut [Mr. BRANDEGEE], and the Senator from California [Mr. WORKS].

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

EMPLOYMENT OF ADDITIONAL CLERK.

Mr. MYERS. I ask leave to submit a resolution for reference.

The VICE PRESIDENT. Is there objection? The Chair hears none.

Mr. MYERS submitted the following resolution (S. Res. 190), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the Committee on Public Lands be authorized to employ an additional clerk, at a salary of $100 per month, for a period lasting until the end of the present session of the Sixty-fourth Congress, the same to be paid out of the contingent fund of the Senate.

PERSONAL EXPLANATION.

Mr. LANE. Mr. President, if the Senator from Iowa [Mr. KENYON] will permit me a moment for a personal explanation, I wish to state that I made a mistake in my vote yesterday. I find that I voted "yea" upon the motion to recommit House bill 655, to pension the survivors of certain Indian wars from January 1, 1859, to January 1, 1891, inclusive, and for other purposes. I voted under a misapprehension. I was called out of the Chamber, and when I came in I was not familiar with the question I was voting upon, and I made a mistake. My intention was to vote "nay" on the question instead of "yea."

I have always been in favor of the measure which was before the Senate at that time, but I did not understand that the question was on a motion to recommit it. I wish the fact to go upon record that had I been fully advised in regard to my vote I would have voted the other way.

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. KENYON addressed the Senate in continuation of the speech begun by him yesterday. After having spoken, with interruptions, for five hours, he said:

I should like to say to the chairman of the committee that I have reached a point now where I will take up the specific items in the bill, and I would be very glad, if he is willing, to discontinue until to-morrow.

Mr. CLARKE of Arkansas. Very well. Unless there is some executive business to be disposed of——

Mr. STONE. There is.

Mr. CLARKE of Arkansas. I was going to move that the Senate take a recess until to-morrow, but I withhold the motion for the present.

[Mr. KENYON'S entire speech is printed in the Senate proceedings of May 9, 1916.]

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House further insists upon its disagreement to the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CARTER of Oklahoma, Mr. KONOP, Mr. HAYDEN, Mr. CAMPBELL, and Mr. NORTON managers at the conference on the part of the House.

PETITIONS AND MEMORIALS.

Mr. SMOOT. I present resolutions adopted by citizens of Utah assembled in mass meeting in Mackintosh Hall, Salt Lake City, May 1, 1916, to celebrate the anniversary of international labor day, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

*Resolved*, That we, citizens of Utah, assembled in mass meeting in Mackintosh Hall, Salt Lake City, Utah, May 1, 1916, to celebrate the anniversary of international labor day, protest against this continued suppression of women's right to political recognition and demand an immediate report.

*Resolved further*, That copies of this resolution be sent to the President of the United States, the Speaker of the House, majority leader of the Senate, floor leader of the House, chairman of the Judiciary Committee, chairman of the Rules Committee, and Senator SMOOT and Representative MAYS, with instructions to the two latter to read the resolution into the CONGRESSIONAL RECORD.

Mr. SMOOT presented memorials of sundry citizens of Salt Lake City, Utah, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

Mr. THOMAS presented petitions of sundry citizens of Denver, Colo., praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. SMITH of South Carolina presented a petition of the Foreign Missionary Societies of the First Methodist Church South of Dillon, S. C., praying for the enactment of legislation to prohibit the exportation of intoxicating liquors to Africa, which was referred to the Committee on the Judiciary.

Mr. PHELAN presented petitions of Camp No. 770, United Confederate Veterans, and of Wade Hampton Chapter, United Daughters of the Confederacy, of Los Angeles, Cal., praying for the enactment of legislation to grant pensions to Confederate veterans and widows of such veterans, which were referred to the Committee on Pensions.

He also presented a petition of sundry citizens of Madera County, Cal., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of the Chamber of Commerce of Northern San Joaquin County, Cal., praying for an appropriation of $300,000 for the improvement of the Yosemite National Park, and for the creation of a national-park service, which was referred to the Committee on Appropriations.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHIELDS:

A bill (S. 5935) granting an increase of pension to Walter P. Norris (with accompanying papers); to the Committee on Pensions.

By Mr. PHELAN:

A bill (S. 5936) granting a pension to George D. Doble;

A bill (S. 5937) granting a pension to Moetia Atwater;

A bill (S. 5938) granting an increase of pension to John C. Johnson;

A bill (S. 5939) granting an increase of pension to Edmond de Jarnac; and

A bill (S. 5940) granting a pension to Benjamin F. Jenkins (with accompanying papers); to the Committee on Pensions.

By Mr. OLIVER:

A bill (S. 5941) granting a pension to Joseph E. Fulton (with accompanying papers); to the Committee on Pensions.

AMENDMENT TO AGRICULTURAL APPROPRIATION BILL.

Mr. FLETCHER submitted an amendment providing that the unexpended balance on June 30, 1916, remaining to the credit of the appropriation authorized in the Agricultural act approved March 4, 1915, for the expenses of a commission to investigate and report to Congress on European cooperative land-mortgage banks and rural-credit unions, be appropriated and made available for the fiscal year 1917, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

INDIAN APPROPRIATIONS—CONFERENCE REPORT.

Mr. ASHURST. I submit the conference report on the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with the various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917. I ask that the report be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 6, 8, 11, 12, 15, 23, 30, 31, 32, 38, 40, 43, 44, 45, 49, 69, 73, 77, 88, 91, 92, 100, 108, 117, 118, 119, 120, 123, 133, 135, 147, and 149.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 9, 13, 16, 17, 18, 19, 20, 21, 22, 24, 25, 27, 28, 29, 33, 39, 46, 48, 50, 51, 52, 53, 54, 56, 58, 60, 61, 62, 63, 64, 66, 67, 68, 70, 71, 76, 80, 81, 85, 86, 89, 90, 93, 94, 96, 98, 99, 101, 103, 104, 106, 107, 109, 111, 112, 114, 115, 121, 122, 125, 126, 128, 130, 131, 134, 136, 138, 139, 140, 141, 143, 144, 145, 148, 150, 151, 152, 153, 154, and 155, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"The provisions of sections 2140 and 2141 of the Revised Statutes of the United States shall also apply to beer and other intoxicating liquors named in the act of January 30, 1897 (29 Stat. L., p. 506), and the possession by a person of intoxicating liquors in the country where the introduction is prohibited by treaty or Federal statute shall be prima facie evidence of unlawful introduction."

And the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the word "to" and insert in lieu thereof the following: "$5,000 of which shall"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following: *"Provided further,* That not more than $200,000 of the amount herein appropriated may be expended for the tuition of Indian children enrolled in the public schools:"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "two permanent warehouses"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the words "which has been," and in line 2 of said amendment strike out the words "heretofore or"; and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For beginning the construction by the Indian Service, of a dam with a bridge superstructure and the necessary controlling works for diverting water from the Gila River for the irrigation of Indian land and Indian allotments on the Gila River Indian Reservation, Ariz., as recommended by the Board of Engineers of the United States Army in paragraph 217 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $75,000, to be immediately available and to remain available until expended, reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., p. 522), the total cost not to exceed $200,000."

And the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For beginning the construction by the Indian Service of a diversion dam and necessary controlling works for diverting water from the Gila River at a site above Florence, Ariz., as estimated by the Board of Engineer Officers of the United States Army in paragraph 138 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $75,000, to remain available until expended, the total cost not to exceed $175,000: *Provided,* That said dam shall be constructed as a part of a project for the irrigation from the natural flow of the Gila River of Indian lands on the Gila River Indian Reservation and private and public lands in Pinal County, Ariz.: *And provided further,* That the water diverted from the Gila River by said diversion dam shall be distributed by the Secretary of the Interior to the Indian lands of said reservation and to the private and public lands in said county in accordance with the respective rights and priorities of such lands to the beneficial use of said water as may be determined by agreement of the owners thereof with the Secretary of the Interior or by a court of competent jurisdiction: *And provided further,* That the construction charge for the actual cost of said diversion dam and other works and rights shall be divided equitably by the Secretary of the Interior between the Indian lands and the private and public lands in said county; and said cost as fixed for said Indian lands shall be reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., p. 522); but the construction charge as fixed for the private and public lands in said county shall be paid by the owner or entryman in accordance with the terms of an act extending the period of payment under reclamation projects, approved August 13, 1914 (38 Stat. L., p. 686): *And provided further,* That said project shall only be undertaken if the Secretary of the Interior shall be able to make or provide for what he shall deem to be satisfactory adjustments of the rights to the water to be diverted by said diversion dam or carried in canals, and satisfactory arrangements for the inclusion of lands within said project and the purchase of property rights which he shall deem necessary to be acquired, and shall determine and declare said project to be feasible."

And the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For extension of the Ganado irrigation project on the Navajo Indian Reservation in Arizona for the irrigation of approximately 600 acres of land in addition to the area to be irrigated by said project, as authorized in section 2 of the act of August 24, 1912, $20,000; and for maintenance and operation of the project, $3,000; in all, $23,000, reimbursable and to remain available until expended."

And the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment as follows: In line 16 of said amendment strike out the figures "$15,000" and insert in lieu thereof the following: "$10,000"; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 100 Indian pupils at the Greenville Indian School, California, including pay of superintendent, $18,400; for general repairs and improvements, including purchase of additional land for school farm, $8,000; in all, $26,400."

And the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For the improvement and construction of roads and bridges on the Yuma Indian Reservation in California, $10,000, to be immediately available, reimbursable to the United States by the Indians having tribal rights on said reservation."

And the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $10,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Potawatomi Indians in the State of Kansas, and to be expended under his direction for the construction of bridges across the Big Soldier Creek and Little Soldier Creek, within the Potawatomi Indian Reservation, Jackson County, Kans.: *Provided,* That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of the county of Jackson satisfactory guaranties of the payment by the said county of Jackson of at least one-half of the cost of said bridges, and that the said proper authorities of the said county of Jackson shall assume full responsibility for and will at all times maintain and repair said bridges: *And provided further,* That any and all expenses above the amount herein named in connection with the building and maintaining of said bridges shall be borne by the said county of Jackson: *And provided further,* That this appropriation shall not become effective until approved by an Indian council to be called for that purpose."

And the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: Strike out the following language of the amendment: "Hereafter on ceded lands in the State of Minnesota embraced within the provisions of the law entitled 'An act for the relief and civilization of the Chippewa Indians in the State of Minnesota,' approved January 14, 1889, the minerals in and mineral rights pertaining to any of the lands, the cession of which was provided for in said act, and for which the United States has not conveyed title, shall be and remain in and are reserved for the use and benefit of the Chippewa Indians in the State of Minnesota"; and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment as follows: In line 6 of said amendment strike out the following: "at Keewaton Academy, Wisconsin," and the comma; and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In line 1 of said amendment, after the word "balance," insert the following: "of $3,436.03"; and the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the word "section" and in line 3 strike out the word "one" and insert in lieu thereof the words "this act"; and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the figures "$50,000" and insert in lieu thereof "$25,000"; and the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The work to be done with the amounts herein appropriated for the completion of the Blackfeet, Flathead, and Fort Peck projects may be done by the Reclamation Service on plans and estimates furnished by that service and approved by the Commissioner of Indian Affairs: *Provided*, That not to exceed $15,000 of applicable appropriations made for the Flathead, Blackfeet, and Fort Peck irrigation projects shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles for official use upon the aforesaid irrigation projects: *Provided further*, That not to exceed $7,500 may be used for the purchase of horse-drawn passenger-carrying vehicles, and that not to exceed $1,500 may be used for the purchase of motor-propelled passenger-carrying vehicles."

And the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to announce, at such time as in his opinion seems proper, the charge for construction of irrigation systems on the Blackfeet, Flathead, and Fort Peck Indian Reservations in Montana, which shall be made against each acre of land irrigable by the systems on each of said reservations. Such charges shall be assessed against the land irrigable by the systems on each said reservation in the proportion of the total construction cost which each acre of such land bears to the whole area of irrigable land thereunder.

"On the 1st day of December after the announcement by the Secretary of the Interior of the construction charge the allottee, entryman, purchaser, or owner of such irrigable land which might have been furnished water for irrigation during the whole of the preceding irrigation season, from ditches actually constructed, shall pay to the superintendent of the reservation where the land is located, for deposit to the credit of the United States as a reimbursement of the appropriations made or to be made for construction of said irrigation systems, 5 per cent of the construction charge fixed for his land, as an initial installment, and shall pay the balance of the charge in 15 annual installments, the first 5 of which shall each be 5 per cent of the construction charge and the remainder shall each be 7 per cent of the construction charge. The first of the annual installments shall become due and payable on December 1 of the fifth calendar year after the initial installment: *Provided*, That any allottee, entryman, purchaser, or owner may, if he so elects, pay the whole or any part of the construction charges within any shorter period: *Provided further*, That the Secretary of the Interior may, in his discretion, grant such extension of the time for payments herein required from Indian allottees or their heirs as he may determine proper and necessary, so long as such land remains in Indian title.

"That the tribal funds heretofore covered into the Treasury of the United States in partial reimbursement of appropriations made for constructing irrigation systems on said reservations shall be placed to the credit of the tribe and be available for such expenditure for the benefit of the tribe as Congress may hereafter direct.

"The cost of constructing the irrigation systems to irrigate allotted lands of the Indians on these reservations shall be reimbursed to the United States as hereinbefore provided, and no further reimbursements from the tribal funds shall be made on account of said irrigation works except that all charges against Indian allottees or their heirs herein authorized, unless otherwise paid, may be paid from the individual shares in the tribal funds, when the same is available for distribution, in the discretion of the Secretary of the Interior.

"That in addition to the construction charges every allottee, entryman, purchaser, or owner shall pay to the superintendent of the reservation a maintenance and operation charge based upon the total cost of maintenance and operation of the systems on the several reservations, and the Secretary of the Interior is hereby authorized to fix such maintenance and operation charge upon such basis as shall be equitable to the owners of the irrigable land. Such charges when collected shall be available for expenditure in the maintenance and operation of the systems on the reservation where collected: *Provided*, That delivery of water to any tract of land may be refused on account of nonpayment of any charges herein authorized, and the same may, in the discretion of the Secretary of the Interior, be collected by a suit for money owed: *Provided further*, That the rights of the United States heretofore acquired, to water for Indian lands referred to in the foregoing provision, namely, the Blackfeet, Fort Peck, and Flathead reservation land, shall be continued in full force and effect until the Indian title to such land is extinguished.

"That the Secretary of the Interior be, and he is hereby, authorized to prescribe such rules and regulations and issue such notices as may be necessary to carry into effect the provisions of this act, and he is hereby authorized and directed to determine the area of land on each reservation which may be irrigated from constructed ditches and to determine what allowance, if any, shall be made for ditches constructed by individuals for the diversion and distribution of a partial or total water supply for allotted or surplus unallotted land: *Provided*, That if water be available prior to the announcement of the charge herein authorized, the Secretary of the Interior may furnish water to land under the systems on the said reservations, making a reasonable charge therefor, and such charges when collected may be used for construction or maintenance of the systems through which such water shall have been furnished."

And the Senate agree to the same.

Amendment numbered 78: That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "For the purpose of making necessary repairs on the Government bridge across the Niobrara River near Niobrara, Nebr.; also to reconstruct one span of 90 feet over the back channel of the Niobrara River at the same point, the sum of $6,500; said sum to be expended under the direction of the Secretary of the Interior"; and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$91,100"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 290 Indian pupils at the Indian school at Carson City, Nev., including pay of superintendent, $50,430; for general repairs and improvements, $8,000; for irrigating school farm, $4,000; in all, $62,430."

And the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In line 4 of the amendment, after the figures "$15,000" strike out the period and insert a colon and the following: "*Provided*, That no part of this appropriation shall be expended for mileage, salaries, or expenses of employees."; and the Senate agree to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In line 2 of the amendment strike out the following: "And to remain available until expended"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87,

and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 350 Indian pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $59,550; for general repairs and improvements, $6,000; for water supply, $1,600; for the construction of an assembly hall and gymnasium, $25,000; in all, $92,150."

And the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 220 Indian pupils at the Indian school, Wahpeton, N. Dak., and pay of superintendent, $38,540; for general repairs and improvements, $5,000; for new school building, $20,000; in all, $63,540."

And the Senate agree to the same.

Amendment numbered 97: That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment as follows: Strike out all of said amendment and insert the following:

"To enable the Secretary of the Interior to redeem a mortgage on the allotment selection of Starr McGillis, a Turtle Mountain Chippewa Indian, described as the northwest quarter of section 34, township 164 north, range 70 west, of the fifth principal meridian, North Dakota, $1,500, or so much thereof as may be necessary."

And the Senate agree to the same.

Amendment numbered 102: That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the unexpended balance of $9,533.38 is hereby reappropriated and made available for continuing the relief and settlement of the Apache Indians formerly confined as prisoners of war on the Fort Sill Military Reservation, Okla., for the purchase of allotments in Oklahoma, as provided for in the act of June 30, 1913 (38 Stat. L., p. 77), for the three adult heads of families who have not heretofore received allotments."

And the Senate agree to the same.

Amendment numbered 105: That the House recede from its disagreement to the amendment of the Senate numbered 105, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "except that the Secretary of the Interior is hereby authorized within 30 days after the passage of this act to investigate claims not to exceed $1,950 growing out of contracts alleged to be in existence between John Calvin Gray, William T. Lancaster, Arthur Jennings, and Clyde Jennings, as enrolled members of the Choctaw or Chickasaw Nations, and Henry W. Blair, Kappler and Merillat, James K. Jones, Charles M. Fechheimer, and Eugene Hamilton, as attorneys, and in case such claims are found to be valid and the contracts approved in accordance with existing law, the said Secretary of the Interior may, in his discretion, apply any amounts that may be found due under this paragraph to the aforesaid enrolled members of the Choctaw or Chickasaw Nations to the payment of such fee, but the amounts due hereunder to other enrolled members of the Choctaw and Chickasaw Nations shall not be held in abeyance to this claim, but shall be paid promptly without reference to same"; and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$15,000"; and the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "$12,000; for remodeling sewer system, $5,000; for three high-pressure steam boilers, $7,200: *Provided*, That the unused balance of $9,830 of the amount appropriated by the act of August 1, 1914 (38 Stat. L., p. 602), and an additional amount of $2,500 may be expended for an addition to the assembly hall; in all, $128,700"; and the Senate agree to the same.

Amendment numbered 116: That the House recede from its disagreement to the amendment of the Senate numbered 116, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $3,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Klamath Indians of the State of Oregon, and use the same for the construction of a bridge across the Williamson River, on the Klamath Indian Reservation, Oreg., under such rules and regulations as he may prescribe."

And the Senate agree to the same.

Amendment numbered 124: That the House recede from its disagreement to the amendment of the Senate numbered 124, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "$67,500: *Provided*, That the unexpended balance of $1,607.44 appropriated by the act approved August 1, 1914, for repairing buildings and replacing equipment destroyed or damaged by the tornado of June 10, 1914, at Flandreau Indian School, South Dakota, is hereby reappropriated and made immediately available for the purchase and installation of a water tank and the purchase of dairy cattle for said school"; and the Senate agree to the same.

Amendment numbered 127: That the House recede from its disagreement to the amendment of the Senate numbered 127, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized and directed to cause investigation to be made as to the probable cost of providing on the various Sioux Indian Reservations, adequate school facilities for the children of the Sioux Tribes who are now without Government or public-school facilities on the respective reservations, and to make a report thereof to Congress on or before the first Monday in January, 1917, together with a complete and detailed statement of the per capita cost per annum, including mileage paid, now expended for the education of the Sioux Indian children in all the schools, whether on or off the respective reservations, and there is hereby appropriated for the expense of such investigation and report the sum of $1,000, or so much thereof as may be necessary, to be immediately available."

And the Senate agree to the same.

Amendment numbered 129: That the House recede from its disagreement to the amendment of the Senate numbered 129, and agree to the same with an amendment as follows: In line 7 of said amendment, after the word "highway," insert a comma and the following: "reimbursable out of any funds now or hereafter placed to the credit of said Indians in the Treasury of the United States"; and the Senate agree to the same.

Amendment numbered 132: That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $1,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Uintah Tribe of Indians, in the State of Utah, and to use the same to protect the north abutment of the Government bridge at Myton, Utah, under such rules and regulations as he may prescribe, said sum to be immediately available."

And the Senate agree to the same.

Amendment numbered 137: That the House recede from its disagreement to the amendment of the Senate numbered 137, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior be, and he hereby is, authorizd to sell and dispose of not to exceed 20 acres of that portion of the lands situated on the north side of and within the limits of the abandoned Fort Spokane Military Reservation, State of Washington, not necessary for hospital purposes, as provided for in the act approved August 1, 1914 (38 Stat. L., p. 584), at not less than the appraised value thereof, and to place the proceeds thereof in the Treasury of the United States to the credit of the Spokane Indians in said State."

And the Senate agree to the same.

Amendment numbered 142: That the House recede from its disagreement to the amendment of the Senate numbered 142, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,000"; and the Senate agree to the same.

Amendment numbered 146: That the House recede from its disagreement to the amendment of the Senate numbered 146, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That without bias or prejudice to the rights or interests of any party to the litigation now pending, the Secretary of the Interior be, and he hereby is, authorized to sell the timber on the so-called 'school lands' and 'swamp lands' within the boundaries of the Bad River and Lac du Flambeau Indian Reservations in Wisconsin, and to which the State of Wisconsin has asserted a claim; to keep a separate account of the proceeds of such sale with each legal subdivision of such land and to deposit the

said proceeds at interest in a national bank, bonded for the safekeeping of individual Indian moneys, to be paid over, together with the interest thereon, to the party or parties who shall finally be adjudged to be entitled to such fund: *Provided*, That the consent of the State or parties claiming title therefrom be obtained before any such sale shall be made."

And the Senate agree to the same.

Amendment numbered 156: That the House recede from its disagreement to the amendment of the Senate numbered 156, and agree to the same with an amendment as follows: In lieu of the matter proposed, insert the following:

"SEC. 27. On the first Monday in December, 1917, and annually thereafter, the Secretary of the Treasury shall transmit to the Speaker of the House of Representatives estimates of the amounts of the receipts to, and expenditures which the Secretary of the Interior recommends to be made for the benefit of the Indians from, all tribal funds of Indians for the ensuing fiscal year; and such statement shall show (first) the total amounts estimated to be received from any and all sources whatsoever, which will be placed to the credit of each tribe of Indians, in trust or otherwise, at the close of the ensuing fiscal year, (second) an analysis showing the amounts which the Federal Government is directed and required by treaty stipulations and agreements to expend from each of said funds or from the Federal Treasury, giving references to the existing treaty or agreement or statute, (third) the amounts which the Secretary of the Interior recommends to be spent from each of the tribal funds held in trust or otherwise, and the purpose for which said amounts are to be expended, and said statement shall show the amounts which he recommends to be disbursed (a) for per capita payments in money to the Indians, (b) for salaries or compensation of officers and employees, (c) for compensation of counsel and attorney fees, and (d) for support and civilization: *Provided*, That thereafter no money shall be expended from Indian tribal funds without specific appropriation by Congress except as follows: Equalization of allotments, education of Indian children in accordance with existing law, per capita and other payments, all of which are hereby continued in full force and effect: *Provided further*, That this shall not change existing law with reference to the Five Civilized Tribes."

And the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the amendment proposed, insert the following:

"SEC. 28. On or before the 31st day of December, 1916, the Bureau of Efficiency shall prepare and submit to the Secretary of the Interior a system of bookkeeping and accounting for the Bureau of Indian Affairs that will enable the said Secretary, on or before July 1, 1917, to meet the requirements of section 26 of the Indian appropriation act approved June 30, 1913 (38 Stat. L., p. 103)."

And the Senate agree to the same.

WITHDRAWAL.

*Executive nomination withdrawn May 10 (legislative day of May 9), 1916.*

Ray S. Sherman to be postmaster at South Glens Falls, N. Y.

## HOUSE OF REPRESENTATIVES.

### WEDNESDAY, *May 10, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We praise Thee, O Lord God, our heavenly Father, for the light of this another day, which fills the earth with its glory and makes glad the heart of man. So flood our souls, we beseech Thee, with the light of truth, that with clear vision and earnest hearts we may strive to do Thy will in whatsoever our hands findeth to do, in the faith, grace, courage, and fortitude of the Lord Jesus Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

EMBARGO ON SHIPMENT OF ARMS.

Mr. FLOOD. Mr. Speaker, some question has arisen about the position of the German Government in reference to an embargo upon the shipment of arms, ammunition, and munitions of war from that country during the Spanish-American War. It has been contended by some that such an embargo was placed by that Government upon such shipments, and statements in the autobiography of Andrew D. White, the American ambassador to Germany at that time, have been cited to sustain the contention that such an embargo existed.

This contention is not justified by the facts, and in order to put this matter right I ask unanimous consent to extend my remarks by the insertion in the RECORD of the following:

Extract from the autobiography of Andrew D. White (vol. 2, p. 168).
Letter written by Mr. White to Mr. W. B. Blake and published in the New York Times, Saturday, January 29, 1916.
Letter from Secretary of State Lansing to Rev. William E. Barton, of Oak Park, Ill., which appeared in the New York Times, January 29, 1916.

The SPEAKER. The gentleman from Virginia [Mr. FLOOD] asks unanimous consent to extend his remarks in the RECORD by publishing a letter from the Hon. Andrew D. White, at one time ambassador to Germany, and other documents and letters. Is there objection?

There was no objection.

Following are the documents and letters referred to:

THE AUTOBIOGRAPHY OF ANDREW D. WHITE.

[Vol. 2, p. 168.]

As to the conduct of Germany during our war with Spain, while the press, with two or three exceptions, was anything but friendly, and while a large majority of the people were hostile to us on account of the natural sympathy with a small power battling against a larger one, the course of the Imperial Government, especially of the foreign office under Count von Bulow and Baron von Richthofen, was all that could be desired. Indeed, they went so far on one occasion as almost to alarm us. The American consul at Hamburg having notified me by telephone that a Spanish vessel, supposed to be loaded with arms for use against us in Cuba, was about to leave that port. I hastened to the foreign office and urged that vigorous steps be taken, with the result that the vessel, which in the meantime had left Hamburg, was overhauled and searched at the mouth of the Elbe. The German Government might easily have pleaded in answer to my request that the American Government had generally shown itself opposed to any interference with the shipment of small arms to belligerents, and had contended that it was not obliged to search vessels to find such contraband of war, but that this duty was incumbent upon the belligerent nation concerned.

This evidence of the fairness of Germany I took pains to make known, and in my address at the American celebration in Leipzig on the Fourth of July declared my belief that the hostility of the German press and people at large was only temporary, and that the old, good relations would be restored.

—

[From the New York Times, Saturday, Jan. 29, 1916.]

CORNELL UNIVERSITY,
*Ithaca, N. Y., October 6, 1915.*

W. B. BLAKE, Esq., *New York City.*

DEAR SIR: The simple facts in the case to which you refer are as follows:

Receiving a message by wire from our American consul at Hamburg early during the war, to the effect that a Spanish vessel, supposed to carry munitions for Spain, was just leaving Germany, I asked the foreign office that the vessel be searched before leaving, my purpose being not only to get such incidental information as possible regarding the contraband concerned but particulars as to the nature of the vessel—whether it was so fitted that it could be used with advantage by our adversaries against our merchant navy, as had happened during our Civil War, when Great Britain let out of her ports vessels fitted to prey upon our merchant ships.

The German Government was very courteous to us in the matter, and it was found that the Spanish ship concerned was not so fitted up, and that the contraband was of a very ordinary sort, such as could be obtained from various nations. The result was that the vessel, after a brief visit, proceeded on her way, and our agents at Hamburg informed me later that during the entire war vessels freely carried ammunition from German ports both to Spain and to the United States, and that neither of the belligerents made any remonstrance. Of course, I was aware that, under the usages of nations, I had, strictly speaking, no right to demand seizure of the contraband concerned; but it seemed my duty at least to secure the above information regarding it and the ship which carried it.

I remain, Dear Sir, etc., ANDREW D. WHITE.

LETTER OF SECRETARY OF STATE LANSING TO REV. WILLIAM E. BARTON, OF OAK PARK, ILL.

[New York Times, Jan. 29, 1916.]

The department has received your letter asking whether it is true that during the Spanish War this Government requested the Government of Germany not to sell ammunition to Spain, and that the Government of Germany acceded to its request. In reply to your inquiry I have to say that no such request was made by the Government of the United States.

ROBERT LANSING,
*Secretary of State.*

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 5886. An act extending the time for the completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to amend an act approved July 20, 1912, entitled 'An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River,' approved August 23, 1912"; and

S. 5839. An act to repeal paragraph 4 of section 21 of the public-buildings act approved March 4, 1913, providing for the construction of a national archives building.

The message also announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 655. An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 3575. An act to amend section 5234 of the Revised Statutes of the United States so as to permit the Comptroller of the Currency to deposit upon interest the assets of insolvent national banks in other national banks of the same or of an adjacent city or town.

WITHDRAWAL OF PAPERS.

Mr. CLARK of Missouri, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of Jason L. Boyd, Sixty-third Congress, no adverse report having been made thereon.

CALL OF THE HOUSE.

The SPEAKER. This is Calendar Wednesday.

Mr. MOORE of Pennsylvania rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. MOORE of Pennsylvania. To make the point of no quorum.

The SPEAKER. The gentleman from Pennsylvania makes the point of no quorum. Evidently there is no quorum present.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Aiken | Drukker | James | Peters |
| Allen | Eagan | Johnson, S. Dak. | Pou |
| Anderson | Eagle | Jones | Pratt |
| Anthony | Edmonds | Kahn | Price |
| Austin | Fairchild | Keister | Ragsdale |
| Ayres | Farley | Kennedy, R. I. | Rowland |
| Bacharach | Finley | Kiess, Pa. | Sabath |
| Barchfeld | Flynn | Konop | Schall |
| Beales | Focht | Kreider | Scott, Pa. |
| Bennet | Fordney | Langley | Scully |
| Borland | Gardner | Lee | Sears |
| Brumbaugh | Godwin, N. C. | Lewis | Shackleford |
| Burnett | Gordon | Lieb | Sherley |
| Butler | Graham | Liebel | Siegel |
| Byrns, Tenn. | Griest | Lindbergh | Slemp |
| Capstick | Griffin | Lloyd | Smith, Minn. |
| Casey | Hamill | Loft | Snyder |
| Chiperfield | Hamilton, N. Y. | Longworth | Sparkman |
| Clark, Fla. | Hart | Loud | Steenerson |
| Coleman | Haskell | Maher | Stiness |
| Conry | Hay | Martin | Sutherland |
| Costello | Heaton | Montague | Taggart |
| Dale, N. Y. | Hill | Mooney | Taylor, Colo. |
| Danforth | Hilliard | Morin | Tinkham |
| Darrow | Hinds | Moss, W. Va. | Vare |
| Davis, Minn. | Hollingsworth | Nelson | Watkins |
| Dewalt | Hopwood | North | Whaley |
| Dooling | Houston | Overmyer | Williams, Ohio |
| Driscoll | Huddleston | Patten | Wilson, Fla. |

The SPEAKER. On this roll call 317 Members, a quorum, have answered to their names.

Mr. KITCHIN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. CARTER of Oklahoma. To ask unanimous consent to call up the bill H. R. 10385, the Indian appropriation bill, for the purpose of asking that the House further insist upon its disagreement to the Senate amendments and agree to a conference.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to call up the Indian appropriation bill, insist on the disagreement to the Senate amendments, and agree to a conference. Is there objection?

Mr. MANN. Mr. Speaker, I shall not object to the request, which would be in order to-morrow, and I would not object if it were not in order. I think it proper to call to the attention of the House, and possibly others, the fact that in violation of all parliamentary practice—and I am not sure but that it would be subject to a point of order—the distinguished body at the other end of the Capitol acted upon the conference report on the Indian appropriation bill while the papers were in the possession of the House.

It is not possible, Mr. Speaker, to keep track of proceedings with reference to a bill that has been passed by one body where there is only one official copy of the bill, unless the two bodies of Congress observe the parliamentary practice of taking action on a bill only when it has the physical possession of the papers. There have been some bills lost, and it puts a burden upon the enrolling clerk which is unjust to him and unfair to the House. If papers become lost and both bodies act upon a bill without having the papers, it gives an opportunity either to make a mistake by accident or intentionally, which would not be done by the present enrolling force of the House, but it is bad practice. I do not think the Senate had any right to act upon the conference report without having the papers in the Senate. The papers were in the House.

Mr. CARTER of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. MANN. Yes; I yield.

The SPEAKER. The Chair desires, if the House will permit, to indorse the remarks of the gentleman from Illinois [Mr. MANN]. The handling of these conference reports, with papers in them, ought to be done very carefully. Now the gentleman from Oklahoma [Mr. CARTER] and the House Members are not to blame. The Senate just walked off and left these papers lying on the table. It was like that case in the experience of Mr. UNDERWOOD in his first conference.

Mr. MANN. The papers were properly in the possession of the House conferees. That is where they belong.

Mr. CARTER of Oklahoma. If the gentleman will permit, I will say that the House conferees understood perfectly, and so did the Senate conferees, that the papers were in the possession of the House conferees. That matter was thoroughly discussed by the conferees, and it was agreed that the House should and would act before action by the Senate. What precipitated action in the Senate I am unable to say.

Mr. MANN. Well, it was either bad parliamentary law or a total disregard of the rights of the House, I do not know which.

The SPEAKER. Is there objection?

There was no objection; and the Speaker appointed as conferees on the part of the House Mr. CARTER of Oklahoma, Mr. KONOP, Mr. HAYDEN, Mr. CAMPBELL, and Mr. NORTON.

LEAVE TO EXTEND REMARKS.

By unanimous consent, leave was granted to Mr. SNYDER to extend his remarks in the RECORD.

FLOOD CONTROL.

The SPEAKER. This is Calendar Wednesday, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of the flood-control bill, H. R. 14777.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14777) to provide for the control of the floods of the Mississippi River and of the Sacramento River, Cal., and for other purposes, with Mr. CARAWAY in the chair.

The CHAIRMAN. There is an amendment pending, offered by the gentleman from Wisconsin [Mr. LENROOT]. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. LENROOT: On page 20, strike out the word "third" and insert the word "half."

Mr. LENROOT. Mr. Chairman, this is an amendment that was offered last Wednesday, which, if adopted by the committee, will compel the States or levee districts in the building and construction of levees to contribute $1 for every $2 contributed by the Federal Government under this bill.

As the bill now stands the Government will be compelled to contribute $3 in the building of these levees for every $1 contributed by the local interests.

Mr. Chairman, the report of this committee shows that in the levees constructed in the past the local interests have contributed $3 for every $1 that has been contributed by the Government. Now, it is proposed in this bill to go to the other extreme and have the Government contribute $3 for every $1 contributed by local interests, and I submit that that is entirely unfair and unjust. If they have been able in the past, as they have been, to contribute $3 for every $1 the Government has contributed, surely they will be able in the future to contribute $1 for every $2 that the Government contributes, which is my proposition.

Mr. Chairman, the chairman of the Committee on Flood Control has addressed a circular letter, which I suppose every Member of the House has received, urging the defeat of this amendment that I have proposed. In this letter he undertakes to show that even though my amendment is adopted, there will be a saving of only $3,000,000 to the Government. What is $3,000,000 to the Democratic majority? Only a bagatelle. Evidently the gentleman thinks it is so small that the committee should not consider such an infinitesmal sum as that, and therefore that the saving of $3,000,000 is not of the slightest importance.

Further than that, the gentleman goes on in his letter and says:

The money spent in revetment should not be charged against flood control, but should be charged against navigation.

Let me say here that the bill as it now stands proposes that $30,000,000 of the Government's money shall be contributed in the next five years to the building of levees, and that the balance of it, or $3,000,000 a year, shall be used for the building of revetments.

Mr. Chairman, the hearings before the committee show that, while upon the face of this bill an expenditure of only $45,000,000 upon the part of the Government is authorized, if these levees are built, it is expected that before they shall be fully protected by revetments instead of an expenditure of $45,000,000 there shall be an expenditure of $105,000,000.

The CHAIRMAN. The gentleman's time has expired.

Mr. LENROOT. I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Wisconsin [Mr. LENROOT] asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. LENROOT. It is expected that there will be an expenditure of $3,000,000 a year for the next 25 years to come. Now,

the gentleman from Mississippi [Mr. HUMPHREYS] in this circular says these revetments should not be charged against the levees, because they are for navigation only. Mr. Chairman, I want to read from the hearings before this committee from the testimony of Col. Townsend, so that we may see whether or not these revetments are a part of this reclamation proposition or whether they are solely for navigation, as the gentleman from Mississippi [Mr. HUMPHREYS] contends. He says, on page 247:

What we do first, we set aside a certain fund for dredging and the maintenance of the channel of the river. That sum will also include the funds for running the commission—for services. Then, within the last few years, we are setting aside a sum which will utilize our plant for revetment work; and that, as we are revetting the banks which are threatening the destruction of levees, is practically a levee proposition. Then the remainder of the funds goes to levee construction.

Again, he says:

As I say, the revetment work itself is absolutely going into levees; it is a protection of the levees. It is saving a levee that would cost more to rebuild than it would to build this revetment. So I consider really that the revetment is as much levee construction as the money that is spent directly upon the levee.

That is hardly in consonance with the letter that the gentleman from Mississippi [Mr. HUMPHREYS] sent to each Member of this House.

Another thing that probably is not known by this House concerning these levees upon which we propose to expend this enormous amount of money: The location of these levees is not determined by the Mississippi River Commission or by any agent of the Government. The location of these levees is determined by the States and the levee districts in which they are situated, but the Government spends the money upon them. Upon that proposition I want to read from Col. Townsend. On page 240 of the hearings he says:

Well, under our present arrangement the location of the levee line is decided by the local authorities, especially in the State of Louisiana; in fact, the levee line of the State of Louisiana is decided by the chief engineer of the State levee board. That is about the only authority in the State of Louisiana that can decide the question.

And again he says:

There is always a chance for friction where you have two independent bodies, but practically we have found that if we apply to a local board and say we desire to have such-and-such a levee line located that it will locate the line where we desire it. Theoretically I am willing to say that I can not indorse our methods at all, but practically they have not worked so badly as you would think.

In other words, we are spending this $30,000,000 on these levees without any agency of the Government determining where the levees shall be built. Yet gentlemen object to an amendment of this character that requires these levee districts to contribute $1 for every $2 that the Government expends upon them. Mr. Chairman, if justice should prevail there would at least be equal contributions upon the part of these levee districts, and I sincerely hope that this amendment will be adopted. And let me say one word to the Republican side of this House:

Many have been stampeded on the assertion that the Republican platform calls for a vote for this bill. I want to say that it does nothing of the kind. The Republican platform pledges only that the United States Government ought to contribute its proportional share toward the expense of flood control. No man can say that the provision in this bill is a fair or equitable share for the Government to contribute. [Applause.]

Mr. WOOD of Indiana. Mr. Chairman, I wish to say a word in opposition to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT]. It occurs to me that the United States Government could well afford to pay for all the improvements of this country necessary to prevent these disastrous floods. The United States Government has expended $400,000,000 in completing the Panama Canal. Why did it build the Panama Canal? Was it deterred in that great project simply because it improved adjacent territory? Is there anyone here asking that the people who owned the land adjacent to this great waterway should contribute one farthing toward its building? There are slides constantly occurring which is taking millions and millions of dollars to clean them out, and that results in improvement to the adjacent territory. Is there anyone here claiming that the adjacent territory should be made to contribute for that purpose?

I wish to say that it is my opinion that the improvement of the Mississippi River, in caring for the flood waters emptying into the Mississippi River is of more commercial importance to the people of the United States than the digging and construction of the Panama Canal.

This is a United States waterway, it does not belong to those people down there, and they are in no way responsible for the condition that presents itself by reason of the floods.

The gentleman from Wisconsin would have you believe that it is only the immediate territory adjacent to the Mississippi that is damaged by the floods. That is not the case, for hundreds of miles back from the river every time that the river gets on a rampage the lands are inundated, property destroyed, and lives endangered. If we had a great foreign foe threatening this country, would we not think it part of our duty toward our fellow citizens that we should repel the foe and protect the citizenship from it? Here is a foe not only threatening but doing the work each year, and it is a foe that these people should not be made to defend themselves against alone. It should fall upon the entire United States.

The waters from the North—from Montana, from New York, and all those States—flow down upon these people, and they are absolutely helpless. So I say that this thing should not be narrowed down to individual localities, because it is national in its scope. From 1881 down to 1890 every provision that passed the House in reference to the floods had a provision in it that it should not be used to prevent floods in that section of the country, but was merely for aid to navigation. I want to say to you that in my opinion in the observations we made from Cairo to New Orleans the navigation is a mere incident in comparison with the greater work that will be done in saving the country down there from the ravages of the floods.

So I say that in fixing the amount that the people of the locality ought to pay we should take into consideration the reasonable amount that the people in that locality should bear by reason of these floods. If that were to be the rule, they would have to contribute but a very small part individually, for they are responsible for a very small part of the flood waters of that country. If that were the rule, the country at large should contribute nearly the entire amount of the expenditure. I do not know how the gentleman from Wisconsin arrived at the amount the locality should contribute as compared with the amount the United States Government should contribute. It is a mere arbitrary fixation.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. MOORES of Indiana and Mr. DUPRÉ asked that the time be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WOOD of Indiana. Mr. Chairman, as I said, it is a mere arbitrary fixation of the amount. You might as well say that they should contribute it all, or that they should contribute three-quarters, or that they should contribute any given amount.

Mr. SMITH of New York. Will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. SMITH of New York. Is it not a fact that the people in the vicinity of Dayton and Hamilton, Ohio, are arranging to pay all the expenses of preventing the floods on the Ohio River?

Mr. WOOD of Indiana. I do not understand that that is true. I know the people of the Miami country which was visited by the flood waters in 1913 were asking this committee that they be given relief. I know that by a recent petition that came from the people of that country that the Army engineers now are trying to work out a scheme and making plans to take care of the flood waters of the Miami River. I know that some rivers in my own State are included and in Ohio and Pennsylvania that will be taken care of in time.

Mr. GARD. Will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. GARD. For the information of the gentleman I will state that I hold in my hand a report of the engineer in charge of the improvement of the Miami Valley comprising a form of flood-control improvement, not an appropriation bill but a bill which seeks to have the land benefited take care of the needed improvement. [Applause.] I commend this to the gentleman and members of his committee.

Mr. WOOD of Indiana. Who is the author of the report that the gentleman has?

Mr. GARD. The author of the report is the man employed by the people, a commission employed by the people out there to take care of their own problem. [Applause.]

Mr. WOOD of Indiana. That may be true. I am not here for the purpose of disputing it, but I am here for the purpose of edifying the Members of this House upon the fact that there are gentlemen engaged in States, perhaps Ohio may be one of them, who are exploiting different kinds of interests for the purpose of forwarding their different selfish interests. I hope that is not true in the State of Ohio, but I do know that the people of the State of Ohio are asking relief from this committee and that we are receiving communications from them.

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. FREAR. Is it not true in this case that 15,000,000 acres are reported by the committee to be reclaimed by this act, and, according to the testimony, they will be valued at about $100

an acre when reclaimed—not the testimony before the committee, but the testimony of those who have submitted statements?

Mr. WOOD of Indiana. I admit that is true, but what of it?

Mr. FREAR. The gentleman suggests private interests. That would amount to $1,500,000,000 in that one case; that ought to pay its fair share toward this reclamation project.

Mr. WOOD of Indiana. I admit that that is true, but what is its fair share? The same thing might be said with reference to the gentleman's country. If it had not been for Federal aid, if it had not been for the strong arm of the Government in developing his country by reason of putting the great railway systems through there, would the lands in his State have been worth a hundred dollars to-day? By reason of the fact that the railroads were put through and that millions and millions of dollars were expended in the improvement of the rivers and harbors in his State the lands there are worth what they are to-day.

Mr. FREAR. Every dollar of expense for the reclamation of lands in my State from swamps is borne by the property holders and those lands are just as valuable and important to the people of my State as are the lands along the Mississippi River important to the people who reside there.

Mr. WOOD of Indiana. Yes; and your streams are but little bits of branches that are within the confines of the State, rising there, perhaps, and having their outlets into other streams that are directly contributing to this great flood situation down in the Mississippi Valley. That is the reason I say the Members of this Congress should be broad-minded enough to know that in the improvement of our lands throughout the north country we are devastating the lands of the south country. Every string of pile put in in Indiana is precipitating that much more water into this flood situation down there.

Mr. FREAR. Has the gentleman studied the gauge reports at Cairo, which show that it is not the cultivation of the lands, it is not the drainage of the lands, that causes the floods, but the erection of levees, which are damming up the waters to-day, bringing the water from a distance of 70 miles at Vicksburg down to a distance of from 3 to 5 miles. It is the damming up of the waters.

Mr. DUPRÉ. Does not the gentleman know that that has been contradicted by every engineer of repute?

Mr. FREAR. I have quoted an engineer to that effect.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. FREAR. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more. I took up a good deal of his time.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, before the gentleman proceeds, I wonder if we can not agree on some time for debate on this paragraph?

Mr. LENROOT. I have another amendment to the paragraph. I am willing to agree to close debate on this amendment.

Mr. GOOD. I want to offer another amendment to this paragraph.

Mr. HUMPHREYS of Mississippi. We ought to be able to agree on some time. We are reading this bill by paragraphs, gentlemen understand, and not by sections, on the assurance that we will be able to get through; that there would be no attempt to delay.

Mr. LENROOT. I suggest that we agree on time on this amendment and run on a while.

Mr. MANN. Let us agree on time on this amendment. I agree with the gentleman that there was the understanding in the House that we would endeavor to finish this bill to-day; that we would conclude the bill to-day, and I shall try to help the gentleman in that respect.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 50 minutes, one half of that time to be controlled by myself and the other half by the gentleman from Wisconsin [Mr. LENROOT].

The CHAIRMAN. Is there objection?

Mr. CULLOP. Mr. Chairman, I would like to inquire if the 50 minutes include the 5 minutes to be granted, I hope, to my colleague from Indiana [Mr. WOOD]?

Mr. FOSTER. Let the gentleman have 5 minutes additional to the 50 minutes.

Mr. HUMPHREYS of Mississippi. I understand the gentleman from Indiana to have five minutes in addition to that.

The CHAIRMAN. Is there objection?

Mr. SMALL. Mr. Chairman, I object.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I move that all debate on this amendment close in 55 minutes.

The CHAIRMAN. The gentleman from Mississippi moves that all debate on the amendment close in 55 minutes.

Mr. SMALL. Mr. Chairman, I move to amend by making it 60 minutes.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I will accept the amendment and modify my motion to make it 60 minutes.

The CHAIRMAN. The question is on agreeing to the motion of the gentleman from Mississippi that all debate on the pending amendment close in 60 minutes.

The motion was agreed to.

Mr. WOOD of Indiana. Mr. Chairman, I will say only a few more words with reference to the suggestion of the gentleman from Wisconsin [Mr. FREAR] concerning what the engineer says about the floods and the increasing floods at Cairo. Those floods are shown to be increasing not only in frequency but in volume at Cairo. The devastation is below Cairo. The cause of the floods is attributed to a great many reasons. Some gentleman has figured out that it is caused entirely by the destruction of the forests, and we are told that one elm tree 2 feet in diameter drinks five hundred and sixty-odd gallons of water in a day. That may be true, but that is getting it down so fine that it is beyond my ken. But we are not confronting a theory, we are confronting a condition, and what is true with reference to the reclamation of those lands down there and their being made to bring forth material wealth to the country is a matter that is of importance to the United States, including all sections of the country.

And if the flood waters of this country, that come from more than three-fourths of the territory of the United States, are devastating that land there and keeping this 16,000,000 acres worthless, why is it not the part of economy for the United States to undertake to remedy the evil that is making this devastation possible? This is a project that belongs to the United States. It is a flood that is caused by the waters of the United States; not by the waters of Indiana or Ohio alone, but by the waters that come from far-away Montana and far-away New York, all of which spread themselves out over that country, and the North is precipitating its waters faster and faster each year onto this flood district.

Mr. FESS. Will the gentleman yield?

Mr. WOOD of Indiana. Yes, sir.

Mr. FESS. Conceding that deforestation and also drainage do put water in the channels quickly and produce this flood, is the gentleman satisfied that this inevitable flood that is bound at times to come down—is the gentleman satisfied that this method will remedy it?

Mr. WOOD of Indiana. Yes; I am satisfied that it will remedy it. I am satisfied that these engineers—Col. Townsend, who especially has spent more than half his lifetime in studying the problem, I believe that he, impartial as he is, fair-minded in all things as he is, will convince any man here if he will listen to him that this project is a feasible one and that it will reclaim the land which they are claiming it will reclaim.

Mr. FESS. Will the gentleman permit another interruption?

Mr. WOOD of Indiana. Yes.

Mr. FESS. The only concern I have in voting this money out of the Treasury is whether or not it will not be wasted. That is the only concern I have. I would vote for it quickly if it would do the work.

Mr. WOOD of Indiana. We do know that the levees will do it where the levees are made high and strong. We saw a demonstration of the practicability of the strong levee, and we saw a demonstration of the impracticability of the weak levee down there. We went about a distance of 35 miles, going from Greenville to Vicksburg, really 150 miles, but 35 miles of that distance was in 52 inches of water on top of the railroad iron, through which we were running with two engines. That water came by reason of a break in a levee that happened more than 60 miles away. Had that levee been intact and strong, as the Government levees have been, and they do not break, this country through which we were running would not have been flooded—there was water 40 miles on either side like that—and it would have been as dry as this floor is here to-day. So there was a demonstration of how the thing works; and the trouble about the whole business is there has been enough money wasted in work down there to have completed a flood-control scheme if it had been scientifically applied, if it had been invested under the direction of one central scheme and one supervising architect.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. MOORE of Pennsylvania. What difference is there in the method that has heretofore been employed and the method that is to be employed?

Mr. WOOD of Indiana. There is this difference in the method. These people when they depended entirely upon their own resources in building these levees built them low and narrow and they did not take pains to see that the rubbish was moved out from inside of the levees. In consequence of that as quickly as the rubbish on the inside began to rot away these breaks came in these levees, and they have been repairing them and repairing them and they have been making the best that they could out of the situation that has presented itself.

Mr. MOORE of Pennsylvania. The gentleman knows the Mississippi River Commission has been in operation since its creation in 1879 and that this bill proposes to continue its work. Now, if there has been waste in the past and this money has been misapplied, what is the advantage in continuing the system as proposed in this bill?

Mr. WOOD of Indiana. This advantage—and I am glad the gentleman asked the question. Heretofore they have been making these improvements as an incident to the navigation of the Mississippi River, and the flood control of the waters for the purpose of saving the devasted country was a mere incident. The prime purpose was that of navigation. Now, it is the purpose of this measure, and measures that are to follow it, to take up the thread of the work where it is left off and continue it and have the work continued. The trouble has been in times past that they have reached the end of their string and had to quit. They did not have any money with which to go on, and in that way a great amount of money was wasted. Now, it will be a continuous proposition until it is completed.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CLINE. Is it not true that the revetment of the levees constitutes a very material element in making the levees substantial enough to hold the water back?

Mr. WOOD of Indiana. Absolutely.

Mr. CLINE. And that is a new feature.

Mr. WOOD of Indiana. My time has expired.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. ADAMSON having taken the chair as Speaker pro tempore, a message from the President, by Mr. Sharkey, one of his secretaries, announced that the President had, on May 10, 1916, approved and signed bills of the following titles:

H. R. 12207. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1917, and for other purposes; and

H. R. 10750. An act permitting the Mondak Bridge Co. to construct, maintain, and operate a bridge across the Missouri River, in the State of Montana.

FLOOD CONTROL.

The committee resumed its session.

Mr. GARD. Mr. Chairman——

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. Is the gentleman from Ohio for or against the amendment?

Mr. GARD. Mr. Chairman, I speak for the Lenroot amendment.

Mr. Chairman and gentlemen of the committee, what I am about to say is not said in complaint or criticism, for I realize the fact that the lower part of the Mississippi River bears a great burden of flood waters and therefore it, of all parts of the United States, ought to be adequately protected. And I do not speak and shall not speak against any appropriation of necessary money for the protection of the lower part of the Mississippi River, but will gladly do all in my power to afford such protection.

I have been prompted to speak at this time because of the statement of the gentleman from Indiana [Mr. WOOD], who is a member of this newly created Committee on Flood Control, concerning the character of improvements for flood control in the State of Ohio. My only objection to this bill, which has been brought out from the Flood Control Committee, is that it is not a bill such as the House has been led to expect. When this committee was created, I think it was in the mind of every man who voted for the creation of the committee that this body of men would give their study to the problem of affording protection and control of flood waters as a nation-wide project. I am sorry that the committee has not approached it in that way, but has chosen instead to present a system of local improvements and appropriations for local improvements.

I realize that this is the big unit in flood control, but I feel that the plan which the committee was by the House invested with power to determine was greater than merely the consideration of the one largest unit. Therefore my regret, and I think the regret of the Members of the House, and I am sure the regret of the people of the United States, is that this committee has not tried to report to this House a comprehensive plan of flood control.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Ohio yield to his colleague?

Mr. GARD. I will momentarily. I have not much time.

Mr. SWITZER. Will the gentleman please state to the House the outline of the Ohio plan that he has in mind, in contradistinction to the plan embodied in this bill?

Mr. GARD. I was about to come to that, Mr. Chairman. On the Great Miami River in Ohio, which, of course, is inconsequential in comparison with the great Mississippi River, in a region typical of the average country damaged by flood, the people of Ohio have made through legislative provision a law which is State-wide in its aspect and its benefit, and as to that I shall endeavor briefly to advise this committee. This law was written largely by one man, the Hon. John A. McMahon, of Dayton, Ohio, the dean of the Ohio bar, and a man who saw honored service in this House of Representatives, and who, as the climax of a career of public service, has given his very best efforts in order that the people of his community and the State of Ohio may be protected, in so far as legislative enactments can protect, against damage by flood.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. GARD. May I ask unanimous consent to proceed for five minutes?

The CHAIRMAN. The time has been allotted.

Mr. REAVIS. Mr. Chairman, I was given five minutes' time on this debate. I will yield my time to the gentleman.

Mr. GARD. I thank the gentleman.

The CHAIRMAN. The gentleman from Ohio is recognized for five minutes more.

Mr. GARD. Coming immediately to the discussion of the way in which the State of Ohio takes care of its problem, I will say that in 1914 the Legislature of the State of Ohio passed what is called a "conservancy law," for the purpose, first, of controlling floods and regulating stream channels by widening and deepening the streams; second, of reclaiming and filling wet and overflowed land; third, of providing irrigation where it may be needed; and, fourth, of regulating the flow of streams by diverting in whole or part and eliminating watercourses, and so forth. In other words, it is a proposition that deals, not in a local way, but is beneficial to the people of the entire State and, indeed, Nation, in the solution of the problem of control of flood waters.

The distinction between the Ohio plan and the plan of the committee of which the gentleman from Mississippi [Mr. HUMPHREYS] is chairman is that the Ohio plan recognizes the necessity of a general plan for taking care of its flood waters and provides for the payment therefor by assessments. The land benefited by this improvement bears the cost of making the improvement.

I realize that this question of protection of the lower Mississippi Valley is, of course, necessarily on a scale of much greater magnitude than the protection afforded in any nonnavigable river such as the river I have spoken of, but the plan should be the same; and I think what the House has been led to expect from this committee is a plan which would extend all over the United States, which would preserve the property and lives of the people everywhere against the encroachment of floods.

That is what the House wants to know, and not merely that an appropriation of $45,000,000 is brought here for passage. That is not what this committee should have done, because I think everyone will vote, if it is deemed necessary to do so, for the appropriation of any amount of money for the protection of the lower Mississippi River. I am sure that I would do so.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. GARD. Yes. I have but a very short time, but I will yield.

Mr. SWITZER. By what method would you control the water of a flood according to the Ohio plan, and in what way does it differ from the method proposed for the control of the Mississippi? That is what I wanted the gentleman to point out.

Mr. GARD. The Ohio plan is a legislative enactment which provides that a board which is selected shall have the power to call before it competent engineers to determine the proper kind of protection for a given locality. Everyone knows that the question of flood protection depends on the locality, that one sort of protection may be properly afforded in the Mississippi Valley and another in the Missouri and another elsewhere. There is no one general plan of flood protection that you may lay down as

being right and another wrong. What the House wants here is a general plan of authorization to act. It wants information from the committee as to what it recommends as a constructive and general law. If the committee is to take the place of an appropriation committee and make local improvements, that is one thing; but I do not think that is what the House wants.

As I conclude, I wish to say again that I have no criticism against the members of the committee or against what they have done, except to regret that they have not done what the House desired them to do. I believe that in the matter of flood protection, if it is possible for the people of a locality to contribute according to the benefits derived, they should participate in the cost of that improvement. Unquestionably this should be done in any land-reclamation project where the value of adjacent lands is greatly increased, as it is said would be done by this bill. Therefore I shall vote in favor of the Lenroot amendment.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. HUSTED rose.

The CHAIRMAN. The gentleman from New York [Mr. HUSTED] is recognized.

Mr. HUSTED. Mr. Chairman, I sincerely trust that the amendment offered by the gentleman from Wisconsin [Mr. LENROOT] will not be adopted, because I believe that it is unnecessary and unjust and is fraught with a certain amount of danger to the success of this undertaking.

Since 1880, when the United States Government took charge of the matter of the construction of levees on the Mississippi River, $90,000,000, in round numbers, has been contributed by local interests and $30,000,000 by the Federal Government. The amount which has been contributed by local interests has been very largely, if not wholly, controlled by the Federal Government, because the Federal Government has been in a position to say that it will not extend any aid to any particular levee district unless the local interests contribute as much as in the opinion of the Mississippi River Commission is a just and fair share.

Many gentlemen seem to proceed upon the idea that under this bill, in the form in which it was introduced, the local interests would contribute only $10,000,000. That is not true, and it is only fair to assume that the Mississippi River Commission, which is an agency of the United States Government, will continue to compel the local interests to contribute as much as in their opinion is a just and equitable share, as they have done in the past, ever since 1880.

In my opinion, if this bill becomes a law in its original form, the local interests will contribute not $10,000,000, but at least $15,000,000.

Now, the territory along the Mississippi River on which these levees have been constructed and are to be constructed is divided into levee districts. There are some 22 of these levee districts. Some of them have a very large assessable area in proportion to their levee frontage; others have a very small assessable area in proportion to their levee frontage. Some of these districts are very prosperous; others are on the verge of bankruptcy.

Now, the reason why the committee provided in this bill that the local interests should contribute not less than one-third of the amount contributed by the Federal Government was because there are several of these levee districts which can not afford to contribute more than one-third toward the cost of the project. The question was put to Col. Townsend, the chairman of the Mississippi River Commission, "Colonel, what in your opinion is the most which the least financially able levee district could afford to contribute toward the cost of this improvement?" And Col. Townsend, in reply to that question, said that there were several districts that could not afford to put up $1 to the Government's $2, and that is the reason why the one-third ratio was fixed in the bill. Now, the gentleman from Wisconsin [Mr. LENROOT] says if these districts have contributed three times as much in the past as the Government has contributed, they certainly will be able to contribute one-half as much in the future; but the gentleman from Wisconsin fails to realize that while those levee districts were contributing three times as much as the Federal Government they were exhausting their ability to contribute, and some of these districts are now in such a condition that they could not raise enough money, unless you burdened them beyond the bounds of reason and beyond the bounds of justice. [Applause.]

Mr. GOOD. Mr. Chairman, in 1909 there were quite a number of the Members of Congress who took a trip down the Mississippi River from St. Louis to New Orleans. I had the good fortune to be in that party, and I do not believe that I understood the great problem of the control of the flood waters of the Mississippi before as I did after taking that trip. It is a great problem, and one that I believe should have the assistance of the National Government so far as paying for the control of the floods is concerned; but I believe the amendment offered by the gentleman from Wisconsin [Mr. LENROOT] is a reasonable amendment and should be adopted. I recall one day on that long trip down the river looking out over Arkansas, and as far as one could see there were no signs of habitation. The question was asked some of the Arkansas Members as to the reason for that lack of occupancy and cultivation of the soil, because the land seemed to be fertile. It was of that character described by the chairman of the committee, Mr. HUMPHREYS of Mississippi, in his speech, when he said:

> Sixteen million acres of the geological cream of the earth are awaiting the magic touch to spring into fields of waving beauty.

It did seem to us that that was the case, and the question was asked of the Members from Arkansas as to whom does that land belong and what its value was. The reply was that it was largely held in large holdings; that it had no value except a speculative value; that it is held by men who kept it for speculative purposes. If I understand these hearings correctly, there are 20,000,000 acres sought to be controlled in this way, 20,000,000 acres that we are going to reclaim. I do not believe this bill correctly states the amount of expense necessary for the redeeming of this land. Maj. West, an Army engineer, before the Committee on Rivers and Harbors a couple of years ago, said that it would cost $228,000,000 to revet and build levees for the Mississippi, and that did not include the revetting or building of levees on its tributaries. Now it is proposed here to do this work for $45,000,000. I do not believe the gentleman from Mississippi [Mr. HUMPHREYS], the chairman of this committee, will seriously contend that $45,000,000 will at all complete the great work and control the floods of the lower Mississippi. From my reading of the testimony I am satisfied that it will take a great deal more than that, and if that is not true then some of the Army engineers have laid themselves liable to severe censure by Congress.

What is the Lenroot amendment? The Lenroot amendment provides that one-third of the cost of this improvement shall be borne by the States and two-thirds by the Government. The States, through their legislatures, have a right to levy an assessment upon these large holdings of land for improvements that add to the value of the land. I will say that I have no doubt if floods could be prevented that land on the Arkansas side of the character I have described would actually sell for more than $100 an acre, and I was told at the time of my trip that that land was selling for speculative purposes at from $5 to $15 per acre. Are we not going to do something to prevent these land sharks from reaching their hands into the Federal Treasury and taking out large sums to make an improvement that is to add greatly to the value of their land, without in some way providing that they shall pay some adequate return for the benefits they receive? I think the gentleman from Ohio [Mr. GARD] has hit the nail on the head with regard to improvements of this kind. In practically every State of this Union, in making internal improvement of this kind, it is provided that at least a portion of the cost shall be assessed against the property that is benefited. We provide nothing of the kind here, and we hold out to the States whose lands are to be improved no inducement to pass that kind of legislation. Why adopt a plan of economy for expending State and municipal funds and one of extravagance for Government funds? I am sorry my Republican friend failed to read what the party said in its last platform with regard to an equitable division of the cost of this improvement. [Applause.]

Mr. DUPRÉ. Mr. Chairman, the people of Louisiana are watching with strained and eager eyes the proceedings of this House to-day, and praying with anxious hearts that before it adjourns this bill, which means so much to us and for which we have been working so long, will have passed and have been sent to another Chamber for consideration. Their interest and hopes are not limited to any class or section of our people. The sentiment for flood control, under Government auspices and with Government aid, is universal in our State, but I do not suppose that there is any part of it more vitally interested in and more anxious for its early consummation than the district that I represent, bisected as it is from end to end by the great Father of Waters. The city of New Orleans, which I have the honor in part to represent and beside whose doors flow the waters of 40 States, is especially concerned about this question and has a right to expect and believe, after the liberality with which it has taxed itself for protection, that the Government will do its share. It is not asking for aid for itself, for we, without any Government assistance and under a system of taxation which almost amounts to confiscation, have built a system of levee protection that will care for that city; but the

interests of the whole State and that of its great city are inseparably interwoven, and so the entire population of that metropolis is aroused to the greatest tension over what is being done here to-day.

In the four parishes which I represent—Jefferson, St. Charles, St. John, and St. James—however, the question is even nearer and a more personal one, involving as it does, every piece of property in those parishes, and the life of every man, woman, and child, for, sad to say, some of the worst crevasses in the whole history of levee breaking have taken place in those parishes. It is a long tragic roll—the crevasses at Bonnet Carre, Nita, Belmont, Ames, and Hymelia, the most recent and one of the most disastrous of all, which occurred in the terrible flood of 1912, and which, according to the hearings on this bill, caused a property loss of more than $5,000,000.

Our people, Mr. Chairman, want to thank this House for the way in which this measure has been received and for the nonpartisan character of support which it has obtained, and which, we trust, will be further evidenced on final passage. [Applause.]

It is, of course, discouraging to us that the gentleman from Wisconsin [Mr. LENROOT] has seen fit to offer an amendment to increase the proportion of local contribution that our people will have to make should this bill pass, over and beyond that suggested by the committee. We are not mendicants; we are willing to help ourselves, but after all we have done in that direction we had hoped that the relative basis of Government and local aid on a proportion of three to one would be recognized by all as fair and just.

The Government engineers, in their statement before the committee, thought that it would be reasonable and equitable, in view of the tremendous sums that the States of the Mississippi Valley have already contributed out of their own pockets, for the Government of the United States to contribute four dollars to every one tendered by the local communities. The committee modified the engineer's suggestion and adopted the plan of three to one. Now comes the gentleman from Wisconsin, and, I am sorry to say, in a sense, the gentleman from Illinois [Mr. MANN], suggesting that a further modification should be made, and that the levee tax-ridden people of Tennessee, Arkansas, Mississippi, and Louisiana must put up one dollar for every two that comes out of the Public Treasury. Oh, I suppose we will do it if you drive us to it. Certainly it will be better than what we have been doing in the past, putting up three dollars for every dollar that you, with niggardly and almost unwilling hand, have given us. But I do want to call your attention to the fact, for instance, that since 1880 my State has spent more than $45,000,000 in an effort to protect itself from the ravages of the river. Why, gentlemen, do you know that the levee tax in the city of New Orleans alone some years ago amounted to $675,000—3 mills on an assessed valuation of $225,000,000? The Orleans Levee Board is authorized by constitutional amendment to meet a bond issue, which was floated some years ago, to levy a tax of from 1 to 3 mills, as necessity required. Last year the tax was 2 mills, or $500,000. Is it right to ask one community to bear such a burden as that? And what is true of levee taxation in New Orleans is equally true in other levee districts, not so rich as ours and not so well able to bear the awful burden as we have been.

I plead to you gentlemen not to support the Lenroot amendment. Show that you realize the national character of the Mississippi River problem, and that you, even those who have never seen the river at flood time and have no knowledge of its horrible possibilities and of the awful feeling of insecurity that comes over our people every spring when a rise is anticipated, will stand by the committee's proposition, fair and just, and vote down the ungenerous and narrow and, I do not like to believe, sectional spirit that prompts the amendment of the gentleman from Wisconsin.

Mr. Chairman, I was not in the Chamber on last Wednesday when the other gentleman from Wisconsin [Mr. FREAR] made his speech, but, learning that he had made certain observations concerning Mr. John A. Fox, I watched with interest for its appearance in the CONGRESSIONAL RECORD. It finally appeared in Monday's publication, 20 pages of it—I suppose in the usual revised form that the gentleman makes a practice of indulging in—and to those who have any intention of reading it, if there be such, I will suggest that it is entirely worthy of its author.

The House knows the gentleman from Wisconsin, his characteristics and tendencies and obsessions on the subject of river and harbor matters, and so I will not undertake to answer any portion of his address save only to say a few words regarding Mr. John A. Fox, to whose open and active efforts in behalf of the Mississippi River he seeks, by innuendo and insinuation, to give a sinister aspect. It happens, gentlemen, that I have known Mr. Fox well and closely for more than 30 years. We were boys together in the same part of the State in which I was born and lived until I went to New Orleans. We were classmates at the Tulane University in that city during the entire four years of our college course, and we received our bachelor degree on the same day, back in June, 1892. Though our paths diverged for a while thereafter, I have always kept in touch with him and have renewed my close personal intimacy with him during the six years of my congressional service. When I first came to Washington he was connected with the National River and Harbors Congress, engaged in the same character of work which he has been latterly doing for the Mississippi River Levee Association. His work has always been in the open, his methods have been scrupulously honorable in every particular, and I regard his labors as one of the most effective factors in molding the public opinion that is compelling Congress to-day to take cognizance of the Mississippi River problem and to seek to solve it. John A. Fox was born on the river and lived on its banks below the city of New Orleans for a number of years. He was connected with the Louisiana State board of engineers and subsequently with levee work in the State of Arkansas, and his standing in his profession is attested by the fact that he is a member of the American Society of Civil Engineers. One of the reasons why he has been so effective is because his work has been a labor of love. He knew at first hand the conditions in the Mississippi Valley, and was able, through his own experiences and familiarity with the subject, to convince those who were in ignorance of them. Let the gentleman from Wisconsin call him what he cares to—lobbyist, publicity agent, universal legislator, or anything else that the gentleman wants to apply to him in an effort to discredit his activities—but I will tell you the people of the Mississippi Valley owe him a debt which never can be repaid. [Applause.] And I say now that in any element that goes to constitute a clean, high-minded, industrious, intelligent, honest man I would sooner take my chances with John A. Fox than with some Members of this House whom I know and might mention. [Applause.]

Mr. SMALL. Mr. Chairman, this paragraph under discussion relates to the construction of levees, and while it may be contended that there is some incidental benefit to the navigation of the river from the construction of the levees, the main, primary purpose is for land reclamation. This amendment has to do with the proportion of the contribution by the ownership of the land to be reclaimed. The amendment seeks to fix that proportion at one-half instead of one-third, as fixed in the bill. I think the amendment is wise, just to the United States, and just to the landowners. Out of the 77,000,000 acres of unreclaimed wet land in the United States, as reported by the Inland Waterways Commission, there are millions of acres of this land which, if ever reclaimed, will be reclaimed at the entire expense of the landowners. In the progressive States of this Union modern drainage laws have been enacted for reclamation of wet lands, the total expense being borne by the landowners themselves.

Now, we will all agree that exceptional conditions are presented as to these lands along the Mississippi River. As one Member of the House I am in favor of the United States contributing and aiding in their protection and reclamation, but one-half is a fair local contribution.

It is said, Mr. Chairman, that these levee districts have already paid large exactions in the form of assessments that in some instances they have become impoverished. Admit that, if you please, Mr. Chairman—and as to the truth of it, I know nothing except from the statements made here—and what is the inference from it? It is that the States in which these levee districts are situated are not contributing their share as States and are not looking upon this question from the broad viewpoint which they should. There is in this bill a provision for the protection of land in the Sacramento Valley and the San Joaquin Valley in California, but the State of California is to make a contribution dollar for dollar. The difficulty with these States along the lower Mississippi is that there is no unity of purpose, there is no cooperative spirit among their people. Only the State of Louisiana levies a State tax for levee purposes. In the river and harbor bill, where the Mississippi River has been provided for heretofore, both for land protection and for navigation, the delegation from the State of Mississippi has been divided. It is the duty of the great States lying along the lower Mississippi which are benefited, whose lands are reclaimed by this protection and which are benefited as a whole by this protection, to go to the rescue of these levee districts and by their aid contribute their proportion for their reclamation and protection.

I say again, Mr. Chairman, favoring as I do this idea of cooperation by the United States, believing that it is more than a

levee-district matter, more than a State matter, that after all the chief and primary benefits come to the lands to be reclaimed; and, secondarily, to the States in which they are located; and it is the duty of the several contiguous States to meet the United States fairly.

Mr. DENISON. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Just one moment. I would like to make one other suggestion. Was this Committee on Flood Control created entirely for the protection of wet and overflowed lands along the Mississippi and the Sacramento and San Joaquin Rivers, or are there other sections of the United States containing overflowed lands which are looking to this committee and to Congress in the future for legislation and appropriations for their reclamation? If there are, let me say to them that they will find the temper of the committee, as I believe, and I am sure the temper of the House, such that there shall be a larger proportionate cooperation than one-third—at least one-half—for we must treat every section alike. I now yield to the gentleman from Illinois.

Mr. DENISON. Mr. Chairman, the gentleman has spoken of State contribution. I assume he means the State government should contribute?

Mr. SMALL. Yes.

Mr. DENISON. I think we will all agree that the States ought to contribute, but if they are not in a financial condition to do so they can not, and if they can not do so for that reason, or if they refuse to do so for other reasons, then does the gentleman think that this Government ought not to step in and do anything for those people down there?

Mr. SMALL. Mr. Chairman, I do not believe the people of the United States should be penalized for a lack of public spirit and enterprise on the part of the people of those States primarily benefited. [Applause.]

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. RUSSELL of Missouri. Mr. Chairman, the purpose of this amendment is to require the local districts along the Mississippi River to contribute one-half as much as the Government contributes of the necessary taxes to protect that country from floods of the Mississippi River. The bill, as it is written and now pending in the House, provides that the local levee districts shall pay not less than one-third the amount paid by the Government. That proportion is discretionary, I understand, or will be with the Mississippi River Commission. If in any case the Mississippi River Commission thinks the local authorities ought to pay more than one-third of what the Government pays, they will have the right to require them to do so.

Mr. RUCKER. One-fourth.

Mr. RUSSELL of Missouri. One-fourth of the entire amount, one-third of the amount the Government pays. I am very familiar with the Mississippi Valley, at least a part of the valley. I realize very well from practical experience and observation what floods in that country mean to the people and the great inconvenience suffered and damages sustained.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

Mr. RUSSELL of Missouri. I have not the time. The floods that periodically come to the people of the Mississippi Valley are something not realized by people who do not live in that country or who have not given close attention to the subject. A commission was appointed by the governor in our State in 1912 to make a report of damages sustained by the people in five counties in my district during the flood of that year, and they reported that the damages by reason of that flood in one year were more than $13,000,000. The gentleman from North Carolina [Mr. SMALL] says that we should be willing to pay at least one-half of the amount the Government pays, and he thinks that would be a fair proportion for the local authorities to pay. He seems to forget that local levee districts have already paid more than three dollars to one on the levees that have been heretofore constructed, and if we carry out the provisions of this bill the Government will not then have paid one-half as much as the local authorities will have paid.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. RUSSELL of Missouri. I have not the time. I know very well that in the district which I represent we have already expended $3,500,000 in the construction of levees, while the Government has expended in that time about $1,200,000, only about one-third of what the local authorities have expended. The county in which I live, a small county, has already paid or obligated itself by bonds to pay $1,600,000 for the building of levees.

The Mississippi River is a great national stream that drains all or part of 31 States, and the entire country should help our people to secure protection from its flood waters.

The people of the Delta are now taxed almost to the limit of their capacity, and I hope this amendment will be defeated.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. WILSON of Louisiana. Mr. Chairman, as has been stated, the ratio as fixed in this bill of three dollars by the Government to one by the local interests was not fixed except after a very close and deliberate consideration of the testimony adduced before the committee. The testimony showed that since 1880, since there had been any cooperation whatever between the Government and the local interests, the local interests have expended for levee construction $91,000,000 to the Government's $29,000,000. The ratio was fixed in the bill upon the basis of the financial condition of the levee boards to contribute to this work.

This has very often been referred to as a drainage or reclamation proposition. I want to say to the gentleman from Wisconsin [Mr. FREAR] that these levees are not built for the purpose of draining lands. There are drainage districts along the Mississippi Valley now bonded up to $40,000,000 for that purpose. The Government is not asked to contribute one dollar toward the drainage of the lands in this country, and I want to say, further, that while it is true that bank revetment often saves and protects a levee, yet the bank revetments are constructed solely for the purpose of preserving the integrity of the channel of the Mississippi River, and that should not be charged up to levee construction. Under the ratio as fixed in the bill, if the bill passes, the local interests will have contributed $106,000,000 while the Government will have contributed $56,000,000 toward levee construction. Col. Townsend knows more about the ability of these levee boards to pay than any other man, and, according to his testimony, a fair ratio of contribution would be $4 by the Federal Government to $1 by the local interests, and when the committee fixed the ratio at three dollars to one, it placed upon the local interests every dollar that they are able to contribute within five years for the completion of the levees.

Mr. REILLY. Mr. Chairman, the gentleman says that this is not a drainage proposition.

Mr. WILSON of Louisiana. It is not.

Mr. REILLY. Is it not a reclamation proposition?

Mr. WILSON of Louisiana. No; it is a protection proposition.

Mr. REILLY. Is it not for reclaiming lands?

Mr. WILSON of Louisiana. It is for preventing the flood waters of the Mississippi from going over the lands along the banks of the Mississippi; but it is not a reclamation; it is not a drainage proposition.

Mr. CHIPERFIELD. Mr. Chairman, I would like to have the gentleman yield for one question, even though the time has expired. I would ask unanimous consent for that purpose if it may be done.

The CHAIRMAN. There is no power in the Chair to do that.

Mr. CHIPERFIELD. Let me suggest that it is a matter concerning which I wish to inquire that we ought to have some information about, a matter which I think is highly essential, and I would like to have some Member give us some information upon it, as it will be a controlling factor in voting upon this section of the bill sought to be amended by the Lenroot amendment.

The CHAIRMAN. The Chair would suggest that there are other gentlemen to speak on either side.

Mr. CHIPERFIELD. But, Mr. Chairman, is it not in the power of this committee to allow a question to be answered that is of such importance that it may affect some votes?

The CHAIRMAN. The gentleman has not made any request of the Chair.

Mr. CHIPERFIELD. I asked unanimous consent, if the Chair will recollect.

The CHAIRMAN. The Chair begs the gentleman's pardon.

Mr. CHIPERFIELD. I am sure it was not intentional.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the time of the gentleman from Louisiana may be extended one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. CHIPERFIELD. Mr. Chairman, the question I desired to ask the gentleman—and it is simply for the purpose of information and not to interfere in any way—was this: How will the sum be divided between the Government and the landowner, say, for instance, either under the plan of the present bill or the Lenroot amendment? There is a general plan in the river and harbor scheme to be worked out to control floods, but when it comes to a particular district or a particular locality how will the sum be apportioned?

Mr. WILSON of Louisiana. It is to be done by districts. For instance, it is under the control of the Mississippi River Commission, and they say there is so much levee line to be built and that the proper contribution of this levee district is the sum fixed by the commission, not less than $1 to $3 by the Government.

Mr. CHIPERFIELD. I understand that.

Mr. WILSON of Louisiana. And when that money is forthcoming they build that, and the levee is built under its direction.

Mr. CHIPERFIELD. That is as to a particular district, but if there be general work of a flood-control character that is not particularly connected with or chargeable to that district, where will that general charge fall?

Mr. WILSON of Louisiana. There is not any except the district in cooperation with the Government, as they do now, and there is not any friction.

Mr. CHIPERFIELD. The gentleman thinks there will not be any general work that does not apply particularly to a district where it may be apportioned either in the proportion which the bill fixes or in the proportion which the Lenroot amendment fixes?

Mr. WILSON of Louisiana. It might be fixed at one-half, but that is under the direction of the Mississippi River Commission.

Mr. CHIPERFIELD. Without regard to how it is fixed, will there be by this scheme, with which I am not sufficiently familiar to fully understand, a general expenditure that could not be properly chargeable to any particular district? That is the question upon which I desired information.

Mr. WILSON of Louisiana. Not for levee construction, it would not.

Mr. CHIPERFIELD. I thank the gentleman.

Mr. DENISON. Mr. Chairman and gentlemen of the committee. The strongest argument against this Lenroot amendment—the one, at least, that appeals to me—is the financial condition of a great many districts up and down the river.

Now, if the Members have read the evidence that was heard by the committee, they will see the condition that is presented there. I know how it is, particularly in the city of Cairo and in the levee districts just north of Cairo. The people of Cairo and in those levee districts have already expended for their protection the sum of about $2,000,000, and they can not raise another dollar by taxation. They have good levees that will protect them; but the river, by erosion, is eating into the levees and the levees will be destroyed unless they are protected by revetment and mattressing. Now, that will require a pretty large amount of money in those districts, and they can not raise the money by themselves to do this work; so that, to my mind, is sufficient justification for the proportion which is fixed here. There are a great many other districts up and down the river that need protection, and without some action——

Mr. REILLY. Will the gentleman yield?

Mr. DENISON. Yes.

Mr. REILLY. How are the people going to raise what is required in this bill?

Mr. DENISON. By taxation.

Mr. REILLY. Why can not they raise the rest, then, by taxation?

Mr. DENISON. They can not raise it at once——

Mr. REILLY. But the gentleman made the statement they are unable to raise any more money.

Mr. DENISON. They can raise more by taxation in the course of years; but I meant they could not raise enough by taxation to go ahead and make these repairs now.

Mr. REILLY. Do some of these people own land to be reclaimed?

Mr. DENISON. Not in my district. Now, I am going to answer a point which was made. The argument has been that this is a reclamation project, and that there are millions of acres of swamp land that will be reclaimed. Now, if the unoccupied swamp land there was the only land that would be benefited by this bill, there would be some force to the argument of the gentleman from Wisconsin; but this money will be expended for the protection of the people up and down the Mississippi River, from Rock Island clear down to the Passes, and we want to take into consideration the other people as well as those who own these vacant or swamp lands. If we were going to ask Congress to appropriate this money simply to reclaim this swamp land, I would not be in favor of it.

Mr. REILLY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Wisconsin?

Mr. DENISON. Yes.

Mr. REILLY. Will not the occupied land be increased in value?

Mr. DENISON. Yes; I presume it will be.

Mr. REILLY. Why should they not be required to contribute more?

Mr. DENISON. They have already paid $3 to $1 contributed by the Government.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield to the gentleman from Wisconsin?

Mr. DENISON. In one moment. If this bill is passed as it is introduced, then you take the two amounts that have been contributed by the Government before the bill was passed and afterwards and the amounts contributed by the local districts before the bill was passed and afterwards, and it will make it about half and half, as I understand it, which is not inequitable.

Mr. LENROOT. The gentleman states that $3 has been contributed by private interests. Does not the testimony show that where $3 have been contributed by the private interests those levees have been largely completed, and they will get no benefit from this bill at all?

Mr. DENISON. No, sir. I do not think that is true. There are just a few places where the levees have been completed in accordance with the specifications and requirements of the Government engineers, but those levees that have been completed to the required height have not been completed as will be required by the Mississippi River Commission, because that commission will require the strengthening of the levees by building embankments behind and revetments in front of them.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. DENISON. Yes.

Mr. SMALL. If these levee districts in the past have contributed $3 to $1 when there was no compulsion of law requiring them to make any particular contribution, why should they object now to paying $2 for $1, or $1 for $1?

Mr. DENISON. Simply for the same reason that the Irishman did not go to the Waldorf Hotel to stop; because, although perfectly willing, he did not have the money. And that is a good enough reason. [Applause.]

Mr. Chairman, last Wednesday I listened with a great deal of interest, and some surprise, to the discussion of this bill. I had expected that a bill of this kind, which represents the unanimous opinion of the committee after an exhaustive hearing, and which presents legislation upon a subject indorsed by the three great political parties in their national platforms, would meet with almost the unanimous approval of the Members of the House. Some objections to the bill have been seriously urged, while others have been presented in a spirit of humor. I hope this sense of humor may not sway our better judgments and lead us to fail in our duty toward those hundreds of thousands of our people whose homes are annually devastated or threatened by destructive floods.

This bill logically presents to Congress two important ques-questions:

First. Shall the Federal Government continue the policy of, and enter seriously upon plans for, the general control of floods, or shall it abandon what has already been done and renounce the policy?

Second. Does the bill reported by the committee present a wise and practicable solution of the problem?

These questions ought to be discussed and settled in the order named. It ought to be apparent that unless Congress is willing to adopt and vitalize its policy of national aid in the control of floods, any discussion of the relative merits of different plans for doing so is not only unnecessary but would be wholly inexcusable.

I thought that Congress had settled the question of whether or not it would continue its policy of flood control by appointing, after mature deliberation, a permanent Committee on Flood Control. I do not think there is any difference of opinion among the Members as to the general duty of the Government in this respect. There may be some difference of opinion as to the wisdom of continuing the policy at this time. I use the term "continuing," because this bill does not attempt to inaugurate any new policy. It only provides for a comprehensive and continuous plan for carrying to completion, with respect to the two rivers mentioned, the policy long ago adopted but heretofore unwisely executed by Congress.

Mr. Chairman, the problem of controlling the floods of the Mississippi River has been before Congress for almost a century. Since 1822 commissions have been appointed and engineers authorized by Congress to examine and report on its flood conditions. The people who settled and reclaimed that great valley have always appealed to the Government to help protect them from the floods which annually swept down upon them. It was

partly in response to these appeals that the Mississippi River Commission was created in 1879. And the act of Congress creating the commission and defining its powers made it the duty of the commission, among other things, "to prevent destructive floods." It was then that Congress recognized its duty to extend national aid in the control of floods. In 1880 Congress adopted this policy by making and expending an appropriation for that purpose, and since then Congress has appropriated and expended the sum of $29,000,000 for the construction and repair of levees to control the floods of the Mississippi River. But the trouble has been that this great problem of flood control has never heretofore been seriously and intelligently handled. Appropriations have been made at irregular intervals and in varying and uncertain amounts, and the money expended where urgently needed in particular places and for repairing broken levees, rather than with a view to carrying to completion a comprehensive plan for a complete project. Local levee boards have constructed levees with a view to their own interests alone, and without regard to the needs of those above and below them, while many have not been completed at all in such manner as to successfully resist the floods they were intended to provide against. There has never been a correlated plan for a complete levee system that would control the floods of the entire valley, and there has never been any legislation to provide for continuous work until the project was completed. In other words, Congress years ago recognized as a national problem the control of the floods of the Mississippi River and has made large appropriations for that purpose, but the aid given has been temporary and unsystematic, and has, in fact, amounted to nothing more than patchwork. The result is that the money appropriated by Congress has not always been wisely spent, and the work that has been done has cost the Government at least 20 per cent more than it would have cost if a connected plan had been adopted, and if provision had been made by Congress for continuous work until the project was completed.

Moreover, the jurisdiction of the Mississippi River Commission to construct levees for flood control has heretofore been limited to that part of the Mississippi River between the Head of Passes and the mouth of the Ohio River. There are parts of the Mississippi north of the mouth of the Ohio, as well as its tributaries and other rivers of the country, that are visited with destructive floods and are entitled to national aid in securing flood protection. Mr. Chairman, Congress has wisely recognized the national character of the flood problem, but has unwisely, and I may say unfairly, dealt with it.

The result has been neither satisfactory nor economical, and the time has come, it seems to me, when Congress should either abandon the policy entirely or deal with it intelligently. Year after year these appalling floods sweep down the Mississippi River from the 31 States that are drained by it, and the levees that have either been improperly located or insecurely constructed give way. Lives are lost, stock drowned, crops destroyed, homes ruined, and the country devastated to the amount of many millions of dollars. I learn from the estimate of the Mississippi River Commission that the destruction of property, not including the loss of crops, by the floods of 1912 and 1913 in the Mississippi Valley amounted to $61,000,000; that in 1912 there were 272,000 people who were fed by the Government after they were driven from their homes; all of which could have been prevented if the levees had been properly located and constructed. Losses of this magnitude in the Mississippi Valley, year after year, are economic losses of the Nation, and Congress should aid in preventing their recurrence. These floods will continue just as surely as the seasons return, and the people of that valley will continue to suffer losses, or be ever in danger of them, unless the levees are completed as the engineers say they should be completed. While they do come, and so long as the levees give way and the people are driven from their homes by the thousands, we have not heretofore and we can not hereafter disregard their appeals for help. Congress has already appropriated and expended $3,044,388 for the relief of victims of the floods of the Mississippi and other rivers. As a matter of economy merely, to say nothing of the duty we owe the people who live there, it is the course of wisdom for Congress to take hold of this flood problem and solve it. It is folly to continue the wasteful practice of spending millions for patching and repairing levees and relieving suffering people after the levees have been broken and the losses sustained.

Now, as to the wisdom or propriety of our doing so, the Members of the House need not worry nor suffer any pangs of conscience. We were all chosen by one or the other of the great political parties to which we claim allegiance. It was repeatedly stated here last Wednesday that the great political parties had indorsed the policy of national aid in controlling the floods of the Mississippi River in their national platforms. Mr. Chairman, that is true. And it is a matter of such significance to my mind that I am going to read those parts of the platforms, I will not say for the information, but for the satisfaction of the Members and for the information of the country.

Now, the Democratic national platform of 1912 contains this statement:

> We hold that the control of the Mississippi River is a national problem. The preservation of the depth of its water for the purpose of navigation, the building of levees to maintain the integrity of its channel, and the prevention of the overflow of the land and its consequent devastation, resulting in the interruption of interstate commerce, the disorganization of the mail service, and the enormous loss of life and property, impose an obligation which alone can be discharged by the General Government.

And now while I am reading from this important document I want to read this further concluding paragraph, for I know it sounds like sweet music to my Democratic friends and arouses noble impulses in their very souls:

> Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign, and we invite the cooperation of all citizens, regardless of party, who believe in maintaining unimpaired the institutions and traditions of our country.

Now, there are some who do not have very deep respect for planks in a political platform. But, of course, there are none among the Democrats here who would take that view of it. I believe it was the President who said in a speech made soon after he was nominated that in this platform "there was no molasses to catch flies." I have always understood that by that the President intended to say that the planks in the Democratic platform were statements of principles in which that party believed and by which its representatives would be guided, and not mere empty phrases with which to win the support of the people at the polls.

In accepting the Democratic nomination upon this platform Mr. Wilson said:

> In the case of the Mississippi River, that great central artery of our trade, it is plain that the Federal Government must build and maintain levees and keep the great waters in harness for the general use.

Now, we have heard much during these late days about standing by the President. If there is any substance and virtue in this appeal to stand by the President, I commend it to our Democratic friends here with the hope that they will stand by the President in this expression of his policy, by supporting this bill, which will carry it into effect.

On the other hand, the Republican national platform of 1912 contains this declaration:

> The Mississippi River is the Nation's drainage ditch. Its flood waters, gathered from 31 States and the Dominion of Canada, constitute an overpowering force which breaks the levees and pours its torrents over many million acres of the richest land in the Union, stopping mails, impeding commerce, and causing great loss of life and property. These floods are national in scope, and the disasters they produce seriously affect the general welfare. The States, unaided, can not cope with this giant problem. Hence, we believe the Federal Government should assume a fair proportion of the burden of its control, so as to prevent the disasters from recurring floods.

President Taft, in speaking on one occasion about the flood problem of the Mississippi River, said:

> I am strongly in favor of spending the whole $50,000,000 to save that part of the country from floods in a reasonable time and to provide a proper levee system.

These provisions of the national platforms, Mr. Chairman, and these declarations of the party leaders ought to be sufficient to settle the first question involved and justify Congress in acting now and providing for the control of the rivers mentioned in this bill.

The history of the settlement and development of the Mississippi Valley is the history of a struggle as desperate as any ever waged by men against the forces of nature. Lured by the beauty of its scenery, the richness of its soil, and the commerce of its waters, men have from the beginning of the century gone to the valley of the Mississippi to build their homes and found their fortunes. Thriving cities sprang into existence, and years ago its commerce exceeded that of any other river in the world. Year after year these great floods came and left their ruin, but the people began building levees to keep them back; and with a sacrifice, fortitude, and perseverance unsurpassed anywhere among men they have continued the struggle, believing that the waters of the great river could be kept back. In order to build these levees the people have burdened themselves enormously with taxes. They have levied to the very limits of their constitutional rights and have issued bonds as long as bonds could be sold. And all this sacrifice has been made under the hope and belief that some day the National Government would awaken to its duties and aid in the construction of levees to protect them from the flood of waters that is drained by this great river from 40 per cent of the Nation's territory. The people along that river could not have made the sacrifice they have nor borrowed

the money they have with which to build their levees but for the hope that Congress would some day aid them.

Mr. Chairman, the people of the district I represent are peculiarly interested in this bill. They are threatened by the floods of the Mississippi on the west and those of the Ohio on the south and the east, and the people of Cairo and the drainage districts near there have taxed themselves with every dollar they can under constitutional limitations to build levees to protect them from these floods.

I know that the Members of the House who are opposing this bill do not appreciate the importance of it to the people of Cairo and of other cities and levee districts similarly situated in the Mississippi Valley. At Cairo and in the levee districts north of Cairo the people have had to raise their levees a little higher every few years in order to keep back the flood, which keeps rising higher and higher. As the country north is cleared and drained its waters come down upon us with greater volume and with greater rapidity; and as the levees are constructed to the south of us and across from us these waters are confined to a narrower channel and held back upon us, so that year after year my people have had to rebuild and raise their levees higher, until this burden is no longer a natural one, but is an added burden brought upon us by the drainage of the country above us and the building of levees below us. This past winter the water in the Mississippi River rose higher on the levees of Cairo than it had ever been known before; and the people who have their homes and their property there are wondering and fearing what the future will have in store for them unless the National Government takes charge of the levee system of the entire river and aids in their protection.

The perplexities of the levee system and the unnatural conditions which have been brought about by the drainage and reclamation of the swamp lands and the building of levees have made this, more than ever before, a problem for the National Government to handle. It would be a crime to withdraw from this work and abandon the people of that great valley to their fates. I have read the reported hearings, and I find abundant proof submitted to the effect that the levee districts themselves can not possibly raise enough money to complete their levees according to the specifications found by the Government engineers to be necessary to hold back the floods.

There is, then, to my mind, one paramount and sufficient reason why Congress ought to aid in the completion, and the rapid completion, of this work, and that is that either Congress must do so or the work will in all human probability not be done. The aid which Congress has heretofore given to the building of levees has accomplished more by giving hope and credit to the people than it has in actual levee building. This money has been spent in driblets here and there to strengthen weak places, repair breaks, and relieve sufferers, rather than in completing the levees so they would permanently resist the floods. If Congress will but rationally take hold of the problem and make it a national project, the Mississippi River can soon be harnessed so as to effectively control its floods and save to the Nation its most fertile and productive valley.

Mr. Chairman, I get the following facts from the reported hearings, which I wish to refer to briefly:

There are about 20,000,000 acres of land as fertile as there is in the world that is or can be protected from floods in the Mississippi Valley alone. This is an area equal to the combined States of Delaware, Massachusetts, Connecticut, Rhode Island, and Maryland. It is nearly four times the area of the Hawaiian Islands. It is seven times the area of the island of Porto Rico, more than half the size of the State of Pennsylvania, and more than one-fifth the size of the combined area of all the Philippine Islands, for which we have expended nearly a hundred million dollars.

Of the 20,000,000 acres there are 16,000,000 that are capable of cultivation, if properly protected, and on which there could be raised as much cotton as is to-day grown in all of the remainder of the United States, which, at 12 cents a pound, would be worth $960,000,000 per year.

In 1910 the population of the protected area was about 830,000. It is over a million now. Of the 16,000,000 acres that could be protected and cultivated, 4,000,000 acres are now under cultivation.

The farm value in the protected district in 1910 was about $175,000,000 and the value of personal property on these farms was over $50,000,000 more.

The Government has already spent $29,000,000 on these levees, while the local levee districts have spent about $90,000,000. A great deal of this money will have been spent in vain if the work is not completed. It can be completed, according to the estimates of the engineers, for $40,000,000, of which $30,000,000 is to be paid by the Government, according to this bill. The money that will be saved to the Government alone, to say nothing of the millions that will be saved to the people who live in the Mississippi Valley, is so out of proportion to the amount required to complete this project, it seems to me that Congress should not hesitate or longer delay.

I think the statements made by the Speaker, Mr. CLARK, while addressing the House on the resolution to create the Committee on Flood Control, is correct—that this question of controlling the floods of the Mississippi River is the greatest economic problem that is before the American people to-day. And I believe the time is coming, and now is, when Congress should solve it and solve it once for all.

There remains, then, the second question, whether this bill offers the most effective and most practical solution to the problem. Of course, we must try to find the best way to control these floods. But in doing so we must be practical; and we can not leave out of consideration the question of economy. We must understand, too, that any remedy proposed is no remedy at all unless it can be made available now. I find that Senator Percy, of Mississippi, made the following statement before the committee:

> If this work is going to be done at all, it ought to be done in the shortest time within which the amount of money necessary to do it can be expended economically and without waste. There isn't any other way to measure the time. Every year that the completion of the work is delayed means that your entire expenditure is jeopardized. A levee line is as strong as the weakest part in it, and the Government could pursue the course that it outlined in 1910 of giving $4,000,000 a year for levees and could give that for a hundred years, and your levees practically wouldn't be any better than they are to-day, because from 50 to 75 per cent of that would go in repair after disasters and not in strengthening your levee lines. We got $4,000,000 from the Government in 1912 for levees. More than 50 per cent of it went to fill in the crevasses made by the flood of 1912 and not to add one spadeful to the permanent levee system.

Last Wednesday the gentleman from South Dakota [Mr. DILLON] in opposing this bill advocated the theory of controlling floods by the construction of reservoirs. Mr. Speaker, this theory of controlling floods by storage reservoirs is, in my judgment, the most fantastic, the most impracticable, and absurd dream ever conceived to meet a serious situation. It is but the pipe dream of some ingenious theorist who never saw a real flood, at least such a flood as those of the Mississippi River. No one who has ever passed down the Mississippi River on the crest of a spring flood would seriously advocate reservoirs as a means of protection; at least no engineer has ever done so. Yet this theory has been suggested in times past and been given special investigation. It was found absolutely inapplicable to the conditions in the Mississippi Valley. Col. Townsend, one of the ablest engineers of this country and a member of the Mississippi River Commission for many years, said in one of his reports:

> In a mountainous country, where short, high dams can create reservoirs of great depth and volume, or in a comparatively level country where low dams can form lakes of large area, it may be practicable to control floods by means of reservoirs. There is but a comparatively small section of the Mississippi Basin that fulfills either of these conditions, and in such areas the rainfall is generally light. The rolling country, which forms the greater part of the Mississippi Valley and from which the water that produces its floods is derived, can be protected from floods by reservoirs only by an enormous expenditure.

Col. Bixby is reported to have made the statement before the Rivers and Harbors Committee that it would take a reservoir as large as the State of Kentucky to affect the flow of water in the Mississippi River appreciably. No engineer who has studied the flood problem of the Mississippi River has ever claimed that reservoirs could be used to control them, except possibly at an enormous expense. On the other hand, all the engineers who have made a study of this subject have discarded the reservoir theory as impracticable and prohibitive on account of the cost. It would bankrupt the Nation to try to store the flood waters that are discharged from 31 States through the Mississippi Valley. Rather than undertake such a titanic scheme it would be far better to remove the levees already built and let the Delta be a reservoir for the floods as it was in a state of nature.

The gentleman from Wisconsin [Mr. LENROOT] objects to the Government contributing $3 to every $1 contributed by the local districts to complete this project, and this amendment which he has proposed would reduce the proportion the Government is to pay. We must consider the proportion of contribution provided in the bill, in view of what the local authorities have already expended on their levees, and in view of their present financial condition. As I have already stated, Congress has already contributed about $29,000,000, while the local authorities have contributed about $90,000,000, or a proportion of about 1 to 3. As I stated in the beginning, this proportion, when considered in connection with the contribution provided by the bill, will make the Government and the local

authorities contributing about an equal amount for the completion of the levee project.

It is important, too, that we keep in mind the fact that these levee districts have resorted to every known method of taxation. Many of them have reached their constitutional limitations. It is impossible, according to the reported testimony, for the local authorities to raise more than $2,000,000 per year, which is not sufficient to complete the levees so as to prevent recurring disasters. While the people of the district I represent have raised all they can by taxation, and are willing to make every sacrifice necessary to make themselves secure, the preservation of their levees from the erosions of the river will require a large amount of money, and it is absolutely necessary that they have assistance from the Government in order to save what they have already expended and remove the danger with which they are constantly threatened. In this respect they are situated like many other districts that are annually exposed to these floods. I hope the House will vote down this amendment proposed by the gentleman from Wisconsin [Mr. LENROOT], because I do not believe the people there can raise the larger amount that will be required in order to complete the levee system as soon as it should be completed, if this amendment is adopted.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. DUPRÉ. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. OAKEY. Mr. Chairman and gentlemen, there are, in my judgment, two or three objections to the passage of this bill. In the first place, it seems to me that this question of Government aid and Government help and Government control is becoming just a trifle too prevalent. I realize, as has been very forcibly and eloquently said here, particularly by the gentleman from Ohio, Judge GARD, that the Mississippi Valley is the greatest unit for such a proposition as is concerned in this bill; but the thought occurs to me, my colleagues, that in a proper and a real consideration of this problem all of the localities and all of the communities that are damaged by water running rampant should have been considered in this bill, rather than one or two or three units alone.

I live in a community where we have a little trouble of this nature. On the banks of the historic Connecticut we get a little trouble from the district of my colleague from Massachusetts [Mr. GILLETT] and from the district of my other colleague from Massachusetts [Mr. TREADWAY]. A part of their landscape and a lot of their water come down through our town and down through the Dardanelles of this hemisphere to the Sound. It causes us a lot of trouble. It takes away a lot of our property by the erosion of our banks, the filling up of our channels, the overflowing of our lands. But, like the great State of Ohio, we are trying as best we can to protect ourselves; but if this problem of river overflow and the damages incident thereto is to become a national problem, surely the valuable lands that are annually lost to their owners by erosion and floods on such rivers as the Connecticut, where only a little of the public fund would be needed for riprapping and protecting, such systematic scientific aid should be given where the expense would only be a trifle of the tremendous volume of Government help asked for in this and kindred bills.

I just wanted to say here, my friends, that in this discussion it struck me that in the consideration of this Mississippi Valley problem for 35 years it has been said here that all of the Government help and all of the Government assistance has been wasted. Does it not occur to you that we have not sufficient proof, that we have not sufficient knowledge as yet to know that this tremendous appropriation will not be wasted?

I think, my colleagues, that in these serious hours of our country's history, in these difficult moments of the world's progress, we ought to try and forget, for at least a part of one Congress, so much geography, so many congressional districts, and so many interested localities. [Applause.] And when so many of these important problems are knocking at our doors for consideration, problems that may concern our national safety, our national integrity, and our future welfare, can we not, I say, forget and forego at least for a little while geography, sectionalism, partisanship, or personal opportunity, that we may proceed to the consideration of more important legislation that we may protect as best we can our country and its highest and best ideals.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

Mr. OAKEY. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, I have made the point that the Mississippi River problem, so far as the expert engineering knowledge of the country goes, has been cared for in the river and harbor bill. That has been the practice heretofore, and it ought to be the practice now, so far as matters of navigation in the Mississippi are concerned.

There is positively nothing new in the bill that is presented by the Committee on Flood Control, so far as the matter of flood control is concerned. It involves the problem of navigation just the same as it has existed heretofore, and in its treatment of the flood-control problem conditions are just the same as heretofore. Witness the first paragraph of the bill, that "for controlling the floods of the Mississippi River and continuing its improvement," and so forth, "the Secretary of War is hereby empowered," and so forth, "to carry on continuously, by hired labor or otherwise, the plans of the Mississippi River Commission heretofore or hereafter adopted"; and then the appropriation is fixed at $45,000,000, which is to be expended in amounts not exceeding $10,000,000 per annum.

In the river and harbor bill, passed about a month ago by this House, provision was made for the improvement of the Mississippi River, by the construction of levees or otherwise, according to the plans of the Mississippi River Commission, to the extent of $6,000,000 direct for the section of the river referred to in this bill. Upward of $8,000,000 was appropriated altogether for the river.

Now, at the time the Flood Control Committee was organized the question was raised as to whether it would not duplicate the jurisdiction of the Committee on Rivers and Harbors, but we were told then that there was to be something new, some new method of treatment of the problem of flood control on the Mississippi. Remember that we have appropriated money to the extent of $168,000,000, I think, up to the present time in river and harbor bills for the improvement of this river by the construction of levees and otherwise.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. I do.

Mr. COX. Is there a thing in this bill that could not have been taken care of by the Committee on Rivers and Harbors?

Mr. MOORE of Pennsylvania. Absolutely nothing. I have not heard a gentleman advocating this bill indicate that there was anything new whatever. A careful scrutiny of the report, which is lengthy and able, indicates that all the purposes of navigation are to go forward just as heretofore, and that all the purposes of flood control are to be conducted in accordance with the plans of the Mississippi River Commission, which was created in 1879, and which has been operating down to the present time according to the plans and specifications heretofore approved and approved in this flood-control bill.

Mr. GOOD. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. GOOD. Then this is just an addition to the river and harbor bill?

Mr. MOORE of Pennsylvania. The only difference between the plans herein presented and the plan presented in the river and harbor bill is that this guarantees a fixed sum of $45,000,000 at the rate of $10,000,000 per annum, whereas they have not been getting quite that much per annum in the river and harbor bill. It is a case of getting more money, and getting it more directly, and having it more sure, at the expense of all other projects in this country, than they could have obtained in the river and harbor bill.

Mr. FREAR. And it reduces the proportionate payment that is to be made by the locality under this bill.

Mr. MOORE of Pennsylvania. It does reduce the proportionate payment to be made by those who will be benefited.

Mr. DENISON. Does the gentleman know——

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. HUMPHREYS of Mississippi. Mr. Chairman——

Mr. RUCKER. Mr. Chairman, I should like to be heard on this.

The CHAIRMAN. The time for debate on this amendment has been limited, and the Chair recognizes the gentleman from Mississippi [Mr. HUMPHREYS], chairman of the committee.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, the gentleman from Wisconsin [Mr. FREAR] just propounded an inqury to the gentleman from Pennsylvania [Mr. MOORE], which the gentleman from Pennsylvania answered incorrectly. He said that the proportion to be contributed by the local interests as provided for in the river and barbor bill is reduced under this

bill. That is not the fact. We have never required any contribution heretofore. This bill is the first one to require any contribution from local interests. It was because it was suggested to us that if the Federal Government makes this continuing contract some local interest might not contribute as much as has heretofore been contributed; that we put the provision in the bill that no money should be expended until local interests did make a contribution.

Mr. FREAR. Do not the Army engineers determine the proportion that shall be contributed by the localities in the St. Francis district and others? Have they not done so?

Mr. HUMPHREYS of Mississippi. They never have. The contribution is determined by the ability of the local interests to contribute. Nothing else has ever limited it. No people ever taxed themselves more than the people in those deltas have taxed themselves for this particular purpose. Since 1881 they have expended $91,000,000.

Mr. HUMPHREY of Washington rose.

Mr. HUMPHREYS of Mississippi. I yield to the gentleman from Washington, although all the time except 10 minutes has been taken up by those in favor of the amendment, and I hoped that I might get 5 minutes without interruption.

Mr. HUMPHREY of Washington. There is also something involved besides the ability to pay for this local benefit, is there not?

Mr. HUMPHREYS of Mississippi. With all due respect to my friend, I hope nobody else will ask a question that has no more direct bearing than that one. We have contributed $91,000,000.

Now, the gentleman from Wisconsin [Mr. LENROOT], as I understood him, said that it was not fair to consider all of that. Very well; suppose we consider half of it. That, perhaps, in his opinion, would be fair—half of the $91,000,000. Let us say $45,000,000 has been contributed. Under this bill they contribute $15,000,000 more. That makes $60,000,000. Under the bill, counting what the Government has heretofore contributed, the Government will have contributed $59,000,000, so that the local interests will have contributed, even under that arrangement, more than half. The gentleman from North Carolina [Mr. SMALL] says we ought to be required to put up more, because we are requiring it on the Sacramento. The Sacramento puts up half under this proposition. The local interests in the Mississippi Valley will have put up more than half, even if we count only half of the $91,000,000 that has been contributed since the Government and the local interests have been proceeding together.

Now, gentlemen, this is not a new project. This project was adopted by Congress many years ago. It has been carried on by haphazard appropriations—sometimes one sum, sometimes another. The engineers have told us that if we will adopt this particular plan of a continuing contract, authorizing them to go in there and complete this job in 5 years, instead of stringing it out over 10, 15, or 20 years, as they would have to do under the old plan, they will save somewhere between 10 and 20 per cent of the total cost to the Federal Government. So, whereas we increase the appropriation over those carried heretofore of $6,000,000, and make it $9,000,000, we do it upon the assurance of the most conservative of all the engineers who have estimated it that we will save thereby $1,000,000 a year. It is no new project.

Now, gentlemen have insisted that we have done nothing except take care of these two projects. We have taken care of these two projects because they were the only projects in the United States which have been certified in proper shape and were ready to be taken care of. When we reach section 3 I believe the committee will be able to answer many of the criticisms that we have heard of this bill. But so far the committee have tried to confine themselves to a discussion of the particular paragraph pending at the time. When we reach section 3 I have no doubt at all that I can explain to the perfect satisfaction of a great majority of the House that just as ample and just as wise provision has been made by which we can investigate the various flood problems throughout the country as ought to have been made.

I ask for a vote, Mr. Chairman.

The CHAIRMAN. The time has expired.

Mr. RUCKER. Mr. Chairman, I realize that the time is up, but I want to ask the committee for unanimous consent to speak for five minutes.

The CHAIRMAN. The gentleman from Missouri [Mr. RUCKER] asks unanimous consent to proceed for five minutes. Is there objection?

Mr. HUMPHREYS of Mississippi. I object, Mr. Chairman.

The CHAIRMAN. The gentleman from Mississippi objects. The question is on the amendment of the gentleman from Wisconsin.

The question being taken, on a division (demanded by Mr. LENROOT) there were—ayes 59, noes 63.

Mr. LENROOT. Tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. HUMPHREYS of Mississippi and Mr. LENROOT.

The committee again divided; and the tellers reported—ayes 65, noes 64.

Accordingly the amendment was agreed to.

Mr. WALSH. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WALSH: Page 2, line 24, strike out all after the word "approved," down to and including the word "contributing," in line 2, on page 3.

Mr. WALSH. Mr. Chairman, the words which I seek to strike out seem to me to indicate the whole-hearted, unselfish spirit which prevails in the district seeking relief under this bill. They seek to contribute, but they do not care to have any of the money they contribute spent anywhere except upon their own lands. What a noble example of unselfish cooperation! I submit that that is only an example of the spirit prevailing in the section where the floods have done so much damage in the past, because, with one exception, not a single State through its legislature has appropriated money to remedy this condition, but they have sought to leave it to Federal aid or to the particular district which has been affected. I submit that if this condition is so terrible the State legislatures should take notice of it and some taxes should be imposed upon the people of those States.

I have been waiting for some of the gentlemen from that section to rise up and tell you that the poor farmers down there are interested and how they are crying for relief, but apparently the farmers own but a very little of the 16,000,000 acres which it is sought to reclaim. This paragraph, from all the arguments and explanations given on the part of the committee and of those interested in this project, is nothing but a reclamation project pure and simple, although perhaps I should eliminate the word "pure." It seems to me that the people down there object to having the money they contribute used anywhere but on their own property, because they are interested in benefiting or protecting their own property only, and they do not want to have the money that they contribute put into one common fund and have it expended throughout the entire portion of the State or section affected by the overflow of this great river.

Mr. DUPRÉ. Will the gentleman yield?

Mr. WALSH. Yes.

Mr. DUPRÉ. May I say that every farmer in Louisiana is in favor of this legislation?

Mr. WALSH. I thought that that statement should have been made; it comes rather late, and I am sorry the oversight occurred. The farmers have not been brought into the discussion heretofore. We have passed bills for rural roads, for free seeds, for reclamation, census of cottonseed products, and now they seek to pass a navigation bill in the interests of the farmers of the South. [Laughter and applause.]

Mr. HUMPHREYS of Mississippi. Mr. Chairman, the State of Louisiana does—with all due respect to the gentleman from Massachusetts—spend money outside of the State of Louisiana. It spends money up in Arkansas in order, however, to protect the land in the State of Louisiana. This provision was put in so that the commission could not spend money outside of the levee district where it was contributed without the consent of the levee district. Of course nobody doubts that Louisiana would give its consent for the construction of levees in Arkansas to protect its own land.

Mr. Chairman, I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was rejected.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 3, line 2, after the word "contributing," insert the following: "*And provided further*, That where the expenditure of money under this act directly or indirectly adds to the value of lands the owners of which have not contributed to the fund applied to the improvement herein provided for, such assessments shall be levied against the owners of such lands as the Mississippi River Commission may deem warranted by the benefits accruing to such noncontributing landowners."

Mr. MOORE of Pennsylvania. Mr. Chairman, it has been said several times in the course of the discussion of this bill that the small farmer along the Mississippi was not greatly concerned; that the lands were largely in the hands of operators; and that the general purpose of this scheme of taking the

appropriations away from the Rivers and Harbors Committee and putting them under the charge of the Committee on Flood Control was reclamation; that is to say, the making valuable of land which is not valuable; the protection of land which might be subject to overflow and which would be more valuable if floods were prevented.

Now, it is just possible, so far as the arrangement under the bill affecting the distribution of Federal money is concerned, that some landowners—large operators, not the small tenant farmers who have small interest in the matter—that some large operators might be largely benefited by the construction of levees, and that tremendous values would accrue to them by the expenditure of the Government money. When we consider that in sections of the country where reclamation has already proceeded and expenditure has been made by the State itself or by private enterprise, it seems a fair proposition that in the distribution of public money along the banks of this particular river there should be some assessment for the benefits actually accruing to the owners of property.

Mr. GARRETT. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I will yield.

Mr. GARRETT. I will ask the gentleman if he has considered carefully the legal phase that is involved in his amendment. Does the gentleman think that this Congress could go about levying taxes in that way, delegating the taxing power to the Mississippi River Commission? Could the Congress itself lay a tax on land, so far as that is concerned?

Mr. MOORE of Pennsylvania. I submit that the section we are now considering proposes that what is to be done shall be done largely by agreement between the Mississippi River Commission and the levee association and the State. That is to say, if a levee breaks in a certain section, then by agreement between the States and the commission Federal money may be used. While that agreement is pending, I submit, it would be possible for the commission under the amendment I have proposed to say to the levee association or the State: "Yes; we will rebuild the levee, protect the land, provided that in the event of an increment accruing to the value of the property the men who derive the benefit shall contribute along with the Federal Government."

Mr. GARRETT. If the gentleman will permit, this fixes the proportion of the expenditure, and it provides for the enforcement of that proportion as fixed by withholding action on the part of the Federal Government, whereas the gentleman's amendment undertakes to put into operation a positive direction.

Mr. MOORE of Pennsylvania. Suppose it should develop that on the banks of the Mississippi somewhere you were about to start a large plantation corporation or a building operation or industrial improvement, and that thousands and tens of thousands of acres of land subject to overflow belonged to a great railroad corporation or some great lumber corporation or that it belonged to some great cotton corporation, would it not be in order to make these large owners pay something for the increment that must necessarily come to them as the result of the Government expenditure?

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. REAVIS rose.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, can we not come to some agreement about time for debate upon this amendment?

Mr. MANN. Gentlemen over here seem anxious to have 35 minutes more on the paragraph.

Mr. HUMPHREYS of Mississippi. Oh, I submit to the gentleman from Illinois that gentlemen on that side ought not to ask for 35 minutes on this paragraph. It is now half past 2 o'clock and we have not yet read one section of the bill.

Mr. MANN. I think we had better agree to that, and we will try to expedite the matter.

Mr. HUMPHREYS of Mississippi. Why not let us make it on the section, so that we will get along more quickly?

Mr. MANN. We have not yet read the section.

Mr. HUMPHREYS of Mississippi. I know; but we can agree upon time to debate it.

Mr. LENROOT. I think if we close on this paragraph that the gentleman will get along quite rapidly.

Mr. HUMPHREYS of Mississippi. If we are to debate an amendment such as the one the gentleman from Pennsylvania [Mr. MOORE] has proposed for 35 minutes, it will take three weeks to pass this bill.

Mr. MANN. This is a request as to the entire paragraph.

Mr. GARRETT. And all amendments thereto.

Mr. MANN. Yes.

Mr. FOSTER. Are there any more amendments to be offered to the section?

Mr. MANN. There are not very many, but there are some.

Mr. FOSTER. Why not 35 minutes on the section and then let the section be read?

Mr. LENROOT. I think we had better make it on the paragraph.

Mr. FOSTER. Let us be fair about it and try to get it through.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I would like to call the attention of the gentleman from Wisconsin [Mr. STAFFORD] to the fact that we gave up all of last Wednesday to general debate, practically, and agreed to consider it by paragraphs, upon his assurance that there would be no attempt to delay and that we should get a vote on the bill.

Mr. MANN. On the assurance of many Members that we would wind this bill up to-day.

Mr. STAFFORD. I wish to assure the gentleman——

Mr. HUMPHREYS of Mississippi. And I want to enlist the kindly offices of the gentleman from Wisconsin in our behalf with those on his side of the House who apparently are not willing to carry out that agreement.

Mr. STAFFORD. Mr. Chairman, when that agreement was made I stated that I would like to have 10 or 15 minutes for debate under the five-minute rule, and I would like now to speak upon this bill, but I am not pressing that. There are bona fide amendments offered on this side, and there is no intention as intimated by the gentleman's remarks to delay the consideration of the bill.

Mr. HUMPHREYS of Mississippi. We have now put in two days and have gotten only two pages.

Mr. MANN. Mr. Chairman, let us be absolutely fair about it. The gentleman from Mississippi [Mr. HUMPHREYS] was very lenient on last Wednesday, allowing practically general debate under the five-minute rule, upon the assurance, openly stated in the House by a number of gentlemen on this side of the House, that we would come to a final vote on this bill to-day, and if we can not do that I think we ought to have an understanding that we will make it in order again on another Wednesday, because otherwise it would not be fair to the gentleman. I think we ought to take the vote to-day if it is possible, but it would be contrary to good faith in the House if we did not carry out such understandings.

Mr. MOORE of Pennsylvania. Mr. Chairman, I wish to submit to the gentlemen who are now addressing each other on the floor that I did not hear that understanding and was not a party to that agreement. I respect the right of leadership, and I follow it, so far as I can, but here is a bill in which it is proposed to appropriate $50,000,000, which is a tax of 50 cents per head on every man, woman, and child in the United States, that we are expected to pass——

Mr. FOSTER. Mr. Chairman, I demand the regular order.

Mr. MOORE of Pennsylvania. Very well, the gentleman can go ahead.

Mr. FOSTER. If the gentleman is going to make a speech——

Mr. MOORE of Pennsylvania. Very well. The gentleman does not like certain kinds of speeches.

Mr. FOSTER. I like the gentleman's speeches when he makes one with sense in it.

Mr. MANN. Oh, withdraw the demand for the regular order.

Mr. FOSTER. I withdraw it. I do not think it is fair to make a speech of that kind on the floor, however.

Mr. MOORE of Pennsylvania. Mr. Chairman, have I the right to proceed? Here is a bill proposing to appropriate $50,000,000 of the people's money, a tax of 50 cents per head upon every man, woman, and child in the United States, being a bill that is brought in by a committee which with one or two exceptions is composed of gentlemen who come from the very territory concerned, which is being made the subject of an agreement between gentlemen who live in the Mississippi Valley.

Mr. MANN. I beg the gentleman's pardon. His geography is not good. I do not live in the Mississippi Valley.

Mr. MOORE of Pennsylvania. I was not referring specifically to the gentleman.

Mr. MANN. I was the one who made the agreement.

Mr. MOORE of Pennsylvania. The gentleman lives very close to the Mississippi River.

Mr. MANN. I do not live even close to the Mississippi River.

Mr. MOORE of Pennsylvania. Oh, the gentleman lives on high land, as high as can be found around about Lake Michigan; but what I wish to say is this, that I do not care to vote away $50,000,000 of the people's money without having a chance for discussion by Members from the various States of the Union, whose constituents have to pay the bill. There are other rivers in the country that need improvement; there are other rivers in the country subject to overflow; there are other areas in the country greater than this area, and they ought to be con-

sidered in the regular way. Here is a short cut to appropriations, vast appropriations, gentlemen having withdrawn from the River and Harbor Committee and from pursuing the usual course. I do not like to have legislation of this kind go through the House without the people being given a chance to know that they have to pay the bill.

Mr. MANN. Mr. Chairman, still reserving the right to object, the statements which were made upon the floor of the House last Wednesday were made openly in the House. I do not recall that the gentleman from Pennsylvania [Mr. MOORE] was absent, although he may have been, during the time those statements were made. They were made openly and loudly, and there was considerable discussion in the House at that time as to whether there should be an extension of general debate by unanimous consent over that allowed by the rule; and the statement was made from both sides of the House that if the gentleman from Mississippi [Mr. HUMPHREYS] was willing to allow generous debate on last Wednesday under the five-minute rule, both sides of the House would cooperate with him to bring this bill to a vote to-day. I am one of those who carry out their obligations, but I do not ask the gentleman from Pennsylvania or any other gentleman on this side of the House who has contrary scruples to stand by me upon that; but I will ask the Republican Members of the House to stand by their leader when he makes a binding obligation on the floor of the House. [Applause.]

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CARAWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14777 and had come to no agreement thereon.

Mr. HUMPHREYS of Mississippi. Mr. Speaker, I ask unanimous consent that if no vote is had on this bill to-day that it be in order to further consider the bill on next Calendar Wednesday.

The SPEAKER. The gentleman from Mississippi asks unanimous consent that if the consideration of this bill is not concluded to-day it shall be in order on next Wednesday. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, may I ask the gentleman from Mississippi whether he contemplates bringing in a rule to pass this bill on next Wednesday?

Mr. HUMPHREYS of Mississippi. Whether I contemplate bringing in a rule?

Mr. MOORE of Pennsylvania. Yes.

Mr. HUMPHREYS of Mississippi. No.

Mr. MOORE of Pennsylvania. Well, does the gentleman contemplate limiting debate at all next Wednesday? I submit to the gentleman that this is one of the most important bills that has come before the House this session. It involves a problem which I would like to see settled and also involves an enormous expenditure about which there ought to be a fair time for discussion.

Mr. HUMPHREYS of Mississippi. Well, Mr. Speaker, there has certainly been no disposition to cut off debate up to this hour.

Mr. MOORE of Pennsylvania. That is true. I think the gentleman has been fair; and yet I want to say it seems to me the regular course should be pursued.

Mr. HUMPHREYS of Mississippi. It is my hope to conclude the consideration of the bill to-day. It is my hope—I may be disappointed in it—that the House may be permitted to reach a vote to-day; but if it does not reach it to-day, it is my hope and expectation that on next Wedneday we will get to a vote.

Mr. MOORE of Pennsylvania. The gentleman expects to act on the bill to-day, to resume work in the Committee of the Whole House on the state of the Union?

Mr. HUMPHREYS of Mississippi. Yes; I expect to go back into the Committee of the Whole, and it is my hope we might complete its consideration.

Mr. MOORE of Pennsylvania. I have no objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The Chair will count.

Mr. MOORE of Pennsylvania. Mr. Speaker, if I may be permitted to do so, I will withdraw the point of order.

The SPEAKER. The gentleman withdraws the point of no quorum, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14777, the flood-control bill.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14777, with Mr. CARAWAY in the chair.

Mr. MANN. Mr. Chairman, will the gentleman from Mississippi ask unanimous consent to close debate on the pending amendment in 10 minutes, to be occupied by the gentleman from Nebraska [Mr. REAVIS]?

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I will ask unanimous consent that debate on the pending amendment be closed in 10 minutes, that time to occupied by the gentleman from Nebraska [Mr. REAVIS].

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that all debate on the pending amendment close in 10 minutes, that time to be given to the gentleman from Nebraska. Is there objection? [After a pause.] The Chair hears none.

Mr. REAVIS. Mr. Chairman, I want to supplement the remarks of the gentleman from Ohio [Mr. GARD] and to express my disappointment at the character of bill which has been returned to the House from the Committee on Flood Control. I had indulged the hope that this committee had some excuse for its very recent creation other than that of furnishing a method of appropriations for the same general purpose, but nevertheless additional to the appropriations returned by the Committee on Rivers and Harbors. I had hoped that it would formulate and return to this House some legislation, national in scope, that looked to the control of the flood waters, not in any given locality, but in the Nation at large.

Mr. Chairman, in my own State, as the product of some 8 or 10 years of development, there has been evolved a method of flood control similar in some of its aspects to the Ohio law as detailed by the gentleman from Ohio [Mr. GARD]. Whenever there is farm land subject to overflow a certain number of landowners, representing a specified number of acres, may, by petition to a court of record, report the fact that their land is subject to overflow and seek the incorporation of a company for the purpose of devising some means to control the flood waters. That petition is accompanied by the report of an engineer as to the benefit that will accrue to the land in case the overflow should cease, together with the proposed method of improvement and the probable cost of the same. If the benefit which will accrue to the land is greater than the cost of the proposed improvement, a company is incorporated and assessments are made against the land at so much per acre for the purpose of paying for the proposed improvement. Just this morning I received a notification of a drainage tax upon a small piece of land that I own within one of these districts. I am burdened with this assessment for the purpose of relieving my own land from overflow and am now brought face to face with a bill carrying appropriations running into the millions, putting the additional burden upon me and upon mine of preventing the overflow upon the land of somebody else. Within my own district within the past six years millions of dollars have been expended by the farmers for the purpose of preventing the overflow of their lands. They are carrying that burden to-day, and it is a heavy burden, some of them not financially able to bear it.

The National Congress now purposes that they must not only bear the burden of the reclamation of their own land, but that in addition they must bear the burden of reclaiming the lands of others. It was stated by the gentleman from Illinois [Mr. DENISON] that the argument which was persuasive with him was the fact that these landowners adjacent to the Mississippi River were poor and unable to bear the burdens that would fall upon them for the reclamation of their own land. Mr. Chairman, is this bill a matter of philanthropy? Is the Government of the United States to be turned into a charitable institution? Poor? Of course they are poor; many of my people are poor; but we bear our own burdens without complaint. This Congress, gentlemen, can not be just and generous at the same time. We have nothing of our own to give. If we are generous to those in one section of the country, we must take from those in another section of the country that which we have no right to take. If you pass this bill in its present form and contribute millions from the Treasury of the United States for the purpose of enhancing the value of the land adjacent to the Mississippi River, you must take the money from the other sections of the United States for that purpose. It is generous to one; it is unjust to the other. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the amendment was rejected.

Mr. WALSH. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Massachusetts [Mr. WALSH] offers an amendment, which the Clerk will report.

Mr. WOOD of Indiana. A point of order, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. WOOD of Indiana. An amendment is already pending, as I understand it.

The CHAIRMAN. No. The committee has voted on that amendment. It was not agreed to. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. WALSH: Page 3, line 2, after the word "contributing," insert the following:

*"And provided further,* That where the expenditure of money under this act directly or indirectly adds to the value of lands no part of the fund herein provided for shall be expended for the purposes herein provided unless the owners of such land shall have, either directly or through a local governmental authority having jurisdiction over such land or lands, contributed to the extent of the benefit so conferred."

Mr. HUMPHREYS of Mississippi. Mr. Chairman, can we agree upon time for the discussion of this amendment? I ask unanimous consent that debate on this amendment close in 10 minutes.

The CHAIRMAN. The gentleman from Mississippi [Mr. HUMPHREYS] asks unanimous consent that the debate on this amendment close in 10 minutes. Is there objection?

There was no objection.

Mr. WALSH. Mr. Chairman, the purpose of this amendment is to compel the people who are to be directly benefited, or whose lands are to be increased in value, to participate in the contribution of funds and to assume part of the expense of this work; and if, as has been said during the debate on this measure, there are vast tracts of land down there which are to be reclaimed and which are to be greatly increased in value, it seems only proper, before the Government should step in there, under this vast appropriation, that they should be required to contribute to the expense that is to be borne and that they should be asked to bear a proportional part of the burden by way of a betterment contribution that is placed upon the taxpayers throughout this entire country.

Mr. WILSON of Louisiana. Mr. Chairman, will the gentleman yield there?

Mr. WALSH. Yes.

Mr. WILSON of Louisiana. Is not the gentleman aware of the fact that they are contributing now, and that they have contributed in the past, $3 to every $1 that the Government has contributed?

Mr. WALSH. I understand the statement has been made that some of them have contributed and that some of them are contributing now; but by leaving that clause in the bill which I endeavored to strike out, which confines the expenditure and local contributions to the district where the local contributions are made, you will find that it will discourage rather than encourage local contributions in the future.

Mr. WILSON of Louisiana. Does not the gentleman know that there is not a section to be benefited by this bill but that has already contributed by the payment of taxes?

Mr. WALSH. I understand that certain persons down there are contributing and paying a tax, but no contributions have come from the State legislatures, with one exception.

Mr. WILSON of Louisiana. I want to say to the gentleman that all sections are doing it.

Mr. CROSSER. Mr. Chairman, will the gentleman yield?

Mr. WALSH. Yes.

Mr. CROSSER. If they are contributing $3, as the gentleman says, and are locally benefited to the extent of $75, that can not be considered as contributing according to the real benefits, can it?

Mr. WALSH. Not at all, Mr. Chairman; and this amendment which I have offered proposes to make them contribute in proportion to the benefits which they receive and in proportion to the increased value of the property which they hold.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. WALSH. Yes.

Mr. MEEKER. In case that were done and the levee should break, would the Government pay the damages?

Mr. WALSH. Of course not; not any more than if this amendment is not adopted and the levee should break would the Government pay damages. If you make a Government appropriation, it does not necessarily follow that it creates Federal liability.

Mr. MEEKER. Is the liability or risk of holding the land behind the levee to be considered in the matter?

Mr. WALSH. Apparently not. Mr. Chairman, if the words of the gentlemen proposing this measure are to be taken seriously, then there is no liability on the part of the gentlemen owning property behind the levee to be considered at all. They seek to impose the liability, though, upon each and every taxpayer throughout this country, and do not seek to take the taxes to themselves. There is only one State that has appropriated money. No State, except one, as the chairman of this committee has very well said, and that is the State of Louisiana, through its legislature, has appropriated a dollar to help remedy this condition. None of the other States through their legislatures have recognized this crying need for relief or have appropriated money. That certainly is not a sort of public spirit to be commended.

Mr. Chairman, I can not support the pending measure, which has been "benevolently" termed the flood-control (?) bill. The proponents would have us take our choice as to whether this bill is a navigation project, a reclamation matter, or an indorsement of a long-continued scheme, which has admittedly resulted in the waste of millions of dollars.

We were given to understand that the creation of this new committee was for the purpose of submitting measures of merit looking to the adoption of some new and comprehensive method or plan for the control of the flood waters of the great Mississippi and other rivers. But we find nothing new in this scheme; it is the same old story, only it appears on the scene under a new cognomen.

They take out of the rivers and harbors bill an item or two, dress them up a bit, ask for forty or fifty millions of dollars, and seek to have the approval of the House placed upon the measure. And from the sentiment as it has been expressed during the discussion of the bill, the House will approve it, but I submit in so doing it will swallow at one gulp the doctrine heretofore occasionally revered, or at least held in some degree of respect, that States owe some duties to remedy conditions arising within their boundaries from disasters and misfortune, and the expense of such remedial measures should be shared by the taxpayers within the borders of such States.

Hereafter this measure, as indeed other measures of like import, will be cited as precedents to encourage and support legislation seeking to shift to the Federal Government burdens and expenditures properly belonging to the several States. Why should not these States rise to the occasion and appropriate through their legislatures money to remedy the loss occurring. How easy it is to sit supinely by and wait, until by constant dinning and importuning the Federal Treasury is tapped and the taxes necessary for the acquisition of the funds appropriated are levied on the portions of the country that now pay the larger proportion of the revenues received from direct taxation.

You are lessening State responsibility. You are burdening the people of the country by legislation that is not planned with a view to equitable taxation.

You refuse to give consideration to the claims of sections where the need is equally as great; you seek to set apart a certain section to receive the special favor of an inequitable Federal appropriation; you make no provision for participation in the expense occasioned by the States where the moneys are to be expended; nor do you provide for any repayment or reimbursement by the sections or interests directly benefited.

It is only fair to note that the Sacramento Valley project does recognize the principle that the State owes some duty to the country to share the expense, and it is to be commended that the Federal Government is to have its appropriation supplemented by an equal sum appropriated by the State or parties interested.

But on the lower Mississippi no equitable participation is offered, and in view of the broad-visioned perspective of course ought not to be expected.

It is time to cry a halt. Congress ought not to be sledge hammered into appropriating millions of dollars for a project such as is here presented, particularly in view of the history of the plan, as related during the debate on the bill.

Mr. LOBECK. Mr. Chairman, will the gentleman yield?

Mr. WALSH. Yes.

Mr. LOBECK. How would you ascertain the value of these improvements?

Mr. WALSH. Well, you have the Mississippi River Commission and the Board of Engineers, that apparently has ascertained every other unsolved problem, whether connected with this matter or not, and it has also fixed the amount which should be contributed by local interests in the past before they would get Federal aid.

Mr. Chairman, I trust that this amendment will be adopted.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, the bill does provide that everybody must contribute. We just adopted an amendment, offered by the gentleman from Wisconsin [Mr. LENROOT], that none of this money shall be expended until there is contribution.

Now, gentlemen talk about reclamation by these drainage districts. The Federal Government is not asked to spend any money for the purpose of draining any land or reclaiming any land. There are now in process of construction drainage projects in the Deltas amounting to $40,000,000 in round figures, but it will take at least a hundred millions to drain those 16,000,000 acres, every dollar of it to be paid by local interests.

All this talk about the land being made worth $100 an acre by the construction of these levees is ridiculous. Nobody testified as to that except Members on the floor of this House. After the levees have been constructed, after the land has been drained at tremendous cost, after the country has been cleared of its undergrowth and underbrush, after it has been put under cultivation, after the houses have been built upon it and the fences constructed, you can not get $75 an acre for it if you are in luck. It will not average $50 an acre. I happen to know of a plantation in my county, one of the most progressive and best-developed counties in all of the Delta. It was a plantation of 1,200 acres, of which 1,000 acres were under cultivation and 200 acres woodland. It was in a drainage district, and with all the farming implements, stock, and everything else it was sold for $60,000, or $50 an acre, and the seller thought he was getting a good price for it. It is utterly ridiculous to talk about adding to the value of the wild land there $75 an acre by building levees. In the course of human events, if it is made possible by this work for the land to be reclaimed, if the people go in there and bear all the burden of the reclamation, after they have cut the trees down and built their houses and subjected that country to cultivation, possibly the land will be worth $75 an acre. I hope so; but certainly it is unfair for any man to say that this land will spring into values such as have been mentioned here by the mere construction of levees.

Mr. CROSSER. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I yield to the gentleman from Ohio.

Mr. CROSSER. If there is no benefit that actually accrues, then this amendment can not do any harm, can it; and if benefit does accrue, if this land is immediately raised $25 or $50 or $75 an acre in value, should it not pay accordingly?

Mr. HUMPHREYS of Mississippi. Nobody has ever said that no value would accrue. I can understand how the gentleman from Ohio could hold that opinion, of course; but this country has not come to that yet, and I think it will not come to the point where this unearned increment must be turned over to the Government. They do that in Germany. When they improve a canal in Germany, like the Delaware & Chesapeake Canal that my distinguished friends Mr. MOORE of Pennsylvania and Mr. SMALL are so much interested in, they buy up the land on either side of it, and the Government holds that land, so that when it enhances in value the Government gets the benefit of it. I dare say it is not in the contemplation of this Congress to embark upon any such legislation as that now, to buy up all the land, in order that when the land happens to increase in value as a result of any governmental improvement the Government, that does the work, shall get the benefit of it. I put in this report a speech made by Abraham Lincoln, which, it occurs to me, ought to convince any man who reads it of the futility of undertaking anything like that. I hope this amendment will not be agreed to.

The CHAIRMAN. The gentleman's time has expired. All time has expired. The question is on the amendment.

The amendment was rejected.

Mr. MOORE of Pennsylvania. I offer the following amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. MOORE of Pennsylvania: Page 3, line 8, after the word "and"——

Mr. HUMPHREYS of Mississippi. We have not reached that paragraph, Mr. Chairman.

Mr. MOORE of Pennsylvania. I withdraw the amendment.

Mr. LENROOT. I have an amendment, Mr. Chairman.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. LENROOT: Page 2, line 20, after the first word "sum," insert the words "which the commission shall determine to be just and equitable, but which shall be."

Mr. HUMPHREYS of Mississippi. We have no objection to that.

The CHAIRMAN. The question is on the amendment of the gentleman from Wisconsin [Mr. LENROOT].

The amendment was agreed to.

Mr. FREAR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. FREAR: Amend, lines 17, 18, 19, and 20, on page 2, by striking out the words "assurances have been given satisfactory to the commission that local interests protected thereby shall contribute for such construction and repair," and inserting in lieu thereof the following: "there shall have been raised and placed on deposit in a place designated by the Mississippi River Commission and to the credit of the commission."

Mr. FREAR. The purpose of this amendment is to make distinct one of the most important provisions which appears in the bill. The general provision now is that there shall be assurances given to the commission. There is nothing definite as to how long the assurances are to continue, or what kind of security, what kind of guaranty is to be afforded. So I have placed here practically the same condition as exists in the river and harbor bill, that when a contribution is required from any district the contribution shall be fixed and the money placed to the credit of the Secretary of War. In the amendment it is to be placed to the credit of the Mississippi River Commission.

Mr. HUMPHREYS of Mississippi. I think the gentleman is mistaken, and that it is a very unusual thing for any such provision as that to be in the river and harbor bill. The language carried in the river and harbor bill is "upon assurances given to the Secretary of War." That is the usual language. That is the reason we adopted it here.

Mr. FREAR. That may be the language used in some cases, but frequently I have seen the other—not exactly as it is here, but I am trying to make it definite, because this is a very important proposition that we have here. On the question of local contributions there ought not to be any objection to protecting the Government by placing an amount of money that is to be raised to the credit of the commission, so that it can be used. Otherwise assurances may be given and the Government money may be advanced. Then, when you are half way or a quarter of the way through with the construction of the levee, the local community fails to provide the money. The commission ought not to be embarrassed, but the money ought to be available so that they can enter into their contracts with perfect certainty, without any question. We are considering a bill that is direct in its provisions, and we are insisting that there shall be certan contributions made by the locality. In a case like this I can see no objection to requiring the locality to raise by taxation or otherwise the required amount and place it on deposit to the credit of the commission that is to make the expenditure.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, this matter was thrashed out thoroughly with the commission. We had the engineer's report. We wanted to make the matter safe, and this was the advice of the commission, just as it is now. As I said a few minutes ago, that is the language that is almost universally used in the river and harbor bill. Occasionally they require deposits, but that is unusual. Nearly always assurances are given that are satisfactory to the Secretary of War.

Mr. FREAR. What would be the objection to this amendment?

Mr. HUMPHREYS of Mississippi. I can conceive of several. It is necessary for these levee districts to maintain and keep in operation their force for the construction of levees. Because in times of flood when these emergency campaigns have to be made and which cost a tremendous lot of money in temporary work, the Government very largely, almost exclusively, relies on the levee force under supervision and direction of the local engineer.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. FREAR. I ask for an additional five minutes for the purpose of securing additional information.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HUMPHREYS of Mississippi. Now, if the gentleman will yield. They have been at work under cooperation, and while Col. Townsend stated that "theoretically it was not satisfactory, practically it was not so bad," and there is where the gentleman stopped reading; but it afterwards shows that Col. Townsend is very much in favor of continuing the present plan.

Now, they have to have an organization to collect the tax; they will, under the direction of the commission provided for in the bill, let contracts and have a certain amount of work done. There is no occasion, and I suppose no disposition on the part of the House to hamper these people in these activities. We want to encourage them so that they will raise as much as they possibly can and put into the levees. If we should require that

they collect the money in the beginning of the year and put it in the bank instead of letting the contract, then paying when the collector of taxes collected his money in the fall, it will seriously handicap them.

We have never had an occasion in actual practice where any assurance given to the Secretary of War or given to any of the engineers was not considered sufficient absolutely to compel compliance by those who were contributing.

Mr. FREAR. What protection has the Government in any case providing the levee association should fail to levy the tax, or provided that the local community refused to make the contribution after we have once started on the project? We can not levy a tax, as was suggested by the gentleman from Tennessee [Mr. GARRETT]; we are left absolutely helpless. Why is it not a safe plan, as it would be in any case, to require that the Government be protected?

Mr. HUMPHREYS of Mississippi. There are several reasons I could give. They have to make an assurance satisfactory to the commission; they have to enter into a contract; and they are liable on it and can be made to pay it. But the best assurance is the whip the commission has under this bill—that they will not contribute anything toward the work until the assurance which is satisfactory is given.

Mr. FREAR. But suppose a calamity happens and they can not raise the money. It has been said here that some of them are bankrupt. We have in this case an assurance that they will give to the Government; but who is to make up the balance? The Government is to furnish a certain proportion and the district fails to contribute its share; then we must make up the balance or construction stops where it is—unfinished.

Mr. HUMPHREYS of Mississippi. The Government will not contribute anything further to that district. It is just a question of life and death, and there is no sort of doubt that they will put up their share. They have put up 3 to 1 without compulsion, and why should we have any sort of doubt that they will put up 1 to 2 when they are compelled before they can get a dollar's worth of work done to give a satisfactory assurance?

Mr. FREAR. The answer is that the levee system is no good after it has once begun until it is completed. We have no power to tax; we are helpless under this bill to enforce anything, and have to accept what assurances have been given, and which under the circumstances can not be carried out during construction. It is a businesslike proposal that ought to be accepted if we are to protect the Government in making such agreements.

Mr. HUMPHREYS of Mississippi. I will offer an amendment, when we get to it, that the local interests must look out for the maintenance after the work is completed.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was rejected.

Mr. FREAR. Mr. Chairman, I have another amendment to this same section, which I send to the desk.

The Clerk read as follows:

Amend line 2, on page 3, by inserting after the word "contributing" the following: "and the Mississippi River Commission is directed to withhold all work in every State and levee district unless approval is given by the authorities of such State and district that all moneys so contributed by the district or State may be expended in any other State or district whenever required in constructing a levee system along the Mississippi River, and that levee-district lines and State lines shall not be considered by the Mississippi River Commission but that levees wherever constructed shall be built for the system as a whole and not for any particular district or State."

Mr. FREAR. Mr. Chairman, this is somewhat similar to the amendment proposed by the gentleman from Massachusetts [Mr. WALSH]. Here is the importance of adopting such a provision according to my reading of the bill. The bill states at the bottom of page 2:

But no contribution made by any State or levee district shall be expended in any other State or levee district except with the approval of the authorities of the State or district so contributing.

Now, for illustration, a levee is to be completed up to the border line of one of the districts. The people of adjoining districts refuse to raise the money. The money can not be distributed along from one levee district to another, or from one State to another, and you are handicapping the commission by any condition that the money can not be expended outside of the district or State. The commission ought to be able to raise the money and ought to be thoroughly protected. You can not do it without some such provision as I have offered.

Now let me say in a general way in regard to the bill, and I will speak for only a moment or two on that.

There have been some suggestions here about the general character of this land to be reclaimed. In my judgment, as near as I can ascertain from authorities, good authorities, on the subject, a reclamation project is not a flood-control project. In fact, the two are not in harmony. When this commission endeavors to bring this land, now covered by water, some 16,000,000 acres, under this reclamation project, we will have brought the waters within a very narrow levee system. The danger from floods, therefore, will be emphasized. The menace will be greater, because we have taken away the great reservoir which we formerly had before reclamation. That is the opinion of men who have given much time and study to the subject. The two projects are antagonistic. For that reason this is a reclamation project. By bringing these levees close to the river channel I believe the people who are enjoying the benefits of the reclamation project ought to be obliged to pay. They ought to protect the Government clear to the extreme in everything that is necessary, and I do not believe that we are doing so under this bill.

Mr. MANN. Mr. Chairman, I am not able to vote for the amendment offered by the gentleman from Wisconsin [Mr. FREAR]. I think if he will reflect for a moment he will see that it is largely a constitutional question. I doubt whether there are very many States whose constitutions will allow them to appropriate money through the legislature for expenditure in another State. I question whether there is any State that authorizes the formation of a drainage district, with authority to raise money to expend in another State, and there are probably not many cases where they can expend it away from the drainage district. For instance, we have a drainage district in the city of Chicago that has had expended upon it perhaps more money than any other drainage district in the world. A part of the water that runs into our drainage district rises in Indiana, and in a way we have to take care of their flood waters.

Some years ago I looked the matter up, and it is my recollection that the State of Indiana was not authorized to raise money for expenditure over in Illinois, as we would not have been authorized through our drainage district to raise money in Chicago for expenditure in Indiana. I do not believe that a bill of this sort, if it is to be enacted, should be enacted upon the theory that all of the States shall have to amend their constitutions in order to authorize them to expend money outside of the State in the way of public improvements. The States have quite enough to do now in the way of public improvements in the expenditure of money within their own boundaries, and it is not likely that constitutional amendments would be agreed to that merely covered this particular case. It might be desirable for the State of Wisconsin to expend money building a public road in Illinois so that the people in Wisconsin could go to Chicago, but I question whether it would be a desirable thing for them to have the constitutional authority to do that.

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. FREAR. Suppose that the highway was to be extended through Wisconsin and Illinois, and the condition was made by the General Government that contribution would be made of two-thirds by the General Government providing a certain amount was contributed by the State of Wisconsin and by the State of Illinois. Could it not very readily be determined what would be the fair proportion? Otherwise would there not be links left out throughout the highway if you were depending upon the local counties to pay the contributions?

Mr. MANN. I do not quite catch the drift of the gentleman's question, but if it means that the construction of the highway depended upon Illinois being permitted to expend money in Wisconsin and Wisconsin being permitted to expend money in Illinois, I do not think it would be constructed. The gentleman's proposition is that none of this money shall be expended until the States and the drainage districts not only have obtained authority but have agreed to contribute money which may be expended outside of their respective borders. I do not believe there is a State in the Union whose constitution at present would allow that. About that I may be mistaken, though I doubt it; but I am very sure there ought not to be any such authorization to expend money on public improvements raised by one State in another State. However desirable it may be in the particular case, it would be a vicious practice to inaugurate.

Mr. FREAR. If that be true, let me suggest that it shows the weakness of the proposition so far as the Government's interest is concerned, when we have no protection whatsoever in this particular.

Mr. MANN. That is another question.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was rejected.

Mr. ROGERS. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 2, lines 18, 21, and 23, strike out the word "commission" and insert in lieu thereof the following: "Secretary of War."

Mr. ROGERS. Mr. Chairman, paragraph (a), at the top of page 2, provides that the Federal half of the money shall be expended under the direction of the Secretary of War. This paragraph (b), to which my three amendments are directed, provides that the other half of the money, the local half, shall be expended under the direction of the Mississippi River Commission. It seems to me that that is rather poor business practice and procedure, that it is likely to result in conflicts and complexities, and that probably harmony and efficiency would be promoted if both halves of the money, local and Federal, were to be expended under the direction of the Secretary of War.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. MANN. What does the gentleman mean by "halves" of the money? There is nothing in here about "halves" of the money.

Mr. ROGERS. I understand; but one-half of the money is to be appropriated by the Federal Government

Mr. MANN. The gentleman is mistaken about that. It is two-thirds under the amendment that has been agreed to.

Mr. ROGERS. I thought the Lenroot amendment, adopted a few moments ago, was to the effect that the local community should contribute one-half and the Federal Government——

Mr. MANN. Contribute one-half as much as the Federal Government; that makes one-third.

Mr. ROGERS. I did not so understand; but I do not think that changes the effect of the pending amendments.

Mr. MANN. Not at all.

Mr. ROGERS. I was mistaken merely as to the percentage of contribution to be made, respectively, by the Nation and the several localities. Another thing, Mr. Chairman, which I think is worthy of consideration in connection with these amendments is that the expenditure of money under the direction of the Secretary of War would be more likely to safeguard the interests of the country as a whole than would the expenditure under the direction of a more or less local commission.

Mr. DYER. Will the gentleman yield?

Mr. ROGERS. I will.

Mr. DYER. I would like to have the gentleman state why he thinks it should be expended under the Secretary of War, an official who changes very often, whereas the Mississippi River Commission is a continuing commission, the officers of which—at least the chairman has been such for a number of years—and who have given all of their time to this particular work.

Mr. ROGERS. As I understand the functions of the Mississippi River Commission, it is a subordinate board under the Secretary of War—a bureau, so to speak, in the War Department. If that is true, why should not we go to the fountain head of authority and put the direction under the Secretary of War himself, especially as the other portion of this fund is to be expended under the Secretary's direction?

Mr. DYER. The Mississippi River Commission is a separate and is practically an independent authority, I will say to the gentleman, by act of Congress.

Mr. ROGERS. But it is subordinate to the Secretary of War in a great many important respects.

Mr. HUMPHREYS of Mississippi. Will the gentleman yield?

Mr. ROGERS. I will.

Mr. HUMPHREYS of Mississippi. The gentleman will notice that the bill says this is to be expended under the direction of the Secretary of War, but that is not all. It further says, "in accordance with the plans, specifications, and recommendations of the Mississippi River Commission." It is under the general direction of the Secretary of War, but the work must be done just exactly as the Mississippi River Commission says.

Mr. ROGERS. We should have an additional check upon the wise expenditure of this local fund, if the Secretary of War were given supervision here also——

Mr. MANN. Of course this money is to be expended by the local people themselves in the main——

Mr. ROGERS. Yes.

Mr. MANN. Under the direction of the commission, which is on the ground. If it had to be expended under the direction of the Secretary of War apart from the commission, you would have to have another set of officers in Washington, then the Chief of Engineers—a part of them a long way from the ground——

Mr. ROGERS. But I presume that both the Federal and local contributions will be expended as a part of a general scheme.

Mr. MANN. Yes.

Mr. ROGERS. And it would, therefore, seem wiser to have the work carried on under one general scheme rather than two.

Mr. MANN. It is; but the gentleman proposes to make it two. The bill makes it one. The plans of the Mississippi River Commission have to be approved by the Secretary of War and Chief of Engineers to begin with.

Mr. ROGERS. Yes.

Mr. MANN. The Mississippi River Commission is on the ground where the work is to be done. It gives directions there, whereas if you have to come to Washington from the levee district and make application to the Secretary of War here, it would have to be sent by him to the Chief of Engineers and referred by the latter to the Mississippi River Commission, going down to the ground and coming back through this routine, and then the Secretary of War would authorize the expenditure in that way.

Mr. ROGERS. Is not this the situation: Is it not a fact that there is to be one fund, in part contributed to by the Federal Government and in part contributed to by the local units interested?

Mr. MANN. That is not the case as I understand. The Federal Government expends its money. The local money must be expended under the direction of the Mississippi River Commission. But it is not essential, as I understand, that the Mississippi River Commission shall contract to do the work for the local——

Mr. ROGERS. I should like to ask the gentleman——

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROGERS. I should like to have two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

Mr. ROGERS. I should like to have the chairman of the committee say whether I am correct in my understanding from the bill and his statement relative to the bill, namely, that there is to be one combined general fund to be contributed to by the Federal authorities in part and by the State or local authorities in part.

Mr. HUMPHREYS of Mississippi. Not necessarily. The work is to be done under the commission, and, as has been done in the past, they will allot so much of the work to the local interests. They make the contract. They have the whole equipment there, and they are prepared to do that work, but they must do it under the direction of the commission. It is very much better, in view of the fact that there are in the neighborhood of 25 different levee boards, to have the commission direct this than to have it sent back to Washington under the Secretary of War. And, in fact, the Secretary of War, I presume, if he wanted to act intelligently about it would have to take the recommendation of the Mississippi River Commission.

Mr. ROGERS. Is not the situation similar to that which is presented in the course of the river and harbor bill when one of the States through which a river flows agrees to appropriate a proportion of the amount for the improvement of that river?

Mr. HUMPHREYS of Mississippi. Well, I think not, for this reason. The levee districts are already equipped to do this work; the State is not, the local interest is not.

Suppose you are going to improve the harbor at Pascagoula, Miss., for instance, if that happened to be one of the items in this bill, on the condition that the local interests would contribute $150,000. The Secretary of War would very properly require the cash to be deposited.

The CHAIRMAN. The time of the gentleman has expired. The question is on agreeing to the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Any funds which may hereafter be appropriated under authority of this act for improving the Mississippi River between the Head of the Passes and the mouth of the Ohio River, and which may be allotted to levees, may be expended upon any part of said river between the Head of the Passes and Rock Island, Ill.

Mr. FREAR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. FREAR].

The Clerk read as follows:

Amendment by Mr. FREAR: Amend, line 8, page 3, by inserting, after the word "Illinois," the following: "but if said Mississippi River Commission shall at any time ascertain and determine that the levee system is increasing the danger to lives and property along the river the commission is authorized and directed to report back to Congress its conclusions, and shall immediately withhold all additional expenditures until further legislation is had by Congress."

Mr. FREAR. Mr. Chairman, I will state that this carries out my general understanding of the sentiment of many people in the Mississippi Valley at the present time, that this is a dangerous project, this reclamation of land, and that it is not a legitimate part of flood control. If it should be ascertained by the commission that this bringing together of the levees is gradually raising the height of the water and making it more dan-

gerous, from the experiments conducted, so that as this work proceeds—because this bill is for five years—then the duty of the commission is to withhold payments and report back to Congress its conclusions.

We have not any very good convictions expressed by members of the commission so far as I can ascertain; no assurances. Opinions? Yes; but this is an important proposition upon which the people of the valley are very much divided. If it should come to pass that the commission should find this condition to arise, that the system is wrong and that it is becoming threatening and dangerous to the people, then they have the right under this amendment to withhold further payments until they report to Congress and receive further instructions.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Missouri?

Mr. FREAR. Yes.

Mr. MEEKER. Have you any method or suggestion other than the levee system, aside from the reservoir system, which you think should be put into effect?

Mr. FREAR. I will say this to the gentleman, that I am not expressing an opinion except in so far as I am expressing the declaration of men familiar with the conditions, that when you decrease the distance between the levees and undertake to reclaim land, the danger of breaking the levees is increased measurably by that limitation.

Mr. MEEKER. Then the gentleman's suggestion is that in case we undertake this levee system and the commission should report that the system is not a success, we should turn the whole thing loose and lose the money already expended?

Mr. FREAR. No. Here it is provided that they shall go on and spend $45,000,000 and whatever else may be appropriated in addition. It is simply for the protection of the commission itself.

Mr. MANN. Mr. Chairman, the gentleman from Wisconsin [Mr. FREAR] is one of the able and indefatigable Representatives on this side of the House. We need more of them. The Mississippi River proposition is one of the difficult problems of the Government. We need able Representatives all the time. We need more on this side of the House, and I am happy to say, Mr. Chairman, that after the election yesterday in West Virginia we shall have one more. [Applause on the Republican side.]

Mr. FOSTER. It is unfortunate for the country, though.

Mr. MANN. Last fall we had a special election in a Democratic district in New York, which returned a Republican Member to the House. Yesterday they had an election in West Virginia, where a year ago last fall the late Mr. Brown was elected by 1,350 majority and there yesterday Mr. Bowers, Republican, was elected to succeed him by 1,125 majority.

Gentlemen, I invite you to look at the wall. The handwriting is on the wall. [Applause on the Republican side.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. FREAR].

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] moves to strike out the last word.

Mr. STAFFORD. Mr. Chairman, the proposition involved in this bill is one for levee improvement only. It makes no provision whatever for any lateral basins or reservoirs to relieve the surplus flood waters of the Mississippi. It does not require any expert information to know that if you are going to confine in a narrow channel of 2 to 6 miles in width what nature has, in years gone by, been carrying as widely as 60 miles that the banks will have to be considerably raised.

Mr. SWITZER. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Ohio?

Mr. STAFFORD. In a little while. It does not require expert knowledge to know that if you are going to raise the height of the water of that stream the levee required will mount and mount until somewhere or other lands will be overflowed which were formerly free from such devastation.

This is confirmed by the statistics that are available, so far as the levee improvement of the Mississippi has been developed up to the present time. During the flood in the Mississippi in 1882 the headwaters at Cairo were 52 feet above normal, whereas at Memphis during the height of the flood the water was 35 feet above normal. In 1912—and it is agreed that the flood of that year was about the same as that of 1882—the headwaters at Cairo were 54 feet, whereas at Memphis there was a height of 45.2 feet, occasioned by the confining of the waters in a narrower confine by reason of the building of the levees on the lower banks of the Mississippi. In 1913, during the flood, there was a height of water at Cairo of 54.7 feet, whereas at Memphis it was 46¼ feet.

This only goes to show that this proposal is not one that will result in benefit to the whole stricken districts of the South, but one that will be localized and restricted to those lateral lands that are tributary immediately to the levee district. This phase has been called to the attention not only of the Court of Claims but of the Supreme Court. The facts show that uplands, which formerly in flood times were free from the devastating waters of the Mississippi, by reason of the confinement in a narrow channel and the breaking of the levees, have been overflowed, and injury inflicted upon lands which in the history of the Government had never suffered damage before, they being under water for the first time and occasioned by the backwater from a levee break.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. In just a moment. I call attention to the language of the report of the Mississippi River Commission for 1910, involving that, where it says:

> That these people should be condemned to perpetual inundation without the possibility of relief or redress, for the sake of an improvement from which their fellow citizens are enjoying great benefit, is intolerable to any man's sense of justice.

These cases are great in number. The height of the river bed has been raised, and uplands which in old times were known to be free from the devastating influences of the flood are now subjected to inundation.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. STAFFORD. By the erection of these levees you are attempting to do the reverse of what the Isthmian Canal engineers decided should be the policy in the control of the flood waters of the Chagres. It was known that when the great floods of the Chagres came down the valley they overspread that great basin. But instead of confining those waters in a narrow channel the Government provided a great lake that will impound the waters in a surface level of 154 miles.

Mr. MOORE of Pennsylvania. And a spillway.

Mr. STAFFORD. And a spillway to provide that that excess water shall be drained off gradually. Here you propose to back up the water. You propose not only to back it up toward Illinois, but to back it up in all the tributary streams in Arkansas and all the other adjoining districts. This is the first time that Congress by deliberate action approves a policy whereby the Government will be called upon in the future to pay millions and millions of dollars in claims arising directly out of its own policy, by forcing the waters back and overflow adjacent lands. These claims will run into the millions and millions of dollars.

It is not fair for the proponents of this bill to say that the total will amount to an aggregate expenditure of $45,000,000. The hearings admit that these levees, if they are to be lasting, must be revetted, and the cost of that revetment for the purposes of navigation is estimated at from $100,000,000 to $158,000,000.

Mr. HUMPHREYS of Mississippi. Will the gentleman yield?

Mr. STAFFORD. I yield.

Mr. HUMPHREYS of Mississippi. That estimate of $158,000,000 made by the Mississippi River Commission was made in response to an inquiry contained in a resolution of Congress to ascertain what the cost of complete revetment of the Mississippi River would amount to. They said $158,000,000; but they also said, and still say to-day, that no such revetment is necessary. There is no occasion to revet it all, and not more than $60,000,000 to $75,000,000 will ultimately be required in the next 20 or 25 years.

Mr. STAFFORD. Mr. Chairman, accepting the very modest suggestion of the father of this proposition, that it will cost $75,000,000, I claim this is the most stupendous loot of the Federal Treasury that has ever been submitted to this Congress during the past 15 years. Here we have a proposition involving an expenditure of $45,000,000 within 5 years, superimposed with an additional appropriation of $75,000,000 for revetment purposes. If this proposal provided for reservoirs where these flood waters could be accommodated, then we might consistently claim that it was something for flood control; but we know that it is a mere reclamation project to increase the value of the bottom lands that to-day are worth only $20 an acre, but when they are secure from inundation will be worth from $75 to $100 an acre. We know that it is nothing more nor less than a

localized improvement proposition and not for the benefit of all the country.

Mr. GREEN of Iowa. I think 20 cents an acre would be nearer the present value than $20.

Mr. STAFFORD. I have inquired from gentlemen who are acquainted with the value of these lands, and I wanted to be very moderate in my statement.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I will not ask for any further time.

Mr. HUMPHREYS of Mississippi. Let us have a vote now on the pending amendment.

The CHAIRMAN. The question is on the amendment of the gentleman from Wisconsin.

The amendment was rejected.

Mr. TILSON. I move to strike out the last word.

Mr. HUMPHREYS of Mississippi. Let us see if we can not agree on debate on this paragraph. The gentleman, as I understand it, just wants to strike out the last word; that is, he simply wants to make a talk on this subject?

Mr. TILSON. I may possibly ask the indulgence of the House for 10 minutes, but I have five minutes already granted to me.

Mr. HUMPHREYS of Mississippi. I ask unanimous consent that debate on this paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that debate on this paragraph and all amendments thereto close in 10 minutes. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, I think the gentleman will make time if he will extend that to 25 minutes.

Mr. HUMPHREYS of Mississippi. Oh, no. Why not let us read this section and then talk? Let us get through with the section and then talk.

Mr. MOORE of Pennsylvania. I have an amendment to offer to this section. The gentleman from Ohio and the gentleman from Connecticut each want five minutes.

Mr. HUMPHREYS of Mississippi. It is not on any amendment. Let us read this section. I submit to the gentleman that we ought to be fair. We have been here two days now on one section. The gentleman from Wisconsin [Mr. STAFFORD] came and assured me that there would be no delay on the matter if I would permit this bill to be read by paragraphs instead of by sections. I submit that to occupy two days in debate is not keeping that promise in good faith.

Mr. STAFFORD. There has been no attempt to delay the consideration of the bill.

Mr. HUMPHREY of Washington. What authority had the gentleman from Wisconsin [Mr. STAFFORD] for making any such agreement?

Mr. STAFFORD. I did not assume any authority.

Mr. HUMPHREYS of Mississippi. The gentleman from Illinois [Mr. MANN] spoke with some authority, and he called on his party associates to stand by that agreement.

The CHAIRMAN. Is there objection?

Mr. MOORE of Pennsylvania. I object, Mr. Chairman.

Mr. TILSON. Mr. Chairman, the bringing in of this bill has served at least one useful purpose. It removes the mask from what was for the most part only a plausible pretext that the large sums appropriated and spent in the so-called improvement of the Mississippi River were expended for the improvement of navigation. In the discussion of this bill it has not been necessary to talk navigation where there is no navigation, or commerce where there is none. That is a distinct advance.

It is practically admitted that this is a reclamation project, or, at any rate, it has been demonstrated that it is by the facts and arguments produced. It is a reclamation project on a grand scale, one that appeals to the imagination and, I believe, to the sound sense of broad-minded men. It is a project whose magnitude and possibilities arouse the most intense interest, just as the boundless expanse of semiarid land in the West has appealed to the stout-hearted American and has challenged his daring and enterprise to go out and reclaim it. Just five years ago I crossed from east to west the State of Louisiana and part of the great State of Texas. It was a dry season, but in Louisiana I saw unnumbered miles of the richest alluvial land on the earth covered with water, while in Texas boundless areas of black waxy and other fertile lands were producing little or nothing for lack of the one thing an oversupply of which rendered much of the adjoining State valueless. It naturally occurred to me what a wonderful transformation the genius of man might bring to pass by reducing the amount of water in Louisiana and increasing it in Texas.

The 16,000,000 acres of unprotected overflowed alluvial land along the Mississippi must be saved, not only for the sake of the present owners of this land, who will undoubtedly gain most, but for the sake of the people of the entire Nation. We are a Nation of a hundred million people. Continental United States alone could support easily 500,000,000, but it will support them far better if the fertile arid lands are watered and the alluvial overflowed lands are protected from the floods.

The only question is how to bring it about. We are solving the question in the case of the semiarid lands of the West. The practical problem is somewhat more difficult in the case of the overflowed land, owing to the fact of its being entirely in private ownership.

In the case of the irrigation projects where the United States owns the lands they can be sold after being made valuable, and thus recoup the Treasury for what has been expended. At least this is the theory upon which the work is proceeding. The bill under consideration presents the proposition baldly that the United States shall build levees and revet the banks of the Mississippi River so as to prevent overflow and that the private owners of the land thus protected shall pay one-fourth of the cost—one-third if the Lenroot amendment is finally adopted. This does not appear to be entirely fair to all the other people of the country who are only indirectly benefited.

I believe that it is necessary for the United States to take charge of this great problem and work it out. It is too large a problem for individuals, levee districts, or even States to work out alone. It must be done by intelligent cooperation with the General Government. It seems to me it ought to be possible to work out a plan by which the United States would finance and control this work, but that the lands specially benefited should bear at least the major portion of the expense. No such idea is contained in this bill, but it proceeds upon the same old theory that while the benefit is largely special, the cost shall be made general under the same old river improvement guise.

I believe in river and harbor improvement wherever there is business to justify it. I believe that more money rather than less should be expended in deepening harbors, keeping open the channels of rivers and in opening up new waterways, but I would insist that before large sums of public money are expended on such work it should be clearly demonstrated that the commerce is actually there to be carried. If it is there in sufficient quantity, the most effective and most economical means of carrying it should be provided, but I am opposed to projects of the character pointed out in some previous rivers and harbors bills where the total commerce is not equal in value to the sums expended for improvement.

Mr. RICKETTS. Will the gentleman yield?

Mr. TILSON. Yes.

Mr. RICKETTS. What is the plan proposed now by which this $45,000,000 is to be expended in order to protect the lands from the floods?

Mr. TILSON. It was proposed originally that the Government should pay three parts of it and the private owners should pay one part. Unfortunately, if the land which is now practically valueless should become very valuable, the private individual would not receive as his share one-quarter and the Government three-quarters, but the Government would get nothing, while the private owner would receive all the benefit of the increase.

Mr. RICKETTS. That is the proposed expense; but what is the plan of spending this $45,000,000 to protect these lands?

Mr. TILSON. It is the same old plan under a new guise. It consists in spending a great deal of money under the pretext of improving navigation, under the same plan that the money has been spent heretofore, for navigation nominally, but really for the reclamation of the land.

Mr. MOORE of Pennsylvania. There is no change between this plan and the plan carried on under the river and harbor bill.

Mr. TILSON. There is really no change in the plan.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

Mr. TILSON. I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. REAVIS. Will the gentleman yield?

Mr. TILSON. For a question.

Mr. REAVIS. If the report of the engineer is correct that navigation and flood control are incompatible, we make appropriations through one committee for navigation and through another committee for flood control, and one appropriation nullifies the other, and what is the end?

Mr. TILSON. If that be true, we are working at cross purposes, and the first thing to do should be to coordinate our plans.

The passing of this bill as it is written will set a bad precedent and open wide the door for such "pork" appropriations as Con-

gress has never known before. It is frankly stated that this is just the beginning. The gentleman from Indiana [Mr. WOOD], in his remarks last Wednesday, said:

If the project commenced with this measure is carried out, as it is the intention of the committee it should be, the flood waters of the Wabash, White, and Miami Rivers will be controlled, and the awful havoc and destruction committed by them in 1913 will be rendered impossible of repetition.

Yes; and there are hundreds of other streams in the country, in addition to the Wabash, the White, and the Miami, just as destructive to lands along their banks when floods come. I shall cite just two instances in widely separated parts of the country, both having come under my own personal observation. These will serve as illustrations of numerous cases in all parts of the country.

Mr. FESS. Will the gentleman yield?

Mr. TILSON. Yes.

Mr. FESS. The Wabash, the Ohio, the Illinois, and the Missouri all probably will require some attention as to flood control. Is this bill written on a basis that when the improvement is made it will take care of any future improvement above the place where it is now made?

Mr. TILSON. I assume that if this bill passes we shall first attend to the lower Mississippi and then provide for all other streams in the country, build levees at the danger points, revet the crumbling banks, and proceed to protect the whole country. However, I have wondered what will become of the Treasury while we are doing it.

Mr. FESS. Why was not a comprehensive plan set out before we began in this piecemeal way?

Mr. TILSON. I am not a member of the committee, and therefore can not explain why that course was not pursued.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. TILSON. Yes.

Mr. MOORE of Pennsylvania. You have floods in Connecticut, but Connecticut is not provided for.

Mr. TILSON. Yes; we have floods in Connecticut, of which I am going to speak after referring to another illustration in a different part of the country.

In the southern Appalachians the Blue Ridge is the watershed, while the highest crest of the Allegheny Range is the boundary between North Carolina and Tennessee. Four rivers, rising in Virginia and North Carolina, break through the Allegheny Range and flow down through the upper east Tennessee Valley—the Holston, Watauga, Nolichucky, and French Broad. In 1901 there was a somewhat unusual flood in these rivers, destroying land and buildings, mostly land, to the estimated value of $10,000,000. Like the dwellers along the lower Mississippi, the landowners of Tennessee were helpless. Virginia and North Carolina gathered their combined waters and hurled them through the mountain gorges upon Tennessee. Why should not the Government come to the rescue, erect levees, and revet the banks of these rivers in order to protect the alluvial bottoms along their banks? The answer will be: It should and it will if this bill is to determine our policy, for I never knew Tennessee to miss a trick, especially when the old flag and an appropriation are involved. [Laughter.]

The other case is in my own State of Connecticut and occurs annually, some years being worse than others. As you will recall, if you have studied the geography of New England, the Connecticut River rises near the Canada line, forms the boundary between Vermont and New Hampshire from north to south, crosses the entire width of both Massachusetts and Connecticut, and empties into Long Island Sound. The waters of three States are poured out upon little Connecticut, and never does a year pass without great and irreparable damage being done to the very fertile and productive lands lying along the river. Are we to make it a "pork" proposition and have the United States build levees at the danger points and revet the banks of the lower Connecticut, where during the early spring floods half a Connecticut farm will fall into the river at once?

The gentleman from Indiana [Mr. WOOD] tells us it is not a sectional bill. He says:

That it is not intended that this improvement is to be sectional is adequately proven by this initiatory measure, which provides not only for the flood control of the Mississippi River, but for the flood control of the Sacramento River in far away California, thus demonstrating that the people of the South have joined hands with the people of the West to assist each other for the common good of all their citizens, and as readily will they respond and join hands with the people of the North and the people of the East.

Yes, and will be sure to join hands with enough to pass the bill. The amendment and remarks of the gentleman from South Dakota [Mr. DILLON] are illuminating on this point. He proposed to strike out "Mississippi River from the Head of the Passes to the mouth of the Ohio River," and insert "Ohio, Missouri, and Mississippi Rivers and their tributaries." Of course, he should have included the Connecticut River. He omits even the Sacramento River, mentioned in the bill. After informing us that the Missouri is the important river and the Mississippi only a tributary to it, he goes on in support of his amendment:

It seems to me that we will be making a great mistake if we do not take into consideration these propositions. To do things by piecemeal will be a failure. I want to see this bill perfected so that we can all support it; simply doing it by sections in the form of levees will mean a miserable failure. I hope this amendment will be adopted so that we all may be able to give this bill our support, but without such an amendment it is doubtful if I could support a bill of this character.

In other words, if we distribute the appropriation widely enough, it will be done wisely so far as passing the bill is concerned.

I believe in internal public improvement, and there are many things that must be done, if at all, by the Federal Government; but I deprecate the inception of any policy which in its essence consists in collecting revenue by Federal taxation and attempting to distribute it again to the States, to localities, or to the people themselves. It can not be done wisely, or satisfactorily except to the few receiving it. It ought not to be attempted. I fear that this bill will lead strongly in that direction. Therefore, while favoring the cooperation of the Government in the work of building the levees, revetting the banks, and saving the overflowed lands of the Mississippi Delta, I think the problem should be worked out differently from the solution offered in this bill. [Applause.]

Mr. MOORE of Pennsylvania rose.

Mr. HUMPHREYS of Mississippi. Will not the gentleman from Pennsylvania permit us to proceed now with the reading?

Mr. MOORE of Pennsylvania. I would like to have five minutes on an amendment.

Mr. HUMPHREYS of Mississippi. Why not take it on the next paragraph?

Mr. MOORE of Pennsylvania. Let me offer my amendment, and I will speak to that. I have an amendment to this paragraph.

Mr. HUMPHREYS of Mississippi. Very well.

Mr. RUSSELL of Missouri. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 3, line 8, after the word "and," strike out the words "Rock Island, Ill.," and insert the words "St. Paul, Minn."

Mr. MOORE of Pennsylvania. Mr. Chairman, several times comment has been made upon the fact that there is very little difference between obtaining appropriations for flood prevention under a Flood Control Committee and obtaining them under a River and Harbor Committee in the regular way. My judgment is that we should adhere to the old practice, because that was fair to every section of the country.

The flood-control bill has been organized along lines somewhat similar to the river and harbor appropriation bill in this particular, that while the Mississippi Valley is fairly well taken care of up to the point of the Ohio River and is extended in the bill so that the Mississippi River Commission can have control up to Rock Island, taking in two or three more States along the line, California and the western coast is provided for by an appropriation for the Sacramento River. This is the way to get votes for a proposition of this kind. We take care of certain sections of the country where the voting power is strong, and thus we get recognition in the House of Representatives. It is a perfectly natural proposition which any experienced member of the Committee on Rivers and Harbors understands full well, because under various administrations long since passed it was worked very successfully in organizing the votes.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield to the gentleman from Washington, who first addressed me, and then I will yield to the gentleman from Illinois.

Mr. HUMPHREY of Washington. I want to ask the gentleman how much chance he thinks the California proposition would have of passing through this House if it was not hitched onto the Mississippi River proposition?

Mr. MOORE of Pennsylvania. I do not think it would have any chance. The California proposition is in the river and harbor appropriation bill which has been passed, just as is the Mississippi proposition. Provision was made in that bill for the Sacramento River, but see the importance of linking up these sections of the country!

It takes a man who understands how to get an indorsement from three national political conventions to be capable of bringing about this sort of an arrangement. Anyone who can go to a Republican convention and get an indorsement for flood control, then go to a Democratic convention and get an indorsement for flood control, and then to a Progressive convention and get an indorsement for flood control can link up the Sacramento River and the votes on the Pacific coast with those in the Mississippi Valley, and thus put himself in the position of passing his bill. It is a strong play.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield.

Mr. GALLAGHER. I would like to ask the gentleman, if the House should adopt his amendment, how much money would be expended upon the stretch of the river proposed to be taken in under this bill?

Mr. MOORE of Pennsylvania. I think it would be fair to take care of that portion of Missouri which is included in this extension of the line from Cairo to Rock Island. I think it would be fair to provide for the great navigation State of Iowa, which raised some objection to the river and harbor appropriation bill when it was under consideration in the House, and in that way we might get some Iowa votes; but I can scarcely see the reason for stopping at Rock Island. We have already voted $20,000,000 for the construction of a nitrate plant at Muscle Shoals in Tennessee. Maybe Rock Island, being public property and located in the interior of the country, is to be considered for that purpose.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask unanimous consent to proceed for five minutes, because I have not yet come to the merits of my amendment.

Mr. HUMPHREYS of Mississippi. I hope the gentleman will not insist upon that. He said he wanted to discuss his amendment, and the gentleman has not discussed it in the five minutes he has just consumed.

Mr. MOORE of Pennsylvania. But gentlemen diverted me, just like the course of the channel of the Mississippi River. I will proceed now directly to the amendment.

Mr. MANN. I suggest to the gentleman from Mississippi that he ask to close debate on the paragraph in 10 minutes. I would like to have 5.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I ask unanimous consent that all debate on the paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection?

Mr. BARKLEY. Mr. Chairman, reserving the right to object, there is some information that I desire to obtain with respect to the paragraph, and I would like the gentleman to make it 11 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GOOD. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield for one question.

Mr. GOOD. If this bill should include flood control of the Delaware or the inland waterways, I would ask the gentleman if that would be sufficient to obtain the vote of the gentleman from Pennsylvania?

Mr. MOORE of Pennsylvania. Oh, we have our floods. We are in the same position that the gentleman from Connecticut [Mr. TILSON] described. When the freshets overcome us we have to go down into our own pockets and pay for damages ourselves.

Mr. BARKLEY. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I can not yield unless the gentleman will grant me more time. Well, I yield.

Mr. BARKLEY. Oh, well——

Mr. MOORE of Pennsylvania. Very well. Now, Mr. Chairman, apart from the fact that the pork barrel applies only to rivers and harbors and not to flood control—and, by the way, Eastern newspapers will please take notice, especially such papers as work themselves into a frenzy over a $1,000 appropriation for Mud Creek and then go to sleep over a $50,000,000 appropriation for the lower Mississippi—the question here is whether we are proceeding upon the right course. The question is, Are we going to throw $50,000,000 in a ditch or expend it wisely so that it will be of some real benefit to the people of this country? The committee itself, on page 16 of its report, sets out with some gusto a table showing that as the levees have been built and the waters of the Mississippi have contracted, the velocity of the flood has increased enormously, and therefore the damage has been greater. At the same time and in the same table the committee shows that while the floods have been increased and this farm soil from the Northern States has settled upon these southern bottoms, the value of the land has been increased correspondingly. Now, are we operating upon right lines? Our chief witness here, apart from the gentleman who wrote this eloquent report, is the colonel at the head of the Mississippi River Commission, Col. Townsend, and the Colonel has made numerous reports upon this subject. Does the Colonel say the only way to prevent floods is to contract the channel, to build these banks high all along the line?

Let us see. In an official report of October 26, 1912, and I hope I may have time to read the peroration of that report, the Colonel had something to say that has not been quoted here. It pertains to the wisdom of having the Government of the United States take over these lands that are not worth reclaiming and make them flood basins, basins into which the flood waters may flow so that they will not interfere with navigation or destroy property. It is such a report as indicates that a man who goes in upon these danger zones and builds a little home, as described by the gentleman from Mississippi a little while ago, will have notice that he had better not do it because the Government might not be in a position to spend $50,000,000 to help him out. The report suggests that the Government ought to take these lands. I quote from Col. Townsend's report:

83. The disposition of the long, narrow basins which are not worthy of protection is a matter that requires careful consideration. The wooded areas therein do not suffer materially from the overflows that occur. Whether the land should be purchased for the use of the United States or the owners compensated for the damage done by increased flood heights due to levee construction complained of, is a complicated problem, owing to the participation of the States in levee construction, which has contributed much more to the change in flood heights than the work done by the United States.

84. The land embraced in these basins is in places covered with willow and material that would be valuable for use in the work of river improvement and in such cases it is desirable that the ownership should be in the United States. In fact, the earlier reports of the commission recommended that such lands be acquired for that purpose. This becomes more and more important as the demand for material increases, and is further emphasized by the fact that a disposition is shown to secure possession of these lands by private owners in order to compel the Government to pay largely increased prices for the material needed.

85. In view of recent sales of lands in the basins and prices that have been quoted from time to time it is the opinion of the commission that an estimated value of $10 per acre may be regarded as the average price at which the lands whose protection is impracticable can be acquired. The total cost of such acquisition on that basis would amount to $6,226,210.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. Shall the Government own this land and hold it for flood basins or shall we make the Government pay for improving it for private use?

Mr. MANN. Mr. Chairman——

Mr. PARKER of New Jersey. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from New Jersey rise?

Mr. PARKER of New Jersey. I was going to ask unanimous consent for five minutes.

The CHAIRMAN. The time has been limited to 10 minutes on this paragraph.

Mr. MANN. Is there objection to the gentleman from New Jersey having five minutes?

Mr. HUMPHREYS of Mississippi. Can not the gentleman take that right after the next paragraph?

Mr. MANN. Would the gentleman just as leave proceed at the end of the next paragraph?

Mr. PARKER of New Jersey. I would rather not, because the observations I desire to submit are upon the general problem.

Mr. HUMPHREYS of Mississippi. The gentleman can certainly speak on the general problem at the end of the next paragraph as well as this.

Mr. PARKER of New Jersey. But it comes in right after the remarks made by the gentleman from Pennsylvania [Mr. MOORE].

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from New Jersey may have five minutes, not to be taken out of the time already agreed upon.

The CHAIRMAN. Is there objection to the request? [After a pause.] The Chair hears none.

Mr. PARKER of New Jersey. I thank the gentleman. Mr. Chairman, it seems to me that the time has come when a few words should be said in an effort to make plain what the Mississippi problem really is. That great river, like a big snake, moving, twisting, and curling, from Cairo through low country down to the sea, has built up from before the memory of man, on either side, its own natural system of levees. Its sediment when it rises falls first on its banks, so that the country back from the banks is much lower than the banks. That back country is swampy, and the lowest part is often known as the "back river." These back rivers extend over 300 miles, from

the Yazoo on the north to the Atchafalaya on the south, all the way to and beyond New Orleans, and it is well known that the city of New Orleans has a large, high bank between it and the river, but runs back to swamps and then to Lake Pontchartrain, which, at 8 miles distance, is some 8 feet lower than the ordinary level of the river at low water. The levee there is about 15 or 20 feet above the ordinary low water of the river, but when the river rises there was no trouble in old times, because it overflowed at some place where there was a break in the bank, perhaps through some inlet or branch stream, filled up the back rivers, covered the low country 50 miles wide, and left the plantations along its own banks safe, because there was another outlet furnished for the flood water.

These back lands were swamps and not in private hands. I think it is fair to say that none of them were taken up by private owners at the time that Louisiana was admitted to the Union, or for long afterwards. They belonged, after the cession of Louisiana, to the United States, and the United States, owning that land and finding that it was not taken into private ownership, as is stated on page 3 of the report on this bill, conveyed these back lands, the channels, and swamps of the back rivers that relieved the floods of the Mississippi to the various States, on the condition that the proceeds of any sales should be used wherever it should be found profitable to build levees and reclaim lands. Therefore, if these lands are overflowed now, it was understood that they were to be overflowed when the United States made that cession of those lands to the various States, because they always had been, necessarily, overflowed when "all the mighty floods were out."

As time went on a new policy was adopted, namely, of attempting to keep the river from going into those back channels. This was contemporaneous with the attempt to make the Mississippi River deeper, because in order to be deeper it must have a fixed channel and not be allowed to cut through; thereupon the river bed and surface rose foot by foot as time went on, until it got higher than the surrounding country, just as the Po is 16 feet above the surrounding fields of Italy. The Scheldt in Holland is the same, and rivers in Japan are 40 feet above the surrounding country. As the mouth makes out into the sea, the river rises on its upper bed.

By the levee system the river engineers tried to prevent the natural remedy for the rise of the river bed, which always had been that the river sometimes broke through its natural higher banks and went through the low ground to the sea by a shorter cut. Instead of allowing this it has been attempted for many years, first by the States that received these grants of lowlands and afterwards by the United States, to build a levee wall to confine the river and to keep the floods from flowing in their natural channels in the back lands.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. PARKER of New Jersey. I would like to have one minute more.

The CHAIRMAN. The gentleman from New Jersey asks unanimous consent to proceed for one minute more.

There was no objection.

Mr. PARKER of New Jersey. The Mississippi River in times of flood was often 50 miles wide. That water can not be passed by a channel a mile wide unless it is at least ten or fifteen times as deep, and that means a levee 100 feet high. The reason why certain smaller levees stand now is that other levees break and relieve them.

In the next room are some instructive maps of rainfall in the Mississippi Valley, for which, I think, we are indebted to the gentleman from Mississippi [Mr. HUMPHREYS]. One of them shows that in six days, January 26 to 31, 1916, there were 500,000 square miles of territory which seemingly received an average of a fifth of a foot of rain—that means 100,000 square miles of water a foot deep. If that water be confined in a channel 1 mile wide, even if it be 100 feet deep—much deeper than the Mississippi at most parts of the levees—it would occupy that channel for a thousand miles, and if that water pass through that channel at the rate, we will say, of 100 miles a day, it would take 10 days to pass; all that water fell in 6 days. It would take 10 days to pass if the river were 100 feet deep. It averages only 10 feet in many places. To hold the water 100 feet deep would need levees 100 feet high. But no such levees 100 feet high could be built. It is impossible to hold the floods to 1 mile in breadth. In the end we must rely upon the old-fashioned plan by which the river in flood sought and took its own broad course through the low grounds. Any plan that attempts anything else is fighting against the Power that sends the rain. [Applause.]

The CHAIRMAN. The time of the gentleman from New Jersey has again expired.

Mr. MANN. Mr. Chairman, this bill has been to me, in its consideration, one of the most interesting parliamentary experiences in my service in the House. For years, ever since I have been a Member of the House, the river and harbor bill has carried appropriations for this identical work on the Mississippi River, and I have heard more discussion in the last two days, during the consideration of this bill, in reference to this item than I have heard during the entire 18 years of my service in the House before on this item in the river and harbor bill.

It is an interesting parliamentary experience, because, as everybody knows, the river and harbor bill is one of the bills that are called "pork-barrel" bills. I do not use the term invidiously. It is made up primarily—or maybe it is made up secondarily—with a view to having the majority of the House favor the various items in it and stand by each other and put it through; and the question frequently has been asked whether it was not possible to consider these items in separate bills on their merits. We have one of the items that is practically one of the items in the river and harbor bill on its merits now under consideration in the House.

Some of the Members are opposed to it because they are opposed to the same item in the river and harbor bill. Others are opposed to it because they do not want to take it out of the river and harbor bill, for fear it will weaken that bill as a "pork-barrel" bill in its passage through the House.

That bill goes through by inertia. During my service in the House I do not think half a dozen amendments to the river and harbor bill were ever agreed to that did not meet the approval of the gentleman reporting the bill. Gentlemen vote consistently against putting anything in the bill that is not O. K'd by the chairman of the committee reporting the bill. They stand by each other. Those gentlemen do not want to weaken the bill. The Mississippi River improvement has a large number of people interested in it. It has carried through this House more than one river and harbor bill. I think it is wise to take out of this river and harbor "pork-barrel" bill the main item in it and let the other items see if they have strength enough to work themselves through the House on their merits. I think this bill should be considered on its merits, but not because it weakens the river and harbor bill.

I have heard very distinguished and able men in this House, the ablest men we have in the House on both sides of the Chamber, oppose this bill, but in all my service I have never heard them lift their voices against the same item in the river and harbor bill. They have always supported the item when it was in the river and harbor bill and helped to carry through their own items, which would not stand on their own bottoms. [Applause.]

I wish we could have more of these things come before the House on the individual merits of the propositions and see if we could not break up a ring, to which I confess I have been a party in the past, in the consideration of the river and harbor bill, standing by what the Committee on Rivers and Harbors did because I had a valuable item in it myself and proposed to get it through, and did. [Laughter.]

I think it would be wise if we would consider more of the propositions on their merits and less on the "pork-barrel" theory.

Mr. FESS. Will the gentleman yield?

Mr. MANN. I would, if I had time.

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment.

Mr. BARKLEY. Mr. Chairman, I understood that the time was to be extended to 11 minutes instead of 10, in order to give me a chance to ask the chairman of the committee a question.

The CHAIRMAN. Unanimous consent is asked that the gentleman from Kentucky [Mr. BARKLEY] may be permitted to proceed for one minute. Is there objection?

There was no objection.

Mr. BARKLEY. I simply desire to ask the chairman of the committee why was it provided in this paragraph that the money appropriated in this act for use along the Mississippi River between the Head of the Passes and the mouth of the Ohio River, and which may be allotted to levees, may be expended upon any part of said river between the Head of the Passes and Rock Island, Ill.? What is the object of that?

Mr. HUMPHREYS of Mississippi. That is the law now—that is, it has been in the river and harbor bills that have passed the House the last three times. It is because the flood situation on the Mississippi River begins at Rock Island.

Mr. BARKLEY. Why not provide that these appropriations may be made for the Mississippi River as far as Rock Island?

Mr. HUMPHREYS of Mississippi. Because the river above the mouth of the Ohio, for the purposes of improvement, is not under the Mississippi River Commission. It is under the Chief

of Engineers, and the improvement is of an entirely different kind, by locks and dams.

Mr. BARKLEY. This puts it under the Mississippi River Commission, so far as levees are concerned.

Mr. HUMPHREYS of Mississippi. As far as levees are concerned, but the improvements up there continue under the Chief of Engineers.

The CHAIRMAN. The question is on the amendment.

The amendment was rejected.

The Clerk read as follows:

(d) No money appropriated under authority of this act shall be expended in payment for any right of way for any levee which may be constructed in cooperation with any State or levee district under authority of this act, but all such right of way shall be provided free of cost to the United States: *Provided*, That no money paid or expense incurred by any State or levee district in securing such rights of way, or in any temporary works of emergency during an impending flood, or for the maintenance of any levee line, shall be computed as a part of the contribution of such State or levee district toward the construction or repair of any levee within the meaning of paragraph (b) of this section.

Mr. MOORE of Pennsylvania. Mr. Chairman——

Mr. HUMPHREYS of Mississippi. May I ask, has the gentleman an amendment to offer to this?

Mr. MOORE of Pennsylvania. No; I am simply going to move to strike out the last word.

Mr. HUMPHREYS of Mississippi. Does the gentleman from Washington [Mr. HUMPHREY] want any time?

Mr. HUMPHREY of Washington. I want five minutes.

Mr. HUMPHREYS of Mississippi. Not on an amendment?

Mr. HUMPHREY of Washington. No; on a motion to strike out the last word.

Mr. HUMPHREYS of Mississippi. I ask unanimous consent that debate on this paragraph and all amendments thereto close in 15 minutes. That will accommodate the two gentlemen who desire time.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that debate on this paragraph and all amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, following the address of the gentleman from Illinois [Mr. MANN], who approved of segregating the flood-control proposition on the Mississippi River from the river and harbor bill, I wish to quote from the very able report of the Committee on Flood Control, page 9.

After announcing that the Committee on Flood Control is composed of laymen, and admitting that since the organization of the Mississippi River Commission 65 engineers of the Government had been connected with it, a very strong body of men who have formulated plans which do not seem to have been entirely successful up to date, the committee comes bluntly to the point at issue. It says:

The question thus confronted was greatly simplified for the committee by the fact that Congress had already (March 3, 1881, and September 15, 1890) adopted the project—

That is to say, the old project of the Mississippi River Commission—

And during the past 35 years—

It is no new thing, you will observe—the Rivers and Harbors Committee was mighty fair to the Mississippi River Commission during all that time—

And during the past 35 years had appropriated toward its prosecution many millions of dollars.

The Flood Control Committee is very modest in the statement of the fact. The actual amount appropriated during that time for the portion of the river between the Head of the Passes and the mouth of the Ohio River was $87,000,000. But the committee continues:

The question, therefore, which demanded an answer from the committee was not whether the United States should be embarked upon some new sea of Federal activity and another channel opened up into which—

Not the waters of the Mississippi, mark you, but—

the funds of the Federal Treasury might flow, but was rather whether an adopted project which had tarried so long upon the legislative stage should now be abandoned outright or the old and costly policy of meager and inadequate annual appropriations terminated by an order to the engineers to go in and complete the job.

That was the idea. The Flood Control Committee could not wait any longer for river and harbor appropriations of six or eight million dollars per annum. The process was too slow. So the plan was to cut loose from the River and Harbor Committee, form a Flood Control Committee, come out and tell of the devastation, the loss of life, and all that sort of thing, and go in for $45,000,000 "to end the job." It is natural that the gentleman from Illinois should approve of the proposition. He believes in "the short cut" to appropriations on the Mississippi.

Now, the whole project is to reclaim 16,000,000 acres of land, a part of which, according to the Army engineers, should be owned by the Government to store up the flood waters. Sixteen million acres of ground is to be reclaimed. Estimates vary as to its value; gentlemen differ as to what it is worth, they differ as to whether it belongs to the small farmer or to the land speculator. We have not much information from the committee. But 16,000,000 acres is what we are to reclaim——

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. I ask unanimous consent to proceed for three minutes.

Mr. HUMPHREYS of Mississippi. I shall have to object, because we have agreed on a limit of time.

Mr. LA FOLLETTE. Mr. Chairman, this bill is one of great importance. I was over at my office a little while ago and I received a letter on the subject and a few clippings. Among others there was a clipping from the News Scimitar, Memphis, Tenn., down on the Mississippi—Memphis under the hill. I will read a part of it and put it all in the RECORD. It is as follows:

[From the News Scimitar, Memphis, Tenn., Jan. 12, 1914.]

THE RANSDELL-HUMPHREYS BILL SHOULD BE ENTITLED "A BILL TO DESTROY THE NAVIGABILITY OF THE MISSISSIPPI RIVER AND TO EVENTUALLY MAKE IT IMPOSSIBLE TO PROTECT THE VALLEY FROM DEVASTATION BY FLOODS."

RIVER REGULATION AND FLOOD CONTROL.

The argument advanced against the pending Newlands bill is the old argument that it can not be passed. This argument has been used with great effect against many meritorious measures, but it has been demolished so often that it should be abandoned. At the great mass meeting held in New Orleans on November 29, the then Senator-elect, BROUSSARD, dealt it a death blow when he declared with much earnestness:

"No man has a right to say that a bill can not be passed into which has been written the performance of the demands and a fulfillment of the pledges of the Democratic platform in the last campaign, on which President Wilson and a majority of both Houses of Congress were elected to office."

The consensus of opinion among experts is that the fundamental defect of the Ransdell-Humphreys bill is that, although it professes to be in aid of navigation, it provides for large expenditure for levees, which increase the rapidity and total volume of the caving of the banks into the river.

The Chief of Engineers reported to the Secretary of War that until the caving of banks into the Mississippi below St. Louis can be stopped it is practically hopeless to expect any improvement of low-water conditions in the river. In other words, the stream can not be continued navigable.

It is estimated that there are 749 miles of caving banks on the lower Mississippi, from which 9 acres in area by 66 feet deep for each mile is thrown in the stream, which in 50 years would mean half a million acres of land to a depth of 66 feet tumbled in to obstruct navigation.

Col. Townsend is careful enough not to say that the bed of the river is not rising, a fact which everyone familiar with the question knows. He would go no further than stating that the investigations of the Mississippi River had shown "not a deepening but an enlargement of the section," which can be nothing more nor less than a shallowing of the river by the raising of its bed.

It is claimed by those high in authority that the Ransdell-Humphreys bill should be entitled:

"A bill to destroy the navigability of the Mississippi River and to eventually make it impossible to protect the valley from devastation by floods."

This is just what the railroads want and have been working for so successfully, and this is why they are behind the levees-only people, who are making so much noise, but which is "all cry and little wool." The more the people investigate the matter the more they see the futility of patchwork and mud pies. Those who have been forced to study the question because it has been brought home to them, like Mayor Reubenstein, of Stockton, Cal., who has had experience in the San Joaquin Valley, know something about flood control. In replying to a communication from Secretary Fox, of the Mississippi River Levee Association, Mayor Reubenstein exposes the fallacies contained in the Ransdell-Humphreys bill, and states:

"Fortunately for our country a plan has been submitted that is sufficiently comprehensive to insure an orderly start on this great work and with ample means for its successful completion."

In this he is referring to the pending Newlands river-regulation bill, and he asks his correspondent to give it thorough consideration in the hope that he may see the error of his present way.

—

[Editorial from Duluth News-Tribune.]

THE LESSON OF THE FLOODS.

There is a man down in New Orleans who, as he sees the horrible devastation from the waters of the Ohio River and its feeders, can say, "I told you so." He is a man of vision, of ideals, of endless enthusiasm and persistence, who for years has preached flood control.

George H. Maxwell is this man, and he has labored unceasingly to convince the public that the one way to prevent such floods is to control their sources, to hold back the surplus waters at their place of origin, so that torrents would not sweep out dams, letting loose reservoirs, nor pour of their own volume over embankments, levees, dikes, and lowlands.

A fund equaling the present property losses in Ohio and Indiana would, if used for headwater control, be sufficient to forever prevent a recurrence of such a flood anywhere in the Ohio Valley.

A fund similarly equaling the losses in the lower Mississippi Valley, if used in a like way, would forever prevent such floods in that valley.

But until such means of prevention are used, until the necessary investment is made for this purpose, such floods in the future are as inevitable as the succession of the seasons.

It is useless to depend on any form of local protection. Losses will be repaired, cities rebuilt, homes reestablished, fields recultivated, crops grown, cattle raised, only again to be swept away.

This will be next year maybe, not for 10 or 20 years maybe, but some time. And every year, while not the present horror, yet lesser ones with millions of dollars of property losses, will recur.

Is not this lesson enough and will not Congress at last act to supply the only possible complete prevention?

Mr. HUMPHREY of Washington. Mr. Chairman, the distinguished gentleman from Illinois [Mr. MANN] says that this is different from the river and harbor bill. Well, it is. In this bill it is proposed to put all the pork in one barrel, and after they get it in they say that nobody else shall get any. [Laughter and applause.] My friend from Pennsylvania [Mr. MOORE] seems very much agitated because he thought the bill was principally for the purpose of taking care of the Mississippi River. I wonder what he thinks the Committee on Flood Control was formed for in the beginning? There would be no mistake if he knew where the suggestion came from and what was back of it. The purpose was to take care of the Mississippi River. They were afraid that they were not getting as much from the river and harbor bill as they wanted, and did not know as they would be able to get more than their share in that bill; and so the scheme was formed, and I have never seen a finer piece of generalship since I have been a Member of this House. When the average Member of the House found out what it was, there was a combination that nobody could stand against.

Mr. TILSON. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. TILSON. Will the gentleman explain why the Sacramento Valley was taken onto the segregated process that the gentleman from Illinois referred to?

Mr. HUMPHREY of Washington. I imagine it was taken on because there was some feeling that, in order to get the Mississippi through, they had better extend a little bit, and after it was once through it could be very easily shut down on. I have been very much amused to see some of my good colleagues who think they are going to get something sometime from the Committee on Flood Control. I make the prophecy that after this bill is passed none of us will ever live to see the day that this committee will make an appropriation for another river. After you take care of the Mississippi, the rest of the rivers can take care of themselves. There is no difference whatever, as far as the Mississippi River is concerned, in regard to the flood problem than any other, except as to size. It contains no more merit and no more necessity for improving the Mississippi River in this way and taking the Government money than there is in improving any other section where there has been overflows and floods.

Mr. GALLAGHER. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. GALLAGHER. The gentleman spoke of the river and harbor bill. It might be that it was taken out of there because the river and harbor bill is not a sure thing.

Mr. HUMPHREY of Washington. If they had been getting as much or more than they wanted out of the river and harbor bill, I do not think there would have been this agitation.

The CHAIRMAN. All debate is exhausted and the Clerk will read.

The Clerk, proceeding with the reading of the bill, read as follows:

That the watercourses connected with the Mississippi River to such an extent as may be necessary to exclude the flood waters from the upper limits of any delta basin, together with the Ohio River from its mouth to the mouth of the Cache River, may, in the discretion of said commission, receive allotments for improvements now under way or hereafter to be undertaken.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word.

Mr. HUMPHREYS of Mississippi. Can we not agree on a limitation for debate? The gentleman has no amendment except to strike out the last word.

Mr. FREAR. I want to offer an amendment and have five minutes on it.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I have a committee amendment which I desire to offer, and I will ask the gentleman from Pennsylvania to defer his remarks for a moment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Add as a new paragraph, after line 2, page 4, the following——

Mr. STAFFORD. Mr. Chairman, I make a point of order. I understand the amendment now proposed is a new paragraph, whereas the gentleman from Wisconsin [Mr. FREAR] says that he wishes to offer an amendment to the paragraph which has just been read.

Mr. FREAR. That is all right.

Mr. STAFFORD. I withdraw the point of order.

The Clerk read as follows:

Add as a new paragraph, after line 2, on page 4, the following:

"Upon the completion of any levee constructed for flood control under authority of this act, said levee shall be turned over to the levee district protected thereby for maintenance thereafter."

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. This amendment having been offered, and it being a new paragraph, are we precluded from discussing the paragraph as it stands in the bill?

The CHAIRMAN. The Chair thinks not.

Mr. MOORE of Pennsylvania. Then, Mr. Chairman, may I be recognized to discuss the paragraph at this time?

Mr. HUMPHREYS of Mississippi. What is the gentleman's parliamentary inquiry?

Mr. MOORE of Pennsylvania. The gentleman introduced an amendment to the bill in the nature of a new paragraph. My inquiry is whether we are precluded from discussing the paragraph as printed in the bill.

Mr. HUMPHREYS of Mississippi. Oh, no.

Mr. MOORE of Pennsylvania. We may not revert to it if the gentleman's amendment is adopted.

Mr. HUMPHREYS of Mississippi. That question was asked me by the gentleman from Wisconsin [Mr. FREAR]. He said he had an amendment. I will ask the gentleman to just let this amendment be considered as pending.

Mr. MOORE of Pennsylvania. But this is a new paragraph.

Mr. MADDEN. I wish to ask the gentleman from Mississippi a question.

The CHAIRMAN. Does the gentleman from Mississippi yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. MADDEN. Does the language of the amendment of the gentleman from Mississippi, which provides for the turning over of these levees to the owners of the land, when constructed, mean that the private owners are in the future obliged to reconstruct them if that should be necessary?

Mr. HUMPHREYS of Mississippi. It provides that they shall maintain them.

Mr. MADDEN. Suppose it should so happen that they are required to be reconstructed?

Mr. HUMPHREYS of Mississippi. There is no requirement of that kind. They have to maintain them or they will get soaked. The theory we proceed upon is this, and I will state it to the gentleman for it does not seem to be understood by anyone who is discussing it. The levee at present is high enough as a rule. All this volume of water is carried between the levees that are there now. There has been a lot of wild talk here about this matter, but all that we are trying to do is to strengthen the levees. That is not going to raise the water any higher. This last flood was carried all of the way down the river to below Vicksburg before there was any crevasse.

Mr. MADDEN. The point I wish to make in connection with the amendment of my friend from Mississippi is this: I thought the language of the amendment ought to be broad enough to convey the idea that the owners of the land should not only be compelled, when the levee is completed, to maintain it in the future, but to reconstruct it in case it should have to be reconstructed.

Mr. HUMPHREYS of Mississippi. We could not do that. The gentleman from Illinois [Mr. CANNON] the other day asked me why it was that we had a provision of this kind in respect to the Sacramento River and not in respect to the Mississippi. I explained to the gentleman at that time why it was that it so happened and said that there was no objection to putting in a similar provision in respect to the Mississippi River, and that I would offer that amendment at the proper place. So I have just copied the Sacramento provision and have offered it and will ask that it be considered pending.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I yield to the gentleman.

Mr. STAFFORD. Has the gentleman considered the proposal as to the right of the United States to condemn some of these levees in case the engineers should determine in later years that they were in the wrong place and were impeding navigation?

Mr. HUMPHREYS of Mississippi. Oh, yes. Let me say this to the gentleman: The United States has that right now. The question of the location of the levee lines is left to the local interest for this reason: The Mississippi River Commission, as a matter of fact, agree on where the levee shall be located, and then they say to the local authorities, "You go ahead and locate it." They tell them where it should be located, and then the

State of Louisiana, for instance, or the levee board, locates it and is responsible for all of the damages which occur.

Mr. STAFFORD. My question was predicated upon the idea whether, after the location and after the transfer to the local districts for maintenance, the National Government then would have any right to have these levees removed in case they interfered with navigation.

Mr. HUMPHREYS of Mississippi. The National Government would undoubtedly. The gentleman understands that there is no river on the face of the earth that has ever been studied as has the Mississippi River. There is no difference of opinion among the engineers who have been sent by the Government to make this investigation. They have worked at it continually for 35 years and they agree with conclusion reached by the engineers that this is the way to control floods, and that the revetment, about which the gentleman, in my opinion, unfairly complained, is the only way, the sole way by which the navigability of the river can be preserved. Now, they have all agreed upon that; there is no disagreement among Government engineers on that proposition. Of course, if it should develop in years to come that they were mistaken and that these levees were obstructions to navigation, unquestionably there would be the right to relocate them or have them torn away and subject that country once again to devastation.

Mr. MOORE of Pennsylvania. Mr. Chairman——

The CHAIRMAN. The gentleman from Pennsylvania.

Mr. LENROOT. Will the gentleman yield——

Mr. MOORE of Pennsylvania. Mr. Chairman, I hope this will not be taken out of my time, and I will yield to the gentleman to ask a question if he so desires.

Mr. LENROOT. I wanted to ask the chairman at this time——

Mr. MOORE of Pennsylvania. Mr. Chairman, have I been recognized?

The CHAIRMAN. Yes; the gentleman has been recognized.

Mr. MOORE of Pennsylvania. Mr. Chairman, I shall have to insist——

Mr. HUMPHREYS of Mississippi. Can not we agree upon time?

The CHAIRMAN. The gentleman from Pennsylvania has the floor.

Mr. HUMPHREYS of Mississippi. I know, but I just wanted to ask—of course, this does not come out of his time—to see if we can not agree on debate on this section and all amendments.

Mr. BARKLEY. I want about seven minutes.

Mr. LENROOT. And I would want about three minutes to ask some questions.

Mr. HUMPHREYS of Mississippi. Can we agree that debate on this section and all amendments thereto close at 5.30?

Mr. MANN. All right.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close at 5.30.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that all debate on this section and all amendments thereto close at 5.30. Is there objection?

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I had in mind certain gentlemen who arose for recognition—the gentleman from Pennsylvania [Mr. MOORE], the gentleman from Wisconsin [Mr. FREAR], the gentleman from Iowa [Mr. GREEN], the gentleman from Washington [Mr. LA FOLLETTE], the gentleman from Wisconsin [Mr. LENROOT], the gentleman from Kentucky [Mr. BARKLEY], and I should like the last five minutes.

The CHAIRMAN. What is the agreement?

Mr. HUMPHREYS of Mississippi. That the gentlemen whose names I called be recognized, and that debate on this section and all amendments thereto close at 5.30.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that all debate on this section and all amendments thereto close at 5.30. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Chairman, when this matter came before the Committee on Rivers and Harbors the gentlemen favoring the improvement of the Mississippi usually argued for navigation. They did not care so much about discussing flood control at that time. It was the custom when they came before the committee, of which I am not and never have been and never expect to be a member, for the gentlemen to prove that what they wanted to build levees for was to protect the interests of navigation, but now, as some one said to-day, and I am not saying it invidiously, under the auspices of the Flood Control Committee, the "mask is off," gentlemen are out in the open advocating this large appropriation to protect the land, to protect land that is privately owned against the ravages of floods.

Now, I believe that we ought to do all we can to improve the Mississippi, and I have voted when the river and harbor bill was up to help it along, although I have not always been satisfied that the methods pursued were the best. Our experience in the East has proven, in some instances, at least, that if you contract the flow of a stream and increase the rapidity of the flow, the danger of flood increases. Where we build bridges or otherwise impede the flow of the water we add to the possibility of flood. The Mississippi is not so vastly different from other streams in this respect. But while we all agree that we would like to extend measures of relief to the Mississippi, we must not forget that, under the auspices of the good old Committee on Rivers and Harbors, the Mississippi River got $87,000,000 from the Head of the Passes to the mouth of the Ohio, and that as a whole the Committee on Rivers and Harbors saw to it that the river was provided with $168,000,000, and that now, because it is too slow a process, the Mississippi River breaks away from its old associations and comes in under the new system, stealing a march upon other worthy rivers, and seeks to obtain $45,000,000 at one time, by a short and sure cut, in order to protect 16,000,000 acres of land.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Pennsylvania yield to the gentleman from Missouri?

Mr. MOORE of Pennsylvania. No; I can not yield. Sixteen million acres of land! That looks like a large area. But, as I have stated, there are other sections of the country that need protection against flood, and that must be postponed if this bill with its large appropriations goes through. For example, take the State of Virginia. See where it stands. How much land has that State awaiting the hand of the tiller to-day? Valuable land that does not need reclamation. The total amount of land area in Virginia is upward of 25,000,000 acres, of which only four million and odd acres are under cultivation at the present time. That leaves for improvement and cultivation in the one single State of Virginia 21,500,000 acres, a great deal more than you have here under consideration in these various States which you picture so graphically upon the map and upon which you want to spend this additional $45,000,000. To-day there is uncultivated and awaiting the hand of the tiller in Virginia alone nearly 10,000,000 acres, more than half of all that you propose to reclaim by the expenditure of this $45,000,000 appropriation along the Mississippi Valley. Apparently Virginia must wait for her improvements until you get through.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. FREAR. Mr. Chairman, I wish to offer an amendment to strike out all after the enacting clause and substitute the waterway bill that I have. I want to read but one section, by unanimous consent, if I may, because this has a direct bearing upon the proposition that is under consideration.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. GARRETT. Of course, it is understood that points of order are reserved?

Mr. FREAR. Yes; I understand that. That is why I do not want to read it all. I will read the paragraph commencing page 4, line 22, and ending with line 10 of page 5. I read:

The commission shall make a full investigation into all work now being performed by the Mississippi River Commission, the amount of money heretofore expended on such river, character and permanency of work performed, and reclamation interests now being served if there be any, a full statement of contributions by public or private interests toward said work, together with a comprehensive and intelligible report of the probable cost of the present plans of levee construction or other river improvement now being undertaken, the percentage of project completed, and this commission's recommendation thereon. Such Mississippi River report shall be separate and distinct from reports on other projects now under improvement by the Federal Government.

Following is the entire amendment offered by Mr. FREAR:

That a commission is hereby created and established, to be known as the national waterway commission, hereafter referred to as the commission, which shall be composed of five commissioners, who shall be appointed by the President, by and with the advice and consent of the Senate. Not more than three of the commissioners shall be members of the same political party. The first commissioners appointed shall continue in office for terms of three, four, five, six, and seven years, respectively, from the date of the taking effect of this act, the term of each to be designated by the President, but their successors shall be appointed for terms of seven years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the commissioner whom he shall succeed. The commission shall choose a chairman from its own membership. No commissioner shall engage in any other business, vocation, or employment. Any commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. A vacancy in the commission shall not

impair the right of the remaining commissioners to exercise all the powers of the commission.

SEC. 2. That each commissioner shall receive an annual salary of $10,000, payable in the same manner as the judges of the courts of the United States. The commission shall appoint a secretary, who shall receive an annual salary of $5,000, payable in like manner. The commission shall have the authority to employ and fix the compensation of civil engineers, clerks, and other employees as it may from time to time find necessary for the proper performance of its duties and as may be from time to time appropriated by Congress, and in making appointments for continuous service the commission, so far as practicable, shall select its employees from the classified service.

All property of the United States in the hands or under the control of Army engineers or other officials or of private individuals or public contractors, including dredges, steamboats, barges, yards, and other property used in the improvement of public waterways, shall be placed under the jurisdiction and authority of the commission.

SEC. 3. That the Secretary of War may, if practicable, detail such Army engineers as are requested by the commission to assist in organizing and establishing a comprehensive system of waterway improvement, providing that such details of engineers shall not be made to the detriment of their military duties.

SEC. 4. That the commission shall have the authority and it shall be its duty to make an investigation of all waterway projects now constructed in whole or in part by Federal aid. The commission shall prepare a complete and succinct statement, by years, of the amount heretofore appropriated for each project, the estimated amount required to complete such project, a report of the commerce now served and to be served, the character of such commerce given by separate items so far as can be furnished, the source of information, the interests to be served, the kind of water craft used, and such other information as may be useful in determining the public use and value of the project. The commission shall also furnish Congress, at the earliest practicable date, information concerning all harbors and waterways now improved or being improved in whole or in part by Government aid, showing the amount of commerce, character of terminals or landings, ownership thereof, and, so far as practicable, ownership of regular lines of craft used thereon; and the commission shall also report its recommendations for the finishing of the projects now being constructed or modification of existing plans or abandonment of work on any project, together with findings upon which such recommendations are based.

The commission shall further ascertain and report what projects are now being improved for purposes other than navigation, and if for power development, a full statement of interests concerned, officers and stockholders, public use to be served, if any, private or public contribution toward expense of construction, and the commission's recommendations thereon. Said commission shall further ascertain and report what projects are now being carried on in whole or in part for land-reclamation purposes, the character of such project, amount of lands to be recovered, estimated value of such lands, ownership thereof, and contributions now being made by beneficiaries toward such expenditures, together with the commission's recommendations.

The commission shall make a full investigation into all work now being performed by the Mississippi River Commission, the amount of money heretofore expended on such river, character and permanency of work performed, and reclamation interests now being served, if there be any, a full statement of contributions by public or private interests toward said work, together with a comprehensive and intelligible report of the probable cost of the present plans of levee construction or other river improvement now being undertaken, the percentage of project completed, and this commission's recommendation thereon. Such Mississippi River report shall be separate and distinct from reports on other projects now under improvement by the Federal Government.

All of such data and all other available information of a pertinent character affecting particular projects or entire waterway improvements now being conducted by the Federal Government shall be collected in convenient form and presented to Congress in installments at the earliest practicable date.

When the commission shall have reason to believe at any time that the proposed project is not for general use of the public or will not warrant further expenditures, or if contributions shall be required to be furnished before further appropriations are made or further expenditures authorized, such commission shall immediately report to Congress, with a preliminary recommendation thereon, and shall furnish a copy thereof to the United States Treasurer. That thereupon, when so recommended, the Treasurer shall withhold all funds theretofore appropriated not specifically obligated under existing contracts and shall refuse further payments until subsequent and specific action shall be had thereon by Congress.

SEC. 5. That prior to the presentation of any new waterway project appropriations the commission shall cause a careful survey of the proposed improvement, and if it shall appear such protest is to serve a public use and is feasible, the commission shall thereupon collate data showing the estimated cost thereof, commerce to be served, water craft to be used, public terminals furnished, and contributions recommended to be made by public or private interests, together with such additional data as has heretofore been specifically required to be furnished on existing projects. The commission shall thereupon transmit to the Committee on Appropriations of the House of Representatives a full report concerning such new project or projects, its recommendations thereon, and, if requested so to do, all other and further information that may be required by the Committee on Appropriations.

Whenever the commission shall determine that any waterway project is primarily for power or land-reclamation purposes or to serve special interests, the commission may recommend Government aid for such project, notwithstanding the special interests to be served, and shall prepare data showing the proportionate amount of Federal aid recommended, together with suitable restrictions as to audit and payment of funds from the Public Treasury. Such recommendation shall be presented as a proposed separate bill to the Committee on Appropriations of the House and shall not be embodied in any general waterway appropriation bill by such committee.

Whenever any new survey shall be proposed for any waterway project the commission, prior to such survey, may require data to be furnished showing the public use and prospective commerce to be served and such other information as may be desired, and a brief synopsis of such information shall be furnished to Congress by the commission to accompany any recommendations made for new surveys.

All existing waterways, new projects, and new surveys shall be classified, so far as practicable, prior to each regular session of Congress, together with estimates of appropriations required for maintenance and improvement for the ensuing two-year period, and a brief report as to each project considered shall be separately prepared and, with the commission's recommendation thereon, shall be placed in the hands of the Committee on Appropriations of the House at the beginning of each session.

Whenever the Appropriations Committee so requires, the commission shall furnish additional data concerning any project, and shall further aid the Committee on Appropriations when request so to do in the preparation of the regular river and harbor bill which shall be prepared and presented by the Committee on Appropriations of the House.

The commission shall further compile and cause to be published at the earliest practicable date for the use of Congress an intelligible, concise statement of past waterway expenditures by the Government and of amounts needed to complete all continuing projects, and shall further give estimates of future obligations to be incurred by new projects recommended for construction. The commission shall give preference in its recommendations to Congress of appropriations needed to complete the more important projects, and, so far as practicable, shall enter upon a program looking toward the early completion of such projects.

The commission shall make a thorough investigation of reasons for loss of river traffic and shall make recommendations for the reestablishment of such traffic. It shall ascertain and determine the most available craft for river use, and, as soon as practicable, shall prepare plans and build experimental craft for such purpose.

Whenever reason therefor shall appear the commission may fix reasonable freight rates on all interstate water-borne traffic by common carrier and upon all such traffic on navigable waters wholly within the State, subject, however, to the jurisdiction now conferred by law on the Interstate Commerce Commission to fix maximum joint rates between and over rail and water lines.

The commission shall determine the reasonableness of wharfage or water-terminal charges, whether such terminals are owned by private persons or municipalities, and all river and harbor improvements, including terminal facilities, shall be under the supervision and control of the commission.

Whenever the commission shall determine that unprofitable railway freight tariffs are maintained in any given case in order to prevent waterway competition, it shall be the duty of the commission to make a report thereon in duplicate to the Interstate Commerce Commission and to Congress, with recommendations that Congress give power, if need be, to the Interstate Commerce Commission for fixing minimum railway rates.

The commission shall at the earliest practicable date adopt an intelligent system of natural waterway improvement and shall perform such other and further duties as may present themselves from time to time.

Whenever it shall be desirable to secure sworn testimony from any witness or witnesses relating to any project or to navigation generally, or whenever the commission shall have reason to believe that private interests are secretly or improperly seeking to influence the commission or to force the passage of any private or public waterway measure through Congress, the commission may cause a hearing or summary investigation to be held, and for that purpose may issue summons, subpœnas, or other writs in the same manner and under the same procedure as is more specifically set forth in the act to regulate commerce approved February 4, 1887, and the amendments thereto, which portions of such act relating to procedure, so far as applicable, are made a part of this act, and may bring before such commission all parties believed to be informed concerning the facts or interested in the passage of such measure. A complete record shall be preserved of the testimony taken at such hearing and a certified transcript thereof shall be transmitted immediately to the Committee on Appropriations.

SEC. 6. That all unexpended balances to the credit of any project not specifically obligated under existing contracts shall from the date of the passage of this act be transferred by the Treasurer to the general fund, and all vouchers thereafter paid by the Treasurer shall be upon order of the national waterway commission.

SEC. 7. That the sum of $500,000, or so much thereof as may be necessary, be, and the same hereby is, appropriated, out of any money in the Treasury, to carry out the provisions of this act.

Mr. FREAR. I ask unanimous consent to waive the reading of the rest of it. I realize that a point of order may be raised to it. But I wanted to offer this, in answer to several gentlemen who have asked what recommendation can be offered as a substitute for what is proposed in this bill. This would permit an investigation by a high-class commission, as is provided in this case, the highest class commission that can be conceived of, I take it, to make a thorough investigation. I have presented in the RECORD of Monday many complaints made by people of high standing throughout the Mississippi Valley, men of high character, newspapers, and citizens generally, who say that the levee plan is not a successful one; that it is not only dangerous in character, but a standing menace to the people of the valley; and that it will have to be abandoned in a very short time.

If that is so, we ought not to proceed hastily, and this commission bill that I introduced some time ago carries with it this particular provision, whereby an investigation shall be made of this whole subject—the Mississippi River flood problem—a careful investigation, not a two months' committee investigation. I realize that this committee has acted upon information that must come to it from Army engineers, and——

Mr. CLARK of Missouri. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Certainly.

Mr. CLARK of Missouri. I would like to ask the gentleman if this same subject has not been investigated off and on for the lifetime of a generation?

Mr. FREAR. I presume that is true, Mr. Speaker.

Mr. CLARK of Missouri. What is the sense, then, of investigating it any more?

Mr. FREAR. Because of the complaints that have been made, and repeatedly made, by the people who are more affected

than anybody else in the district, those who live in the valley who say that the present plan is not a successful one, and that it has been practically turned over to Army engineers, that floods are caused by levees and much property destroyed. Now, the purpose is to extend it beyond the usual scope of Army engineers, and select a high-class commission of the ablest men we can find in the country, men like Gen. Goethals, and distinguished men of that character, who will ascertain whether or not this levee plan is a success, or will ever be a success, before we spend $45,000,000 or more, as provided in this bill.

Mr. CLARK of Missouri. What kind of an investigation would you undertake to find out whether the levee system is correct or not? That is the whole thing involved here. The rest of it is mere detail.

Mr. FREAR. I say many people in the valley who have lost their property because of building of narrow levees that break in flood time, high-class people who are vitally interested in this matter and whose property is at stake, they have a right to protection; men who have made a study of this problem say reclamation of lands is directly antagonistic to flood control for reasons I have stated. We ought to have the best thought in the country. Army engineers have been experimenting for years and changing plans and estimates. We should know from the best men in the country what course to pursue.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. FREAR. I would like to have two minutes more in order to answer the Speaker.

Mr. HUMPHREYS of Mississippi. We have not the time.

Mr. FREAR. I realize that the amendment may be subject to the point of order.

Mr. GARRETT. I make the point of order.

Mr. STAFFORD. Mr. Chairman, it has never been reported.

Mr. GARRETT. That is very true, but by unanimous consent it was agreed that it might be printed without being read.

Mr. STAFFORD. Unanimous consent has never been granted.

Mr. GARRETT. I so understood.

Mr. STAFFORD. It was never submitted.

Mr. FREAR. As far as I am concerned, I am perfectly willing to have it appear in the RECORD without being read. It will appear in the RECORD, I assume.

Mr. GARRETT. Yes.

The CHAIRMAN. The point of order is sustained. Unanimous consent is asked that the amendment be printed in the RECORD without reading. Is there objection?

There was no objection.

[The amendment appears on pages 7785 and 7786.]

Mr. WILSON of Louisiana. Mr. Chairman, in reply to the statement of the gentleman from Wisconsin [Mr. FREAR], which has been repeatedly made, that the people of the lower Mississippi Valley are divided on this question, I desire to read into the RECORD a telegram showing a resolution just passed by the General Assembly of Louisiana:

BATON ROUGE, LA., *May 10, 1916.*

HON. BEN. G. HUMPHREYS,
*Washington, D. C.:*

The General Assembly of Louisiana has passed the following resolution:

"Whereas the interests of this State imperatively require the adoption by the Congress of the bill now pending in the House of Representatives, known as the flood-control bill: Be it

"*Resolved by the house of representatives (the senate concurring)*, That the Congress of the United States be informed that it is the desire and hope of this legislature that the said bill be passed without delay in order that the relief contemplated thereby may be immediately available for the people of this State and of the Mississippi Valley: Be it further

"*Resolved*, That the contents of this resolution be telegraphed to the chairmen of the proper committees of the Senate and the House of Representatives of the United States."

O. H. SIMPSON,
*Secretary of the Senate.*
THOS. W. CAMPBELL,
*Clerk, House of Representatives.*

I desire to say that just a few days ago the Association of Commerce of the city of New Orleans passed a resolution indorsing this bill, and that every daily newspaper in the city of New Orleans has editorially indorsed the provisions and recommended the passage of the bill. I make that statement relative to the newspapers, because a statement printed back in 1913 has been circulated among the Members of the House to make it appear that the New Orleans Item was opposing the bill. But that is not true, because since this bill has been before the House that newspaper has editorially indorsed it and recommended its passage.

I yield back the remainder of my time.

Mr. LENROOT. Mr. Chairman, if I may have the attention of the chairman of the committee with reference to the paragraph that is now pending—

Upon the completion of all works for flood control herein authorized the said works shall be turned over—

And so forth, may I ask the gentleman what the present condition is, as to whether or not some of these levees are Federal property and belong to the Government?

Mr. HUMPHREYS of Mississippi. No; they are not Federal property. The title to the right of way is in the levee board.

Mr. LENROOT. What control has the Government now, or what right to exercise control over these levees has it after it has expended its money upon them?

Mr. HUMPHREYS of Mississippi. I do not understand just what the gentleman means by what control. As far as maintenance is concerned, or protection?

Mr. LENROOT. In any respect. Suppose it desired to increase the height of a levee?

Mr. HUMPHREYS of Mississippi. Undoubtedly the Government can do that. That is exactly what we expect to do under this bill. The levee lines are nearly all completed. There are very few gaps. There are only two gaps that I recall now in the line. The levees are high enough in most places. They were high enough this last year to carry that entire flood almost to Natchez on the Mississippi before there was a break. What they need is to be strengthened by work behind the levees, to make them strong, so that they will not break. For good reasons they are located by the local interests. The Mississippi River Commission prefer that they should be. They have said so to our committee that they greatly prefer to have the line located by the local interests. As a matter of fact, they get together and determine where they will put the line. The commission, of course, can finally say where the line must be, because the commission have the money, and they say, "We will give you the money, but you must build the levee here." They have always done that. There has never been any conflict between them.

Mr. LENROOT. Are there any levees upon the lower Mississippi that are now Government property?

Mr. HUMPHREYS of Mississippi. Yes; there are several levees. They do not protect any property from overflow, however. For instance, here is a sharp bend in the river that runs up 4 or 5 miles, that has no levees on it at all.

Now, in order to prevent the river from flowing over the bend and cutting across and thereby destroying the navigability—it is a great calamity when we have a cut-off in a bend—the Mississippi River Commission will build a dike which comes out from the main line of levees running right straight down the middle of the bend. It does not protect anybody from overflow, but it is a Government levee, and the Government maintains it and owns the right of way.

Mr. LENROOT. I am entirely in accord and sympathy with the gentleman's amendment, but I want to ask him, in order to safeguard any rights the Government has, would he have any objection to adding this to his amendment, "But for all other purposes the United States shall retain such control over the same as it may have a right to exercise after completion"?

Mr. HUMPHREYS of Mississippi. I do not know that I would. I will look it over and see.

Mr. LENROOT. I will reserve the balance of my time.

Mr. GREEN of Iowa. Mr. Chairman, it is with considerable hesitation that I rise to oppose the bill which has been unanimously reported by the committee, headed by the distinguished gentleman from Mississippi, in whose ability and integrity of purpose the whole House has so much confidence. But I think it is plain why this committee was appointed, and it has well carried out the purpose of its appointment. No matter what might have been the appetite of any gentleman in this House for pork, if $50,000,000 more had been added to the river and harbor bill, of which $45,000,000 was to be expended on the Mississippi River, there would not have been 50 gentlemen in the House who could have swallowed it.

It is quite apparent that this committee was created for the purpose of adding an enormous amount for the reclamation of lands in the vicinity of the Mississippi River which could not have been obtained if this item had been left in any form in the river and harbor bill.

Mr. MEEKER. Will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. MEEKER. Does the gentleman mean to say that the purpose of this committee, advocated by the Speaker of this House and supported by him, was for the purpose of a reclamation proposition in the Mississippi River? Does he want that to stay in the RECORD as his opinion?

Mr. GREEN of Iowa. I have heard nobody deny it.

Mr. MEEKER. Nobody has been foolish enough to make such a statement until right now. [Laughter.]

Mr. GREEN of Iowa. I am obliged to the gentleman from Missouri for his courtesy and fairness, which is of the kind which is characteristic of him. I think I fully understand what I am talking about, and I make the same statement that has been made fifty times since this discussion started and nobody has denied it. It is a reclamation project pure and simple, and everybody knows it and understands it as well as it could be understood if it had been engraven in letters 50 feet high.

Mr. CLARK of Missouri. I would like to ask the gentleman from Iowa a question.

Mr. GREEN of Iowa. I will yield with pleasure.

Mr. CLARK of Missouri. I would like to ask the gentleman if he does not know that they have established a boat line to run from Kansas City to St. Louis and that at all these towns on the Missouri and Mississippi they are fixing river terminals, and that they are raising $2,000,000 in St. Louis to put a line of boats on from St. Louis down to New Orleans?

Mr. GREEN of Iowa. I have so understood.

Mr. CLARK of Missouri. We are trying to get navigation started on the river again and we intend to do it. [Applause.]

Mr. GREEN of Iowa. Let me say, in all deference to the distinguished gentleman, that you will never get navigation through any such project as this.

Mr. CLARK of Missouri. What kind of a project can you get navigation through? That is what I want to find out.

Mr. GREEN of Iowa. If the gentleman from Missouri will let me proceed I will tell him. The only project that will help navigation is a revetment project, which the engineers of the War Department have reported will cost upward of $158,000,000. I have had some experience on the Missouri River. I have had none on the Mississippi River, but I have seen acre after acre of a whole farm swept away into the Missouri River. I understand the same thing occurs along the Mississippi River.

Mr. CLARK of Missouri. I would like to ask the gentleman if reveting the banks is not exactly the same process as building a levee, if it has not the same effect?

Mr. GREEN of Iowa. The distinguished gentleman surely does not think that revetment is a similar process to building a levee? It is altogether different.

Mr. CLARK of Missouri. Let me ask the gentleman one question more. Does it not aid navigation just as much to keep a ton of débris from falling into the river as it does to dig it out after it has fallen in? [Laughter and applause.]

Mr. GREEN of Iowa. A great deal more, and that is the reason why, for navigation purposes, it is necessary to put in revetment instead of building levees, which sooner or later are bound to tumble into the river.

Revetment does not prevent floods; it simply secures the channel of the river and prevents the caving of the banks. It does not raise the natural banks of the river, but it prevents the main channel being one month in one place and the next month a mile, or sometimes 10 miles, away, with perhaps no water at all in the old channel.

Mr. BARKLEY. Mr. Chairman, it is a source of regret to me that the distinguished gentleman from Pennsylvania [Mr. MOORE] and the distinguished gentleman from Washington [Mr. HUMPHREY], who in the few speeches they have made since I have been here during the last four years have always appeared to be so broadly national in their views, have become so narrowly provincial when a proposition is under consideration which by all of the political parties of the Nation has been declared to be a national problem; and if it were not for the fact that we all recognize the disinterested qualities of their statesmanship we might have the right to assume that the reason they are against this project is because their feet have been eliminated from the trough of pork-barrel appropriations against which they proclaim now so loudly, but in which they have participated so freely in bills heretofore. [Applause.]

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. BARKLEY. For just a question.

Mr. MOORE of Pennsylvania. The gentleman's feet are still in the river and harbor appropriation bill, are they not?

Mr. BARKLEY. They are not only in the river and harbor bill——

Mr. MOORE of Pennsylvania. But they are also in this, so he has it coming and going.

Mr. BARKLEY. If my feet are in this bill and in the river and harbor bill, that is not the reason why I am in favor of the bill; but from the gentleman's remarks, judged by his conduct, he opposes this bill because of the fact that his feet are not in it as well as in the river and harbor bill. In the Mississippi Valley our feet are in the trough of its great flood waters, and we are by this bill trying to get them out onto dry land.

Mr. Chairman, this is not, as the gentleman from Iowa [Mr. GREEN] says, purely a reclamation project, when the water of more than 31 States and part of the Dominion of Canada sweeps down the Mississippi River and destroys the property and drives people out of their homes, and in many cases causes them to lose their lives. It is not a reclamation project when we undertake to pass legislation to protect them from these floods. [Applause.] I am sorry that my good friends, these two distinguished gentlemen, these deputy Republican leaders, the gentleman from Pennsylvania [Mr. MOORE] and the gentleman from Washington [Mr. HUMPHREY], see fit so vociferously to oppose this project, which everyone recognizes as not a matter of charity, not a matter simply of reclaiming waste lands, but a matter of justice in undertaking to protect the people of the Mississippi Valley from the flood waters of 31 States. I happen to live in the Mississippi Valley. I have swum in the waters of that stream. There is no stream in the United States, none in the world, which is so treacherous and so damaging and so dangerous as the Mississippi River, especially when the floods come down from all of these States. I have seen poor people, tenants, landowners, farmers, laboring men of every description driven out of their homes onto the hills, and I have seen refugees come in from one State to another in order to receive protection and food and to protect their lives or property; and because we want to try to protect these people and their property, which they have spent a lifetime in accumulating, the gentleman from Iowa [Mr. GREEN] and others rise up and say it is a reclamation project and unworthy of attention. Heretofore the Mississippi River Commission has taken the position that it could not expend the funds allotted to it in the river and harbor bill for flood control, but could only use them in aid of navigation. In this bill we give them authority to expend these funds to protect life and property from the great floods of the Mississippi Valley, and I hope the bill will speedily become a law.

Mr. LA FOLLETTE. Mr. Chairman, there has been $168,000,000 or $170,000,000 already spent for flood control on the Mississippi River, and it has been expended in about the same way that this will be expended, and as yet you have not controlled any floods, and the navigation is less now that it was 25 years ago.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, will the gentleman yield for a correction?

Mr. LA FOLLETTE. Yes.

Mr. HUMPHREYS of Mississippi. I am sure the gentleman does not want to misstate the facts. Of that $168,000,000, $29,000,000 has been spent for levees and $43,000,000 for revetments, and the rest of it was spent from the headwaters of the Mississippi all the way down solely in the interest of navigation, including what has been expended in building jetties at the mouth of the river.

Mr. LA FOLLETTE. That is all right, but it has been spent on the Mississippi River to improve navigation and for flood control.

Mr. HUMPHREYS of Mississippi. Not for flood control.

Mr. LA FOLLETTE. The gentleman confesses in his own figures that half of it has gone into levees and revetments.

Mr. HUMPHREYS of Mississippi. Yes; but revetment is in behalf of navigation.

Mr. LA FOLLETTE. What I want to say is this: I am in favor of flood control, but I think under this bill that flood control is a misnomer. You leave the waters at the head of these streams to go down uninterrupted, and you narrow up your channel below, and consequently in time the water tears out the levees and your banks and floods the country; and you will be coming back to Congress for forty or fifty million dollars more over and over again, and it will be that way for the next hundred years if you can get the people to put up the money. If you had expended one-half of the money at the head of these streams, taking care of the floods at their inception, you would not only have prevented the damage below and the water could have been used, especially on the west side of the Mississippi River, to take care of thousands, hundreds of thousands of acres of semiarid and arid lands, and that on the east side to gradually be turned into the streams for the improvement of navigation during the low-water period, also preventing stagnation, thereby contributing to the comfort and health of those living in proximity to the streams.

It is not the expenditure of money that I complain of; it is the unwise way of expending it, trying to control floods at the lower end of a stream instead of starting where the floods originate. I think that the principle is wrong, not that I find any fault with the intent. I think that the intent is all right, but

I do not think you will make a success of this method after you have expended your $45,000,000. You will reclaim some of this land for a while, and then it will be flooded and swamps again in the future; and until some comprehensive plan is formulated and entered into to take care of the waters up at the heads of these streams you will never have any flood control.

Mr. COOPER of Wisconsin. Mr. Chairman, I only want to ask one question of the chairman of the committee. The gentleman from Washington [Mr. LA FOLLETTE] just stated that the proper way to control these floods was to begin at the head of these streams. Now, as I understand, from what I have read and heard on the floor here, this last great flood in the Mississippi Valley did not have its origin at the headwaters of these streams, did it?

Mr. HUMPHREYS of Mississippi. No; neither did the flood of 1912 nor the two floods of 1913 nor the flood of 1916. If there had been a dam that could not have been passed constructed at Pittsburgh and another one at St. Paul and another at Keokuk, it would not have affected the height of the flood in the lower Mississippi 6 inches.

Mr. COOPER of Wisconsin. That is what I have heard.

Mr. HUMPHREYS of Mississippi. This theory about the reservoirs is a beautiful dream, and it is one that appeals to the imagination of men and commends itself to their favor until they are charged with the responsible duty which devolves upon this committee of actually studying the question. Now, the engineers are hard-headed fellows. They have to take pen *and paper in* hand and figure. They have to estimate, they have to investigate this subject just as thoroughly as they can. This question of reservoirs is not new. It was urged most strongly in Congress in 1850 when Congress finally set great engineers to work, a commission known as the Humphreys-Abbott Commission—not a relative of mine, I am sorry to say; a very distinguished man, however—another distinguished member of the family. [Laughter.] Now, those engineers made a most thorough investigation of the river for 10 years. Their report is the most comprehensive report that has ever been made upon any river on the face of this earth. They went very thoroughly into this question of reservoirs, and they demonstrated the inadequacy of reservoirs.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. In a moment I will yield. The Civil War came on about that time, and after the Civil War, in 1875, we appointed another commission of engineers, known as the Warren Commission, headed by Gen. Warren, United States Army Engineers. They made another very elaborate investigation into this subject. They reported again the inadequacy of reservoirs. In 1879 we created the Mississippi River Commission, just such a commission as the gentleman from Wisconsin [Mr. FREAR] wants now to create. But he does not believe in Army engineers, just as some gentlemen then did not believe in them, but I was struck by the remark of the gentleman from Wisconsin [Mr. FREAR] when he said that he did not want these Army engineers, but he wanted some distinguished engineer like Col. Goethals. He was the only man he mentioned, and he is an Army engineer.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. HUMPHREYS of Mississippi. I will.

Mr. COOPER of Wisconsin. The gentleman will recall a quotation, which I read here during a recent debate, from former Senator Burton, when he was a Member of the House, when he said that of all men to make this investigation, if there was a commission to be appointed, it should be a commission of Army engineers, because they were disinterested absolutely and were much less amenable or susceptible to political influence than any other board possible to be selected.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Just in a second, and I will yield to the gentleman. They created then the Mississippi River Commission. I would like to get this history straight before I yield. Upon that they put three Army engineers, two engineers from civil life, one engineer from the Coast and Geodetic Survey, and one civilian, not an engineer. That particular civilian in this instance was Benjamin Harrison, afterwards President of the United States.

That commission has gone into everything connected with reservoirs, and issued reports which treat of rivers and the sources of streams, and studied the whole question for 35 years. That commission got out about 35 or 50 volumes of reports. That commission of Army and civilian engineers, with always one distinguished citizen not an engineer, are unanimous in the opinion that the only way to control the floods of the lower Mississippi River is by building levees along the banks and protecting those banks from caving.

There is but one place—and the map out there shows it—where a reservoir could be constructed, and that is near the mouth of the Ohio River, because sometimes the rain falls here and sometimes here, always revolving upon the mouth of the Ohio River as a pivot. You would have to put reservoirs in three or four different places unless you put it at this one pivotal place, where all this water accumulates.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. HUMPHREYS of Mississippi. I would like to be recognized for five minutes in my own right. I am sorry to have taken the gentleman's time.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. HUMPHREYS of Mississippi. They reported that it would require a reservoir so large that the amount of dirt excavated for it would build levees 150 feet high 7,000 miles long. [Laughter.]

Now, when gentlemen go into the details of this and study it as I have studied it for 13 years—and I have thought of it and thought of practically nothing else for 13 years—they will realize that my people are not confronted with a theory, but are confronted with an actual condition. We would not put $90,000,000 in levees simply for the pleasure of spending that money. Our lives and property are at stake. Two hundred and seventy-two thousand people were fed by the War Department in the flood of 1912 at one time. Those people are in earnest about it. They do not want theories. They know there is only one salvation, and that is to build levees along the banks. That is the knowledge that has come from the experience of all of the history of the world. In Egypt, from the time of the twelfth dynasty down to this good day, it has been the only way in which the Nile Valley has been fully protected from floods. If the gentlemen want to go up into the sources of the stream, the only estimate we have ever had on the Ohio watershed, to control the waters there, is that it would cost from $500,000,000 to $1,000,000,000. Think of it! They could not come within $500,000,000 of the cost of it.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman permit a question right there?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. COOPER of Wisconsin. I have read and have been told also within the last few days that somebody who ought to know said it would cost $100,000,000 to make even the surveys.

Mr. HUMPHREYS of Mississippi. It would cost $190,000,000 to make the surveys contemplated in one very elaborate bill that has been advocated here. It would cost $10,000,000 on the Ohio alone to make the survey.

Mr. LA FOLLETTE. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. LA FOLLETTE. Does not the gentleman think the time spent on that Ohio dam and figuring on it was simply time wasted? They could not build it without flooding much land up the Ohio River if they were going to put it as high as you say and excavate as much dirt as you speak of.

Mr. HUMPHREYS of Mississippi. The reservoir was to hold the water.

Mr. LA FOLLETTE. I know; but does not the gentleman think that if the Government had put in reservoirs on the different streams and had taken care of the spring freshets as much as possible, and then the people of the South had put in the millions and millions of dollars that they have put in to reclaim and protect their lands, the two together would do more than could be done by simply putting in levees and letting the water come down untrammeled and tear down the levees that had been constructed?

Mr. HUMPHREYS of Mississippi. I would think I was a very bold man, being a layman and not an expert; I should think I would have unconscionable assurance, if I were to put my opinion against the opinions of all the engineers that this Government has employed in the last 100 years and say that engineers know nothing about it, that all they have done is to study the question and figure it out.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield there?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. SMITH of Michigan. From the great study and investigation which the gentleman has made, what has he to say about constructing a levee that would be permanent, and which would resist this great flow of water?

Mr. HUMPHREYS of Mississippi. I have not the remotest doubt about it. In one levee district in my congressional dis-

trict we have built the levees high enough and strong enough to withstand any flood that has come down or that will come down the river. We have not had a crevasse in it for 19 years, and when the flood comes the people behind this levee are not concerned, except as they have a general interest in the fate that they fear is going to befall their neighbors elsewhere. That is the only way that God Almighty prevents rivers from overflowing. That is the only reason why the Hudson River does not overflow, because of the high hills and high bluffs which God built along there, a hundred or two hundred feet high, strong enough to withstand any flood that ever came down the river.

Mr. SMITH of Michigan. How long is the levee that the gentleman is speaking of now?

Mr. HUMPHREYS of Mississippi. Something more than 100 miles long; I have forgotten exactly, about 118 miles, or something like that. As I say, for 13 years this subject has been my pillar of fire by night and my pillar of cloud by day. I have studied it as I have studied nothing else; because all of my district is subject to overflow whenever the waters come down the river. It is the breath of our nostrils; and I give it as my deliberate opinion that there is one way and no other way to control these floods, and that is the way provided in this bill.

The CHAIRMAN. The time of the gentleman has expired. The question is on the committee amendment.

Mr. LENROOT. Mr. Chairman, I desire to offer an amendment to the amendment.

Mr. GARRETT. I should like to say a word about the amendment. I ask unanimous consent to proceed for two minutes.

Mr. LENROOT. I should like four minutes.

Mr. GARRETT. I ask unanimous consent that the time be extended four minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the time be extended four minutes, so that he may have two minutes, and the gentleman from Wisconsin may have two minutes. Is there objection?

There was no objection.

Mr. GARRETT. Mr. Chairman, I want to say that if the chairman of the committee insists on this amendment, of course I will not oppose it; but really it is not necessary. This is a legal question that is involved in this amendment. The adoption of this amendment will not change in any respect the legal situation that now exists. As I understand it, all that the gentleman desires is to maintain the legal situation as it now exists. I give it as my opinion, from a hasty examination, that the adoption of this amendment is not at all necessary.

Mr. LENROOT. Will the gentleman yield for a question?

Mr. GARRETT. Certainly.

Mr. LENROOT. Under the existing situation, is the Mississippi River Commission permitted to expend money for the maintenance of levees already constructed?

Mr. GARRETT. Yes; it is.

Mr. LENROOT. If it is, then, of course, this would change that situation.

Mr. GARRETT. They are permitted to expend money for maintenance, and they do it.

Mr. LENROOT. Then this should go in, should it not? We desire to relieve the Government from that maintenance.

Mr. GARRETT. I think the situation would remain the same if this amendment is not adopted.

Mr. LENROOT. If it is not adopted, the appropriations hereafter made could be used for maintenance, could they not; and if this amendment is adopted they could not be so used after completion?

Mr. HUMPHREYS of Mississippi. There would be no appropriations after the levees were completed.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I desire to say a word.

Mr. LENROOT. I yield to the gentleman one minute of my time.

Mr. HUMPHREYS of Mississippi. I do not think this amendment is at all necessary. The gentleman from Illinois [Mr. CANNON] suggested that it ought to be put in. I did not see any special objection to putting it in, but I do not think there is any occasion in the world for it, because when we complete the levees the people protected by them are bound to maintain them unless we provide the means to maintain them ourselves, and all we have to do is to say nothing; and then there is no maintenance provided by us. It occurs to me that there is no occasion for the amendment, but I do not object to it.

Mr. LENROOT. I think it would be wise to put it in, in view of the fact that they might use a portion of the appropriation for maintenance, and in that case I desire to offer an amendment to the amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Add, at the end of the paragraph, the following: "But for all other purposes the United States shall retain such control over the same as it may have the right to exercise upon such completion."

Mr. HUMPHREYS of Mississippi. There is no objection to that.

The CHAIRMAN. The question is on the amendment to the amendment.

The amendment was agreed to.

The CHAIRMAN. The question is on the committee amendment as amended.

The amendment as amended was agreed to.

By unanimous consent, leave was granted to Mr. GREEN of Iowa to extend his remarks in the RECORD.

By unanimous consent, leave was granted to Mr. BARKLEY to extend his remarks in the RECORD.

Mr. HUMPHREYS of Mississippi. Now, Mr. Chairman, let us begin the reading of the next subdivision.

The CHAIRMAN. There is an amendment pending, offered by the gentleman from Mississippi [Mr. QUIN] that has not been reported.

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry. Is that an amendment to the Mississippi River section?

The CHAIRMAN. Yes.

Mr. MOORE of Pennsylvania. Because there was an agreement that we should not go beyond that section this afternoon.

Mr. HUMPHREYS of Mississippi. That amendment has been pending all the while.

Mr. MOORE of Pennsylvania. I shall object to any reading beyond the Mississippi River paragraph this afternoon.

The CHAIRMAN. There is an amendment pending offered by the gentleman from Mississippi [Mr. QUIN], which the Clerk will report.

The Clerk read as follows:

Insert, after the second line, on page 4 of said bill, a paragraph, as follows:

"Jurisdiction is hereby conferred upon the Court of Claims to hear and determine and adjudicate to judgment claims for destruction of private property and damage thereto as the result of the construction of levees along the Mississippi River, and other improvements of the Mississippi River, where such damage is now officially declared to be the fact by the Mississippi River Commission in their report to the Secretary of War, June, 1910."

Mr. STAFFORD. Mr. Chairman, I make the point of order that that amendment is not germane. It hardly needs any discussion; it is apparent that this bill has nothing to do with claims resulting from damage.

The CHAIRMAN. The point of order is sustained.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CARAWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 14777) to provide for control of floods in the Mississippi River, and had come to no resolution thereon.

### LEAVE OF ABSENCE.

Mr. BAILEY, by unanimous consent, was given leave of absence for five days on account of important business.

### MINORITY REPORT.

Mr. CROSSER. Mr. Speaker, I ask unanimous consent to file a minority report on this bill (H. R. 14777) for flood control.

The SPEAKER. For how long?

Mr. CROSSER. Until next Monday.

The SPEAKER. The gentleman from Ohio asks unanimous consent to file a minority report on the flood-control bill not later than next Monday. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the flood-control bill.

The SPEAKER. Is there objection?

There was no objection.

### THE PHILIPPINE BILL.

Mr. GARRETT. Mr. Speaker, while the Philippine bill was under consideration unanimous consent was given to all Members to print for 10 days. I am not entirely certain whether that would include some matter that I desire to insert. I desire to insert in the RECORD a speech delivered by the Hon. J. M.

Dickinson, former Secretary of War, upon the subject of the Philippines.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to insert in the RECORD as a part of his remarks a speech by the Hon. J. M. Dickinson, former Secretary of War. Is there objection? [After a pause.] The Chair hears none.

Mr. BARKLEY. Mr. Speaker, during the consideration of the Philippine bill did the order that was made provide that all Members who spoke on the bill could extend remarks in the RECORD or that all Members could have 10 days to extend remarks?

Mr. GARRETT. It provided that any Member could within 10 days extend his remarks in the RECORD. I want also to say that there is a part of a letter that I want to insert in the same connection.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 6099. An act to amend section 72 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

S. J. Res. 119. Joint resolution to permit the issuance of medical and other supplies to the American National Red Cross for a temporary period.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 40 minutes p. m.) the House adjourned until to-morrow, Thursday, May 11, 1916, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Duncan M. Reid and Milton Whinnery *v.* The United States (H. Doc. No. 1093); to the Committee on Claims and ordered to be printed.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Roebuck Lake, Miss., from its outlet to Ittabena, including consideration of any proposition for cooperation on the part of local or State interests (H. Doc. No. 1094); to the Committee on Rivers and Harbors and ordered to be printed.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Clark Fork River between Albany Falls and Lake Pend Oreille, in Idaho (H. Doc. No. 1095); to the Committee on Rivers and Harbors and ordered to be printed.

4. A letter from the Secretary of the Treasury, requesting that item of appropriation for central heating, lighting and power plant, public buildings, Washington, D. C., be eliminated from the sundry civil estimates for the fiscal year ending June 30, 1917 (H. Doc. No. 1096); to the Committee on Appropriations and ordered to be printed.

5. A letter from the Acting Secretary of the Treasury, submitting, for inclusion in the sundry civil appropriation bill now pending, estimates of appropriations for commencement, continuation, and completion of sundry public buildings (H. Doc. No. 1097); to the Committee on Appropriations and ordered to be printed.

6. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of John Gerteisen *v.* The United States (H. Doc. No. 1098); to the Committee on War Claims and ordered to be printed.

7. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Albert A. Haskett *v.* The United States (H. Doc. No. 1099); to the Committee on War Claims and ordered to be printed.

8. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Herbert S. Sleeper *v.* The United States (H. Doc. No. 1100); to the Committee on War Claims and ordered to be printed.

9. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of R. Sherman Lerch *v.* The United States (H. Doc. No. 1101); to the Committee on War Claims and ordered to be printed.

10. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of George B. Loud *v.* The United States (H. Doc. No. 1102); to the Committee on War Claims and ordered to be printed.

11. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Albert G. Peabody *v.* The United States (H. Doc. No. 1103); to the Committee on War Claims and ordered to be printed.

12. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Guy C. Pierce *v.* The United States (H. Doc. No. 1104); to the Committee on War Claims and ordered to be printed.

13. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Jemima R. Clevenger, widow (remarried) of Henry Richardson, deceased, *v.* The United States (H. Doc. No. 1105); to the Committee on War Claims and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk and referred to the several calendars therein named, as follows:

Mr. CARTER of Oklahoma, from the Committee on Indian Affairs, to which was referred the bill (S. 3423) to provide for the construction of a bridge across the Salt Fork of the Arkansas River, near White Eagle Agency, in the Ponca Indian Reservation, Okla., reported the same without amendment, accompanied by a report (No. 663), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GANDY, from the Committee on Indian Affairs, to which was referred the bill (H. R. 13298) authorizing the Secretary of the Interior to make payments to certain Indians of the Rosebud Sioux Reservation, in the State of South Dakota, who were enrolled and allotted under decisions of the United States district and circuit courts for the district of South Dakota, reported the same with amendment, accompanied by a report (No. 664), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. CARTER of Oklahoma, from the Committee on Indian Affairs, to which was referred the bill (H. R. 10872) making an appropriation to Stuart, Lewis, Gordon & Rutherford, in payment of legal services rendered by them to the Creek Nation, reported the same without amendment, accompanied by a report (No. 662), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 7135) granting a pension to Samuel L. Vandever; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 15191) granting an increase of pension to Annie E. Welch; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 4641) granting an increase of pension to Jasper Johnson; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. KENT: A bill (H. R. 15522) to establish a National Park Service, and for other purposes; to the Committee on the Public Lands.

By Mr. RAKER: A bill (H. R. 15523) to punish persons who make false representations to settlers and others pertaining to the public lands of the United States; to the Committee on the Public Lands.

By Mr. JOHNSON of Washington: A bill (H. R. 15524) providing for the abandonment of the Vashon Island Military Reservation in the State of Washington, and for other purposes; to the Committee on Military Affairs.

By Mr. GRAY of Alabama: A bill (H. R. 15525) to improve, enlarge, remodel, and modernize the building at Mobile, Ala., known as the customhouse; to the Committee on Public Buildings and Grounds.

By Mr. RAINEY: A bill (H. R. 15526) authorizing the removal of dams in the Illinois River; to the Committee on Flood Control.

By Mr. FOCHT: Joint resolution (H. J. Res. 222) "The Birth of a Nation" picture; to the Committee on the District of Columbia.

By Mr. KITCHIN: Resolution (H. Res. 233) providing for consideration of the bill H. R. 15455; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and a resolution were introduced and severally referred as follows:

By Mr. ADAIR: A bill (H. R. 15527) granting a pension to Nancy J. Fetron; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15528) granting a pension to Martha Bell; to the Committee on Invalid Pensions.

By Mr. BAILEY: A bill (H. R. 15529) for the relief of Martin L. Cuppels; to the Committee on Military Affairs.

By Mr. BOOHER: A bill (H. R. 15530) granting an increase of pension to Roderick Schoonover; to the Committee on Invalid Pensions.

By Mr. BRUMBAUGH: A bill (H. R. 15531) granting a pension to Frank A. Crawford; to the Committee on Pensions.

By Mr. BUCHANAN of Illinois: A bill (H. R. 15532) granting an increase of pension to Charles B. Kunstler; to the Committee on Invalid Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 15533) granting a pension to Anna R. Sharp; to the Committee on Invalid Pensions.

By Mr. CLINE: A bill (H. R. 15534) granting an increase of pension to Benjamin W. Skelton; to the Committee on Invalid Pensions.

By Mr. GANDY: A bill (H. R. 15535) granting an increase of pension to William H. Lott; to the Committee on Invalid Pensions.

By Mr. GREEN of Iowa: A bill (H. R. 15536) granting an increase of pension to Marquis D. Usher; to the Committee on Invalid Pensions.

By Mr. HAMILTON of New York: A bill (H. R. 15537) granting an increase of pension to Stillman P. Daily; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15538) granting a pension to M. Elizabeth Gorton; to the Committee on Invalid Pensions.

By Mr. HICKS: A bill (H. R. 15539) granting an increase of pension to John Hutchinson; to the Committee on Invalid Pensions.

By Mr. KAHN: A bill (H. R. 15540) authorizing the Commissioner of Navigation to cause the steamship *Republic* to be enrolled and licensed as a vessel of the United States; to the Committee on the Merchant Marine and Fisheries.

By Mr. LAFEAN: A bill (H. R. 15541) granting an increase of pension to Joseph A. Wisner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15542) granting an increase of pension to Augustus F. Woltman; to the Committee on Invalid Pensions.

By Mr. MOORE of Pennsylvania: A bill (H. R. 15543) granting an increase of pension to Joseph Walton; to the Committee on Invalid Pensions.

By Mr. OAKEY: A bill (H. R. 15544) granting an increase of pension to George W. Daniels; to the Committee on Invalid Pensions.

By Mr. PAGE of North Carolina: A bill (H. R. 15545) for the relief of the estate of John B. Johnson, deceased; to the Committee on Claims.

By Mr. POWERS: A bill (H. R. 15546) for the relief of Emily J. Mullins; to the Committee on Claims.

By Mr. REILLY: A bill (H. R. 15547) granting an increase of pension to Albert P. Jackson; to the Committee on Invalid Pensions.

By Mr. RUSSELL of Ohio: A bill (H. R. 15548) granting a pension to Lucy Freeman; to the Committee on Invalid Pensions.

By Mr. SCOTT of Pennsylvania: A bill (H. R. 15549) granting an increase of pension to Louisa J. Kottcamp; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15550) granting an increase of pension to Albert M. Gotwalt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15551) granting an increase of pension to Kathrine Hake; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15552) granting an increase of pension to Matilda W. Leightner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15553) granting an increase of pension to Aaron Markle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15554) granting an increase of pension to Maggie A. Meals; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15555) granting an increase of pension to Samuel Platts; to the Committee on Invalid Pensions.

By Mr. SHOUSE: A bill (H. R. 15556) granting a pension to Brother Buis; to the Committee on Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 15557) granting an increase of pension to James C. Haslett; to the Committee on Invalid Pensions.

By Mr. STEPHENS of Texas: A bill (H. R. 15558) granting a pension to Harry G. Hodges; to the Committee on Pensions.

By Mr. TAGGART: A bill (H. R. 15559) granting an increase of pension to Stephen Lampman; to the Committee on Invalid Pensions.

By Mr. TALBOTT: A bill (H. R. 15560) granting a pension to Mary R. Ramsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15561) granting a pension to Julia Ford; to the Committee on Invalid Pensions.

By Mr. TILLMAN: A bill (H. R. 15562) for the relief of Henry N. Rumley; to the Committee on Claims.

Also, a bill (H. R. 15563) granting an increase of pension to Benjamin M. Ammons; to the Committee on Invalid Pensions.

By Mr. TREADWAY: A bill (H. R. 15564) granting a pension to Hattie S. Swift; to the Committee on Invalid Pensions.

By Mr. VARE: A bill (H. R. 15565) granting an increase of pension to Ernestine Shetrone; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15566) granting an increase of pension to Frederick Wagner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15567) granting an increase of pension to Jacob Haar; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15568) granting an increase of pension to William H. Swartz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15569) granting an increase of pension to Laura V. Croll; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15570) granting an increase of pension to Maggie Sponsler; to the Committee on Invalid Pensions.

By Mr. VINSON: A bill (H. R. 15571) granting a pension to Talbert T. Wates; to the Committee on Pensions.

By Mr. WINGO: A bill (H. R. 15572) for the relief of W. T. Dingler; to the Committee on Claims.

By Mr. POU: Resolution (H. Res. 232) for the relief of R. L. Jennings; to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petitions of sundry citizens and organizations, favoring a report by the Judiciary Committee on the Susan B. Anthony amendment; to the Committee on the Judiciary.

By Mr. BAILEY: Memorial of Local Union No. 2179, United Mine Workers of America, favoring House resolution 139; to the Committee on Rules.

By Mr. BOOHER: Petition of S. M. Clark, G. E. Walter, Russell Burke, and 40 other citizens of Atchison County, Mo., against regulations enforcing the migratory-bird law; to the Committee on Agriculture.

By Mr. BRUMBAUGH: Evidence to accompany House bill 11976, granting an increase of pension to Washington G. Marshall; to the Committee on Invalid Pensions.

By Mr. BURKE: Petition of citizens of Plymouth and St. John's Lutheran Church, of Woodland, Wis., against war with Germany; to the Committee on Foreign Affairs.

By Mr. CAREW: Petition of Chamber of Commerce of the State of New York, in re rural-credit banking; to the Committee on Banking and Currency.

By Mr. DALE of New York: Petition of Arnon L. Squiers, of New York, in re House bill 14337; to the Committee on the Merchant Marine and Fisheries.

Also, memorial of New York Academy of Medicine, in reference to the number of medical officers provided for in the United States Army; to the Committee on Military Affairs.

Also, petitions of various and sundry citizens and organizations, favoring the reporting out of the Susan B. Anthony amendment by the Judiciary Committee; to the Committee on the Judiciary.

Also, memorial of Chamber of Commerce of the State of New York, in re pneumatic-tube mail service; to the Committee on the Post Office and Post Roads.

By Mr. DILL: Petition of H. C. Boger, of Snohomish, Wash., and other residents of that locality, protesting against House bill 652; to the Committee on the District of Columbia.

Also, petition of H. C. Boger, of Snohomish, Wash., and other residents of that locality, protesting against House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

Also, petition of G. W. Dial and other residents of Hillyard and Spokane, Wash., urging the passage of House bill 8665; to the Committee on Labor.

By Mr. DILLON: Petitions of sundry citizens of Freeman, S. Dak., in reference to our foreign relations and opposing war; to the Committee on Foreign Affairs.

By Mr. DOOLING: Petition of New York Academy of Medicine, favoring a change in the number of medical officers in the United States Army; to the Committee on Military Affairs.

By Mr. EMERSON: Memorial of citizens of twenty-second district of Ohio on House bill 5308; to the Committee on Ways and Means.

By Mr. FLYNN: Memorial of the New York Academy of Medicine, favoring a change in the number of doctors in the United States Army; to the Committee on Military Affairs.

Also, memorial of Chamber of Commerce of the State of New York in re pneumatic-tube mail service; to the Committee on the Post Office and Post Roads.

By Mr. FULLER: Petition of Chamber of Commerce of the State of New York, relative to rural-credit banking; to the Committee on Banking and Currency.

Also, petition of Association of Drainage and Levee Districts of Illinois, relative to flood control in the Illinois River Valley; to the Committee on Rivers and Harbors.

By Mr. GALLIVAN: Petititon of citizens of Boston, Mass., against United States in war; to the Committee on Foreign Affairs.

By Mr. HOWELL: Memorial of Commercial Club of Salt Lake City, Utah, favoring Shields water-power bill; to the Committee on Rivers and Harbors.

By Mr. JOHNSON of Washington: Petition of 33 citizens of Clarke County, Wash., against House bill 652—Sunday-observance bill; to the Committee on the District of Columbia.

Also, petition of 30 citizens of Tacoma, Wash., favoring House bill 8665, against the Taylor system; to the Committee on Labor.

Also, petition of 59 citizens of Clarke County and 64 of Pierce County, Wash., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. LAFEAN: Memorial of National and State officials of the Farmers' Educational and Cooperative Union of the National Grange; to the Committee on Agriculture.

Also, petition of Chamber of Commerce of New York State, meeting held May 4, 1916, adopting report on antiefficiency bills; to the Committee on Labor.

Also, petition of Chamber of Commerce of State of New York, meeting held May 4, 1916, on rural-credit banking; to the Committee on Banking and Currency.

Also, petition of Chamber of Commerce of the State of New York, meeting held May 4, 1916, adopting report on pneumatic-tube mail service; to the Committee on the Post Office and Post Roads.

By Mr. LOUD: Petition of A. W. Gibbons and Orient and Sylvan Sunday School Association, of Sears, Mich., favoring national prohibition; to the Committee on the Judiciary.

By Mr. McDERMOTT: Petition of Messrs. S. J. Dorsch, Joseph J. Rusch, F. Schultz, G. Dittman, and others, all of Chicago, Ill., favoring the passage of the Lobeck classification bill; to the Committee on Reform in the Civil Service.

By Mr. MAPES: Petition of 13 citizens of Grand Rapids, Mich., urging the passage of the Stevens standard-price bill; to the Committee on Interstate and Foreign Commerce.

By Mr. NOLAN: Petitions of 493 citizens of San Francisco, Cal., against war with Germany; to the Committee on Foreign Affairs.

By Mr. PAGE of North Carolina: Petition of sundry citizens of North Carolina, favoring rural-credit bill; to the Committee on Banking and Currency.

By Mr. ROUSE: Memorial of citizens of Covington, Ky., regarding international situation; to the Committee on Foreign Affairs.

By Mr. SANFORD: Papers to accompany House bill 15450, for relief of Emil E. Koenig, or King; to the Committee on Invalid Pensions.

By Mr. STEPHENS of California: Communication from Mariella Stanton and E. H. Sharp, both of Los Angeles, Cal., opposing preparedness; to the Committee on Military Affairs.

Also, resolutions from public meetings at Hotel Alexandria, Los Angeles; Panama-Pacific International Exposition, San Diego; Polytechnic High School, Los Angeles; also from San Luis Obispo, Sacramento, and Santa Barbara, all in the State of California, favoring the woman suffrage amendment; to the Committee on the Judiciary.

Also, communications from the E. W. Reynolds Co., Los Angeles; the Broadway Department Store, Los Angeles; and the Retail Dry Goods Association, Oakland, all in the State of California, protesting against the Stephens-Ayres maintenance bill; to the Committee on Interstate and Foreign Commerce.

Also, petition from Giles Otis Pearce and others, Soldiers' Home, Cal., favoring import tax upon gold and silver; to the Committee on Ways and Means.

Also, petition from Giles Otis Pearce and others, Soldiers' Home, Cal., concerning the free coinage of silver; to the Committee on Coinage, Weights, and Measures.

Also, communication from Labor Council, San Francisco, Cal., favoring exclusion of Asiatic laborers; to the Committee on Immigration and Naturalization.

Also, communication from Realty Board, Los Angeles, Cal., favoring the relocation of a Government power plant in Washington; to the Committee on the District of Columbia.

Also, communication from Vocational Guidance Society, San Francisco, Cal., favoring the Smith-Hughes bill; to the Committee on Education.

Also, communication from Young People's Society, Immanuel Presbyterian Church, Los Angeles, Cal., favoring a Federal motion-picture commission; to the Committee on Education.

Also, communication from California Association for the Prevention of Tuberculosis, favoring the Kent-Norris bill; to the Committee on Interstate and Foreign Commerce.

Also, communication from 25 members of the German Ministerial Association of Los Angeles, Cal., protesting against war with Germany; to the Committee on Foreign Relations.

Also, communication from Merchants' Association of Watsonville, Cal., protesting against stamps on checks; to the Committee on Ways and Means.

Also, communication from Labor Council, San Francisco, Cal., favoring peaceful settlement of international disputes; to the Committee on Foreign Relations.

Also, petition of Joseph A. Powers and 72 others of Sawtelle, Cal., protesting against the compulsory Sunday observance bill; to the Committee on the District of Columbia.

Also, petition signed by Joseph A. Powers and 100 other citizens of Sawtelle, Cal., opposing House bill 8348; to the Committee on the District of Columbia.

Also, petition signed by Joseph A. Powers and 102 other citizens of Sawtelle, Cal., favoring freedom of speech and of the press; to the Committee on the Post Office and Post Roads.

By Mr. SULLOWAY: Memorial of Hillsborough County (N. H.) Medical Association, favoring proper medical service in the United States Army; to the Committee on Military Affairs.

By Mr. WARD: Petition of citizens of White Lake, Monticello, Stevensville, and Liberty, N. Y., for a Christian amendment to the Constitution of the United States; to the Committee on the Judiciary.

## SENATE.

### THURSDAY, *May 11, 1916.*

*(Legislative day of Tuesday, May 9, 1916.)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

#### RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. KENYON resumed the speech begun by him on Tuesday. After having spoken for two hours and a half, he said:

Mr. President, I will not be able, I think, to finish what I have to say to-night. I had hoped to finish, but I find myself very weary. The Senator from Illinois [Mr. SHERMAN] desires to occupy the floor for some time, and I think therefore I will stop at this point and resume my remarks at a later day.

[Mr. KENYON'S entire speech is printed in the Senate proceedings of May 9, 1916.]

Mr. KENYON. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Borah | Harding | Jones | Lodge |
| Brandegee | Hardwick | Kenyon | Martine, N. J. |
| Chamberlain | Hitchcock | La Follette | Myers |
| Clarke, Ark. | Hollis | Lea, Tenn. | Norris |
| Dillingham | Husting | Lee, Md. | Oliver |
| du Pont | James | Lewis | Page |
| Gallinger | Johnson, Me. | Lippitt | Poindexter |

| | | | |
|---|---|---|---|
| Pomerene | Shields | Thomas | Walsh |
| Ransdell | Simmons | Tillman | Warren |
| Shafroth | Smith, S. C. | Underwood | Works |
| Sheppard | Smoot | Vardaman | |
| Sherman | Sutherland | Wadsworth | |

The PRESIDING OFFICER. Forty-six Senators have responded to their names. There is not a quorum present. The Secretary will call the names of absentees.

The Secretary called the names of absent Senators, and Mr. BECKHAM, Mr. GORE, Mr. JOHNSON of South Dakota, Mr. MARTIN of Virginia, Mr. NELSON, Mr. OVERMAN, Mr. PITTMAN, Mr. REED, Mr. SMITH of Georgia, Mr. STERLING, and Mr. SWANSON responded to their names when called.

Mr. LEWIS. Mr. President, I wish to announce the necessary absence of the Senator from Mississippi [Mr. WILLIAMS], who is detained from the Senate on business.

The PRESIDING OFFICER. Fifty-seven Senators have responded to their names. A quorum is present.

Mr. SHERMAN addressed the Senate. After having spoken nearly two hours and a half, he said:

I will state, Mr. President, that I can not conclude to-night. I am perfectly willing to yield at any time.

Mr. CLARKE of Arkansas. Whenever it may suit the pleasure of the Senator to suspend it will be satisfactory here. The Senator from West Virginia [Mr. CHILTON] has a matter that he desires to present, and it may as well be presented while this bill is pending as at any other time.

[Mr. SHERMAN'S entire speech is printed in the Appendix.]

CHARLESTON-DUNBAR TRACTION CO.

Mr. CHILTON. On the 17th of March I introduced the bill (S. 5103) authorizing and directing the Secretary of War to lease to Charleston-Dunbar Traction Co. a certain strip or parcel of land owned by the United States Government on the Great Kanawha River, in West Virginia, and it was referred to the Committee on Military Affairs. It should have been referred to the Committee on Commerce. I ask unanimous consent that the bill be taken from the Committee on Military Affairs and referred to the Committee on Commerce. Clearly, it ought to go there.

The VICE PRESIDENT. Without objection, the change of reference will be made.

Mr. CHILTON. I also present a letter from the Secretary of War to accompany the bill.

The VICE PRESIDENT. The bill and accompanying letter will be referred to the Committee on Commerce.

CONGRESSIONAL ELECTION IN WEST VIRGINIA.

Mr. CHILTON. Mr. President, I understand that while I was out of the Chamber the Senator from Iowa [Mr. KENYON] referred to the recent election held in West Virginia and predicted that what had happened to the Democratic Party in the second district of West Virginia was in store for it at the November election. I sincerely hope that the Senator is a prophet and that the magnificent gains made by the Democratic Party in the second West Virginia district are an omen of what is going to happen to the party to which the Senator has given his allegiance all his life in November.

Mr. President, I wish to put in the RECORD something about the second congressional district. In the year 1902 the Republicans carried that district by 1,341. In the year 1904 the majority was much in excess of 2,000; it was two thousand and something like three or four hundred. In 1906 the Democratic candidate received 16,752 votes and the Republican candidate 20,384 votes, a majority of 3,632.

In the year 1908 the Republican candidate received a clear majority of 2,561. In the year 1910 the Democratic Party nominated a most remarkable man, Hon. W. G. Brown. He carried the district by 3,984, but everyone understood that it was a victory for Brown and not a victory for the Democratic Party. The largest Republican county in the district, Preston, is usually good for a Republican majority of from 2,000 to 2,500. Instead of its giving a majority against Mr. Brown, he was related to so many people, connected with so many people, and personally was so popular there, as he was here to the time of his death, that he carried that county by a substantial majority and won his election.

In the year 1912 that district gave Mr. Roosevelt 14,934 votes and Mr. Taft 10,420 votes, making a combined opposition vote of 25,354 to 21,955 given for Mr. Wilson, making a Republican majority of 3,399. Notwithstanding that Mr. Brown was elected to Congress.

Mr. THOMAS. By what majority?

Mr. CHILTON. I have not the exact majority, but I think it was 196, less than 200.

In that same year notwithstanding the fact that Gov. Hatfield ran considerably behind his ticket he carried that district by 2,463.

In 1914 Mr. Brown had a plurality of 1,361 votes and the Progressive vote was 1,296, leaving Mr. Brown with a majority of only 65.

In the county of Preston, where Mr. Brown lived, in 1908 the Republican majority was 2,141 on the vote for Representative in Congress.

Mr. SUTHERLAND. All of which indicates, as I understand, Mr. President, that there never has been more than one Democrat in the district whom the people were willing to trust.

Mr. CHILTON. That is one way to state it but not the correct way. I want to state to the Senator further that in the election which has recently taken place Mr. Wood, the Democratic candidate for Congress, was beaten in Preston County by only 1,100, and so there was in the district a substantial Democratic gain in all the counties except probably two.

One of them was the county of Berkeley, where Mr. Bowers, the Republican candidate lived, and I have no doubt in the world that when the other House of Congress comes to investigate that question it will find ample reasons why that county happened to slump to prevent the Democratic Party from getting the splendid advantage which they would have had by virtue of the popularity of the present Democratic administration.

In other words, Mr. President, it can be easily shown that the official vote in two counties in that district was not a fair expression of the sentiments of the voters, and that at least unfair means were used to eke out the meager majority of about 400, which is now being paraded as a sign of a Democratic slump. The truth is that even if it were fairly obtained the returns from the second West Virginia district show a falling off in the Republican majorities—a district, normally Republican by over 2,000, went Republican by about 400.

If the Senator from Iowa can find any consolation in these figures I hope that consolation will keep up until November for his benefit. The wise politicians in his party will not base hopes of victory in November upon that result.

Mr. KENYON. Mr. President, I simply want to say that I join in the joy which the Senator from West Virginia may feel about myself, and I am doubly glad if the Senator from West Virginia can get any comfort out of the situation.

I read a prophecy a few days ago of the Senator as it was reported in the newspapers when he left for the scene of the recent election in which he was reported to have said that everything was all right, and that the Democrats would see that the district was carried for their candidate. If the Democrats keep up, of course, this kind of a game the result will be clearly apparent when November comes. I only know that whereas a Democrat represented that district for the last six years a Republican has been elected. I know nothing more about it, of course, and I am glad the Senator can get comfort out of the situation.

THE SHIPPING SITUATION.

Mr. FLETCHER. I ask to have printed in the RECORD a statement made by the members of the United States Section of the International High Commission, and also a statement by Secretary McAdoo, chairman of the commission, as to the work of the commission on its recent trip to South America.

Mr. SMOOT. Does the Senator ask to have the matter printed in the RECORD or as a document?

Mr. FLETCHER. These are very brief statements, and I propose that they shall be printed in the RECORD.

Mr. SMOOT. The other two statements of Secretary McAdoo have been printed as public documents.

Mr. FLETCHER. Those were addresses delivered on public occasions.

The VICE PRESIDENT. Without objection, the request of the Senator from Florida is complied with.

The matter referred to is as follows:

THE SHIPPING SITUATION.

WASHINGTON, D. C., *May 8, 1916.*

So important did the members of the United States Section of the International High Commission find the shipping question in South American countries that they deem it their duty especially to report the statements brought to their attention by residents of the countries visited as well as by members of the commission from the Republics of Central and South America attending the Buenos Aires conference.

Without exception, in every country we found the shipping question uppermost in the minds of Government officials, bankers, and business men. Practically every business man with whom the members of the commission discussed conditions emphasized the absolute need of greatly increased ocean tonnage, while the members of the American colonies in the various cities sought every opportunity to impress upon the members of the commission the importance of action at the earliest moment to improve conditions.

It was pointed out repeatedly that under the normal circumstances preceding the war the operation of many lines to European countries for both passengers and freight, making the trips in less time than steamers plying to the United States, gave Europe a great advantage in the sale of merchandise, not only because of the larger tonnage available and quicker service but because of the lower freight rates enjoyed. Representatives of the American business houses declared that it would be very difficult to extend American trade with such a handicap.

As a result of the war, the cost of ocean tonnage to South American ports has increased enormously, and instead of an improvement in the conditions the fear seems to be well grounded that they will become worse. As an illustration of present rates, it may be stated that before the war the rate on coal from the United States to Buenos Aires was 16s. to 20s. per ton; for a considerable time recently it has been 102s. 6d., and on occasions the rate has been as high as 120s. As a result coal has been selling in Buenos Aires at $28 to $30 a ton, nearly $25 of this price being represented in freight payments. Before the war it sold in cargo lots at $7.75 to $8.

Rates on hardware, drugs, paper, and general merchandise have increased in like proportion, and notices of general advances approximating 50 per cent additional were given to Buenos Aires houses about the middle of April. Even at these prices immediate acceptance of cargo space was necessary. We are advised bottoms are available in very much larger proportion from Great Britain than from other countries, and British merchants are enjoying rates 50 to 75 per cent less than American manufacturers. The situation as to rates does not obtain in the Argentine alone but applies in all the countries. A number of notable cases were brought to the attention of members of the commission where important contracts have recently gone to Europe, which would have been given to the United States, but for the wide difference of freight rates which made it impossible for our manufacturers to compete.

It was pointed out by the representatives of American shippers in these countries that very much higher rates to the United States, as against Europe, seriously militate against our manufacturers in the purchase of raw materials, which become available to European manufacturers at lower cost because of the cheaper transportation. This, of course, adds to the difficulty our manufacturers encounter in marketing manufactured products in competition with Europe.

American houses in Brazil and the Argentine informed the commission that they had been notified in the middle of April that a number of ships now in service from New York to South American ports would be taken off of this direct service and would soon make the trip from New York via Europe, thus still further restricting a service already so seriously impaired as to constitute a grave menace to our South American commerce.

The representatives of all the Governments participating in the Buenos Aires conference took every opportunity to urge that the shipping conditions could only be improved on the initiative of the United States. They made clear their inability to finance new steamship enterprises, but at the same time promised that cooperation would be given in every way that their Governments could aid. It was also urged upon us that, while the present situation constituted a serious emergency calling for the quickest possible relief, the development of the commerce of the United States with South American countries in times of peace necessitated very much greater tonnage than had ever been available, while fast passenger lines were also essential if increased trade and communication between the countries were to be developed.

The United States commission does not as a commission assume to say what remedies should be applied by our Government, but they are convinced that there is no more vital question affecting our commerce with the Latin American countries than that of providing greatly increased shipping facilities.

W. G. McADOO.
D. U. FLETCHER.
A. J. PETERS.
PAUL M. WARBURG.
SAMUEL UNTERMYER.
JOHN H. FAHEY.
ARCHIBALD KAINS.

STATEMENT BY SECRETARY M'ADOO.

WASHINGTON, D. C., *May 4, 1916.*

We have had a most instructive and interesting trip. In every country visited the United States delegates were received with the greatest cordiality. The friendship and hospitality extended to us were delightful, and we are extremely grateful for the generous attentions bestowed upon us everywhere. It would be impossible to convey an adequate idea of the personal charms and exquisite hospitality of the people of Latin America. They have an enviable distinction of their own.

I shall not undertake now to give impressions of the various countries, except that, although I expected to find well-built and beautiful cities, they far exceeded my expectations.

I wish that every American business man and capitalist could visit these Latin-American countries and see for themselves how rich they are in natural resources, how rapidly they are developing, and how full of opportunity they are for American capital and enterprise.

I had the honor and privilege of meeting and conversing with the Presidents of Brazil, Uruguay, Argentina, Chile, Peru, Panama, Cuba, and Haiti, and I also met many of the leading statesmen of South America, with whom I discussed questions of national interest. Everywhere I found an earnest desire to strengthen commercial, financial, and political relations with the United States, and everywhere we went there was a genuinely friendly attitude and a complete absence of that suspicion and distrust of the United States which has, until recently, existed to a more or less degree in some, at least, of the Central and South American countries. This is a very fortunate development. It is due primarily to the policies and utterances of President Wilson and to the suggestions made by the United States for mutual guaranties of the territorial integrity and political independence of all of the American Republics. If this happy consummation can be realized it will do more, in my opinion, to promote stable, rapid, and peaceful development of the American States than any single political act of the last century. It will be a transcendent achievement if the territorial and political integrity of every American nation, large and small, can be made secure through unity of action and interest. With this accomplished there is no limit to the future of the Americas—they will be as impregnable as they will be potential for good. The numerous Pan American conferences recently held, bringing together as they have leading men of the various Latin-American States, have contributed greatly to a better understanding and have helped to create sentiment in favor of Pan American unity and solidarity.

Every leading statesman in South America with whom I talked emphasized the paramount importance of a merchant marine under the flag of the United States, or under the flags of the different American nations, if American financial and commercial relations are to be enlarged upon an enduring foundation. Without a single exception, they all concurred in the view that the merchant-marine question is the most important one now confronting the American States. The hope was expressed in every country, and was voiced in the resolutions unanimously adopted by the International High Commission, that the United States will promptly solve this pressing problem, and there was frank recognition that the United States alone has the financial resource to do so. A number of the leading statesmen of South America did not hesitate to say that if our Government really wanted to serve her own interests in the highest degree and help her suffering neighbors of South America in their extremity—because the commerce of many of these countries is seriously hurt for lack of shipping—the United States will not fail to do something practical and promptly. Many prominent men told me that there has been an abundance of inter-American conferences and friendly expressions for many years, but that concrete results had been relatively small; that if the United States wanted to take advantage of the greatest opportunity in its history to strengthen its commercial, financial, and political relations with the Latin-American States, it would be necessary to do more than merely exchange friendly messages and sentiments; that the surest foundation of better relations was the establishment of ample means of communication, so that the products of the different countries could be quickly moved in mutually profitable trade with each other. Sufficient credits would then follow, because wherever there is profitable trade between the people of different countries it is not difficult to find the means of financing it.

Another question of great importance is the completion of the Inter-Continental Railway, connecting North and South America through the Isthmus of Panama. Outside of ocean transportation, no other undertaking is more essential to the future development of North and South America than the construction of this great railroad. It is not a visionary idea; it is a very practical idea, and one that can be realized at much less cost than the Panama Canal. This is the kind of constructive enterprise that appeals to the imagination and spirit of our people. There are no people to whom a great and daring development of this character appeals so strongly as the people of the United States. If the ideal of Pan American unity, based upon mutual guaranties of territorial integrity and political independence, should come about, the construction of this Pan American trunk line will be all the more important and all the more easily secured, because there will be no hesitation then about the adoption of a standard gauge in all countries. As it stands now, different gauges have been adopted by various countries as a protection against invasion of one by another. This fear will disappear, and greater cooperation will be assured when territorial integrity and political independence of each nation is removed from doubt.

The total distance between New York and Buenos Aires by rail is 10,300 miles, of which approximately 7,400 miles have been built and are now in operation, leaving approximately 2,900 miles to be constructed. The principal gaps in the Inter-Continental Railway are in the countries of Central America and in Colombia, Ecuador, and Peru, in South America, and the estimated cost of construction is, roughly speaking, $150,000,000. With these links completed it would require only a relatively small amount of additional construction to connect the main trunk line with Santiago, Chile, and Rio de Janeiro, Brazil, and then practically all the principal capitals of Central and South America will be connected with each other and with all the cities of the United States. "All aboard for Buenos Aires," when shouted in the railroad stations of New York City, will be a thrilling announcement. Some day, and in the not remote future, this announcement will be heard.

The sessions of the International High Commission began in Buenos Aires April 3 and ended April 13. The proceedings were brilliantly opened by the President of the Argentine Republic, Dr. de la Plaza, and the Argentine Minister of Finance, Dr. Oliver, was, on motion of the United States delegation, elected president of the conference. One of the fundamentally important things agreed upon was the permanent organization of the International High Commission. Washington was selected as the headquarters for the next two years, and a central executive committee was created, whose duty it is to coordinate and carry on the work of the commission. As there are 20 sections of the high commission, 1 being located in each American State, it was necessary to have a central authority to keep in touch with the various sections and direct the general work. By locating the headquarters at Washington a signal honor was conferred on the United States, and by this action the Secretary of the Treasury of the United States becomes president, Hon. John Bassett Moore, vice president, and Dr. Leo S. Rowe, secretary general of the central executive committee for the next two years. The work of the commission will be pushed vigorously and every effort will be made to carry into effect the conclusions of the Buenos Aires conference.

The commission adopted a resolution recommending that a Pan American financial conference, so as to bring together the ministers of finance of all countries, be held every two years, and agreed upon the city of Washington as the place for the financial conference of 1917.

Senator FLETCHER represented the United States on the committee to which was referred wireless telegraphy, improved cable and telegraphs, and postal facilities. The conference declared in favor of exclusive control by the various Governments of wireless telegraphy, it being recognized that it was essential to the security and protection of the various States that this new science should be under the control of their respective Governments. A conference of wireless experts of the different countries was recommended to be held in Washington in the near future.

The conference also declared in favor of the policy of connecting up the telegraph system of the various South American countries, improving the service and establishing a system of more uniform and equitable rates. It was recognized that the telegraph service through South America could be immensely improved by cooperation between the different Governments. The conference also declared for increased cable communications at more reasonable rates, it being recognized that the insufficient cable service between North and South America and the high rates prevailing are a serious handicap upon commerce and intercourse.

The conference considered very thoroughly the subject of a uniform gold standard and increased banking facilities. Mr. Warburg, of the Federal Reserve Board, and Mr. Kains, governor of the Federal Reserve Bank of San Francisco, represented the United States on the commit-

tees dealing with these subjects. While it was recognized that the adoption of a uniform gold standard in all of the Central and South American countries, especially under existing conditions, was impossible at this time, nevertheless a great step forward was taken when the conference approved and recommended to the various Governments the adoption of a standard unit of money of account, and recommended that this unit should be based on a gold coin of .33437 grams in weight and 900/1000 fine. This unit is exactly one-fifth of the gold dollar of the United States, and if adopted by the various States as a money of account will provide a uniform basis of account for transactions between all of the Latin-American countries and North America. Moreover, it offers a basis likely to be adopted for the actual coinage of gold by the various countries when and as they find themselves able to put into effect a gold currency system of their own, in which case all such American gold coins would be of the same fineness and would be in simple multiples of the United States dollar; and this new Pan American coin and the United States dollar would circulate freely throughout the United States and such other American nations as adopted the standard. There are so many recognized advantages in this uniform money of account and interchangeable gold coins that it is not worth while to enumerate them here.

In this connection another admirable idea put forward by Messrs. Warburg and Kains, and recommended by the conference for careful study, was the suggestion for gold trust funds between the different American States, similar in some respects to the gold clearance fund maintained by the Federal reserve banks at Washington and administered by the Federal Reserve Board. If such international gold trust funds can be established, it will prove of the greatest convenience and assistance to commerce, saving unnecessary transfers of gold in settlements of balances, with all the attendant loss and expense. Treaties would, of course, be necessary to bring about this result. The matter will be followed up by the central executive committee.

The conference approved the idea of encouraging banks of each country to establish branches, or taking an interest in banks operating in other countries, for the purpose of facilitating commerce and exchanging accurate credit information, and it recommended legislation for the protection of merchant creditors.

Mr. Untermyer represented the United States on the committees having to do with negotiable instruments, bills of exchange, laws with reference to credits, as well as questions relating to patents, trademarks, and copyrights. Here notable progress was made toward securing uniformity between the laws of the various countries, especially with respect to bills of exchange. The Hague Convention of 1912 formulated a uniform law on this important subject, which has not, however, received general adhesion. In order to secure the tentative approval of that law by the representatives at The Hague it had been necessary to accompany it with a convention, which was signed at the same time, by which independence of action contrary to the terms of the uniform law was expressly reserved to the various signatory States upon many of the important features of the uniform law, thus largely nullifying the effect of the latter.

The task to which the conference addressed itself was that of securing uniform action among the Pan American countries upon the many points contained in the convention as to which independent and conflicting action had been expressly reserved. The conference was able to make a unanimous recommendation for harmonious action upon all except one of the many points thus reserved.

Substantial progress was also made toward securing uniformity in the laws relating to patents, trade-marks, and copyrights among the Pan American countries. The Buenos Aires Conventions of 1910 on these subjects, which have as yet been ratified by only eight, including the United States, of the 20 signatory countries, were reaffirmed, with certain changes on the subject of trade-marks to clear up ambiguities. An important addition to the copyright convention was recommended, the effect of which will be to create monthly exchanges between the various countries of the copyrights registered in each country. This will prevent future conflicts as to copyright ownership, and will enable every applicant for a copyright to learn from the records of his own country whether he is entitled to copyright in the other signatory countries, and will obviate months of delay and endless litigation.

Senator FLETCHER represented the United States on the committee which considered improved postal facilities between the Latin-American States. The conference approved the recommendation for a Pan American postal union, which would, in turn, cooperate with the existing International Postal Union, whose headquarters are Berne, Switzerland, and recommended that an early meeting of postal experts be held in Montevideo for the purpose of going carefully into these important postal questions. Recommendations were adopted which when put into effect will mean a reduction of letter postage to a Pan American rate of 4 cents.

Assistant Secretary Peters represented the United States on the committees having charge of classifications of merchandise, with respect to commercial statistics and regulations affecting customs administration and sanitation. The conference approved, with slight modifications, the uniform nomenclature agreed upon at Brussels for uniform classification of merchandise for the purpose of commercial statistics and the use of the standard monetary unit of account recommended by the committee on banking. As the uniform classification of merchandise for statistical purposes is a matter of administrative regulation in each country and does not require new laws, it is believed that the recommendations of the conference can be carried into effect in the near future. If this is done, the statistics of exports and imports of each country in the Latin American Union will be issued on the same basis, and will, therefore, for the first time, give thoroughly comparative and accurate statistics on these important subjects.

The conference recommended that customhouse entries be simplified and requirements made uniform and that port dues be limited to reasonable charges for services actually rendered to vessels. This reform will remove some of the most vexatious restrictions on commerce.

Mr. John H. Fahey represented the United States on the committees to which were assigned the questions of uniform regulations for commercial travelers and their samples and arbitration of commercial disputes. In dealing with the vexed question of commercial travelers and their samples, the unanimous action of the conference marks a long stride forward in the direction of securing the abolition of license fees and the many other onerous obstacles that now confront our business men in transacting business in Central and South America. The arbitration of commercial disputes between citizens of the Pan American countries, through their respective commercial bodies, was given a distinct impetus on the lines of the agreement reached between the Chamber of Commerce of the United States and the Buenos Aires chamber, which was formally approved by the conference.

Assistant Secretary Peters represented the United States in dealing with the problems of labor and labor conditions. The commission went upon record in favor of the most progressive legislation on these subjects and recomemnded numerous legal provisions now existing in the United States for the betterment of labor conditions.

Secretary McAdoo represented the United States on the committee on natural resources and their development. The conference earnestly recommended the fullest and most systematic study of the mineral resources of all the American Republics, with a view to uniformity of analysis and classification. It was also suggested that the plan for this survey, on which will be based an inter-American policy as to conservation of natural resources, be prepared under the direction of the Pan American Union.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 562) to amend the act approved June 25, 1910, authorizing a Postal Savings System.

### ENROLLED BILL AND JOINT RESOLUTION SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bill and joint resolution, and they were thereupon signed by the Vice President:

H. R. 6099. An act to amend section 72 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; and

S. J. Res. 119. Joint resolution to permit the issuance of medical and other supplies to the American National Red Cross for a temporary period.

### MEXICAN SISAL HEMP (S. DOC. NO. 440).

The VICE PRESIDENT laid before the Senate a communication from the chairman of the Federal Trade Commission, transmitting, in response to a resolution of April 17, 1916, a report concerning the requirements of Mexican sisal hemp by manufacturers in the United States for the production of binder twine to fill orders for domestic consumption during the season ending August 1, 1916, which, with the accompanying paper, was referred to the Committee on Agriculture and Forestry and ordered to be printed.

### TRANSPORTATION BETWEEN ATLANTIC AND PACIFIC PORTS.

The VICE PRESIDENT laid before the Senate a communication from the chairman of the Interstate Commerce Commission, transmitting, in response to a resolution of May 16, 1914, a report relative to corporate interests of railroads in vessels or steamship lines engaged in transporting freight between Atlantic and Pacific ports and in the coastwise trade of the United States, which, with the accompanying paper, was referred to the Committee on Interstate Commerce.

### PETITIONS AND MEMORIALS.

Mr. MYERS. I present resolutions of the Monarch Local, American Society of Equity, of Monarch, Mont., in favor of legislation for the homesteaders on the Fort Peck Indian Reservation in Montana. I ask that the resolutions be printed in the RECORD together with the signatures.

There being no objection, the resolutions were ordered to be printed in the RECORD as follows:

Whereas the cooperative farmers of Montana, known as the American Society of Equity, realize that our country now stands in the midst of difficulties, deem it necessary that all farmers should be induced to raise all food possible; and

Whereas we find a vast area of fertile land on the Fort Peck Reservation practically uninhabited on account of the present law requiring all homesteaders to pay from $2.50 to $7 per acre for said land, one-fifth to be paid at time of entry, the other four-fifths to be made in five annual payments, that said law is keeping actual settlers from this land: Therefore be it

*Resolved*, That we ask our Senators and Congressmen to introduce a law asking a reduction of one-half of the appraised value of said land and that 10 years' extension of time be granted on all payments after the first one has been made, that being one-fifth down at time of entry. We also ask that said law be made to cover all payments that have been made, with the exception of commutements, so that the actual settler who is on the land at the present time may receive the same benefits from time of their entry as those who are yet to homestead. That as we consider this one of the first steps toward preparedness, we ask our Senators and Congressmen to act as soon as possible, as the planting time is near at hand and through this law not only our State but our Government would be greatly benefited, as this is one of our greatest wheat belts.

FRED DANIELSON, *President*,
STEVEN FULLER, *Secretary*.
*Monarch Local, American Society of Equity.*

Mr. MYERS. I also present resolutions of Little Belt Local, American Society of Equity, of Belt, Mont., favoring legislation for homesteaders on the Fort Peck Indian Reservation in Montana. I ask that the resolutions be printed in the RECORD, together with the signatures.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Whereas the cooperative farmers of Montana, known as the American Society of Equity, realize that our country now stands in the midst of difficulties, deem it necessary that all farmers should be induced to raise all food possible; and

Whereas we find a vast area of fertile land on the Fort Peck Reservation practically uninhabited on account of the present law requiring all homesteaders to pay from $2.50 to $7 per acre for said land, one-fifth to be paid at the time of entry, the other four-fifths to be made in five annual payments, that said law is keeping actual settlers from this land: Therefore be it

*Resolved*, That we ask our Senators and Congressmen to introduce a law asking a reduction of one-half of the appraised value of said land and that 10 years' extension of time be granted on all payments after the first one has been made, that being one-fifth down at time of entry. We also ask that said law be made to cover all payments that have been made, with the exception of commutements, so that the actual settler who is on the land at the present time may receive the same benefits from time of their entry as those who are yet to homestead. That as we consider this one of the first steps toward preparedness, we ask our Senators and Congressmen to act as soon as possible, as the planting time is near at hand, and through this law not only our State but our Government would be greatly benefited, as this is one of our greatest wheat belts.

ISAAC RANTIA, *President*,
ALEX. STONE, *Secretary*,
*Little Belt Local, American Society of Equity.*

Mr. PHELAN presented a petition of the Teachers' Club, of Los Angeles, Cal., praying that an adequate appropriation be made for the improvement of the Yosemite National Park and for the creation of a national park service, which was referred to the Committee on Appropriations.

He also presented a memorial of Lasker Lodge, No. 370, Independent Order B'nai B'rith, of San Diego, Cal., remonstrating against the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

He also presented a petition of the California State Retail Hardware Association, praying for the enactment of legislation to provide 1-cent letter postage, for the taxation of mail-order houses, and for the fixing of standard prices on patented and trade-marked articles, which was referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Lodi and Armona, in the State of California, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. WARREN presented a petition of the Sweetwater County (Wyo.) Branch of the Congressional Union for Woman Suffrage, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

Mr. VARDAMAN presented a petition of the Woman's Christian Temperance Union in State convention at Belzonia, Miss., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. JOHNSON of South Dakota presented a petition of sundry citizens of Miranda, S. Dak., praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

Mr. WADSWORTH presented a petition of Clyde Grange, No. 33, Patrons of Husbandry, of Clyde, N. Y., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. POINDEXTER presented the memorial of Mrs. F. O. Noble and sundry other citizens of Vancouver, Wash., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented petitions of the Woman's Civic Club of Seattle, and of sundry citizens of Spokane, Tacoma, Everett, Wenatchee, and Cashmere, all in the State of Washington, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which were ordered to lie on the table.

He also presented a petition of the confederated Indian tribes located along the Columbia River in Washington and Oregon; of the Walla Walla Tribe of Indians, located on the Umatilla Indian Reservation in Oregon; and of the Yakima Tribe of Indians on the Yakima Reservation, Yakima County, Wash., relative to their property rights and general welfare, which was referred to the Committee on Indian Affairs.

Mr. TOWNSEND presented petitions of sundry citizens of Harrison and Greenwood, in the State of Michigan, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a memorial of the Real Estate Board of Detroit, Mich., remonstrating against the proposed location of a Government power plant in the District of Columbia, which was ordered to lie on the table.

He also presented a petition of the Local Union of Christian Endeavor of Grand Haven, Mich., praying for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a petition of the Trades and Labor Council of Escanaba, Mich., praying for Federal aid in the treatment of indigent persons afflicted with tuberculosis, which was referred to the Committee on Public Health and National Quarantine.

### REPORTS OF COMMITTEES.

Mr. REED, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 3265) for the extension, remodeling, and improvement of the public building at Jefferson City, Mo., reported it without amendment and submitted a report (No. 426) thereon.

Mr. SHAFROTH, from the Committee on Pacific Islands and Porto Rico, to which was referred the bill (H. R. 9525) to establish a national park in the Territory of Hawaii, reported it without amendment and submitted a report (No. 431) thereon.

He also, from the same committee, to which was referred the bill (S. 5777) to authorize and provide for the manufacture, maintenance, distribution, and supply of electric light and power within the Lihue district and the Koloa district, county of Kauai, Territory of Hawaii, reported it with amendments and submitted a report (No. 427) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 5274. A bill to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Hawaiian Electric Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii (Rept. No. 429);

S. 5658. A bill to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Honolulu Gas Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii (Rept. No. 428); and

S. 5776. A bill to amend certain public-utility company franchises in the Territory of Hawaii (Rept. No. 430).

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON of Maine:

A bill (S. 5942) for the relief of Orrin Mayo (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 5943) granting an increase of pension to Annie Davis;

A bill (S. 5944) granting a pension to James Kelley (with accompanying papers);

A bill (S. 5945) granting an increase of pension to Eugene A. Libby (with accompanying papers);

A bill (S. 5946) granting a pension to Helen Deering (with accompanying papers);

A bill (S. 5947) granting an increase of pension to Nora E. Danforth (with accompanying papers);

A bill (S. 5948) granting an increase of pension to Abbie M. Fernald (with accompanying papers);

A bill (S. 5949) granting a pension to Mary Miller (with accompanying papers);

A bill (S. 5950) granting an increase of pension to Effie Herbert (with accompanying papers);

A bill (S. 5951) granting a pension to Charles H. Kelley (with accompanying papers);

A bill (S. 5952) granting a pension to John B. Wallace (with accompanying papers);

A bill (S. 5953) granting an increase of pension to Eli O. Colson (with accompanying papers);

A bill (S. 5954) granting a pension to Harriet T. Draper (with accompanying papers);

A bill (S. 5955) granting an increase of pension to Charles G. Bridges (with accompanying papers);

A bill (S. 5956) granting an increase of pension to Gustavas A. Thompson (with accompanying papers);

A bill (S. 5957) granting an increase of pension to James Fairbrother (with accompanying papers);

A bill (S. 5958) granting an increase of pension to Joseph H. Knox (with accompanying papers);

A bill (S. 5959) granting an increase of pension to George W. Butterfield (with accompanying papers);

A bill (S. 5960) granting an increase of pension to Thomas J. Dill (with accompanying papers);

A bill (S. 5961) granting an increase of pension to William E. Cunningham (with accompanying papers);

A bill (S. 5962) granting an increase of pension to Aaron O. Houghton (with accompanying papers);

A bill (S. 5963) granting an increase of pension to Albion K. P. Marston (with accompanying papers);

A bill (S. 5964) granting an increase of pension to Elias A. Lothrop (with accompanying papers); and

A bill (S. 5965) granting an increase of pension to Hiram Ellis (with accompanying papers); to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 5966) to amend an act entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," approved October 3, 1913; to the Committee on Finance.

By Mr. POINDEXTER:

A bill (S. 5967) granting a pension to Mahalath Leonard (with accompanying papers);

A bill (S. 5968) granting an increase of pension to Thomas Brown (with accompanying papers);

A bill (S. 5969) granting an increase of pension to Mary A. Miller (with accompanying papers); and

A bill (S. 5970) granting an increase of pension to Mary C. Kessinger (with accompanying papers); to the Committee on Pensions.

By Mr. RANSDELL:

A bill (S. 5971) to provide for aviation in the Coast Guard; to the Committee on Commerce.

By Mr. FLETCHER:

A bill (S. 5972) for the relief of the legal or equitable owners or claimants of the U. S. S. *Nueces* (with accompanying paper); to the Committee on Claims.

AMENDMENTS TO APPROPRIATIONS BILLS.

Mr. STERLING submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 12193), which was ordered to lie on the table and be printed.

Mr. SHEPPARD submitted an amendment proposing to appropriate $65,000 to enable the Secretary of Agriculture to gather information relative to the number of different classes and grades of marketable live stock, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

RECESS.

Mr. CLARKE of Arkansas. I move that the Senate take a recess until 11 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock and 15 minutes p. m., Thursday, May 11, 1916) the Senate took a recess until to-morrow, Friday, May 12, 1916, at 11 o'clock a. m.

## HOUSE OF REPRESENTATIVES.

### THURSDAY, *May 11, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Almighty God, our heavenly Father, that we are living in this age of gigantic industries, vast commercial enterprises, scientific discoveries, wonderful inventions, widespread knowledge and acumen; when the central truths of the Gospel, fatherhood, brotherhood, are being universally acknowledged through the innumerable philanthropic institutions which are reaching out helping hands to the needy; when character and right living are set above creeds and dogmas. Help us, we beseech Thee, to use these blessings with an eye single to Thy glory, that Thy kingdom may come and Thy will be done on earth as it is in heaven. In the spirit of the Lord Jesus Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

POSTAL SAVINGS SYSTEM.

Mr. MOON. Mr. Speaker, I call up for consideration the conference report on the bill H. R. 562, to amend the act of June 25, 1910, authorizing a Postal Savings System, and ask unanimous consent that the statement may be read in lieu of the report.

Mr. GLASS. Mr. Speaker, I demand the regular order under the rule under which we are operating.

The SPEAKER. The Chair will see what the rule provides.

Mr. MANN. Mr. Speaker, my recollection is that some time ago under a similar rule which purported to cut out all other business I made the point of order that a conference report was not in order, and the Speaker overruled the point of order.

The SPEAKER. The Chair is inclined to think the gentleman is correct about that.

Mr. MOON. I understand that the consideration of conference reports is in order at any time under the general rules, except during the calling of the roll or when the House is considering some matter fixed by special order. I was not aware that there is any special order that would preclude the consideration of this matter at this time.

Mr. MANN. The language of the rule would cut it out, but I think that was the fact in the case to which I have just referred.

The SPEAKER. It is certainly within the power of the House to bring in a rule that would cut out a conference report, temporarily. The Chair will examine this rule.

Mr. GARRETT. Mr. Speaker, I will ask the gentleman from Tennessee how long this will take?

Mr. MOON. Only a few minutes.

Mr. GARRETT. Then I ask unanimous that the gentleman from Tennessee may be permitted to call up the conference report.

Mr. MOON. Mr. Speaker, I do not want to do it by unanimous consent.

Mr. MANN. I think we ought to have a ruling upon it.

The SPEAKER. After examining the rule the Chair concludes that it does not exclude the consideration of conference reports, and the Chair recognizes the gentleman from Tennessee. The gentleman from Tennessee asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT (NO. 661).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 562) to amend the act approved June 25, 1910, authorizing a Postal Savings System, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment to the title of the bill, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the Senate insert the following:

"SEC. 2. That postal savings funds received under the provisions of this act shall be deposited in solvent banks, whether organized under National or State laws, and whether member banks or not of the Federal Reserve System established by the act approved December 23, 1913, being subject to National or State supervision and examination, and the sums deposited shall bear interest at the rate of not less than 2½ per cent per annum, which rate shall be uniform throughout the United States and Territories thereof; but 5 per cent of such funds shall be withdrawn by the board of trustees and kept with the Treasurer of the United States, who shall be treasurer of the board of trustees, in lawful money as a reserve. The board of trustees shall take from such banks such security in public bonds or other securities, authorized by act of Congress or supported by the taxing power, as the board may prescribe, approve, and deem sufficient and necessary to insure the safety and prompt payment of such deposits on demand. The funds received at the postal savings depository offices in each city, town, village, and other locality shall be deposited in banks located therein (substantially in proportion to the capital and surplus of each such bank) willing to receive such deposits under the terms of this act and the regulations made by authority thereof: *Provided, however,* If one or more member banks of the Federal Reserve System established by the act approved December 23, 1913, exists in the city, town, village, or locality where the postal savings deposits are made, such deposits shall be placed in such qualified member banks substantially in proportion to the capital and surplus of each such bank, but if such member banks fail to qualify to receive such deposits, then any other bank located therein may, as hereinbefore provided, qualify and receive the same. If no such member bank and no other qualified bank exists in any city, town, village, or locality, or if none where such deposits are made will receive such deposits on the terms prescribed, then such funds shall be deposited under the terms of this act in the bank most convenient to such locality. If no such bank in any State or Territory is willing to receive such deposits on the terms prescribed, then such funds shall be deposited with the treasurer

of the board of trustees and shall be counted in making up the reserve of 5 per cent. Such funds may be withdrawn from the treasurer of said board of trustees, and all other postal savings funds, or any part of such funds, may be at any time withdrawn from the banks and savings depository offices for the repayment of postal savings depositors when required for that purpose. If at any time the postal savings deposits in any State or Territory shall exceed the amount which the qualified banks therein are willing to receive under the terms of this act, and such excess amount is not required to make up the reserve fund of 5 per cent hereinbefore provided for, the board of trustees may invest all or any part of such excess amount in bonds or other securities of the United States. When, in the judgment of the President, the general welfare and interests of the United States so require, the board of trustees may invest all or any part of the postal savings funds, except the reserve fund of 5 per cent herein provided for, in bonds or other securities of the United States. The board of trustees may in its discretion purchase from the holders thereof bonds which have been or may be issued under the provisions of section 10 of the act of June 25, 1910. Interest and profit accruing from the deposits or investment of postal savings funds shall be applied to the payment of interest due to postal savings depositors, as hereinbefore provided, and the excess thereof, if any, shall be covered into the Treasury of the United States as part of the postal revenue: *Provided further*, That postal savings funds in the treasury of said board shall be subject to disposition as provided in this act, and not otherwise: *And provided further*, That the board of trustees may at any time dispose of bonds held as postal savings investments and use the proceeds to meet withdrawals of deposits by depositors. For the purposes of this act the word "Territory" as used herein shall be held to include the District of Columbia, the District of Alaska, and Porto Rico, and the word "bank" shall be held to include savings banks and trust companies doing a banking business.

"SEC. 3. That the Postmaster General, in cases of emergency, between October 1 and April 1 of any year, may hereafter return to the mails empty mail bags theretofore withdrawn therefrom as required by law, and for such times may pay for their railroad transportation out of the appropriation for inland transportation by railroad routes at not exceeding the rate per pound per mile as shown by the last adjustment for mail service on the route over which they may be carried, and pay for necessary *cartage* out of the appropriation for freight or expressage.

"SEC. 4. That when, during a weighing period, on account of floods or other causes, interruptions in service occur on railroad routes and the weights of mail are decreased below the normal, or where there is an omission to take weights, the Postmaster General, for the purpose of readjusting compensation on such railroad routes as are affected thereby, is hereafter authorized, in his discretion, to add to the weights of mails ascertained on such routes during that part of the weighing period when conditions are shown to have been normal the estimated weights for that part of the weighing period when conditions are shown to have been not normal, or where there has been an omission to take weights, based upon the average of weights taken during that part of the weighing period during which conditions are shown to have been normal, the actual weights and the estimated weights to form the basis for the average weight per day upon which to readjust the compensation according to law on such railroad routes for the transportation of the mails, notwithstanding the provision of the act of Congress approved March 3, 1905, requiring that the average weight shall be ascertained by the actual weighing of the mails for such a number of successive working days, not less than 90, as the Postmaster General may direct: *Provided further*, That readjustments from July 1, 1913, may be made under this provision on routes in the first section affected by the floods in the Ohio Valley and tributary territories, commencing about March 25, 1913.

"SEC. 5. That so much of section 4 of 'An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes,' approved August 24, 1912, as provides that no adjustment shall be made unless the diverted mails equal at least 10 per cent of the average daily weight on any of the routes affected is hereby repealed.

"SEC. 6. That section 3949 of the Revised Statutes be amended to read as follows:

"'All contracts for carrying the mail shall be in the name of the United States and shall be awarded to the lowest bidder tendering sufficient guaranties for faithful performance in accordance with the terms of the advertisement: *Provided, however*, That such contracts require due celerity, certainty, and security in the performance of the service; but the Postmaster General shall not be bound to consider the bid of any person who has willfully or negligently failed to perform a former contract.'

"SEC. 7. That whenever in the judgment of the Postmaster General the bids received for any star route are exorbitant or unreasonable, or whenever he has reason to believe that a combination of bidders has been entered into to fix the rate for star-route service, the Postmaster General be, and he is hereby, authorized, out of the appropriation for inland transportation by star routes, to employ and use such means or methods to provide the desired service as he may deem expedient, without reference to existing law or laws respecting the employment of personal service or the procurement of conveyances, materials, or supplies.

"SEC. 8. That whenever an accepted bidder shall fail to enter into contract, or a contractor on any mail route shall fail or refuse to perform the service on said route according to his contract, or when a new route shall be established or new service required, or when, from any other cause, there shall not be a contractor legally bound or required to perform such service, the Postmaster General may make a temporary contract for carrying the mail on such route, without advertisement, for such period as may be necessary, not in any case exceeding one year, until the service shall have commenced under a contract made according to law: *Provided*, That the cost of temporary service rendered necessary by reason of the failure of any accepted bidder to enter into contract or a contractor to perform service shall be charged to such bidder or contractor.

"SEC. 9. That if any person shall hereafter perform any service for any contractor or subcontractor in carrying the mail, he shall, upon filing in the department his contract for such service and satisfactory evidence of its performance, thereafter have a lien on any money due such contractor or subcontractor for such service to the amount of same; and if such contractor or subcontractor shall fail to pay the party or parties who have performed service as aforesaid the amount due for such service within two months after the expiration of the month in which such service shall have been performed the Postmaster General may cause the amount due to be paid said party or parties and charged to the contractor: *Provided*, That such payment shall not in any case exceed the rate of pay per annum of the contractor or subcontractor.

"SEC. 10. That the act of March 4, 1909 (35 Stats., p. 1126), be amended to read as follows:

"'That whoever shall willfully or maliciously injure, tear down, or destroy any letter box or other receptacle intended or used for the receipt or delivery of mail on any mail route, or shall break open the same, or shall willfully or maliciously injure, deface, or destroy any mail deposited therein, or shall willfully take or steal such mail from or out of such letter box or other receptacle, or shall willfully aid or assist in any of the aforementioned offenses, shall for every such offense be punished by a fine of not more than $1,000 or by imprisonment for not more than three years.'

"SEC. 11. That the limit of weight of mail matter of the first class shall be the same as is applicable to mail of the fourth class: *Provided*, That no article or package exceeding 4 pounds in weight shall be admitted to the mails under the penalty privilege unless it comes within the exceptions named in the acts of June 8, 1896 (ch. 370, 29 Stats., p. 262), and June 26, 1906 (ch. 3546, 34 Stats., p. 477).

"SEC. 12. That postage stamps affixed to all mail matter or to stamped envelopes in which the same is inclosed shall, when deposited for mailing or delivery, be defaced by the postmaster at the mailing office: *Provided*, That when practicable postage stamps may be furnished to postmasters precanceled by printing on them the name of the post office at which they are to be used, under such regulations as the Postmaster General may prescribe.

"SEC. 13. That section 2 of the act of April 28, 1904 (chap. 1759, 33 Stats., p. 440), be amended to read as follows:

"'That under such regulations as the Postmaster General may establish for the collection of the lawful revenue and for facilitating the handling of such matter in the mails it shall be lawful to accept for transmission in the mails, without postage stamps affixed, quantities of not less than 300 identical pieces of third-class matter and of second-class matter and 250 identical pieces of fourth-class matter, and packages of money and securities mailed under postage at the first or fourth class rate by the Treasury Department: *Provided*, That postage shall be fully prepaid thereon at the rate required by law for a single piece of such matter.'

"SEC. 14. That the act approved January 21, 1914 (38 Stats., p. 278), authorizing the Postmaster General to adjust certain claims of postmasters for loss by burglary, fire, or other unavoidable casualty, be so amended as to include Navy mail clerks and assistant Navy mail clerks.

"SEC. 15. That hereafter the Postmaster General may enter into contracts for the conduct of contract stations for a term not exceeding two years.

"SEC. 16. That on and after July 1, 1916, when the total compensation of any postmaster at a post office of the fourth class for four consecutive quarters shall amount to $1,000, exclusive of commissions on money orders issued, and the receipts of such post office for the same period shall aggregate as much as $1,900, the Auditor for the Post Office Department shall so report to the Postmaster General, who shall, in pursuance of such report, assign such post office to its proper class, to become effective at the beginning of the next succeeding quarterly period, and fix the salary of the postmaster accordingly.

"SEC. 17. That all laws or parts of laws in conflict with the provisions of this act are hereby repealed."

And the Senate agree to the same.

JOHN A. MOON,
D. E. FINLEY,
H. STEENERSON,
*Managers on the part of the House.*

J. H. BANKHEAD,
E. D. SMITH,
CHARLES E. TOWNSEND,
*Managers on the part of the Senate.*

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House make the following written statement in explanation of the action agreed upon by the conference committee submitted in the accompanying conference report:

Page 2, section 2, line 10: The words "a reserve bank created by the Federal Reserve" have been stricken out, and in lieu thereof the following inserted: "the Federal Reserve System established by the." This change was made in order to give the Federal Reserve System its accurate title.

Page 3, lines 7 and 8: The words "a reserve bank created by the Federal reserve act" have been stricken out, and in lieu thereof the following inserted: "the Federal Reserve System established by the act." This change was made in order to give the Federal Reserve System its accurate title.

Page 4, lines 6 to 12: So much as relates to the investment of postal savings funds is stricken out, and in lieu thereof provision is made that when the banks in a State refuse or are unable to accept postal savings deposits originating in that State and the deposits are not needed to make up the 5 per cent reserve fund the board of trustees are empowered to invest such funds. The authority conferred upon the President to direct the investment of postal savings funds when, in his judgment, the general welfare and interests of the United States so require is continued in the exact terms of the original postal savings act.

This section also modifies the present laws in two other important respects. At present only member banks of the Federal Reserve System are eligible to receive postal savings deposits. Postal savings deposits under this section as agreed upon may be made in both member and State banks, but preference is given to member banks. If, however, a member bank in a community is unwilling to accept the deposits, or if there is no member bank in that locality, a State bank may qualify as a postal savings depository and receive the funds.

Under present laws the board of trustees are authorized to accept only bonds or other securities supported by the taxing power as security for postal savings deposits. The bill agreed upon goes further by authorizing the board of trustees to accept as security for postal savings deposits not only bonds or other securities supported by the taxing power, but also bonds or other securities authorized by act of Congress.

Section 3: Entire section stricken out.

Section 4: Entire section stricken out.

Reason: Both sections are embraced in the Post Office appropriation bill (H. R. 10484) which passed the House February 28, 1916. If adopted, would require an appropriation to carry out provisions.

The conference committee agreed to the Senate amendment without change as embraced in the following sections, all of which are included in the Post Office appropriation bill which passed the House February 28, 1916.

Section 5, now numbered section 3: Provides for the transportation of mail bags in mail trains at railroad mail rates.

Section 6, now numbered section 4: Provides for the substitution of weights of mails for weights not taken or omitted.

Section 7, now numbered section 5: Provides for readjustment of pay for diversions of mail.

Section 8, now numbered section 6: Provides for star-route service under special conditions.

Section 9, now numbered section 7: Provides for transportation for star-route service when in the judgment of the Postmaster General bidders enter into combination to fix rates.

Section 10, now numbered section 8: Provides for temporary star-route service on account of failure of contractor or carrier to peform service.

Section 11, now numbered section 9: Provides for payment to carrier when contractor for star-route service fails to pay.

Section 12, now numbered section 10: Provides for protection of letter boxes.

Section 13, now numbered section 11: Provides for limit of weight of mail matter.

Section 14, now numbered section 12: Provides for use of precanceled postage stamps.

Section 15, now numbered section 13: Provides for mailing of a number of identical pieces of third or fourth class mail matter without affixing postage stamps.

Section 16, now numbered section 14: Amends act approved January 21, 1914, authorizing the Postmaster General to adjust certain claims of postmasters for loss by burglary, etc., and includes Navy mail clerks.

Section 17, now numbered section 15: Provides that the Postmaster General may enter into contracts for conduct of contract stations for the term of two years, instead of four years, as proposed.

Section 18 was stricken out: Provided for nonaccounting offices.

Section 19, now numbered section 16: Provides for advancement of fourth-class offices.

Section 20, now numbered section 17: Provides for repeal of all laws in conflict with provisions of this act.

JOHN A. MOON,
D. E. FINLEY,
H. STEENERSON,
*Managers on the part of the House.*

Mr. MOON. Mr. Speaker, it is hardly necessary in view of the report and the statement to consume very much time in reference to this bill, so I shall move the previous question on the adoption of the report after a discussion of a few moments, unless gentlemen desire to be heard, and then, of course, I shall withhold it.

Mr. MADDEN. Mr. Speaker, I would like to have the chairman of the committee yield me 30 minutes.

Mr. MOON. I will yield 30 minutes to the opposition to the report.

Mr. MADDEN. I am in opposition to it.

Mr. MANN. Will the gentleman from Tennessee yield to me for a question first?

Mr. MOON. Certainly.

Mr. MANN. As I understand it, no change is made from the House bill so far as it went?

Mr. MOON. Not any.

Mr. MANN. And the only change in the conference report, respecting section 2, which was the first section in the Senate amendment, is in the description of the Federal reserve bank?

Mr. MOON. Yes; that is the only one that affects the first section.

Mr. STAFFORD. Mr. Speaker, would the gentleman from Tennessee be able to yield to me for 5 or 10 minutes?

Mr. MOON. I think I can. I will be glad to do so if I can. I want to proceed myself now for a few minutes. The maximum amount which the postal savings depositors may have on interest is increased in the original bill from $500 to $1,000, and $1,000 is permitted to be deposited in the discretion of the board of trustees, which does not draw interest. That was the original bill which passed the House. The Senate added one amendment in 19 sections as reported in the conference report. The effect of the Senate amendment on the original bill was this: It provided that funds might be deposited in State banks and savings institutions other than those that were not members of the Federal reserve board. That is a change in the law. It, however, gives preference to the reserve banks. It is further provided that the board of trustees might take as security for the postal funds not only bonds which were supported by the taxing power but any bonds authorized by an act of Congress; for instance, if you passed the rural-credits bill the farmers' land bonds might be for acceptance under the provisions of this bill. That is a change in the law recommended by the Senate and agreed to by the conferees.

Now, the second and third sections of this bill had reference to the payment of claims of railroad companies on account of

diversions of mails, companies that were not fully and adequately compensated, owing to the conditions described in the third and fourth sections. Inasmuch as that would require an appropriation, and there were no funds at this time to meet it, this money would necessarily have to be appropriated in the general appropriation bill for the fiscal year 1917, and it was thought wise not to let those two sections remain in this bill, and therefore they were stricken out. They are, however, in the Post Office appropriation bill, where we think they properly belong.

I will not undertake to discuss the other sections of this bill that are agreed upon, because all of those sections are now in the Post Office appropriation bill, and they are matters of postal administration and are simply placed by the Senate committee in this bill to relieve them from the Post Office bill, and might as well be passed at one place as another. The House has fully considered all of them, and they have already passed in the House; not a change is made in any of them by the Senate, but they simply put them into this bill, and, of course, when we come to the consideration of the Post Office appropriation bill they will be stricken from that bill if passed in this measure.

There was, however, one other section of the amendment known as No. 18, the nonaccounting office amendment, which the Senate put in this bill and the conferees struck out. That was a proposition by which the Post Office Department could take any one office in a county or State, or the United States, as far as that is concerned, and make it a central accounting office, and all other offices might be made subsidiary to it or substations and nonaccounting to the general office at Washington, but accounting only to the central office of which it was made a substation. That would place all first, second, and third class postmasters under a new name by operation of the law under the civil service. It is too big a question, we thought, for consideration without a very full hearing, although there was a disposition to let fourth-class postmasters remain now under the civil service. Even as to these offices it was thought best by the conferees not to take up that question and not to undertake to determine it now, in view of the fact that it involved more consideration than ought to be undertaken by a mere conference on a newly suggested item. Later we hope to give full consideration to these suggestions. A majority of the conferees thought best not to do so now.

Mr. Speaker, I reserve the remainder of my time, and I will yield to the gentleman from Illinois [Mr. MADDEN], who desires to discuss the question I have last mentioned, 30 minutes?

Mr. MADDEN. It may be I will get through sooner than that, but I would like to have 30 minutes.

Mr. MOON. I yield the gentleman 30 minutes.

Mr. MADDEN. Mr. Speaker, I consider my membership in Congress equivalent to a membership on the board of directors of the great business corporation known as the United States, and I regard my position on the Post Office Committee as a member of the executive committee of the board of directors, with special reference to the work of the Post Office Department, and as such I feel it to be my duty to advance the interests of the corporation in every honorable way that will facilitate and systematize the transaction of the public business.

I regard it as one of the first obligations of a Member of Congress to make a thorough study of the particular work to which he is assigned, to familiarize himself with every detail of the Government service, and to utilize the information thus acquired to advance the public interest.

I regard the Post Office as the people's department, for it comes into contact with every individual in the land, and I look upon my membership on the Post Office Committee as a responsibility which should be seriously assumed.

Wherever it is possible to furnish better facilities or to exercise greater economy by putting the department on a better business basis, it should be done. The first consideration should be service to the people, and as it is not possible for all Members of the House to give careful study as to how this can best be done, the members of the Post Office Committee should, whenever possible, give them such information as will enable them to intelligently cooperate with the department and the committee to the end that the management of the department may have the cooperation which the importance and magnitude of the business justifies.

In any business corporation a recommendation from the head of a department for the institution of economies would be welcomed by the board of directors; indeed, the head of the department would not be considered as worthy to act in that capacity unless he called to the attention of the board of directors every modern method which he believed proper to apply. It is because of the close cooperation between the executive heads and the boards of directors of business cooperations that they succeed. Initiative upon the part of the head of a business corporation is not only encouraged but demanded by the board of directors, and wide latitude is always given to the head of the corporation in administrative affairs. That should be the case in governmental affairs, and wherever it is shown that the head of a department is willing to apply business methods in the conduct of his department he should be encouraged by the Congress to do so; indeed, the Congress should cooperate with him to that end. There should be no politics in the conduct of a business department of the Government. Members of Congress should not play politics; they should not permit the department head to do so. Strict business methods should be applied.

Two years ago the Postmaster General recommended the enactment of a provision reading as follows:

> Hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting, for the transaction of any post-office business which may be required for the convenience of the public.

His recommendation was adopted by the committee and approved by the House and Senate. Although both Houses adopted this provision, it did not become law because the post-office bill failed of passage on the last day of the Sixty-third Congress.

It is a matter of regret that the House committee failed to report the provision in the appropriation bill which recently passed the House, and a matter of still greater regret that the conferees on the part of the House failed to approve that provision which the Senate embodied in the administrative measures attached to the amendment to the postal savings-bank bill, which is now before the House for consideration.

If the provision had been approved by the House conferees, it would now be before us for consideration and undoubtedly would be adopted, and if adopted it would enable the Postmaster General to reorganize the department on a business basis and make a saving to the department of $10,000,000 a year and at the same time increase the efficiency of the service without taking any facilities away from the people.

Mr. LLOYD. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I will.

Mr. LLOYD. The saving would be made, would it not, in the reduction of the salaries of the postmasters?

Mr. MADDEN. It would be made by the substitution of superintendents of stations where now postmasters preside.

Mr. LLOYD. And those superintendents could be employed for a much less sum than is now paid to the postmasters for the discharge of the same duties?

Mr. MADDEN. They undoubtedly would; there is no doubt about that. I am going to get to that.

Mr. RUCKER. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. Yes, sir.

Mr. RUCKER. Does the gentleman think that the superintendents could be employed cheaper than the ordinary salary paid to a second or third class postmaster?

Mr. MADDEN. I am going to describe that, if the gentleman from Missouri will permit, and show exactly what effect it would have upon the service. In the great cities of the country the law provides:

> The Postmaster General, when the public convenience requires it, may establish within any post-office delivery one or more branch offices (stations or substations) for the receipt and delivery of mail matter and the sale of stamps and envelopes; and he shall prescribe the rules and regulations for the government thereof. But no letter shall be sent for delivery to any branch office contrary to the request of the party to whom it is addressed.
>
> 2. No station, substation, or branch post office shall be established beyond the corporate limits or boundaries of any city or town in which the principal office to which such station, substation, or branch office is attached is located, except in cases of villages, towns, or cities of 1,500 or more inhabitants not distant more than 5 miles, as near as may be, from the outer boundary or limits of such city or town in which the principal office is located. * * *

The arbitrary limitations of population and distance embodied in the second paragraph of the law above quoted operate as a bar to the application of the principle of consolidation to the detriment both of the department and of the public.

Of the 55,935 independent post offices now being operated, 46,760 are of the fourth class, where the compensation of the postmaster is less than $1,000. It should be apparent that this low compensation will not attract to the position of postmaster persons possessing the training, experience, and ability to administer the post office in the most efficient manner. The supervision of these small post offices, under the present system of organization, is conducted principally by correspondence from the department, supplemented by infrequent visits of post-office inspectors. In addition to the direct correspondence between the department and the 55,935 independent post offices, it is necessary for the auditor to maintain a separate account with each of these offices, which account is closed four times each year, and voluminous correspondence is conducted by the auditor in

the adjustment of these accounts every three months. Furthermore, supplies and equipment, including stamped paper, are furnished by the department separately for each of the independent post offices. The matter of stamped paper is particularly important. Under the present system it is necessary for offices to be furnished with stamped stock ample for three months. Most of the small offices have no adequate means of safeguarding this property of the Government, and the result is frequent loss by burglary and peculation.

From the standpoint of the public the present law prevents the extension of more effective postal service to small communities adjacent to or in the vicinity of larger post offices. Not only is the conduct of the post offices as they exist less efficient than it would be under consolidation with the larger offices, but the communities in which they are located are deprived of the better facilities which would flow from consolidated management, principally in the way of city delivery and collection service.

With a view to removing the limitations of the present law and paving the way toward simplified and improved administration by the department, as well as more effective service for the smaller communities throughout the country, the department has recommended the enactment of the following provision of law:

Hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting, for the transaction of any post-office business which may be required for the convenience of the public.

Under the proposed law the goal would be to establish territorial units of postal management, in each of which there would be one central office with as many nonaccounting branches and stations as the postal needs of the communities might require. It should be clearly understood that the attainment of this goal would be gradual.

The immediate benefits, however, would be great. The department would proceed to apply the law to the cases in which the immediate need for consolidation was most apparent.

The principal advantages which would accrue from the administration of the proposed law may be summarized as follows:

Each community in which a nonaccounting station or branch office is substituted for an independent post office will receive the benefits of improved service resulting from supervision by trained and experienced postal officials close at hand, and will be entitled upon installation of the requisite public improvements to the extension from the central office of city delivery and collection service.

The community will lose none of its local identity. Its name will continue to be carried in the Postal Guide and, so far as the public is concerned, there will be no change in the service except for improvement.

The establishment of each nonaccounting station or branch office in lieu of an independent post office will relieve the administration of the service in the following ways:

Direct correspondence with the department regarding the conduct of the office would be eliminated.

Direct accounting to the auditor and correspondence with the auditor on this subject would be eliminated.

The furnishing of supplies and stamped paper by the department would be discontinued. The supplies and stamped paper would be obtained from the central office in quantities sufficient for demands for one week. Opportunities for burglary and peculation would be minimized.

The proposed law has been objected to on the ground that it would destroy the identity of small communities and that it fixes no limit which the department may not exceed in the consolidation of post offices. This objection has been met by the suggestions contained in the Postmaster General's letters of March 18 and 20 to the chairman of the House Post Office Committee, to the effect that the proposed law contains the following provisions:

*Provided*, That there shall be at least one independent accounting office in every county.

*Provided further*, That the Postmaster General in establishing branch offices or nonaccounting offices in lieu of independent offices shall not change the name of the office because of the consolidation, and that all post offices so consolidated shall not be deprived of any postal facilities which they may have prior to the time of consolidation.

Does that answer the question?

Mr. CANNON. Will the gentleman yield?

Mr. MADDEN. I will.

Mr. CANNON. Now, this provision does not go into this bill?

Mr. MADDEN. It does not go into the bill, but it ought to be in the bill.

Mr. CANNON. And is not to be enacted into law this session?

Mr. MADDEN. Unless the House refuses to approve the conference report and sends it back.

Mr. CANNON. Precisely; and it will not be upon the Post Office appropriation bill?

Mr. MADDEN. Not this time, although it passed before.

Mr. CANNON. The gentleman is making a very strong speech and a very able one. I gather from his speech that in every county in the United States, as far as the recommendation of the Postmaster General is concerned, there will be one central post office?

Mr. MADDEN. Yes.

Mr. CANNON. And probably when the act goes into force what are now local post offices will be——

Mr. MADDEN. They would be stations.

Mr. CANNON. They would be stations.

Mr. MADDEN. Presided over by superintendents responsible to the postmaster at the county seat.

Mr. CANNON. Precisely; yet the postmaster of the county seat must have, in the larger counties, a corps of clerks to do the auditing; and when we multiply that by all the county seats in the country getting an independent auditing force in the various county seats, does not the gentleman think that that would be much more expensive, against the whole thing as provided for, than to let the accounting be done by the auditing office at Washington?

Mr. MADDEN. On the contrary, after having given two or three years of careful study to the question, I conclude it would be much more economical, to the extent of $10,000,000 at least, and much more effective and efficient.

Mr. BRITT. Will the gentleman yield?

Mr. MADDEN. I have only 30 minutes, but I will yield to my colleague on the committee.

Mr. BRITT. I would like to ask if the economy would not lie in lessening the large amount of accounting between the present post offices and the department?

Mr. MADDEN. There would be some.

Mr. HAMILTON of Michigan. Would this system go under the classified service?

Mr. MADDEN. It would. I am going to get to that.

The law recommended by the Postmaster General will enable the department to bridge the gap between the present unscientific and ineffective organization of the Postal Service and the organization of this service upon strictly scientific business principles recognized by every up-to-date business executive.

And I apprehend if the people knew the situation with respect to this that every Member of the House and every Member of the Senate would find himself deluged with telegrams demanding the enactment of this law. Oh, but you say, you take away a post office from some fellow that wants a job. There is only one in every community. The rest of the people have something to say and would say it if they understood the situation, and the purpose of my making this statement here to-day is with the hope that somehow or other information will get into the minds and hearts of the people.

Mr. FESS. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. FESS. Under this plan instead of 15 or 20 postmasters to be appointed in the county in which I live there will be one?

Mr. MADDEN. Yes.

Mr. FESS. Would not that be some relief to a Congressman?

Mr. MADDEN. It would be a great relief to you.

Mr. COX. Will the gentleman yield for a question?

Mr. MADDEN. Yes.

Mr. COX. I am particularly interested in the part of the gentleman's speech wherein he says he believes it will tend to bring about an economy of $10,000,000.

The gentleman remembers, does he not, that a few years ago the Postmaster General recommended that he be given authority to let out to a private bidder rural routes, to be given that bidder in each county in every congressional district in the United States? He proved conclusively, to my mind, that by paying to those contractors the same amount of money that is now paid to the highest priced star-route contractor in the United States it would save $18,000,000 a year. But we did not go very far with it in the House, did we?

Mr. MADDEN. I know you did not, and you may not get very far with this. But I think it is the duty of the members of the Post Office Committee to present the facts to the House and then allow the House to decide what it wants. I think we would be negligent in our duties if we did not present the facts.

If the provision referred to is enacted into law it will reduce the number of postmasters from 56,000 to 3,000.

The present method requires the preparation and settlement of approximately 1,150,000 monthly and quarterly accounts and upward of 5,000,000 separate remittances to the various depository offices, and this would be reduced in the proportion which 3,000 bears to 56,000 by the adoption of the proposed plan.

Mr. CANNON. Will my friend allow me to interrupt him right there?

Mr. MADDEN. Yes, sir.

Mr. CANNON. Does my friend say that that saving would be net? Does he not count something for the auditing in these 3,000 post offices?

Mr. MADDEN. No additional expense is required to do the auditing in these post offices. We have in Chicago, for example, to-day—a city of 2,500,000 people, covering an area of 200 square miles—one postmaster, 52 post offices, and over 51 of these post offices a superintendent presides, and he reports to the postmaster. And there is no such system anywhere in any business in all the world as has been inaugurated there.

The SPEAKER. The gentleman has spoken 30 minutes.

Mr. MADDEN. Mr. Speaker, may I have a few minutes more?

Mr. MOON. I have not the time to give.

Mr. MANN. Mr. Speaker, I ask unanimous consent that the time of the gentleman from Tennessee [Mr. MOON] be extended 10 minutes.

Mr. MOON. Mr. Speaker, I am not asking any unanimous consent. If the gentleman wants it and can use it, I have no objection.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the time of the gentleman from Tennessee [Mr. MOON] be extended 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MOON. I yield the time to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. I thank the gentleman.

I shall not allow any interruption now, I think; but if I finish before the 10 minutes is up, I shall be glad to permit interruptions.

It would enable the Postmaster General to establish one post office in each county, the postmaster of which would have supervision over all the other post offices within the county. It would place every man subject to the orders of the county postmaster under civil service, giving him permanent tenure, and encourage him to do the work better on that account. The department should be so reorganized as to place the First, Second, Third, and Fourth Assistant Postmasters General and all of the postmasters proposed to be named under the provisions of this law under civil service. Every man who enters the service should be eligible to promotion, from the lowest to the highest place in the department, whenever he proves himself qualified.

The adoption of such a system would invite a higher type of men into the service, enable them to learn the business from the bottom, and qualify them to fill the places at the top. Each man would be an expert. The business would be run by experts, as commercial businesses are run. The service would be more responsive to the people's needs than it is to-day.

The Congress should encourage the department by authorizing its reorganization and giving the Postmaster General an opportunity to show what can be done in the department by the introduction of business methods. Members of Congress would be relieved from the burden of selecting postmasters and from the many disagreeable things that confront them in connection with that work. They would have more time to attend to their legislative duties, and they would lose no prestige at home; on the contrary, the adoption of this measure would merit the plaudits of the American people and give the satisfaction to those who were responsible for its enactment of knowing that they had performed a service calculated to meet the wishes of the people by providing the best facilities possible to be devised for the transaction of the enormous business of this great department.

It may be asked, What will become of the fourth-class postmasters, where the compensation is small, and whether such offices would justify the appointment of a superintendent? I am frank to say that it would not; but in all the great cities of the country where they have one postmaster and numerous superintendents the Postmaster General also has the right to provide contract stations for the sale of stamps, registry of letters, and for the transaction of such other business as the community may require. Wherever a station with a superintendent would not be justified a contract station would be established and the business of the community carried on in that way.

There need be no fear on the part of any Member of Congress that the facilities for the transaction of the postal business will be curtailed by granting the Postmaster General the authority which I have outlined. The important question is, Does the Congress of the United States feel that the department ought to be put on a business basis? If it does, it will reject the report of the House conferees and send them back with instructions to report this provision of the bill favorably. If it does not, of course, it will adopt the conference report and thus place itself on record in favor of continuing the present antiquated spoils method of conducting the postal business of the country.

The progressive thought of the country will approve the adoption of the plan outlined here, for I am sure the people of America are anxious that their representatives shall, while furnishing them every facility which they ought to have, do so in the most scientific manner possible and with the greatest degree of economy.

The department is now employing more than 273,164 men. They are appealing to the Congress for pensions, and, judging from the sentiment which seems to prevail both in and out of Congress, the time is not far off when the enactment of some law to provide for the worthy superannuated employees of this great department must be enacted.

The adoption of the suggestion which I have outlined will make it possible for the department to save $10,000,000 annually, part of which, if need be, can be used to retire many of the men who have reached that stage in life where they are no longer able to do a young man's work.

In addition to making this saving and the possibility of its use in part for the purpose indicated, we will, by the enactment of this provision of law, have modernized the department, increased the facilities for the transaction of its business, encouraged new blood to enter the service, created a stimulus among the men for better work in the hope of promotion, taken the department out of politics and have shown our disinterested devotion to the cause of good government. [Applause.]

Mr. Speaker, I ask unanimous consent that I be permitted to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MADDEN. I submit the following under the leave to extend my remarks:

PAGES 126 TO 144, INCLUSIVE, OF HEARINGS ON THE POST OFFICE APPROPRIATION BILL BEFORE HOUSE COMMITTEE, EMBODYING DISCUSSION OF DEPARTMENT'S RECOMMENDATION FOR NEW LEGISLATION GOVERNING ESTABLISHMENT OF STATIONS AND BRANCH OFFICES (NONACCOUNTING).

BRANCH OFFICES.

The CHAIRMAN. This new item reads:

"That hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting offices, or stations, of any post office for the transaction of such postal business as may be required for the convenience of the public."

Now, as to that nonaccounting office, do you want to take up this matter now?

Mr. MADDEN. I think, if it is agreeable to the chairman, that the committee itself ought to take up that question of legislation and see how far we want to go.

The CHAIRMAN. I was asking you whether you wanted any further hearing from Mr. Roper on it.

Mr. MADDEN. I think we might want to talk it over first and then call him back.

The CHAIRMAN. Well, General, you can come back at any time.

Mr. STEENERSON. That will be agreeable.

(Thereupon the committee adjourned to meet Monday, January 10, 1916, at 10 o'clock a. m.)

—

COMMITTEE ON THE POST OFFICE AND POST ROADS,
HOUSE OF REPRESENTATIVES,
*Washington, D. C., Monday, January 10, 1916.*

The committee met at 10.30 o'clock a. m., Hon. JOHN A. MOON presiding.

Present: Representatives COX, ROUSE, BEAKES, AYRES, RANDALL, STEENERSON, MADDEN, and COPLEY.

STATEMENT OF HON. DANIEL C. ROPER, FIRST ASSISTANT POSTMASTER GENERAL—RESUMED.

BRANCH OFFICES.

The CHAIRMAN. I believe you testified to everything except this matter on page 47?

Mr. ROPER. Yes, sir.

The CHAIRMAN. Let me ask you about this matter:

"Hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting, for the transaction of any post-office business which may be required for the convenience of the public."

What is meant by that statement in there?

Mr. ROPER. We find in the operation of the Postal Service that we could give more satisfactory service if the Postmaster General had greater leeway in the matter of establishing stations than under the present law, which requires that the villages, towns, or cities shall have not less than 1,500 population and be located within 5 miles of the post office to which the proposed station is to be attached.

With the expanding Postal Service we are able to give to these outlying communities better facilities, as by establishing such stations we are able to extend the delivery service to such communities in many instances, and in many cases, by tacking on such outlying communities to the larger postal district, to give more satisfactory supervision. That is, the station would fall under the general supervision of a man more experienced in handling postal affairs. This measure also would add materially to the convenience and economy of distributing supplies, and keeping in general touch with the smaller locality. It is a matter which would naturally be very gradually administered. We are now, as you know under the law, gradually bringing such districts under this superior supervision when the conditions justify it. We

are simply seeking here a little more leeway in the administering of the station feature.

Mr. RANDALL. That provision was incorporated in the last bill which was filed, was it not?

Mr. ROPER. Yes; this was passed favorably upon by this committee a year ago, and, Mr. Chairman, in that connection I would like to make this general statement: In constructing our estimates this year, as well as the legislation, we have endeavored to follow what we believe to be the attitude of this committee as expressed last year. We have therefore passed over in our group of special recommendations the measures which you failed to act favorably on last year, and have grouped for this year only those on which we interpreted your attitude last year as being favorable. That is, passed on by this committee, passed by the House, and submitted to the Senate, where the bill died.

The CHAIRMAN. Have you got up a statement of the legislation you want outside of this report?

Mr. ROPER. Yes, sir; I have. These items of proposed legislation which we are seeking at this time include the elimination of the position of assistant postmasters; the reclassification of the salaries of supervisory officers in post offices, based on gross receipts; the reclassification of the salaries of station superintendents, based on receipts and on the number of employees; the establishment, when desirable, of nonaccounting branches of post offices to serve outlying territory; the advancement of fourth-class post offices to the presidential grade on the basis of annual instead of quarterly returns; the readjustment of postmasters' salaries on the basis of the receipts for the preceding calendar year instead of the year ended March 31; four-year terms for contract stations; and the payment of all substitute clerks and carriers at the uniform rate of pay of 35 cents an hour.

Mr. MADDEN. That is not following the attitude of the committee last year.

Mr. ROPER. I was about to say that that is not exactly in line with the attitude of the committee, but we have suggested this for the sake of uniformity and equitable treatment not out of line, we trust, with the attitude of the committee.

In this connection I also refer to two other matters which seem to be forced upon us and which I desire to bring to the attention of the committee again. These are the legislation in line with the Postmaster General's recommendation for a guaranty fund in lieu of the surety bond for postmasters and other postal employees; and the acquisition, in conjunction with the post offices, of the telegraph and telephone utilities in Alaska, Porto Rico, and Hawaii. This is a general list, and inasmuch, Mr. Chairman, as we have now discussed all of these items except the bonding feature, I should like to ask that the committee consider what I am about to submit with regard to the bonding feature in executive session. I feel that it is my duty to submit it in executive session.

The CHAIRMAN. I want to ask you a few questions about this other matter before we get to that.

Mr. MADDEN. So do I, Mr. Chairman.

The CHAIRMAN. It is your purpose in establishing a nonaccounting office to extend the jurisdiction of the main or central office beyond 5 miles, you say, the limit in taking in these nonaccounting offices?

Mr. ROPER. We are removing the limitations and leaving that to administration.

The CHAIRMAN. So that if at the county seat one county has a large town and you saw fit to do it, you would take in the post offices of the adjoining county?

Mr. ROPER. We could make the unit what good administration proves to be the best.

The CHAIRMAN. Whether it was 5 miles or 100 miles, you make it what you saw fit?

Mr. ROPER. Yes, sir.

The CHAIRMAN. Is that intended to apply to anything except fourth-class offices?

Mr. ROPER. The legislation sought would make it broad enough to apply to other offices.

The CHAIRMAN. To make it apply to other offices—first, second, and third class offices?

Mr. ROPER. To make it apply to any offices where the administration of the service showed it necessary, practicable, and best for the service and the people affected.

The CHAIRMAN. Then, for instance, at Indianapolis, where you have a post office, you could make all your second, third, and fourth class offices subordinate to the Indianapolis office that you saw fit in the State of Indiana?

Mr. ROPER. Of course the object of this is to create practical units. It would have to be determined from experience in handling this service what the most workable and satisfactory units would be.

Mr. STEENERSON. Did I understand the answer to be in the affirmative?

The CHAIRMAN. Yes. That would have the effect of putting under civil service all the offices you saw fit to put under the control of the chief office, would it not?

Mr. ROPER. Under the present civil-service law it would have the effect of making the postmaster of the office consolidated eligible for classification as station superintendent.

The CHAIRMAN. Do you think that would be satisfactory to the people to have their first, second, and third class offices all subordinate to another first-class office; to have no postmasters, excepting superintendents, appointed under the civil service for them?

Mr. ROPER. I could hardly see how the people would recognize any difference at all, because the station would carry the same name as the offices heretofore carried, and it would carry all the facilities, too.

Mr. BEAKES. They would get city delivery, would they not?

Mr. ROPER. In many instances they would get city delivery, and in all instances they would have better supervision. The offices would be more readily checked up than now, and the cost of auditing accounts would be materially reduced. The losses by burglary would be reduced for the reason that the stock of stamps would be replenished from day to day by the central post office.

The CHAIRMAN. The postmaster, however, would be just as apt to come from some other town as that one, would he not?

Mr. ROPER. It would make it possible to establish an interchangeable personnel in the service.

The CHAIRMAN. And civil service throughout?

Mr. ROPER. Civil service throughout.

Mr. MADDEN. This would put the Postmaster General in position to appoint one postmaster in the county, would it not, and would put all the other post offices in the county as nonaccounting offices, subject to his jurisdiction?

Mr. ROPER. If the county should be the unit.

Mr. MADDEN. It would make it possible?

Mr. ROPER. Yes, sir.

Mr. MADDEN. That would reduce the number of accounts to be kept in the general office from, say, 60,000 to 3,000, that being the number of counties in the United States, would it not?

Mr. ROPER. Yes, sir; it would very materially reduce the work here.

Mr. MADDEN. It would make the tenure of office of the men who are now postmasters, in every case except those that would not be changed, permanent?

Mr. ROPER. The Postmaster General has already recommended the classification of postmasters of the third and second classes.

Mr. MADDEN. It would introduce a system similar to the system we have, say, in the big cities, like New York and Chicago. For example, we have 2,500,000 people in Chicago, and we have 1 postmaster and 52 post offices, in effect, because we have 51 stations outside of the post office, over each of which there is a superintendent presiding.

Mr. ROPER. From an administrative standpoint, we look upon the entire county as an enlarged city.

Mr. MADDEN. Surely. And you believe that this suggestion is a suggestion in line of good administration for the department, do you not?

Mr. ROPER. I do.

Mr. MADDEN. I am inclined to agree that it is, myself.

Mr. COX. What is your judgment as to economies it would bring about, cost of administration, etc.? Would it lessen or increase them?

Mr. ROPER. I think anything which adds to the efficiency of operation necessarily results in economy, and in this we would certainly have very material efficiency added to the service.

Mr. COX. Have you any data or compilations along that line showing the approximate amount that would be saved to the Government if a plan of that kind should be worked out?

Mr. ROPER. I have no data except the information relating to localities which have become stations during this administration, compared with the operation of those stations prior to the time when they were stations.

Mr. COX. Are you in a position to put that data in the record?

Mr. ROPER. We can compile some data along that line and will put it in the record.

Mr. COX. I wish you would do it.

(The following is the data referred to:)

"The following statement refers to a majority of instances where the present administration has substituted classified postal stations for independent post offices and truly reflects the financial changes resulting from the consolidation of the offices named, in so far as the expense for clerical and carrier assistance and the rental of quarters are concerned.

"Except in the cases of Theological Seminary, Va., Secaucus, N. J., and Cedar Point, Ohio, all of the independent post offices replaced by classified stations were of the presidential class, and in every instance City Delivery Service was extended to the territory served by the independent post office.

"Where the word 'postmaster' appears after the title 'superintendent' or 'clerk,' under the heading 'Cost after consolidation,' it means that the postmaster was transferred to the classified service at the compensation stated. In some instances the postmaster asked that he be not classified, while in other cases, owing to the advanced age and the lack of previous postal experience, it was deemed inadvisable to classify the postmaster.

"In addition to the consolidations referred to in the statement a large number of fourth-class post offices were replaced by contract stations attached to first or second class post offices and City Delivery Service was extended to the territory served by the fourth-class offices. The contract stations were established at an expense approximating the salary of the fourth-class postmaster, and in many instances the postmaster was appointed clerk in charge of the contract station.

DAYTON, OHIO.

Consolidation of National Military Home. Effective July 1, 1914.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,500 |
| Clerk hire | 300 |
| Rent, light, and fuel | 0 |
| | 1,800 |
| Cost after consolidation: | |
| Two clerks, at $800 each | 1,600 |
| One carrier | 800 |
| Rent, light, and fuel | 0 |
| | 2,400 |

WEEHAWKEN, N. J.

Consolidation of Secaucus. Effective May 1, 1914.

| | |
|---|---|
| Cost before consolidation: Salary of postmaster | $1,000 |
| Cost after consolidation: | |
| One clerk (postmaster) | 800 |
| Rent, light, and fuel | 300 |
| Auxiliary clerk hire | 375 |
| 1 carrier | 800 |
| Horse hire | 360 |
| | 2,635 |

SANDUSKY, OHIO.

Consolidation of Cedar Point. Effective June 13, 1915.

This is a summer resort station open only during three months of the year.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,000 |
| Clerk hire | 240 |
| | 1,240 |
| Cost after consolidation: | |
| Auxiliary clerk hire | 481 |
| Rent, light, and fuel | 200 |
| | 681 |

MONTCLAIR, N. J.

Consolidation of Verona. Effective April 1, 1914.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,400 |
| Clerk hire | 240 |
| Rent, light, and fuel | 360 |
| | 2,000 |
| Cost after consolidation: | |
| Superintendent (postmaster) | $1,100 |

| Two city carriers, at $800 each | 1,600 |
| Rent, light, and fuel | 480 |
| | 4,260 |

DENVER, COLO.

Consolidation of Englewood. Effective December 1, 1913.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,500 |
| Clerk hire | 180 |
| Rent, light, and fuel | 204 |
| Rural carrier service | 110 |
| | 1,994 |
| Cost after consolidation: | |
| One clerk (postmaster) | 800 |
| One clerk | 800 |
| Three carriers, at $800 each | 2,400 |
| Rent, light, and fuel | 600 |
| | 4,600 |

ALEXANDRIA, VA.

Consolidation of Theological Seminary. Effective January 1, 1915.

City delivery service was extended to a large territory by authorizing one regular carrier in place of 12 hours' auxiliary service a day.

| | |
|---|---|
| Cost before consolidation: Compensation of postmaster | $742 |
| Cost after consolidation: | |
| One clerk | 800 |
| Rent, light, and fuel | 20 |
| | 820 |

JOHNSTOWN, PA.

Consolidation of Conemaugh. Effective August 1, 1915.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,900 |
| Clerk hire | 600 |
| Rent, light, and fuel | 500 |
| | 3,000 |
| Cost after consolidation: | |
| Superintendent (postmaster) | 1,100 |
| Two clerks, at $800 each | 1,600 |
| Four carriers, at $800 each | 3,200 |
| Rent, light, and fuel | 500 |
| | 6,400 |

DETROIT, MICH.

Consolidation of Hamtramck. Effective January 25, 1915.

This office would have advanced to the second class July 1, 1915, when the cost of the independent office would have been $13,645 a year.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,600 |
| Clerk hire | 1,060 |
| Rent, light, and fuel | 405 |
| | 3,065 |
| Cost after consolidation: | |
| Four clerks, at $800 each | 3,200 |
| Six carriers, at $800 each | 4,800 |
| Rent, light, and fuel | 2,100 |
| | 10,100 |

HOUSTON, TEX.

Consolidation of Houston Heights. Effective March 1, 1915.

Prior to consolidation a large part of the territory attached to this office was served by city carriers from the main office at Houston. The transfer of carriers and clerks to the station permitted the serving of additional territory without authorizing additional carriers or clerks other than the classification of the postmaster.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,200 |
| Rent, light, and fuel | 264 |
| | 1,464 |
| Cost after consolidation: | |
| Superintendent (postmaster) | 1,200 |
| Rent, light, and fuel | 400 |
| | 1,600 |

WHEELING, W. VA.

Consolidation of Elm Grove. Effective November 1, 1915.

The number of city carriers attached to the Wheeling office being in excess of the requirements, it was possible to extend city delivery service to Elm Grove without authorizing additional carriers.

| | |
|---|---|
| Cost before consolidation: | |
| Salary of postmaster | $1,600 |
| Clerk hire | 360 |
| Rent, light, and fuel | 360 |

| Two clerks, at $800 each | 1,600 |
| Three carriers, at $800 each | 2,400 |
| Rent, light, and fuel | 600 |
| | 5,600 |

Mr. MADDEN. I could illustrate one or two cases myself, Mr. Cox. For example, Chicago to-day has about 200 square miles of territory. Before the annexed outside territory came in we had 37 square miles of territory. With each new annexation we brought in one or more post offices, over which postmasters presided. After annexation the post office, with the postmaster, was discontinued. The post office itself was continued as a station with a superintendent. The salary of the superintendent was probably not in any case more than one-half the salary of the postmaster before it came in.

Mr. ROPER. Not less than two-thirds and in some cases more. The minimum salary paid to a superintendent of a station is $1,200. As the majority of offices consolidated with larger offices are of the third and fourth classes, consolidation usually results in an increase in the salary of the postmaster of the discontinued office. Although when larger offices are consolidated the postmasters of the discontinued offices suffer a reduction in salary, they are compensated for this by being made secure in their positions.

Mr. MADDEN. I would not think it was that much. Perhaps it may be. I would not undertake to say certainly. But I think it is agreed by everybody that the service rendered by the superintendent of the station is infinitely more satisfactory than the service rendered by the post office as such before the annexation.

Mr. COX. Right in that connection you have found from experience out there that there has been a great economy in the way of saving of salaries?

Mr. MADDEN. Oh, yes.

Mr. COX. Now, in the way of supplies and reports backward and forward, have you any estimate of that?

Mr. MADDEN. They all make their reports to the postmaster of the city of Chicago and he makes his report to the Postmaster General, which only makes one account from Chicago between the general office and Chicago, whereas if we had the 52 post offices we would have 52 reports and 52 sources of supplies.

Mr. COX. And the department here would be running 52 accounts with 52 postmasters in the city of Chicago?

Mr. MADDEN. Yes, sir.

Mr. COX. Whereas now it is only running one account?

Mr. MADDEN. That is right. That is what will happen all over the country if this provision recommended by the Postmaster General be adopted.

The CHAIRMAN. If you had just one office in each State, you would have 48 accounts?

Mr. MADDEN. Yes; that is true.

The CHAIRMAN. And if you had only one in the United States you would only have one account. That is the logic of that.

Mr. STEENERSON. About how many offices would there be if this new provision were enacted into law? Could you give an estimate?

Mr. ROPER. I would state, Mr. STEENERSON, that these units would have to result from experience in operating the service. I mean the size of the units would have to be determined from experience. It would be impossible to advise in advance just how large or how small those units should be.

Mr. STEENERSON. It has been suggested here that there are 3,000 counties in the United States, approximately, and there are approximately 60,000 post offices now.

Mr. ROPER. Yes; 56,000 post offices.

Mr. STEENERSON. So it might reduce it to 6,000?

Mr. ROPER. There are sometimes several important municipalities within one county. That might make it necessary to have in some counties several units, but there would be a great many counties, no doubt, in which one unit would answer.

Mr. STEENERSON. Probably in the majority?

Mr. ROPER. Probably in the majority of the counties of the country.

Mr. STEENERSON. Right here I should like to have you give the substance of the law now as it is on the subject, so we can compare it with the proposed provision.

Mr. ROPER. I will insert it in exact terms and ask the stenographer to insert the law.

Mr. STEENERSON. We should like to have your version so we can understand how it is interpreted.

Mr. ROPER. It simply gives to the Postmaster General the right to extend the service of these large communities so as to take in communities where the population is as much as 1,500, and where such communities are within a radius of 5 miles of the post office to which it is to be attached.

Mr. STEENERSON. You might insert the exact language.

Mr. ROPER. It is as follows, Postal Laws and Regulations, which is the law:

"SEC. 249. The Postmaster General, when the public convenience requires it, may establish within any post-office delivery one or more branch offices (stations or substations) for the receipt and delivery of mail matter and the sale of stamps and envelopes; and he shall prescribe the rules and regulations for the government thereof. But no letter shall be sent for delivery to any branch office contrary to the request of the party to whom it is addressed.

"2. No station, substation, or branch post office shall be established beyond the corporate limits or boundaries of any city or town in which the principal office to which such station, substation, or branch office is attached is located, except in cases of villages, towns, or cities of 1,500 or more inhabitants not distant more than 5 miles, as near as may be, from the outer boundary or limits of such city or town in which the principal office is located."

Section 252 of the Postal Laws and Regulations:

"2. No post office established at any county seat shall be abolished or discontinued by reason of any consolidation of post offices made by the Postmaster General under existing law * * *: *Provided, however*, That this provision shall not apply to the city of Cambridge, Mass., or to Towson, Md., or to Clayton, St. Louis County, Mo."

Mr. COX. I wish to ask you a question in that connection. Practically the plan that you are seeking to have incorporated here is now in force in the large cities, is it not? Only one post office, and all the rest of the stations accounting to the post office?

Mr. ROPER. Yes. We have now, of course, the service in that respect organized by municipalities, as you say. Then we have around these municipalities certain communities which have been tacked on for the purpose of giving them city-delivery service.

Mr. COX. In what cities do you have this kind of service in force?

Mr. ROPER. In nearly all of the large cities.

Mr. COX. Your idea now, if I gather it, is to simply enlarge and to extend that service out over the State, or out over the United States?

Mr. ROPER. We are asking authority to do that when it seems to be in the interest of the service. There are no fixed units in our minds at this time, and I doubt whether you could fix uniform units for the entire country. You would have to deal with the conditions as they exist.

Mr. COX. Under your present system of only having one accounting officer in the cities, practically, like Chicago, there is no question but what we have better service under the present system than we would have if we had 52 different offices, is there?

Mr. ROPER. I think that we have absolutely uniform testimony that the service is superior.

Mr. COX. Is superior?

Mr. ROPER. Yes.

Mr. COX. Supposing that the department here, just as an illustration, was compelled to deal with 52 different post offices in the city of Chicago, instead of with only 1. How much additional cost would that throw on the department? Have you any idea at all?

Mr. ROPER. I shall have to ask the auditor. I will endeavor to get the auditor to put that in a statement.

(The following statement has been furnished me by the Auditor for the Post Office Department:)

"PRESENT SYSTEM.

"In round numbers, there are 56,000 post offices in operation. In addition, there are 6,000 branches and stations and 43,000 rural-delivery routes, which collect and deliver mail, sell stamps and money orders, and serve the public in much the same manner as regular post offices. It is generally admitted that the public is more efficiently served on rural routes and at stations and branches than at the 47,000 fourth-class post offices because rural carriers and clerks-in-charge are under the immediate supervision of the postmaster at a large office, and cases of incompetency, neglect of duty, or improper conduct are speedily disclosed and corrected. On the other hand, the fourth-class postmaster is accountable to the department at Washington direct. At the time he assumes charge of the post office there is usually no one to instruct him in the performance of his duties, and he must acquire the routine details of conducting his office as best he can unless he is fortunate enough to secure the assistance of a post-office inspector. Nor has the department any means of keeping informed as to the character of the service which he subsequently renders, except through an occasional visit by a post-office inspector, complaints on the part of the public, and reports from the Auditor for the Post Office Department relative to the nonrendition of accounts or failure to deposit surplus postal and money-order funds.

"The system of accounting at post offices is also unsatisfactory, as the maintenance of so many thousands of independent crossroads post-offices necessitates the preparation and settlement of approximately 1,150,000 monthly and quarterly accounts each year and the transmission of upward of 5,000,000 separate remittances (many of them consisting of only a few dollars) to the various depository offices. Not only does the maintenance of such a cumbersome system materially augment the clerk-hire cost, but it likewise necessitates the holding of larger money-order reserves and increases the loss by burglary, fire, and other unavoidable casualties.

"PROPOSED SYSTEM.

"By making the county the unit and each post office located therein subsidiary to one main office situated at the county seat the number of accounting offices would be reduced from 56,000 to 3,000. The county postmaster would be assisted by a clerk in charge, under his immediate supervision, at each subsidiary office, instead of a regularly appointed postmaster and the business conducted in precisely the same manner as at stations in the larger cities. All supplies would be sent to the county postmaster direct, and the subsidiary offices would obtain their stocks from him in small quantities daily, weekly, or as often as local conditions might require. All surplus funds would likewise be turned in at the time of getting additional supplies. Under this plan the stocks of money-order forms, postal-savings certificates, stamps, and other supplies could be reduced to a fraction of the amount now carried, thereby reducing the amount of losses sustained from fires, burglaries, etc.

"As postmasters at the larger offices are almost invariably selected from the ranks of successful business men of demonstrated executive ability, there can be no doubt that the shifting of the administrative supervision in the manner outlined would result in an immediate and marked improvement in the character of the service rendered to the general public.

"SYSTEM OF ACCOUNTING AT POST OFFICES.

"The stamp account and postal account should be combined and rendered monthly instead of quarterly, as at present. This and the decrease in the number of accounting offices would reduce the number of accounts to be rendered and settled from 1,150,000 to 110,000 annually and make it possible for the department to complete the settlements and compile a monthly financial statement covering the entire fiscal operations of the service within 30 days after the close of each month, and in time to be utilized by the various officers of the department in the administration of the service.

"ADMINISTRATIVE EXAMINATION OF ACCOUNTS.

"The preliminary administrative examination and journalizing which has operated so successfully with respect to mail transportation and supply accounts, representing annual disbursements of $100,000,000, and revenue collections on account of stamps and stamped paper totaling upward of $250,000,000, should be extended to the combined monthly stamp and postal accounts of postmasters.

"The audit of postmasters' money-order accounts presents a radically different problem from that encountered in any other class of Government accounts, due to the fact that money orders are valid for payment for 12 months from the last day of the month of issue. It follows, therefore, that a postmaster's money-order account can not be finally audited until all orders issued by him have either been presented for payment and returned as vouchers or become invalid by lapse of time. Manifestly, under such conditions it would be impracticable to make a double examination of money-order accounts—once in the Post Office Department and again in the Treasury Department. After thorough consideration, I have reached the conclusion that the system worked out by the Dockery Commission, after months of investigation and study and subsequently enacted into law, is still the best solution of that problem. Moreover, the findings of that commission are further strengthened by reason of the introduction of automatic electric machinery, which has to a large extent eliminated the human element in the audit, cut the cost in half, and placed it on a plane of almost absolute mechanical accuracy.

"FINAL AUDIT AND SETTLEMENT OF ACCOUNTS.

"As outlined, the proposed system contemplates that the monthly postal savings and consolidated stamp and postal accounts from the 3,000 accounting offices shall be sent to the Post Office Department direct for administrative examination and journalizing, after which the accounts, copies of the journal, and all supporting vouchers, pay rolls, and abstracts shall be sent to the Auditor for the Post Office Department for final audit and settlement. Judging from my experience in the settlement of accounts in this office, I am of the opinion that the additional labor incident to the administrative examination of the postal accounts, pay rolls, and vouchers from the 3,000 accounting offices will be about offset by the saving resulting from the reduction of the number of postal savings accounting offices from 9,000 to 3,000, and most certainly will this be the case if modern labor-saving machinery is utilized in the various administrative bureaus affected by the change. The change in system will also make possible an initial saving of from $75,000 to $100,000 annually in the auditor's office. Past experience teaches that in the introduction of radical changes in system the initial saving which may be effected is usually only about one-half of what may be expected eventually.

"In my opinion, the proposed reorganization of the service, if carried into effect, will result in more effective administrative supervision of the field operations, insure better postal service to the public, provide a more efficient system of accounting, and result in a large saving in cost, both in the field offices and in the various administrative bureaus of the department."

Mr. COX. I wish you would. I suppose the same system in force in Chicago is in force in New York, Philadelphia, Boston, and St. Louis, is it not?

Mr. ROPER. Certainly. In Boston we have about 80 stations.

Mr. MADDEN. You go outside of the city of Boston?

Mr. ROPER. Yes, sir; we take in municipalities like Cambridge, the university city of Boston, Brookline, Chelsea, etc.

Mr. MADDEN. For example, we have some stations in Chicago with as many as 200 men—I think one, at least—and I think the superintendent of that station, which is the Canal Station, gets about $2,200 a year, if I am not mistaken.

Mr. COX. As postmaster he would get $4,000?

Mr. MADDEN. From 160 to 200 men would be a big post office, would it not?

Mr. COX. It would; surely.

Mr. MADDEN. You can imagine what he would get if he was postmaster.

Mr. COX. Take the State of Indiana, with Indianapolis as the center, and it is nearly the center of the State. Would it be your idea to gradually work the plan out over the State so as to make Indianapolis the accounting office for the whole State of Indiana?

Mr. ROPER. That would not be my idea. That would be too large a postal district.

Mr. COX. Too large a territory?

Mr. ROPER. If you will permit me to give an offhand opinion, I should say that, as a rule, the counties of Indiana would constitute about as large districts as would be found practicable for this purpose.

Mr. COX. That would mean 92 postmasters in the State of Indiana, and the remainder of them stations?

Mr. ROPER. Probably we would have to make exceptions to that and deal with these large municipalities as separate districts.

Mr. COX. But in rural communities, where you have 1,000 to, say, 3,000 inhabitants, you would make one town in each county the accounting office and the rest of them to be served from there?

Mr. ROPER. The county, or part of county agreed upon, would constitute the unit, and in that unit there would be one accounting office and the others would be stations of that office.

Mr. COX. The head of the accounting office would be the postmaster for that territory?

Mr. ROPER. He would be the postmaster for that territory.

Mr. COX. And he would be an appointed officer?

Mr. ROPER. Yes, sir.

Mr. COX. And the stations would be under civil service?

Mr. ROPER. Stations would be under civil service.

Mr. RANDALL. Gen. Roper, in the matter of auditing the accounts of the 52 stations of the Chicago post office it was to be shown in the record the amount that is saved to the department at Washington on that account. Is it not the fact that the accounts of those 52 stations will have to be audited in the Chicago post office instead of being audited here, and would it not cost as much to audit them there as in the Post Office Department in Washington?

Mr. ROPER. We find not. That is a question for the auditor to answer, but it seems to me that the auditing can be done much more expeditiously and much more economically by these accounting offices. The former is very important, namely, the expedition. We have been, as you know, for a number of years endeavoring to lessen the period between the transaction and the audit, in order that we might get in closer touch with the transactions of the post offices of the country with regard to the handling of our funds.

Mr. MADDEN. So you keep these accounts——

Mr. ROPER. I can see no other way in which it can be made and kept current the postal accounts.

Mr. RANDALL. I refer only to expenses. It strikes me that you are better equipped in the auditor's office here to audit accounts than you would be in Indianapolis or Topeka or any such place as that.

Mr. ROPER. I am unable to see why these districts could not be made just as effective, through their knowledge of local conditions, as we are in the auditor's office in Washington; but a more important feature than you have mentioned is getting this auditing on a current basis and checking and protecting the revenues of the Government.

Mr. ROUSE. This only could be applied to presidential offices, could it not? For instance, if you had a county without a presidential office in it, you could not establish this provision, could you?

Mr. ROPER. Oh, yes.

Mr. MADDEN. Yes; because it would make it presidential. If you take the receipts of the whole county it would make it presidential; do you not see?

Mr. ROUSE. But could you do that? There are a number of counties, take for instance in the mountains, where you have nothing but fourth-class offices; some in other sections that are not mountainous; for instance, Mr. COX's district.

Mr. MADDEN. But if you took the aggregate receipts of all fourth-class offices in that county, that would make one presidential office.

Mr. ROUSE. But that is not contemplated; is it, General?

Mr. ROPER. We have endeavored to ask you here for legislation that will permit us to work this out in the most feasible and practicable manner. I can not undertake to say to you now just what experience will show to be the most practicable unit.

Mr. ROUSE. Let me get back to that original proposition again. I referred to Mr. COX's district, which is not fair. But I will take my own district, for instance. I live in a county that has not a presidential office. I know of one town in the county, the county seat, with less than 200 people. It has a fourth-class office. There is not one presidential office in the county. The nearest presidential office to my home is 15 miles away, at Covington, Ky., in an adjoining county. Could Covington be made the accounting office and all of the offices in my home county get their mail by star routes; could they be made to account to the Covington office under this plan?

Mr. ROPER. As I have stated in answer to Mr. COX's question, I feel now that the county is as large a unit as we would want to deal with, and even in a county where there are several municipalities that county might be subdivided into further units.

Mr. AYRES. Under this plan the second and third class post offices come under the same plan, and the fourth class being under civil service.

Mr. ROPER. The Postmaster General has already recommended the classification of the postmasters of the second and third classes, and this would naturally result in classifying the offices that would be consolidated with the accounting office.

The CHAIRMAN. If there was only one first-class office——

Mr. ROPER (interposing). There might be some counties where the office might not be rated as a first-class office—might be rated second class.

The CHAIRMAN. Say the program for change put the second and third class offices under civil service; presidential offices would only be first class?

Mr. ROPER. Yes; really the approval of the recommendations that the Postmaster General has made accomplishes that.

Mr. RANDALL. Would it not be possible, and would it not be the policy of the department, to establish a number of small stations and rural routes where fourth-class postmasters have been discontinued on account of the establishment of rural routes? Would it not be possible to restore service, to get the same accommodations that the fourth-class post office formerly afforded, by establishing small stations?

Mr. ROPER. As I say, we no doubt would find through experience that such conditions as you mention would arise, but in advance of any experience along this line I could not say whether the suggestion that you have made would be considered or not. It might be.

Mr. MADDEN. If this suggestion should be adopted and the county was made the unit, or whatever was made the unit would be made large enough, the unit would be made large enough so that the postmaster appointed for the unit would be the first-class postmaster. It necessarily would be a first-class post office, because the receipts within the unit would be large enough to justify his appointment as such.

Mr. ROPER. In answer to the chairman, I have just said that I presume that would be the case in most instances, although there are some small counties, no doubt, where the postmaster would not be ranked perhaps above the second class.

Mr. MADDEN. But there would not be anything below the first and second class?

Mr. ROPER. First and second class offices.

Mr. MADDEN. And all fourth-class postmasters would be done away with and superintendents of stations would take their places?

Mr. ROPER. No; they would not be done away with. The fourth-class postmaster would simply become the superintendent of the station or clerk in charge.

Mr. MADDEN. That is what I say. He would not be a postmaster any longer, but the superintendent of a station?

Mr. ROPER. For all intents and purposes he is a postmaster.

Mr. MADDEN. Suppose he is a postmaster; what would be the basis of pay for the fourth-class postmasters?

Mr. ROPER. You are here providing a scale in this bill for the payment of station superintendents.

Mr. MADDEN. But that scale generally does not go as low as the salaries of those fourth-class postmasters?

Mr. ROPER. The lowest salary we could have would be an $800 clerk, the entrance grade.

Mr. MADDEN. That is too much to pay these men, is it not? Suppose the man's salary as fourth-class postmaster amounts to but $200 or $300; are you going to put him under civil service and pay him $800?

Mr. ROPER. You understand we have different kinds of stations where that might result in establishing not a classified but a contract station, with a clerk in charge receiving a salary as low as $50, based upon the business of the station, the same as is now done in large cities.

Mr. STEENERSON. I think there are probably 25 post offices in my district where the postmaster's salary is less than $50 a year. Would their salary be raised under this plan or would it be reduced?

Mr. ROPER. In all probability the salary of such postmaster would remain the same as at present. We probably might not disturb your district at all, if it were not in the interest of better service for your district. The object of this is to improve the service, and if we could not get better service through the plan here suggested we would maintain the present service.

Mr. STEENERSON. But the suggestion made by Mr. MADDEN that in counties where there are no second-class and no third-class offices, no presidential offices, that all the offices might be consolidated so as to form a presidential office; that is not contemplated by this, is it?

Mr. ROPER. No; he used the word "might."

Mr. STEENERSON. But it might not. As I read this proposed law you would not have any such authority. You would have to change your language in this provision if you were going to do that, because this proposed language only authorizes you to consolidate with some existing third or second class office or first-class office. I do not think you can create or consolidate offices in a whole county and make that kind of office a presidential office.

Mr. ROPER. I will read the language:

"That hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting offices or stations, of any post office for the transaction of such postal business as may be required for the convenience of the public."

Mr. MADDEN. That would give him the right, then, Mr. Roper, to appoint a superintendent of a station where it was justified instead of a postmaster, or it would give him a right to establish a contract station where he would not be justified in appointing a superintendent of a station.

Mr. ROPER. Yes; or maintain the present system.

Mr. MADDEN. Yes; either one.

Mr. ROPER. Yes, sir.

Mr. BEAKES. Would there not be economy in the shipment of supplies from Washington to the central post office instead of to the several post offices?

Mr. ROPER. I will answer for the Fourth Assistant on that. In my opinion it will effect very great economy in that respect, but a greater economy than even the one you have mentioned would be the better care of supplies.

Mr. BEAKES. I was going to speak of that.

Mr. ROPER. Better supervision.

Mr. BEAKES. Has not the department found that these offices have no use for a great many of the supplies, and would they be likely to get those supplies if they asked for them from the central post office?

Mr. ROPER. Not only that, but this central postmaster could deal more equitably with the demand and conditions of these other offices accounting to him than probably could be done from Washington.

Mr. BEAKES. Would it not be possible to work out a scheme which would preserve the local communities by allowing them to keep the name of the post office while putting them on the station basis?

Mr. ROPER. That is what I intended to say in the outset. It is our idea not to disturb the name, not to infringe on the pride of the community which it may have in regard to its name; to give the community everything it now has and a superior service to what it now has.

Mr. RANDALL. Would you object to the addition of language something like this: "Except where the sentiment of the offices proposed to consolidate with the other was clearly against such a consolidation"?

Mr. ROPER. I regard the Postal Service, Mr. RANDALL, as the people's service. We can not administer this service out of harmony with the

will of the people. We do not undertake to do it. Hence the phraseology where we say, "As may be required for the convenience of the people."

That language cares for the point that you have in mind. The convenience of the people reflects, of course, the sentiment of the community.

Mr. STEENERSON. Is there not another point, General, in which this would be an improvement in bringing about supervision of the smaller offices? To illustrate: Most of the smaller offices that I know of have not seen an inspector, a post-office inspector, for four or six years. They do not get any instruction until about the time for them to go out—until their four years are nearly up. They would have that instruction if they were under a central post office, would they not?

Mr. ROPER. True. This is a little bit out of the line of the hearing, but I should like to say, Mr. BEAKES, that we are endeavoring to correct that as much as we can by sending out inquiries to be answered by all these fourth-class postmasters at the end of every quarter. These inquiries develop the way they are conducting their offices and enable us to check up and see just how much out of line they may be. But the supervision which we are seeking under this particular provision will be superior, because it keeps in even closer touch with them.

Mr. STEENERSON. You spoke of a sentiment of the patrons. Now, in these recent consolidations—for instance, in Boston—have you consulted the sentiment of the people?

Mr. ROPER. The consolidations in the Boston district were made in the administration immediately preceding this.

Mr. STEENERSON. Have you heard of any dissatisfaction?

Mr. ROPER. There was some dissatisfaction growing out of what would appear to have been a too rapid consolidation. We have in Boston about 80 stations, and the previous administration absorbed a great many large communities. Among them was Lynn, the large shoe-manufacturing community adjacent to Boston. In the case of Lynn some protests were filed, which we carefully investigated, and after due investigation reached the conclusion that Lynn should be kept as a postal district to itself, and we therefore have removed Lynn from the station classification made under Mr. Hitchcock's administration, and it is now a separate postal district. We discovered, Mr. STEENERSON, that Lynn was a better district to itself. We have other offices consolidated with Lynn.

Mr. STEENERSON. How was it about Cambridge?

Mr. ROPER. In the case of Cambridge I know of no special opposition.

Mr. STEENERSON. And you have never heard of any?

Mr. ROPER. I would not go so far as that, Mr. STEENERSON, because I should have to refer to department files for positive data.

Mr. STEENERSON. When was that included as a substation?

Mr. ROPER. We have made no consolidation in and around Boston during this administration.

Mr. STEENERSON. They were all made before?

Mr. ROPER. Before my connection with the Postal Service.

Mr. STEENERSON. But under the same law now in operation?

Mr. ROPER. Under the law now in operation. We have not disturbed that district except as to Lynn——

Mr. STEENERSON (interposing). You then retained Lynn as an independent post office?

Mr. ROPER. Yes, sir.

Mr. STEENERSON. If a similar discontent among the patrons of the office existed in Cambridge you would reestablish that?

Mr. ROPER. We would consider it.

Mr. STEENERSON. You would give them the same show you gave Lynn, would you not?

Mr. ROPER. We endeavor to treat all alike.

Mr. MADDEN. We have some outlying territory outside the city limits of Chicago—Argo and Mount Greenway. You probably recall some correspondence on Mount Greenway?

Mr. ROPER. I do.

Mr. MADDEN. The people at Mount Greenway would be very anxious to have a station established there and have the delivery made from the Chicago post office rather than to have a separate post office established. So far the department has not been able to give them the Chicago delivery, so they get their mail by rural delivery. The sense of the people is to the effect that they would prefer to have Chicago delivery than to have a separate post office.

Mr. ROPER. We have a very interesting illustration at North Kansas City. North Kansas City is a community that has developed very rapidly within the last few months, because of the establishment of large mail-order business in that community, but it just happened that the population is not 1,500, and consequently we can not extend the desired facilities to that community under the present law.

The CHAIRMAN. Is there anything further on this matter? The other matter you felt you wanted to discuss in executive session?

Mr. ROPER. The Second Assistant is here, Mr. Chairman, with a statement in answer to certain requests made by Mr. Madden the other day, and I shall be glad to give way to him and not keep him here, if he wishes to make his statement at this time.

—

PAGES 126 TO 144, INCLUSIVE, OF HEARINGS ON THE POST OFFICE APPROPRIATION BILL BEFORE SENATE COMMITTEE, EMBODYING DISCUSSION OF DEPARTMENT'S RECOMMENDATION FOR NEW LEGISLATION GOVERNING ESTABLISHMENT OF STATIONS AND BRANCH OFFICES (NONACCOUNTING).

The CHAIRMAN. The basis now is two years, is it not?

Mr. ROPER. Senator, you authorized it in the bill last year, but the bill did not pass. You approved the two years' provision last year, but the bill did not pass.

Now, so far as the next section is concerned, the amendment asked for regarding postal stations is carried in the administrative bill, which is now in conference between the two Houses. So I do not know that we need to dwell upon that. I desire, however, to insert at this point two communications which will explain themselves and make slight modifications in the recommendation made to the House committee.

(The communications referred to are here printed in full, as follows:)

MARCH 18, 1916.

Hon. JOHN A. MOON,
*House of Representatives.*

MY DEAR JUDGE MOON: With further reference to our recent personal conversation in relation to section 19 of H. R. 562, giving the Postmaster General authority to establish branch offices, nonaccounting offices, or stations of any post offices, I understand there is some lack of support of the measure among the Members because of doubt as to the administrative unit to be used by the department. I accordingly suggest that there will be no objection on the part of the department to having this unit fixed by a proviso to be inserted after the word "public" in line 18, page 12, as follows:

"*Provided*, That there shall be at least one independent accounting office in every county."

This is in accord with the act of Congress approved August 24, 1912, reading as follows:

"No post office established at any county seat shall be abolished or discontinued by reason of any consolidation of post offices made by the Postmaster General under existing law."

The advantages which will accrue to the Postal Service through the enactment of the section with this proviso are many. Some of these are as follows:

The superintendent or clerk in charge of the branch office or nonaccounting office would be under the direct supervision of competent officials of the central post office, whereas the postmaster is now upon his own resources without particularly comprehensive knowledge of the service and must rely upon instructions received by mail from the department at Washington. The local postmaster assigned as superintendent or clerk in charge of any independent office which would be converted into a branch office or nonaccounting office would be in line for promotion to higher and more responsible positions in the central office.

The service would be further improved at the offices so designated as branch offices, nonaccounting offices, or stations because of the fact that city delivery service may be extended to these places from the central office, provided the requirements of the Post Office Department as to necessary improvements are complied with.

There will be no disadvantages to the public on account of the substitution of branch offices in lieu of independent post offices. The branch office will not lose its identity as a post office and its name will still appear in the Postal Guide. Money orders issued will be under the same name as when the branch was an independent office. Mail addressed to patrons at the branch office will continue to arrive just as before the consolidation, and mail dispatched will bear a postmark showing the name of the present office. Postal savings business will be handled as at present and deposits will be made in local banks as now. In fact, patrons of these branch offices will not be affected adversely in any way, nor will the community suffer by loss of any prestige or service due to a consolidation.

The losses from burglary will be reduced by reason of the fact that the branch office or nonaccounting office need not carry stamps and stamped paper in excess of $100. The present independent post office, since it must secure its supplies directly from Washington, must necessarily carry sufficient stamps and stamped paper for at least one full quarter. The protection against burglary at the small office is inadequate and annual losses by reason of burglaries aggregate a considerable sum.

In addition to reducing the risk of loss by burglary, there will be a smaller risk of defalcation on the part of employees at these branch offices, as such offices will be required to deposit funds daily at the central office. It is the practice at present for the independent post offices to transmit money-order funds for deposit at intervals, depending upon the amount received, and to deposit postal funds received from the sale of stamped paper, etc., when accounts are transmitted to the Auditor for the Post Office Department. As the central office will deal with those branch offices on a cash basis, there will be a small amount of stamps and stamped paper on hand and practically no funds carried over from day to day.

The present voluminous correspondence maintained by the department with the many smaller independent offices will be reduced materially by the establishment of branch offices in lieu of many independent offices. There will be a marked saving of time, labor, and money in the office of the Auditor for the Post Office Department by the elimination of a large volume of small accounts now received from independent post offices.

In view of these and many other service reasons for the enactment of section 19, as modified by the proviso prescribing that the accounting unit shall not be larger than the county, I sincerely hope that this matter may have your hearty support.

Sincerely, yours,

A. S. BURLESON.

—

MARCH 20, 1916.

Hon. JOHN A. MOON,
*House of Representatives.*

MY DEAR JUDGE MOON: Referring to my letter of the 18th instant, concerning section 19 of the House resolution 562, relative to the establishment of branch post offices, I would advise that, as stated in that letter, there is no disposition on the part of the department to change the name of or decrease the postal facilities at the post offices affected by the section, if enacted into law, and there will be no objection to so stating in the provision suggested in my former letter.

The provisos carrying the restrictions could, therefore, read as follows:

"*Provided*, That there shall be at least one independent accounting office in every county.

"*Provided further*, That the Postmaster General, in establishing branch offices or nonaccounting offices in lieu of independent offices, shall not change the name of the office because of the consolidation, and that all post offices so consolidated shall not be deprived of any postal facilities which they may have prior to the time of consolidation."

I sincerely hope that with these additional restrictions on the administration of the section you may be able to give it your support.

Sincerely, yours,

A. S. BURLESON.

Mr. MOON. Mr. Speaker, I was very much interested in the remarks of my colleague on the committee [Mr. MADDEN]. I appreciate the fact that there might be some saving to the Government by a proper accounting system in certain classes of post offices in the United States, but as yet it is purely a matter of speculation. Some figure a loss along that line and some figure, as the gentleman does, that there may be a saving. However, it is a question we have not been able to work out, and I think we best not go into that too rapidly.

Mr. HAMILTON of Michigan. These superintendents that the gentleman from Illinois has spoken about would perform the function of postmasters, and these various postmasters and post offices would have to have employees as they have now?

Mr. MOON. Of course, if that system were adopted.

Mr. HAMILTON of Michigan. And the central post office would have to have an additional force to handle reports from these branch post offices?

Mr. MOON. I will read section 18 to show that the gentleman has discussed the proposition in part on a wrong basis. This section does not provide for any county unit:

SEC. 18. That hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting offices, or stations of any post office for the transaction of such postal business as may be required for the convenience of the public.

That was assumed at one time to be applicable alone to the fourth-class post offices, but a careful consideration of it shows that that is not true. In fact it is elicited by an examination of the First Assistant Postmaster General himself, that the county is not necessarily the unit; even the State may not be the unit. The United States may be the unit. Mr. Roper said in reply to an inquiry submitted to him, when he was asked if at Indianapolis one office were maintained, every other office in the State of Indiana could be made into substations and subsidiary to the Indiana office, that that could be done.

Mr. TRIBBLE. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Tennessee yield to the gentleman from Georgia?

Mr. MOON. Yes.

Mr. TRIBBLE. Section 15 states that "hereafter the Postmaster General may hereafter enter into contract for the conduct of contract stations for a time not exceeding two years." What do you mean by "contract stations"? What do you mean by that?

Mr. MOON. By that is meant those little stations that they have in the cities, like the drug-store post offices, and so on.

Mr. TRIBBLE. It does not refer to the little country places?

Mr. MOON. No. It does not hit your place at all. [Laughter.]

Now, Mr. Speaker, I want to impress upon Members the fact that this will, in the department's discretion, take away every distinct post office in the State, remove every postmaster in the State, except one, or it might remove him if in the discretion of the department it was deemed proper, and all the post offices would be made substations and nonaccounting.

This could be, but probably would not be, done. While I do not know what you gentlemen think about it, to my mind the most humiliating, corrupt, and infamous statute that was ever passed or allowed to exist is that old civil-service fraud. [Applause and laughter.]

I do not want, so far as I am concerned, to give any more power along that line to anybody. I am entirely willing, if any economy can be effected by making the offices nonaccounting, to consider that change, and to preserve still the present status of postmasters in doing that. I hope we may be able to work out something along that line. I did not intend to say this much.

Mr. LLOYD rose.

Mr. MOON. I now yield to the gentleman from Missouri to ask me a question.

Mr. LLOYD. My only purpose in rising was to say, in response to the inquiry of the gentleman from Georgia [Mr. TRIBBLE], that what was intended by the Post Office Department in this connection was to make all post offices in the United States nonaccounting offices, like these little stations that he talks about.

Mr. MOON. Now, Mr. Speaker, I yield to the gentleman from Minnesota [Mr. STEENERSON].

Mr. TOWNER. Before the gentleman leaves the floor, will he allow me one suggestion?

Mr. MOON. Yes.

Mr. TOWNER. Is it not true that this accounting that the gentleman speaks of must be done in any event by somebody?

Mr. MOON. Yes; it has to be done somewhere.

Mr. TOWNER. Is it not at least as economical that it should be done in the way it is now done, by clerks who are accustomed to that business, as it would be to have it done by somebody whose work would have to be passed upon later by the central station here in Washington?

Mr. MOON. I do not know just how that would be; I have not worked it out. But, generally speaking, I should think we could perhaps effect an economy by abolishing in all departments about one-third of the useless places we have now. [Laughter.]

Mr. TOWNER. If these accounts of substations were required to be passed upon, it would in reality require two accountings to dispose of the business, and it would not effect any economy?

Mr. MOON. Possibly; but I hope we may be able to effect some economy in the line of accounting. Probably we can do so by nonaccounting offices. I am not opposed to nonaccounting offices if economy can be accomplished in their establishment. We will work this out later.

Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman has 23 minutes.

Mr. MOON. Mr. Speaker, I yield five minutes to the gentleman from Minnesota [Mr. STEENERSON].

Mr. STEENERSON. I would like to have more than five minutes.

Mr. MOON. Then, I yield 10 minutes to the gentleman. He is a member of the committee.

The SPEAKER. The gentleman from Minnesota [Mr. STEENERSON] is recognized for 10 minutes.

Mr. STEENERSON. Mr. Speaker and gentlemen of the House, the conferees did not feel justified in agreeing to a proposition that had never been before this House in any form or shape, because it was of such a revolutionary and far-reaching character. The identical proposition, it is said, was incorporated as a rider on the Post Office appropriation bill a year ago, but it received no discussion. It came in with a lot of other legislative propositions as riders, and was not explained either in committee or in the House. The language is so blind that unless a man is familiar with the intent and purpose of it he can not guess at it. The provision reads as follows:

SEC. 18. That hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting offices, or stations of any post office for the transaction of such postal business as may be required for the convenience of the public.

It was brought up in the Committee on the Post Office and Post Roads, and it was explained at length. Members of the committee, including myself and others, asked Mr. Roper, the First Assistant Postmaster General, the effect of it, and it was explained. The hearings were printed. When the postal savings bank bill, which is now before us, was brought back with this amendment on the 17th of March, last, and the chairman of the Committee on the Post Office and Post Roads asked unanimous consent to disagree to the Senate amendments, including this which is section 18 in the amended postal-savings bill, I asked unanimous consent for five minutes in which to explain this provision, which for the first time then appeared before the House, and I printed as a part of my explanation the hearings that I refer to. I am sure that a great many Members, judging from their remarks afterwards, were surprised that so important a provision should be sought to be enacted in that manner.

Now, the gentleman from Illinois [Mr. MADDEN] is an ardent advocate of this proposition, although I do not recall that he ever advocated it specifically before. But he reflects the opinion of the Post Office Department, no doubt, to some extent. He makes a wild assertion here about saving $10,000,000. It is a surprise to me that he did not say $15,000,000. He has as much basis for the one as he would have for the other. He does not know, nor does anybody else know, and it can not be proved that it will save a single dollar. I can figure out that they will lose money on it. If you do away with the many thousands of little postmasters who receive but a small pittance for their services, and put those little offices and substations in charge of clerks at $1,200 a year, which is the way it is proposed to furnish efficient men such as they have not got in the local communities, it would increase the expense of the Postal Service.

But the most serious objection to this proposition lies in the fact that it is along the line of many other propositions that come here at every session of Congress for an increase in the discretionary power of the department. It is advocated here as "civil-service reform." We have been told that this will promote "efficiency." Well, perhaps if you put in a czar, an autocrat, that will improve efficiency. I believe it is an old doctrine that a despotism is the best government, provided you have got a good despot.

But we are told and we should always remember that the foundations of this Government are laid upon the basis that it is a Government of laws and not of men; and every time that we unduly increase the discretionary power of administrative officers we find that we reap trouble. Look at the Rural Delivery Service. The law simply authorizes the department to establish it. There are no restrictions except those prescribing the salaries. The department has used those large discretionary powers, and now see where we are. They have sought to revolutionize and reform that service. Every time you get a new Postmaster General he thinks it is his function to turn things upside down, to undo everything that was done by his

predecessor, Republican or Democrat. Hence we find an outcry on both sides of this Chamber against the changes in the Rural Delivery Service, and bill after bill is introduced to limit the discretion of the Post Office Department. The gentleman from Florida [Mr. CLARK] and various others propose amendments to the Post Office appropriation bill limiting the discretion that the Post Office Department now has, which they say has been misused, and the people are up in arms.

Cotemporaneously with that experience we are asked here—the proposition is not before the House now, because the conferees struck it out, but this proposition asks—that the power of the Post Office Department be increased to an almost unheard-of degree. As explained by the chairman of the Post Office Committee, you would place it in the power of the Post Office Department to abolish all the offices except one in each county. They say they would not abolish the county-seat post office, but they could under this authority, and, as was stated in the hearings, they could establish one post office at Indianapolis, for instance, and abolish all the others in the State of Indiana.

Then it is said that this is in the interest of the civil service. Yes; it would abolish 56,000 post offices and create that many superintendents in charge, or superintendents of contract stations. Where a fourth-class office does not pay enough to employ a $1,200 clerk, they would make it a contract station for whatever contract they could make, the same as they do with the drug stores in the cities. Necessarily, if you should pass this law, it would wipe out all those offices. Of course, it may be considered partisan, but I may be permitted, seeing that my Democratic friends agree with me, to suggest that if you pass this law you could make vacancies for 56,000 men, to be filled in this case by worthy Democrats, and then put them into the civil service forever. As to the efficiency, who can tell? Unless you spend more money you will not get any more efficient men. It seems to me that it is a sufficient answer to all of these arguments to say that they are merely speculative. They are the dream of an imaginative mind. The results that we have heretofore reached from increasing the discretion of the department have not been satisfactory. If you want to do something in the interest of the civil service, let us not by changing the title of these offices create 56,000 new places to be filled and then put under the civil service.

But it is said that you can save $10,000,000.

The SPEAKER. The time of the gentleman has expired.

Mr. HAMILTON of Michigan. I ask unanimous consent that the gentleman's time be extended five minutes, not to come out of the hour.

The SPEAKER. The gentleman from Michigan asks unanimous consent that the time of the gentleman from Minnesota be extended five minutes, not to be charged up to the hour. Is there objection?

There was no objection.

Mr. STEENERSON. The gentleman from Illinois [Mr. MADDEN] suggested that by the saving that would be accomplished by this change they could establish a pension system. Yes; you would put all the fourth-class postmasters that are not in contract stations into the positions of clerks in charge.

Mr. RUCKER. Will the gentleman yield there?

Mr. STEENERSON. Yes.

Mr. RUCKER. In making a fourth-class office a contract station, that would necessarily do away with the rural delivery out of those fourth-class post offices, would it not?

Mr. STEENERSON. Exactly. That is another consequence that hardly anyone has thought of. One or two Members have suggested that when you center the mail in the county seat, for instance, the routing of the mail is different, and you play havoc with every rural route in the county. You destroy the Rural Delivery Service.

But just think how many men there would be advocating a pension system. The more men you put into the civil service the more advocates there will be; and if the gentleman's plan of pensioning all these civil-service employees is carried into effect, you will use up ten times more than you ever could save.

These are the reasons why the conferees could not agree to this, because it was too revolutionary a proposition to be adopted without debate and without being explained and understood and considered by the House. It looked too much like bringing in a joker upon the American Congress to adopt this thing in conference without any discussion either in the committee or on the floor of the House. And even if it were as meritorious as it has been explained and supposed to be by some of its friends, we insist that it was proper for the conferees to disagree to this proposition, and if it has any merit, let it come in like other propositions and stand on its own merits. For that reason, gentlemen, it seems to me that we can do nothing less than to vote to agree to the conference report, which eliminates this section 18 entirely.

There are a great many features of this thing that I could go into, but in the limited time I have I do not think it would be wise to undertake it. We might discuss this from various standpoints, but I simply wish to say this: It is a remarkable thing that when in the last Congress you created 14,526 new offices—and you will have created over 100,000 new offices before this administration ends, at the present rate—and a great many of them are not put under the civil service; but when you find an old office, like that of a postmaster or an assistant postmaster, then you seek to wipe it out and create it under a new title in order that you may fill the vacancy and then put it under the civil service. It is a new way of finding jobs, but it is too transparent to fool anybody.

Mr. HAMILTON of Michigan. Effective, though.

Mr. STEENERSON. This is not a civil-service measure at all. The effect would be that you would fill these places by first creating vacancies in them, and I believe that is the real motive behind the proposition. You would make a changeable personnel in the Postal Service, so that if in Racine, Wis., or in Crookston, Minn., they wanted to put in a new postmaster they could send him up from Virginia. Out in the Northwest, where people make money and can not afford to be in the public service, the supply will be furnished from these States near Washington, where everybody seems to be willing to serve the public under the civil service. [Laughter.] The quota from Maryland and Virginia and these near-by States is always full, and they have a surplus at all times. Under this proposition you could send these carpetbaggers all over the United States to fill places in the North and West. [Laughter.]

It is a proposition that is hostile to popular government and tends to despotism. I would rather see the postmasters elected by the people than imposed upon them against their will. In my opinion it is neither in the interest of economy nor efficiency, but would tend to create an office-holding class to rule over the people.

Mr. MOON. Mr. Speaker, I yield 10 minutes to the gentleman from South Carolina [Mr. FINLEY].

Mr. FINLEY. Mr. Speaker, I am opposed to carpetbag postmasters. This will be not only possible, but probable if the Senate amendment—section 18—is enacted into law, and for that reason, and a great many others, I heartily agreed with the conferees on the part of the House and Senate in striking out section 18 as it passed the Senate. And I want to say, while speaking of that, that while there was a mild protest on the part of certain gentlemen, not Members of the House, there were no tears shed when section 18 went out of the bill.

It is a section fraught with far-reaching importance; no man in this body can tell how far. No one knows what section 18, as it passed the Senate, would mean to the American people. The law as it stands to-day makes the small postmaster in the community the nearest approach to a democracy in government. He is responsible, and a complaint can reach him. This would not be the case with a civil-service clerk in charge of the post office. Under section 18 as it was recommended by the department and as it passed the Senate you would do away with personal responsibility to a large extent. Not necessarily, I mean, but you would legislate to increase the discretion in the Post Office Department.

I am not criticizing any present or past Post Office Department, but when I am called upon to legislate and help to place a law on the statute book I do not act for the past or the present alone, but for all time, until conditions change, or until other legislation is had. Under section 18 it would be possible, as has been stated here, to abolish every post office in each county in the United States, every post office in each congressional district in the United States, every post office in each State in the United States, and only leave one post office, as my friend from Minnesota stated, in the United States.

It may be argued that of course that would not be done. Certainly it would not be done, but how much of it would be done we do not know and we are not going to take any chances. When we are legislating we should know. You do not know and can not know what would be the effect of section 18.

The present law requires one post office at least in each county located at the county seat. Very well. Take my own home county, where there are two second-class post offices. The county-seat post office is only about one-third in size to one other second-class office. Would you have the larger office account to the county-seat office, or reverse it, or what would you do? I am opposed to this class of legislation, and I am in favor of the law as it stands now.

There must be under the present law at least one post office and that located at the county seat, and the establishment of other post offices is in the discretion of the Post Office Department.

The gentleman from Illinois [Mr. MADDEN], whose ability in a business way we all admire, argues that it will save $10,000,000 a year. He gives us no basis for these figures. Let us see about that. Ten million dollars a year saving! How he would save it he did not tell us, but the nonaccounting office would be a substation, and that office would be in charge of a clerk, and, of course, what salary that clerk would have we do not know, but it would be more or less on the contract order, open to competition, for 56,000 post offices, and I am of the opinion that when you got through paying the clerks in charge of the 56,000 post offices you would be more than $10,000,000 in the hole. Instead of this being a good business proposition I think it is a very poor one. So, Mr. Speaker, this bill if enacted into law would serve no good purpose whatever.

One other point and that is this: What you want in this country is not too large centralization of power. This power would place it in the hands of the Postmaster General, absolute power, to centralize the postal activities of this country whenever he saw fit. That the present Postmaster General would do that nobody believes. But who will be Postmaster General in years to come we do not know.

Section 18 went out by unanimous vote of the conferees on the part of the House and the Senate. It went out because it is unnecessary legislation. It is legislation that no one understands the effect and purport of, and we should not legislate in any such manner. So, Mr. Speaker, the conference report, in my opinion, should be adopted, and adopted unanimously. [Applause.]

The SPEAKER. The gentleman from South Carolina yields back three minutes.

Mr. MOON. That leaves me six minutes?

The SPEAKER. Yes.

Mr. MOON. Unless some gentleman wants to use the time I will move the previous question.

Mr. BUTLER. Will the gentleman yield to my colleague Mr. MCFADDEN three minutes?

Mr. MOON. Yes. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. MCFADDEN] three minutes.

Mr. MCFADDEN. Mr. Speaker, I simply want to call the attention of this House to the provision set forth in this conference report, presented by the gentleman from Tennessee [Mr. MOON], chairman of the Post Office Committee, permitting the deposit of postal savings deposits in other than national or Federal reserve banks, namely, State banks, savings banks, and trust companies, and the tendency on the part of the United States Government to give recognition to banks outside of those under the direct supervision of the United States, a bad precedent to be established, in view of the extreme desire of the men who are administering the affairs of the Federal reserve act, namely the Federal Reserve Board and their associates, to make the system so attractive as to bring these State banks and trust companies into the Federal Reserve System. [Applause.]

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

## RURAL CREDITS.

The House automatically resolved itself in Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes, with Mr. GARNER in the chair.

Mr. MANN. Mr. Chairman, I desire to offer an amendment. I move to amend, on page 76, by striking out, in line 17, the words "out of any moneys in the Treasury of" and inserting the word "by," and by striking out, in line 18, the words "not otherwise appropriated," so that it will read:

The salaries and expenses of the Federal farm-loan board and of farm-loan registrars and examiners authorized under this section shall be paid by the United States.

Mr. GLASS. Mr. Chairman, I accept that amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

Mr. MANN. Mr. Chairman, I now move to strike out, on page 77, all after the word "board," in line 6, down to the end of the paragraph.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 77, by striking out after the word "board," in line 6, down to line 15, the following:

"All such attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars, examiners, and appraisers shall be appointed without regard to the provisions of the act of January 16, 1883 (Vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance thereof: *Provided*, That nothing herein shall prevent the President from placing said employees in the classified service."

Mr. MANN. Mr. Chairman, the provision which I have moved to strike out is the provision which refuses to the President of the United States the right to fill these positions by appointment under the civil-service law, but which grants to him the right to thereafter cover the said employees into the classified service. It seems to me that if there ever be a bill which ought to be free from political consideration it is this rural-credits bill at this time in the House. I do not think these appointments ought to be made as political appointments. Under the provisions of the Constitution we can not direct the President how he shall make appointments, but sometimes we endeavor to do so and sometimes we do enact it into the law, and I presume the President usually follows the provision of the law, though he is not required to do so. We can, of course, refuse to the President the authority to use a law which we have passed, and I suppose we can refuse to the President the right to use the civil-service act in making appointments. That act is only permissive, at best. It only authorizes the President to make appointments or have appointments made in conformity with its provisions. Possibly we have the right to say that he shall not make use of the act, but the Constitution provides that the President shall make the appointments; and under the civil-service act appointments are made in accordance with that act unless the President issues an order to the contrary.

This provision which I have moved to strike out forbids the President making use of the civil-service act in the making of his primary appointments under this law. It seems to me that the purpose of that is to make partisan appointments. I suppose it would be resented by the gentleman in charge of the bill if one should say that after this act became operative it was intended only to loan money to Democrats if they were in power, or to Republicans if they were in power. Gentlemen would say that that was a childish, silly argument. Then why make appointments on a political basis? Why not give to the President the discretion to say that the appointments shall be made under the civil-service law, so far at least as the President shall determine they ought to be made under that law. There may be temporary appointments; there may be experts appointed, for aught I know, that ought to be made regardless of the civil-service law, but to say that clerks and all of the other employees shall be appointed under the old political system does not seem to me to be a desirable thing in enacting a bill designed for the benefit of a whole class regardless of politics. [Applause on the Republican side.]

Mr. GLASS. Mr. Chairman, I desire to state that there is no Member of this House who is a more sincere advocate of the civil-service law than I am. I do not believe in the spoils system in any way, shape, or degree. Nevertheless, this provision of this bill, taken bodily from the Federal reserve act, seems to the Committee on Banking and Currency of the House to be a desirable thing. In our judgment it is utterly impossible upon the initiation of a system like this to select experts, and appraisers of land values, and employees of that description, by the hard and fast regulations of the civil-service act. I do not believe in partisan appointments in the Government service, and I can not better illustrate my conviction upon that point than by saying to the House that, although I had some part in the construction and the enactment of the Federal reserve act, I have never to this day so much as made a recommendation to the Federal reserve board for the appointment of a typewriter or a janitor or any other position under the system. I detest Federal patronage, and if I could conceive that this provision of the bill would be administered in any partisan way, there is no Member of this House who would be quicker to vote it out than I; but I think it is necessary in the initiation of this system to proceed along these lines. Therefore, I hope the committee will not vote out the provision.

Mr. GILLETT. Mr. Chairman, will the gentleman yield?

Mr. GLASS. Certainly.

Mr. GILLETT. May I ask the gentleman if this language were not in, Whether the President would not have absolute

power to make such exceptions as the gentleman thinks are necessary?

Mr. GLASS. Perhaps that is true, but that would put a matter of detail up to the President that I would not think he would care to bother with. This provision simply gives the farm-loan board, which is to be nonpartisan, the power to make these appointments of experts and appraisers without unnecessary restrictions. Can my friend from Massachusetts [Mr. GILLETT] imagine that any civil-service regulations could affect the qualifications of a man charged with the duty of valuing lands in various parts of the country?

Mr. GILLETT. If that be the only purpose, why include clerks and laborers?

Mr. GLASS. Because, as I have stated, the provision was taken bodily from the Federal reserve act. How that has been administered I am not prepared to say, except upon the general belief that it has been administered without regard to partisan considerations.

Mr. HUMPHREY of Washington. Mr. Chairman, it seems to me that we are about to repeat the folly that we committed when we created the Federal Trade Commission. If I am correctly informed, and I think I am, the Federal Trade Commission, much to their credit, I think, as well as for their self-protection, have appealed to the Civil Service Commission to hold examinations for them, although we did not provide that this should be done.

Mr. GLASS. May I interrupt the gentleman to remark that the Federal Reserve Board has done that precise thing, and that every appointment under the Federal Reserve Board that could be made subject to the civil-service regulations has been so made.

Mr. HUMPHREY of Washington. Well, I understand the Federal Trades Commission have asked the Civil Service Commission to hold examinations where they have appointments to make, although not required by the law. They did it, as I understand, not only for the good of the service but for self-protection. If I understand, when they started there were 1,500 or 2,000 applicants for something like 100 places, and the pressure was so terrific they went to the Civil Service Commission and appealed to them for assistance, and asked them to hold examinations, and in that way reduced the number to something like 250 from which they could make selections.

Mr. GLASS. I will say to the gentleman precisely that course was pursued by the Federal Reserve Board where the question of expert employees was not involved.

Mr. HUMPHREY of Washington. Now, it does seem to me when this commission went voluntarily to the Civil Service Commission and asked that they be protected in this way, for the good of the service and for the good of the country, we ought to enact the amendment that the gentleman from Illinois [Mr. MANN] has proposed.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that debate on this proposition be closed——

Mr. GILLETT. I would like to have five minutes.

Mr. MANN. There are some other gentlemen over here who desire time.

Mr. GLASS. I do not want to shut off debate, but I do wish to proceed.

Mr. MANN. We would like to have 15 minutes more over here.

Mr. GLASS. I will ask, Mr. Chairman, that debate close in 20 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this paragraph close in 20 minutes. Is there objection. [After a pause.] The Chair hears none.

Mr. CULLOP. Mr. Chairman, as I read the provision which the gentleman from Illinois [Mr. MANN] has moved to strike out, it does not prevent the President from going into the classified service and appointing these men to these positions. The language of it is as follows:

> All such attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars, examiners, and appraisers shall be appointed without regard to the provisions of the act of January 16, 1883.

Now, that does not compel him to go into the classified service to appoint them, and it does not prevent him from doing so. In other words, he is not bound to ignore it, but he may under this provision make his appointments out of the men who have passed the civil-service examination, or may not do so, at his option. So there is nothing here that requires the construction to be put upon the language of this provision which the gentleman from Illinois has placed upon it in the statement he has made in support of his amendment. Now, Mr. Chairman, the President may conclude that men who have not passed the civil-service examination are better qualified to fill these positions at the inception of the operation of this law, at the time that this administration is begun, than men who have passed the examination; and therefore, under the language of this statute, he may select anyone he pleases, without reference to the civil-service law, or he may take upon himself the initiative and select from the classified service the men who shall be appointed to these places.

Now, that is all there is in this language; and if they have been proceeding in other departments, such as the Trades Commission and one or two others, to select men from the classified service, the language is such that it does not compel him to resort to the classified service to make these appointments at the start, and in the proviso the gentleman moves to strike out there is nothing which will prevent the President from placing the employees in this department under the classified service.

Now, if I were to write the act, I would write it freed of the classified civil service. I believe that the President of the United States and the men in charge of the initiation of this great system can better select the men who can popularize this great system, who can make it more effective and a greater success than by resorting to the civil-service law to make the selections. I would like at this time to call attention of the committee to this fact, that under the classified service of this Government there are 500,000 employees. That constitutes an enormous army of officeholders. The number now is almost able to dictate here in Congress what the legislation of the National Congress shall be. It is too great a power, too valuable a patronage to be intrusted to the hands of any one man in this country, I care not who that man may be. [Applause.] This power is great enough to be felt in every department of public affairs, and is asserting itself in dictating public legislation and the development of public policies. Its power should not be increased by multiplying its numbers, but, on the contrary, its powers should be curtailed, its numbers reduced, in order that it may not direct the policies of the people. Selfish interest on the part of this great army of public officials will direct their efforts in promoting their welfare rather than the welfare of the people. The power should be decentralized and its growth checked in order that it may not become arbitrary and autocratic and thereby menace the best interests of the public. [Applause.]

Mr. GILLETT. Mr. Chairman, according to the argument of the gentleman from Indiana [Mr. CULLOP] this clause means nothing at all, but it is perfectly clear that it has a meaning and has an effect, and to my mind it is perfectly clear what the intent of it is, and that is it is to allow these appointments to be made according to the old spoils system and to give patronage to the Democratic Party. Now, I believe thoroughly in the sincerity of the chairman of this committee in what he has said. I do not believe if the chairman of this committee had had the drafting of this clause he would have inserted it. Mr. Chairman, if that clause was not in at all, then the President of the United States had absolute power over the method of appointment. He could cover these into or except these from the civil service according as it was necessary, and if the experts, to whom the gentleman from Virginia [Mr. GLASS] referred, ought to be excepted, he could have excepted them; but to pretend that the clerks and the laborers at least—those two classes—to pretend that they should be excepted from the civil-service law because they could not be procured through the Civil Service Commission is preposterous; and, Mr. Chairman, I think that the Democrats might as well admit that they put in this clause in order to give the Democrats patronage.

Now, I will admit that it is much easier for a member of the minority to criticize such a clause as this than it is for a member of the majority. I admit the party that is in the majority always has the temptation to put in such a clause as this in order to get patronage for themselves, but the Democratic Party since they have been in power have distinguished themselves by these numerous exceptions which they have put into different bills. They put a clause into their tariff bill excepting the income-tax collectors from the operation of the civil-service law.

They put a special provision on the deficiency bill excepting the deputy marshals and the deputy internal-revenue collectors, and they have every little while, apparently distrusting their own President, taken the subject out of his hands and put positions into the classified service; and, thinking apparently he was too much of a civil-service reformer, they have tried, just as they are trying here, to take away from him the power, and I think they deserve to be criticized and condemned for it.

The gentleman from Virginia [Mr. GLASS] quotes as a precedent the case of the Federal Reserve Board. To my mind the Federal Reserve Board was a rank case of partisanship. President Wilson appointed the board, and every member of it

was a Democrat, and it was intended, I believe, there, just as it is intended here, by excepting its subordinates from the civil-service law to give patronage to Members of Congress. As the gentleman from Washington [Mr. HUMPHREY] says, that board finally, to protect itself, was compelled to go to the Civil Service Commission and ask them to select its subordinates by examination. But I do not believe they did that until the most pressing needs of the leading Democrats had been relieved. I venture to suspect that some prominent individuals in the Democratic Party got patronage. I do not believe the Secretary of the Treasury, for instance, was neglected. I think the Democratic Members of Congress are deceiving themselves in putting this clause in and thinking they are going to get a good deal of patronage out of it. I believe the officials of this board will want to protect themselves against Members of Congress.

A few of the very important Democratic magnates will probably get positions such as they want, but when it comes down to feeding the ordinary Member of this House I am inclined to think these gentlemen of the farm-loan board will be obliged in self-defense to do as the Federal Reserve Board did and the Federal Trade Commission did, and in order to keep the Congressmen from pestering them for offices will resort to some form of examination. But the vice of this provision is that it allows them to give such places as they please to their favorites, or the favorites of their friends or patrons, and that I believe is the only purpose of the proposition. The Republican Party when it was in power was not always blameless in this respect. There was always a large element in it as there will probably always be in every majority party which wanted to give itself patronage and the distribution of offices. But there were generally enough genuine believers in civil-service reform to detect and prevent such selfish legislation as this. But since the Democratic Party obtained power there has been a constant effort to let down the bars, to take advantage of every excuse to abrogate the civil-service law and provide a few places for deserving Democrats who could not pass a competitive examination. The President, despite his professions of devotion to the merit system, has approved these attempts and has seconded them by issuing an unprecedented number of Executive orders authorizing the appointment of favorites in opposition to the advice of his Civil Service Commission. The result is that the pledge of the Democratic platform promising an honest enforcement of the merit system has been shattered and dishonored like so many other of its planks by the legislative action of the Democratic Congress and by the Executive action of the Democratic President.

Mr. MAPES. Mr. Chairman, this is another raid on the civil service. It is too bad to prejudice this important piece of legislation by starting it off under the spoils system. This bill has been changed in a great many particulars, from the rural-credits bill, which was considered in the House during the last Congress, but this provision to do away with the civil service remains the same.

It is proposed that all the clerks and other employees provided for in the bill shall be appointed without regard to the civil service. Not satisfied with that, after they are once appointed it is provided, "that nothing herein shall prevent the President from placing said employees in the classified service." The authors of the bill are not willing to take any chances on the merit system in selecting employees under the act but are perfectly willing to make their positions secure after they have once been appointed.

The action here proposed, however, is in harmony with other legislation enacted since this adminstration came into power. I must confess, Mr. Chairman, that I was surprised to hear the distinguished chairman of the Banking and Currency Committee say a few minutes ago that he was a thorough believer in the civil-service law and opposed to the spoils system. The two principal bills reported by his committee in the last and this Congress, which is as long as I have been a Member of the House, have contained express provisions exempting all of the employees created by those bills from the civil service. The Federal reserve act, for which the gentleman from Virginia [Mr. GLASS] was principally responsible, contained a provision similar to this one, providing that all the employees of the Federal Reserve Board should be appointed without regard to the civil service, and the rural-credits bill reported by his Committee on Banking and Currency in the last Congress contained the same provision. It is now proposed again to appoint all the employees of this new rural-credits system without regard to the civil service.

In this connection, if I may be pardoned for calling attention again to an instrument which has been so much discredited as the last Democratic platform, it might not be out of place to read the plank in that platform on this subject. It was there solemnly declared by the Democratic Party that—

> The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather than services rendered to a political party.

As if to make assurance doubly sure, the platform further declared:

> Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign.

In spite of these promises and platform pledges no administration in recent years—in fact, no administration since the civil-service law was enacted—has made such attacks on the civil service as has this one. In addition to the laws already called attention to in which the civil-service law has been set aside are the following enacted by this administration:

The Underwood Act exempted collectors of the income tax from the civil service.

The deficiency appropriation act of the last Congress took deputy United States marshals and deputy collectors of internal revenue out of the civil service.

The Post Office appropriation bill in the last Congress attempted to take assistant postmasters out of the civil service, but that provision was defeated on the floor of the House.

This amendment would strike out the language in this bill which provides that all the employees under this act shall be appointed without regard to the provisions of the civil-service law. If adopted, they would have to be selected the same as other employees of the Government are selected.

It seems to me, Mr. Chairman, that it would be particularly unfortunate to have this rural-credits act, which has been considered in such a nonpartisan way both by the committee and by the House, and which is so important to the farmers of the country, started off under the spoils system. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. LENROOT. Mr. Chairman, I do not know whether there is any use in appealing to the other side of the House to adopt this amendment; but I would think that after the election in West Virginia on Tuesday enough Members, at least, upon that side of the aisle would stop and consider the record they are making, in their own interest, if not in the interest of the party to which they belong.

Mr. Chairman, the Democratic Party, like the Republican Party, in every platform and in the last platform pledged themselves to the civil-service law, and insisted—and I have it in my hand, but I shall not take the time in the five minutes I have to refer to it—that it should be carried out in spirit and faithfully applied. And yet, Mr. Chairman, every time an opportunity has arisen to destroy the civil-service law a very large majority of the membership upon the Democratic side of this aisle have voted to destroy it.

Now, Mr. Chairman, what reason can there be for exempting all of these employees from the civil-service law? Why, we all remember, when President Taft covered fourth-class employees into the civil-service—a thing which I did not at all approve as to the manner in which it was done—that this Democratic administration, in ordering civil-service examinations, said that their only purpose was to know whether the fourts-class postmasters that had been covered into the classified service were competent or not. And they held examinations all over the United States ostensibly for that purpose. Of course we all realize that their actual purpose was by indirection to get Democrats into those fourth-class post offices. But, Mr. Chairman, if it was necessary, according to their theory, to ascertain by competitive examination whether fourth-class postmasters were competent to perform the duties of their office, how can they vote consistently to keep this section in the bill which provides that there shall be no examination at all? I realize, Mr. Chairman, as does everyone upon that side of the aisle, that even though you do put them in the classified service, you upon the other side will find ways and means to get these places for Democrats rather than Republicans. That is not the point. But if this is in the classified service, the Democrats that will go in there will have to pass an examination and show they are qualified to perform the duties to which they are appointed.

That is exactly why you want these exempted from the classified service, because you on that side want the privilege of appointing Democrats who are not competent to perform the duties. You want to treat this as a piece of political pie, irrespective of the merits or the services which they will perform; and so far as this bill is concerned a very large majority upon that side of the aisle are looking a good deal more to the jobs

that will be created for Democrats in this bill than to the benefit to the farmers that will result from the bill. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman from Wisconsin has expired. All time has expired. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the "noes" seemed to have it.

Mr. MANN. I call for a division, Mr. Chairman.

The committee divided; and there were—ayes 46, noes 81.

Mr. MANN. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. GLASS and Mr. MANN to act as tellers.

The committee again divided; and the tellers reported—ayes 59, noes 89.

So the amendment was rejected.

Mr. FESS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on the amendment just defeated.

The CHAIRMAN. The gentleman from Ohio [Mr. FESS] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I move to amend, page 77, line 15, by striking out the word "employees" and inserting the word "positions."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, page 77, line 15, by striking out the word "employees" and inserting the word "positions."

Mr. MANN. So that it would read, Mr. Chairman:

*Provided*, That nothing herein shall prevent the President from placing said positions in the classified service.

Mr. GLASS. I accept that amendment, Mr. Chairman.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GLASS. Mr. Chairman, on page 77, line 18, there is a misprint. The word "lands" ought to be "land." I ask unanimous consent that the alteration be made.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that the amendment suggested be agreed to. Is there objection?

There was no objection.

Mr. GLASS. Mr. Chairman, I submit to the committee that this bill was hastily printed, and I have discovered quite a number of typographical errors, and I ask unanimous consent that those obvious typographical errors may be corrected by the Clerk.

Mr. MANN. Let the Clerk correct them.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. WALSH. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Massachusetts [Mr. WALSH] moves to strike out the last word.

Mr. WALSH. In view of the vote that has just been taken on the amendment offered by the gentleman from Illinois [Mr. MANN]——

Mr. GLASS. Mr. Chairman, if there are no further amendments——

Mr. HOWARD. I have an amendment, Mr. Chairman.

Mr. GLASS. How many amendments are proposed to be offered?

Mr. MANN. Three gentlemen over here wish to offer amendments to the section, besides the pro forma amendment offered by the gentleman from Massachusetts [Mr. WALSH].

Mr. WALSH. Mr. Chairman, in view of the vote that has just been taken on the amendment of the gentleman from Illinois [Mr. MANN], I should like to call the attention of the committee to a little ancient history, and to read the words of the late lamented President of this Nation, William McKinley, spoken in debate on April 24, 1890, when an attempt was made to strike out the appropriation for enforcing the civil-service law. And I want to direct the attention of the members of the committee to the fact that it was on that side of the House almost entirely that the opposition has just now developed to the amendment of the gentleman from Illinois [Mr. MANN]. Speaking on the proposition in 1890, Mr. McKinley, of Ohio, said:

If the Republican Party of this country is pledged to any one thing more than another, it is to the maintenance of the civil-service law and its efficient execution; not only that, but to its enlargement and its further application to the public service.

The law that stands upon our statute books to-day was put there by Republican votes. It was a Republican measure. Every national platform of the Republican Party since its enactment has declared not only in favor of its continuance in full vigor, but in favor of its enlargement so as to apply more generally to the public service. And this, Mr. Chairman, is not alone the declaration and purpose of the Republican Party, but it is in accordance with its highest and best sentiment—aye, more, it is sustained by the best sentiment of the whole country, Republican and Democratic alike. And there is not a man on this floor who does not know that no party in this country, Democratic or Republican, will have the courage to wipe it from the statute book or amend it save in the direction of its improvement.

I regret that since that time, apparently, some gentlemen on that side of the House have received sufficient inspiration and encouragement from somewhere to attempt to do by indirection what they do not dare to do directly.

Mr. FERRIS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Oklahoma?

Mr. WALSH. No; I regret I can not yield. I have but a few minutes remaining of my five minutes.

The CHAIRMAN. The gentleman declines to yield.

Mr. WALSH. Mr. McKinley proceeded further, and said:

The merit system is here, and it is here to stay, and we may just as well understand and accept it now and give our attention to correcting the abuses, if any exist, and improving the law wherever it can be done to the advantage of the public service.

I want to call the attention of that side of the House to the fact that what the lamented McKinley said at that time is true to-day; that the people of this country believe that the civil-service laws should be enforced in spirit and in letter; and that they will resent any attempt on the part of the majority party, as indicated in its vote upon this amendment proposed by the gentleman from Illinois [Mr. MANN], to break down those laws and throw open that class of service to be filled by the political henchmen of the majority party, who are lieutenants in that vast army of deserving Democrats, hungry for jobs. [Applause on the Republican side.]

Mr. GLASS. Mr. Chairman, I do not think much credit is to be derived by any side or any party by diverting this House from modern legislation by going into ancient history and by holding post-mortems over a proposition that has already been decided. I hope we will confine ourselves to the consideration of this bill. [Applause on the Democratic side.]

Mr. POWERS. Mr. Chairman, I move to amend section 3, page 77, line 9, by striking out the word "without" and substituting the word "with," and on page 77, lines 12 and 13, by striking out the words "or any rule or" and substituting "with regard to rules and," and on line 13, after the word "thereof," by striking out the words "*Provided*, That nothing herein shall prevent the President from placing said employees in the classified service," so that as amended it will read:

All such attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars, examiners, and appraisers shall be appointed with regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, and with regard to the rules and regulations made in pursuance thereof.

Mr. GLASS. Mr. Chairman, I make the point of order that substantially the same proposition has just been voted down.

Mr. POWERS. I want to say, Mr. Chairman, that this is not the same proposition at all, because the amendment of the gentleman from Illinois [Mr. MANN] proposed to strike out the entire provision and leave it in the discretion of the President to appoint, without regard to the classified service. My provision makes it incumbent upon the President to appoint with regard to the classified service.

The CHAIRMAN. The Chair is inclined to believe that the point of order is not well taken, because of the fact that the other provision would leave it discretionary with the President, whereas under the amendment offered by the gentleman from Kentucky he would be compelled to observe the civil-service law.

Mr. GLASS. I ask unanimous consent that all debate on the amendment conclude in five minutes.

Mr. FERRIS. Make it seven minutes.

Mr. GLASS. I ask unanimous consent that all debate on the amendment conclude in seven minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on the amendment be closed in seven minutes. Is there objection?

There was no objection.

Mr. POWERS. Mr. Chairman, one plank of the Democratic platform adopted at Baltimore in June, 1912, reads in part as follows:

The law pertaining to the civil service should be honestly and rightly enforced, to the end that merit and ability shall be the standard of appointment and promotion, rather than service rendered to political parties.

Mr. Chairman, the Democratic Party of this Nation went before the voters of this great country with that as one of the planks in their platform. They made a sacred pledge that if entrusted with power they would carry out in letter and in

spirit the civil-service laws and regulations on the statute books of this great country.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. POWERS. I yield to the gentleman.

Mr. LA FOLLETTE. Was there any plank sacred except that one? They seem to have broken them all.

Mr. POWERS. In further answer to the gentleman's question I desire to say, Mr. Chairman, that apparently no plank of the Democratic platform adopted at Baltimore has been regarded by them as binding upon them in the legislation that they have enacted since they came into power. The Panama Canal tolls plank was broken——

Mr. MOORE of Pennsylvania. Have not all these broken planks to which the gentleman refers been repealed by common consent?

Mr. POWERS. If they have not been, they will be in the approaching November election. [Applause on the Republican side.] I can not discuss at this time all the broken pledges of the Democratic Party.

Mr. HUMPHREY of Washington. Not in five minutes' time.

Mr. POWERS. By no means. It would take a month to reiterate them all and to lay them before the people of this Nation.

Of course, Mr. Chairman, in regard to the violation of the civil-service law, so far as this bill is concerned, let me say that this is one bill of all bills that ought to be free from the spoils system. The farmers of our country are interested in good legislation. They have never stood at the pie counter. They have never stood at the public trough. They are far removed from all that in the business in which they are engaged. They are entitled to have a rural-credits system set up in such a way as will produce the very best results for them and the country generally. When the President of the United States was a candidate for the Presidency, he wrote a letter to the National Civil Service Reform League, of which he was vice president up to the time of his election, stating that he would see to it that at all times the service laws and principles should be upheld by him.

Mr. FERRIS. Mr. Chairman, I will detain the House only long enough to say that while the Democratic side of the House are passing bills beneficial to the farmers and in keeping with our platform pledges, the Republican side of the House are, as usual, engaged in talking politics. [Applause on the Democratic side.] But before I pass from that I want to refer to the speech of the gentleman from Massachusetts [Mr. WALSH] just a moment ago, who took occasion to read from the utterances of President McKinley when he was a Member of this House. I wonder why he did not take time to read from President Taft's last Executive order, which, in effect, placed under the civil service some 28,000 or 30,000 partisan Republicans, who had been appointed on the recommendation of partisan Republican politicians. [Applause on the Democratic side.] And again, while I am not the defender or spokesman of the present administration and am not in any way commissioned for that purpose, I may add that the fact of the business is that the Wilson administration has enforced the civil-service rules to a very much greater extent than any reasonable man would expect them to do under the circumstances. Talk about abusing the civil service! It was abused more in the last few days of the Taft administration than it probably ever will be again.

Mr. POWERS. Will the gentleman yield?

Mr. FERRIS. The gentleman from Kentucky made a bland prophecy a few minutes ago about what the Republicans would do to us in November. They had a little victory on Tuesday. In a district normally Republican by 4,000 or 5,000 they carried it by a few hundred. So that is the much talked of and wonderful victory that they enjoyed on yesterday; and so with all their victories and all their bland prophecies. They might all be properly consigned to the scrap heap together, but this is not the time or place to discuss but very few of the Republican delinquincies and short comings. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman has expired. All time has expired. The question is on the amendment offered by the gentleman from Kentucky.

Mr. COX. May we have the amendment reported?

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. POWERS: Page 77, line 9, strike out the word "without" and insert the word "with"; line 12, strike out "or any rule or regulation" and insert "and with regard to the rules and regulations"; line 13, after the word "thereof," strike out the remainder of the paragraph, so that the paragraph as amended will read: "All such attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars, examiners, and appraisers shall be appointed with regard to the provisions of the act of January 16, 1883 (22 U. S. Stat. L., 403), and amendments thereto, and with regard to the rules and regulations made in pursuance thereof."

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. All debate upon this amendment is closed. The question is on the amendment of the gentleman from Kentucky [Mr. POWERS].

The amendment was rejected.

Mr. McLAUGHLIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. McLAUGHLIN: Page 77, line 8, strike out the word "shall" and insert the word "may."

Mr. McLAUGHLIN. Mr. Chairman, the speeches made by some gentlemen on this paragraph indicate a belief on their part that this paragraph will be construed just as I wish by my amendment to have it provide clearly and without question; that is, that it ought not in so many words to require the President to make these appointments without regard to the civil-service law, but to permit him, in his discretion, to make appointments without regard to that law. They may be right as to the construction and meaning of the word "shall." Often the word "shall" is construed to mean the word "may," but it seems to me that it will be better to use the word "may" rather than the word "shall." It will show a better disposition; it will not show a disposition on the part of the House to require or to ask the President to regard civil-service law or to demand that he shall violate it or fail to observe it. It will be better to permit him to disregard it if the exigency of cases coming before him seem to require him to disregard it.

I appreciate that some of the places may be better filled in the first instance when the force is to be organized by making some selections without regard to the civil-service law. But it seems to me that Congress ought to be slow in placing itself upon record directly in opposition to that law, which in its platforms it has promised to observe.

The Democratic Party, in control of the House, ought to make some effort to comply with and keep some of the promises of its platform. Evidently there is only one pledge made in the Baltimore platform that is to be kept, and observance of that pledge will not be kept by the Democratic Party itself or of its own accord; observance will be demanded and enforced by the people of the country in November, when they will insist by an overwhelming vote that the one-term plank of the platform must be fulfilled. [Applause on the Republican side.]

I offer this amendment in good faith, hoping our Democratic friends will consent to it and make the provision permissive instead of obligatory upon the President.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that debate on this amendment close in five minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this amendment close in five minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, the gentleman from Oklahoma [Mr. FERRIS], endeavoring to console himself and the other Democrats in the House a moment ago, said that the Republicans had elected a Republican Member of the House in West Virginia last Tuesday in a Republican district. The statement was entirely true. All the districts, with a very few exceptions, all over the North in the United States are to-day Republican [applause on the Republican side], including the district represented by my genial friend from Oklahoma. [Laughter and applause on the Republican side.]

Mr. HOWARD. Mr. Chairman, I want to say a few words for the sake of those gentlemen on the other side of the House who seem to be suffering from political cramp colic.

Mr. MANN. We are enjoying it, not suffering.

Mr. HOWARD. And want to play politics on a bill of this sort. They talk about what they are going to do in November. Why, they are going to be the sickest set of Republicans in November that you ever saw in your life. [Applause and laughter on Democratic side.]

The gentleman from Michigan referred to the one-term plank. That is the main thing that seems to interest all of you. You are as scared of President Wilson as you are of a cinnamon bear. You stay awake at night to keep from having a Wilson nightmare. [Laughter and applause on the Democratic side.] Here you are, 30 days from the great convention of your party, running around like a cat shot with a paper of No. 8 tacks, trying to find some one to take a nomination that they know will not be worth anything after they get it. [Laughter and applause on the Democratic side.] One day it is Root; the next day it is Roosevelt, or WEEKS, or Burton, or Fairbanks, or CUMMINS, or LA FOLLETTE, or Hughes. Then your Republican papers let out a wail for a man to beat Wilson. No one seems to have any

interest in the coming convention but the southern negro delegates. Do you know why they are interested? They want to be at the auction. It is really amusing to see the bravery and the front that you are putting on—whistling while you go through the graveyard. You may keep on whistling, but everybody knows you are scared. [Laughter and applause.]

What I want to call attention to is this: The gentleman from Massachusetts [Mr. WALSH] delivered a speech over there a while ago about civil service. Now, the people do not know so much about your application of the civil-service law, because you have been pretty smooth in the way in which you couched the language when you wanted to evade it, but brave when you did it vie et armis, and broke the world's record by covering 36,000 of the old faithful Republicans into the civil service at one stroke of the pen. Of course, that was not an assault upon civil service. That was literal murder. Of course, you blessed Republicans over there condemn that now. How it shocks your modesty to even refer to it; it makes you shudder to think one of your Presidents was so naughty.

The result after the Democrats came in, after your being in power 16 years, was that we found that 95 per cent of the post-office inspectors were Republicans—85 per cent of all the civil-service employees were Republican—and you lambasted every Democrat that raised his head up and got a decent salary. You were doing it with a bludgeon, and we have been trying to do it more decently. [Laughter and applause.]

Now, as a matter of fact, I want to show you how you have evaded the civil service. When you established the Tariff Board, one of the most innocent little things I ever saw, couched in perfectly innocent language, and if I did not love my friend from Illinois [Mr. MANN] like I do, I would accuse him of having written the paragraph, and I believe he did have something to do with it.

Here is the way you handled the Tariff Board:

To secure information to assist the President in the discharge of the duties imposed upon him by this section, and the officers of the Government in the administration of the customs laws, the President is hereby authorized to employ such persons as may be required.

The President did employ every blessed one of them, from the president of the board to charwomen. He never consulted the civil service; he only consulted your Republican patronage dispensers who happened at that time to have on hand a very healthy supply of "lame ducks." He took care of the "lame ducks" until we sent them off on crutches by abolishing the whole inefficient shooting match.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The question was taken, and the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Insert after the word "Senate," on page 74, line 16, the following: "Before appointing said board the President shall divide continental United States, excluding Alaska, into three districts, which he shall designate by number. He shall certify said districts to said board, which shall cause the same to be made of record. One member of said board shall be appointed for each of said districts, and the person so appointed shall have been an actual resident of said district at the time of his appointment for more than two years immediately prior thereto. Thereafter not more than one member of said board shall be a resident of any one of said districts."

Mr. MORGAN of Oklahoma rose.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MORGAN of Oklahoma. Mr. Chairman, the amendment that I offer I think should be accepted by the chairman of the Banking and Currency Committee and adopted by the Committee of the Whole. This bill provides that we shall create a Federal farm-loan board consisting of three members. This board, as we all know, is given very great powers in directing the affairs of these land-credit institutions. The members of the board are to hold office for nine years, which is almost equivalent to life positions. All this amendment proposes is that, before making the original appointments, the President shall divide the United States into three districts. As there are 48 States, there will be an average of 16 States in each district, one, say, in the West, one in the South, and one in the central or eastern part. My amendment provides that one member of that board will be appointed from each one of those districts. I do not see how there can be any objection to the proposition. There would naturally be, to some extent, different conditions in the different parts of the United States. The wants and needs of the farmers in one section would differ from those in another section. Why would it not be proper to divide the country into three districts and appoint one of the members of this board from each one of those three districts? That would give fair representation to the farming interests of the entire country. There may be a time, with all the power that we give to this Federal farm-loan board, a majority of the board may live in the East, that the West might not have proper consideration, although the members of the board might be absolutely honest.

There is something in environment, there is something in the point of view. No man can understand the West or the great Southwest or the Pacific coast unless he is, to some extent, identified with those sections of the country, and likewise a man who lives in the far West and gets his inspirations, ideas, and conceptions from that part of the country can not have a proper conception of the conditions in the East. It would seem to me to be a wise precaution to make this division and have one member of the board appointed from each one of three great districts. Of course, this does not change the bill in any important particular. It probably would run all right without it, but, in my judgment, it would be a wise precaution to take.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma.

The question was taken; and on a division (demanded by Mr. MORGAN of Oklahoma) there were—ayes 30, noes 47.

So the amendment was rejected.

Mr. HOWARD. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 76, line 21, strike out the words "and the joint-stock land banks."

Mr. HOWARD. Mr. Chairman and gentlemen of the committee, if I can get the attention of the committee for a moment or two on this proposition I would be very glad. I would like only to inject this question at this stage so that Members may think it over. My honest, cool judgment, after studying this proposition, is that the mixture of a different form of banks with the land-mortgage banks of the Federal system is the worst mistake we can make. There are two very strong objections, as I see them, to the adoption of this joint-stock bank provision in this bill. First, there is no limitation upon the rate of interest to be charged. The section says that they can charge only 1 per cent above what the last bonds sold for, but it does not restrict the loans made to farm loans.

Mr. MOSS of Indiana. Oh, the gentleman is mistaken when he says that there is no limitation fixed.

Mr. HOWARD. No fixed rate.

Mr. MOSS of Indiana. Yes; there is a fixed rate. No bond can be issued at a higher rate than 5 per cent.

Mr. HOWARD. They can charge 1 per cent above what the bonds sold for the last time, but you provide that this rate shall not be in excess of 6 per cent, including the 1 per cent.

Mr. MOSS of Indiana. And no bond can be issued higher than 5 per cent.

Mr. HOWARD. Well, we will eliminate that for the present; but what is the object of establishing a system of farm credits for the farmers of this country? Let us get right down to the reason for this legislation and let us reason about it.

Mr. MANN. Does the gentleman want an answer to that question now?

Mr. HOWARD. No; not from the gentleman. [Laughter.] Not right now. The reason for the establishment of farm-loan banking is this: As a Nation we are dependent upon the farming element of our population for the subsistence of our people. That is the reason we want to induce some of the great influx of citizens that is pouring into the civic centers for the purpose of educating their children and making a better living to stay in the country on the farm; and we are endeavoring to permit them to finance their capital demands at a reasonable rate of interest that farming may become a more profitable business. What do you do? When you establish these joint-stock banks you depart from the very principle of rural-credits banking, every single principle of it. You allow the badge of respectability, Government respectability and integrity, to be pinned to individuals who go into these joint-stock banks, establish them with $250,000 capitalization, and issue fifteen times their capital stock in bonds purely for individual gain. I will admit that their bonds are distinctive in color, that they are distinctive in print, and the general public will not be deceived as to which bond it is getting; but I want to submit that if one of these privately owned corporations ever fails and the American public gets bitten by one of these failing banks, then your rural-credits system as a whole is gone to the bowwows, and you will displace the confidence of the American investing public in this kind

of security as a good investment and shake the confidence of the country in the system. People say that it is safeguarded against fraud.

If you are going to establish a system of farm-loan credits for farmers and the Government is going to exercise supervisory powers over it, do so. This field is amply covered now by the insurance companies. This field is amply covered by the private land-mortgage banks of this country that are doing business, but gentlemen will say this is to meet the demands for shorter time loans than five years. If that be true, then the farmer who needs the loan can go to these private corporations and secure his loan; he would certainly drive as good a bargain with them out of this bill as he could with them in the bill. Why, the gentleman from Illinois, the gentleman from Indiana, the gentleman from Iowa in their States are getting money from three to five years from land banks already organized at 6 per cent. Why do you want to put in jeopardy a system that the Government of the United States is behind for the purpose of allowing a few private individuals that have got $250,000 capital, engaged with the Government side by side with them, to enjoy practically the same privileges, and a great deal more privileges, than the rural-credit banks themselves are enjoying, and take the risk of jeopardizing the farmers' banks with this scheme to exempt some established banks from taxation? What interest will these banks have in selling bonds at a minimum rate of interest? They are to do business by marketing the most attractive interest-bearing bond. They enjoy all the privileges and none of the burdens of the system. The farmer gets nothing back in the way of dividends from these joint-stock banks. You create a corporate parasite to suck the life blood out of the very system you are trying to create with puny Government aid.

For love and mercy let us do something one time in the Congress for the farmer that will give him complete freedom so far as his affairs are concerned.

The CHAIRMAN. The time of the gentleman has expired.

The question is upon the amendment offered by the gentleman from Georgia.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent that the amendment be again stated. Some gentlemen have come in since it was reported.

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection.

The amendment was again reported.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the noes appeared to have it.

Upon a division (demanded by Mr. HOWARD) there were—ayes 34, noes 41.

Mr. HOWARD. Mr. Chairman, I ask for tellers.

The CHAIRMAN. The gentleman asks for tellers. Sixteen gentlemen have arisen, not a sufficient number.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. POWERS. Mr. Chairman, before going to the next section I desire to move to amend section 3, page 76, line 20, by striking out the word "and" and substituting in lieu thereof the following:

Not exceeding in amount as salary more than $5,000 each annually and same.

So that that part of the section as amended will read——

Mr. GLASS. Mr. Chairman, I make the point that debate is exhausted.

The CHAIRMAN. All debate was closed on the amendment.

Mr. MANN. But that does not prevent an amendment being offered to the section.

Mr. CULLOP. Mr. Chairman, I call attention to the fact that the Clerk had begun to read the next section.

Mr. MANN. That point of order was not made.

Mr. GLASS. I make the point of order now.

The CHAIRMAN. The Chair thinks the gentleman is in time. The Clerk will report the amendment.

Mr. POWERS. I will read the language as it will read as amended:

Appraisers shall receive such compensation as the Federal loan board shall fix, not exceeding in amount as salary more than $5,000 each annually and same.

I have put a limitation there that they shall not receive more than $5,000 annually. Can I offer a few remarks on it?

The CHAIRMAN. Debate is closed. The gentleman will have to send up his amendment to the Clerk. The Clerk can not report the amendment without its being sent up.

Mr. POWERS. I ask unanimous consent that discussion on the bill may go on; I think it will save time——

The CHAIRMAN. But debate is closed by unanimous consent.

Mr. POWERS. I ask that the section be passed and that we may revert to it.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to pass the section and to permit him to go back and offer an amendment.

Mr. POWERS. It is just to save the time; I do not want to take up the time of the committee.

Mr. PHELAN. Mr. Chairman, does the gentleman mean to go back to the section without debate just for the purpose of offering his amendment?

Mr. POWERS. I understand that debate is closed.

Mr. PHELAN. Does the gentleman now ask to go back to the section to offer an amendment without debate?

Mr. MANN. I shall ask unanimous consent that the gentleman be permitted to address the House for three or four minutes, if we go back.

The CHAIRMAN. Let the Chair see if he understands the request. What is the request of the gentleman?

Mr. MANN. That the gentleman from Kentucky have the right to recur to this section for the purpose of offering his amendment.

The CHAIRMAN. Is there objection to the request? [After a pause.] The Chair hears none.

The Clerk read as follows:

POWERS OF FEDERAL FARM-LOAN BOARD.

SEC. 4. That the Federal farm-loan board shall have power—

(a) To organize and charter Federal land banks, and to charter national farm-loan associations, and joint-stock land banks, as hereinafter defined, subject to the provisions of this act.

(b) To review and alter at its discretion the rate of interest to be charged by Federal land banks for loans made by them under the provisions of this act, said rates to be uniform so far as practicable.

(c) To grant or refuse to Federal land banks, or joint-stock land banks, authority to make any specific issue of farm-loan bonds.

(d) To make rules and regulations respecting the charges made to borrowers on loans under this act for expenses in appraisal, determination of title, and recording.

(e) To prescribe the form and terms of farm-loan bonds, and the form, terms, and penal sum of all surety bonds required under this act and of such other surety bonds as they shall deem necessary, such surety bonds to cover financial loss as well as faithful performance of duty.

(f) To suspend or to remove for cause any district director or any registrar, appraiser, examiner, or other official appointed by said board under authority of section 3 of this act; the cause of such suspension or removal to be communicated forthwith in writing by the Federal farm-loan board to the person suspended or removed, and in case of a district director to the proper farm-land bank.

(g) To exercise such incidental powers as shall be necessary or requisite to fulfill their duties and carry out the purposes of this act.

Mr. PLATT. Mr. Chairman, I move to strike out the last word simply to call attention to subsection (b). It seems to me the authority there given the Federal farm-loan board is wholly unnecessary, but I know the probability is it would not be stricken out if I should so move. Here we are establishing a system of Federal farm-loan banks controlled at the outset by Government directors and afterwards controlled wholly by the borrowers themselves, and it does not seem to me it is at all necessary that any authority in Washington should be given the right or discretion to review the rate of interest charged by those banks. It is conceivable that such authority might do harm. If our system is workable—and I believe it is—this matter of interest will regulate itself. There is a similar provision in the Federal reserve act, and I believe this is taken from that. There is no use in putting language in here unless it will do some good, and it seems to me it is wholly unnecessary.

Mr. MOSS of Indiana. If the gentleman will permit, the power given to farm-land banks to make charges to borrowers is provided for on page 105, and it says it is to charge the borrowers under rules and regulations promulgated by the Federal farm-loan board, because if you keep in the language on page 105 it is necessary to give that board the right to promulgate rules and regulations.

Mr. PLATT. That is not the section to which I was referring.

Mr. MOSS of Indiana. That is on page 105, under subsection 8.

Mr. PLATT. That refers to reasonable fees, and so forth, and this subsection (b) refers to the rate of interest on loans. They are entirely different things.

Mr. MOSS of Indiana. On page 104, section 13, it relates to the power of the Federal land banks to charge borrowers, under rules and regulations promulgated by the Federal farm-loan board, reasonable fees not exceeding the actual cost of appraisement and determination of title. Now, then,

under section 4 the farm-loan board is given powers to make rules and regulations respecting the charges made to borrowers. It only gives the power to carry out what is provided on page 1.

Mr. PLATT. I am referring to subsection (b) and not to subsection (d). It seems to me the system we are creating is workable. I think it will work out a lower rate of interest in the long run, and if it does it ought to be permitted to take care of itself. The economic laws and competition between the two systems here will bring the rates of interest down. You can not have a board in Washington to regulate the rates of interest all over the country.

Mr. SISSON. I notice that there seems to be some latitude given as to interest charges fixed under this subsection (b). Does that mean that this board will have the right to fix one rate, we will say, in California and another rate in Iowa and another in New England?

Mr. PLATT. I think it does. It would practically mean that, I should think.

Mr. SISSON. It enables the board to have practically as many different rates of interest as they desire?

Mr. PLATT. It says that said rates are to be uniform so far as practicable.

Mr. GLASS. The gentleman will remember that the commodity rate fixed for the Atlanta banks was different from the commodity rate fixed by the St. Louis banks, but all the rates must be within the maximum. But there might be an entirely different reason in commercial banking and the loan on farm lands, which lands are fixed in their nature. There may be many reasons in commerce where you might want to make a rate of interest high in order to force the retirement of currency or to make it low in order to force an issuance of currency. But here we are having a fixed loan, a loan intended as nearly as possible to be a fixed loan.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. Mr. Chairman, I move to strike out the last two words. I did not really want to take the time from the gentleman from New York.

Mr. PLATT. I do not want to take any more time unless the gentleman wishes to ask me further questions.

Mr. SISSON. I was just wondering why, in fixing the interest on land values, this discretion should be vested in the board to make the change of interest.

Mr. MOSS of Indiana. I would like to give my own opinion. We give the board the power practically to say under what conditions the bonds shall be sold. Now, then, there is 1 per cent, which is the difference between the bonds and what the borrower pays. Now, then, the bank is given the power to charge the 1 per cent, but at the same time the board is given power to regulate, but they can make it less than 1 per cent if they want to. That is the power they would still exercise.

Mr. SISSON. I want to understand just why this power was given to the committee. Suppose the rate of interest in the South is higher with the local banks than it is, we will say, in Illinois or Indiana, is it intended that this board should be able to meet the differences in that State?

Mr. MOSS of Indiana. Oh, no; it means this. We have 12 land districts. In one there may be a very large volume of business done by the bank, and the bank can do it at a less rate per $100. Here is a district that is sparsely settled, and it costs more to place business on the books.

Mr. SISSON. The overhead charges would be greater?

Mr. MOSS of Indiana. Here is 1 per cent, and the board will have an option as to whether the land banks will charge the full 1 per cent or a fraction of 1 per cent.

Mr. SISSON. Suppose the pressure should become great, and the rate of interest being greater in the South, then would it mean that the balance of the country might get money at a cheaper rate of interest than the people of the South, where the interest is high, as in Oklahoma, in Texas, and in Mississippi, that they might get money from the Government cheaper than they would where there is a great competition for money?

Mr. WINGO. If the gentleman will look closely, he will see that there can not be any variation except in the 1 per cent, as suggested by the gentleman from Indiana [Mr. Moss]. The market price of the bonds will fix the rate of interest, and within 1 per cent.

Mr. SISSON. Then, as a matter of fact, this board does not fix the rate, but the sale of the bonds fixes it?

Mr. WINGO. Yes; but the gentleman overlooks the suggestion made by the gentleman from Indiana [Mr. Moss]. If one of the banks was doing a very large volume of business, it might be impossible for it to operate upon less than the 1 per cent. For that reason, then, they could require them to make their loans at 5½, say, where the bonds had been sold at 5. That was the object and the theory which I understood the committee had in mind.

Mr. SISSON. The only fixing of the rate, then, would be the difference between the price at which the bonds were sold plus 1 per cent?

Mr. WINGO. Yes. This would only go to 1 per cent. That would be the limit of their control. If they wanted to require them to make their loans at 5½, where the bonds had sold at 5, they could do it, but they could not make it 6½.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. WINGO. Yes.

Mr. HAWLEY. This situation will frequently arise: The 12 land banks will be in the market to sell their bonds. Suppose they think a bond issue at a given time should be floated at 4½ per cent, then the bonds, selling at 4½ per cent, would fix the rate of interest on the succeeding mortgages. Thereafter they have acquired a number of additional mortgages and wish to float another bond issue of $50,000. They wish to sell them at the former rate of 4½. But the board finds that they sold the former issue of bonds at a premium, and they can now sell a 4¼ per cent bond at par. Therefore they will refuse permission to them to sell the bonds at 4½ and get a premium for them—which premium would come out of the farmer—and require them to sell a 4¼ per cent bond at par, and therefore they would reduce the interest rate to the farmer one-fourth of 1 per cent.

Mr. SISSON. Suppose the bond might be sold at 3½, exempt from taxation? Then the limit of interest to be charged the borrower would be 3½ plus 1?

Mr. HAWLEY. Three and one-half plus such part of 1 as the operating charge would amount to.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word. The gentleman speaks in opposition to the amendment.

Mr. MANN. Mr. Chairman, paragraph 6 gives to the Federal farm-loan board the power to grant to the Federal land bank authority to make any specific issue of farm-land bonds. I have read this bill over a number of times, and I would like to have had an opportunity to read it over a number of times more, so that I would know more about it. I am trying to avail myself now of the opportunity to really know more about it by asking gentlemen who do know. I hope it is excusable, because I do not think any one of us knows, unless he has made an expert study of it, and I do not think we will know when we go home unless we have given to it such a study.

This apparently would say that the land banks could not authorize or make any farm-loan bonds without first having received specific authority from the Federal farm-loan board—that is, they could not grant any authority by general regulations, apparently. This provision is to grant or refuse the right to make any specific issue of farm-loan bonds.

Now, what is to be the process? First, you have your joint-loan association get together some applications for mortgages, and the mortgages are made and recorded. The appraisal of the property is made by the various different appraisers and comes within the provisions of the regulations. They are ready to issue the money. They have some money on hand, and they pay out the money on these mortgages, and they have a certain number of mortgages on hand. They would want to issue some farm-loan bonds. Well, that is all right when you have a large amount at once, but in course of time the capital furnished by the Government will be absorbed. Supposing a man wants to get a mortgage then. Will he have to wait until other people want $100,000 more and make an application here and have the Federal farm-loan board go over that specific application each time? That would apparently be the process. It looks to me as though it would be very long-winded. I am asking for information.

Mr. PHELAN. The gentleman wants an answer now?

Mr. MANN. Yes.

Mr. PHELAN. Well, each time there is an issue of bonds it would be necessary to get the consent of the farm-loan board.

Mr. MANN. How often will Federal bonds be issued, then? They could not issue them before they have the mortgages ready, could they?

Mr. PHELAN. No. I will explain that process, but it will take two or three minutes to do it.

Mr. MANN. I hope the gentleman will, because I have listened quite diligently to the general debate on this bill, and I did not hear anything explained about the process, except that the gentleman from Massachusetts [Mr. PHELAN]

explained the bill very intelligently, as did some of the other gentlemen.

Mr. PHELAN. Mr. Chairman, the gentleman from Illinois has raised a pertinent inquiry, and asks to have some explanation made about these bonds. There is some difficulty, in reading a bill of this kind, to understand all its provisions. I shall try to make this particular provision clear.

It is intended by those who prepared the bill that there shall be no issue of bonds by either the Federal farm-loan bank or the joint-stock bank without the specific consent of the farm-loan board. The purpose is this: We realize that the money that is going to the farmer on mortgage loans comes from one source, and can come in greatest measure from one source only, and that is the investors of the United States. The Government has not enough money, and under proper conditions and restrictions can not get enough money to give the farmer. The money must come from the investors. Now, since the money must come from the investors, those investors must be assured that the investment is to be good. Accordingly, we have made careful provision in the bill for the appraisal, in order that the mortgage will be thoroughly good. Then we have taken the precaution that before the bank can issue any bonds, the board shall look over the security, and if there is any suspicion or doubt regarding it they can make further inquiry about it.

I think the ordinary procedure will be that they will take the mortgages from the banks. They will look into the case; they will be satisfied, probably, in a short time that everything is all right, and they will grant the consent to have the bonds issued. Now, let us take the procedure.

Mr. HAWLEY rose.

Mr. PHELAN. If the gentleman will wait just a moment, I will be glad to answer his questions.

To start at the beginning, the bank starts with $750,000. It will loan out a certain portion of that amount to the farmer borrowers through the local associations. When it has loaned a certain amount—not the entire $750,000, but a certain amount, in the discretion of the board of directors of the bank—then the bank will go to the public and say: "Here, we want you to buy *some* bonds." The banks have the mortgages, because they have loaned the money. With those mortgages as security, they will again offer their bonds to the public. As I said, they will have the mortgages ready. If the public takes those bonds, they will have more money to loan over again through the association to the farmers; and when they are pretty nearly out of that money, or at any time within their discretion, they will go to the public again and will offer some more bonds. Again they have the mortgages, and they will sell their bonds to get the money to loan to the farmer, and that thing goes on indefinitely as long as they can sell bonds to the public and as long as the farmer wants to borrow money which the banks obtain from the sale of the bonds, provided that the banks do not exceed the limit permitted in the issue of bonds of twenty times the capital.

Mr. MANN. They have $750,000 to begin with, from the Government, under this provision.

Mr. PHELAN. Yes.

Mr. MANN. They get $100,000 of mortgages. They can not issue any more bonds than the amount of mortgages on hand, can they?

Mr. PHELAN. It is barely possible, but in general they will not. There is a provision whereby they can substitute United States bonds for mortgages, but that will hardly be done.

Mr. MANN. I mean practically they can not issue more bonds than they have securities on hand?

Mr. PHELAN. No.

Mr. MANN. They authorize an issue of bonds. Another man wants to borrow a small amount of money. Of course it is all right as long as they have money on hand belonging to the Government.

Mr. PHELAN. Yes.

Mr. MANN. Does the gentleman apprehend that there never will be a time when this $750,000 will not keep revolving round, to take care of all the borrowers? If so, why not start with $100,000?

Mr. PHELAN. One hundred thousand dollars contribution by the Government?

Mr. MANN. Yes.

Mr. PHELAN. You could hardly get that system started with as small an amount as $100,000.

Mr. MANN. I agree with the gentleman. I am not sure that you could get it started with $750,000. Who determined just the amount that was going to be necessary in every district of the United States to make that revolving fund out of which you could get mortgages and then issue bonds by specific authority, there being no authority for the issue of bonds until you had obtained the mortgages?

Mr. PHELAN. To make an exact answer again I will state that the Banking and Currency Committee of the House determined upon $750,000. The Senate bill fixed the amount at $500,000.

Mr. MANN. Did they do it by lot?

Mr. PHELAN. No; they did it because——

Mr. MANN. I would not criticize them if they had.

Mr. PHELAN. I understand. They fixed it at that amount because after figuring the thing out they believed the system would work with $750,000 original capital. There may be more capital than that under the provisions of the bill. But the minimum was $750,000, and they felt that after $300,000 or $400,000 or $500,000 had been loaned, then the banks would be perfectly safe in going to the public and selling their bonds, because the security for the bonds was believed by the committee to be ample, and the public will have every confidence in the bonds as soon as they are issued. I do not know that I have made myself clear to the gentleman.

Mr. MANN. I think the gentleman is very clear in his statement.

Mr. CANNON. I should like to ask the gentleman a question.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. CANNON. I move to strike out the last word, and will yield to the gentleman from Massachusetts if I am recognized.

The CHAIRMAN. The gentleman from Illinois is recognized.

Mr. CANNON. Suppose that the farm-land bank is organized. I want $100,000, or there are enough people with me who want $100,000 or any other sum, complying with the provisions of the law. Or suppose I go alone and want it, will I have to wait, after the mortgage is drawn and the title is examined, until it goes to the boss bank—what do you call that?

Mr. PHELAN. The Federal land bank, under one system.

Mr. CANNON. Yes. Suppose the Federal land bank turns down the loan, will I get my money in the meantime?

Mr. PHELAN. You mean your loan?

Mr. CANNON. Yes.

Mr. PHELAN. Oh, no; certainly not.

Mr. CANNON. Then it has to go through the appraisers?

Mr. PHELAN. Yes.

Mr. CANNON. And the mortgage has to be recorded?

Mr. PHELAN. Yes.

Mr. CANNON. The abstract of title must be made?

Mr. PHELAN. Yes.

Mr. CANNON. And they say, "Yes; we will take that," but still I do not get my money until it goes up to Washington to this Federal land bank and they bless it. But if they turn it down I do not get anything.

Mr. PHELAN. Does the gentleman ask that in the form of a question?

Mr. CANNON. Yes; precisely, and in good faith.

Mr. PHELAN. If the gentleman will excuse me, that is not quite a correct statement of the situation. In the first place, the gentleman says the Federal land bank at Washington.

Mr. CANNON. Wherever it may be.

Mr. PHELAN. There will be 12 of these banks. Perhaps none of them will be at Washington. I thought perhaps the gentleman meant the Federal farm-loan board. That is in Washington.

In the first place, the man does not make out his mortgage in the beginning. I will state the procedure.

I want to borrow some money, and I have some farm land on which I want to borrow it. I go to the local association. In the first place, the local association must admit me as a member, because under the cooperative plan nobody can borrow money without belonging to the local association. Under the joint-stock plan anybody can secure a loan, if the joint-stock bank is willing to make it to him. But under the other system, I go to the association and tell them I want to borrow some money, and incidentally to join the association. If they admit me to the association they have a loan committee that looks into my land, and if their report is favorable the application goes to the land bank. The land bank has an appraiser who looks over the land. If his report is favorable and the board of directors want to give me the loan, I get it.

Now, that looks like a rather cumbersome proposition.

Mr. CANNON. The gentleman means one of the 12 banks?

Mr. PHELAN. Yes. Let me state incidentally that there is a provision in the bill whereby the land banks may have branches, so that as business expands they can have a branch here and there and some place else that will perhaps not be

more than an examining office in which they can have some of the work done.

Mr. CANNON. Will that branch have the power to give me my money?

Mr. PHELAN. No; it would simply make a report. I think in practice this would all work out so that there would not be much delay. Now, in a particular district there may be, say, half a dozen or 12 or 15 farmers who want to borrow some money, and they will make application about the same time. The loan committee can quickly determine what the situation is and make a report to the land banks, and almost before the committee has any report made the land banks can have the appraiser there, and out of the 12 or 15 that make application there will be at least 4 or 5 probably every one of whom will receive a favorable report from the loan committee. So that the whole thing can be done up, I think, in a comparatively short space of time. I think after a while the directors of the farm-land banks will get so that they can depend on the appraisers, and they can pass the things in a short time, as the national banks do on many loans to-day. The investment committee of the board of directors of the national bank will look into the whole matter and make a report, and in most cases the report will be accepted without question, except in particular cases where there might be some question that they wanted to ask. Now, while there might seem to be some delay, I think the thing will work out with more or less speed.

But we must be careful and look out for the appraisal, even though it may cause delay. One thing we must do, and that is to make the investor certain that his investment is going to be secure, because the mortgages are the security on which the bonds depend, and no man is going to invest his money unless he is absolutely certain that the appraisal is proper and correct and safe.

Mr. CANNON. That is undoubtedly true, but before the money can be had the appraisement must be made, an abstract must be perfected, the mortgage recorded——

Mr. PHELAN. Not necessarily must the mortgage be recorded, all it is necessary to do is to have the appraisal correct, and incidentally I suppose the title will be looked up, to save time, as soon as the application to the board is made.

Mr. CANNON. In the meantime he might sell the property.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 79, after line 11, insert as a new paragraph the following:

"If at any time a Federal land bank, the fair value of whose assets is at least equal to the total of its liabilities, shall find that it may soon be without funds, immediately available, sufficient to meet its obligations with respect to the payment, when required, of the principal of, or the interest on, bonds issued under this act, or of both principal and interest, it may make application to the Federal farm-loan board for a temporary deposit by the Secretary of the Treasury of the sum needed to make such payment, during the period for which its funds, immediately available, will be insufficient, setting forth in its application such information as the Federal farm-loan board may require. If, after investigation, the Federal farm-loan board approve said application, it shall give notice thereof to the Secretary of the Treasury, stating the sum required, the period for which needed, and such other facts as may be necessary. Thereupon the Secretary of the Treasury may deposit such sum, or from time to time so much thereof as may be required, with said Federal land bank, to be expended under the direction of the Federal farm-loan board for the purposes for which the application for such deposit was approved. Any sum so deposited shall bear a rate of interest fixed by the Secretary of the Treasury, not to exceed the current rate charged for other Government deposits, and shall be repaid as may be required, but not later than the expiration of the period fixed by the Secretary of the Treasury. To secure the repayment of any such deposit, together with the payment of the interest thereon, said Federal land bank shall issue to the Secretary of the treasury its certificate of indebtedness, and the United States shall have a first lien upon the assets of the said Federal land bank: *Provided*, That the aggregate of all such deposits in any one Federal land-bank by the Secretary of the Treasury shall not exceed in any fiscal year or at one time the sum of $500,000."

Mr. GLASS. Mr. Chairman, I reserve a point of order on the amendment, and I would like to inquire how much time the gentleman wants on this amendment.

Mr. LEVER. I think 45 or 50 minutes.

Mr. GLASS. It seems to me that is too much; can not we make it 30. I ask unanimous consent that all debate on the amendment may close in 30 minutes.

Mr. HENRY. I would like to have it understood that I get five minutes.

Mr. LEVER. Let me say that this will probably call for considerable debate, and I suggest that it might be well and would save time to be liberal in the matter of time.

Mr. GLASS. I want to be altogether liberal, but as my colleague from Pennsylvania [Mr. MILLER] suggested, at the rate at which we are proceeding it will take 34 days to get through with this bill. I will agree to 40 minutes.

Mr. MANN. We would like 40 minutes on our side on this amendment.

Mr. GLASS. Well, Mr. Chairman, we seem unable to reach a unanimous-consent agreement. I will let the debate run on, and then I will move to close it.

Mr. LEVER. Mr. Chairman, the amendment I have offered is the result of many months of study upon my part as a member of the joint committee on rural credit which was authorized to be organized by the last session of Congress. My study of rural-credit systems in other countries and of the various plans suggested for such a system in this country convinces me that the strength of the system proposed by this bill depends upon the strength of the bond to be issued under it. The bond is the bridge which connects up the borrowing farmer on the one side of the stream with the investing public on the other. The system will be only just as strong as this connecting bridge—this bond. The system will succeed or fail just in proportion as the bond is strong or weak. The all-important part of this machinery is the bond. It is the bond that will get the money for the farmer in the first instance; it is the strength of the bond in the investing mind that will determine the rate of interest to the borrower and more readily the bonds sell, the more favorable the terms under which it sells, the lower will be its own interest rate, and more important, the lower will be the rate of interest to the farmer. It is this that I am trying to do.

Now, what is this proposition? The amendment proposes to allow the Secretary of the Treasury, under certain circumstances, to deposit with any Federal land bank during any fiscal year a sum of money not to exceed $500,000, or a total of $6,000,000 for all the land banks of the entire system in any one year.

It may happen that in the State of Kansas the grasshoppers may eat up the crop; it may happen in the Mississippi Valley the levees break with great disaster to the growing crops; it may be that a severe drought sweeps over a section of the country and the farmers find themselves unable to meet the annual interest upon their mortgages, with the result that the bank, which in turn must meet the interest on its bonds and the maturing principal thereof, will find itself without means to meet these obligations. In that case the system would shake from foundation to top, because the land banks can meet their obligations only from funds paid into them by the borrowers in the way of interest or amortization, and a severe disaster over a large area of country might greatly embarrass the system, or, at least, the land bank immediately involved especially in the early life of the system. It is to safeguard against such a possible but not probable contingency that I think the fund proposed by this amendment should be available.

What will be the effect of this provision upon the salability of the bonds? What influence will this guarantee against possible temporary contingencies have upon the minds of those who have funds to invest and wish to place them in the most certain security? It is perfectly patent to me what the effect will be. The investor, the insurance company, the trustees of an estate, the school-teacher with a few hundred dollars, who desires a perfectly safe investment, one that can not fail in an emergency, will look to these farm-loan bonds as furnishing the best security. They will find certain security behind them—the mortgages, the capital stock of the bank, the reserves of the bank, the joint responsibility of the 11 other banks, and all that—but in addition to that they will see that in case of an emergency which might by the merest possibility overtake one of these land banks the Federal Treasury stands ready to deposit $500,000 to take care of the situation. [Applause.]

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, what is the result? The effect of that kind of guarantee upon the mind of the investor—and we get our funds from the private investor—makes him buy these bonds readily and at the very lowest rate of interest, because of the superlative safety of the investment. What is the ultimate effect of this amendment upon the rate of interest the borrower back in the country must pay upon his mortgage? This whole system is being initiated to help the man who wants to pay off debts already hanging over his farm or who wants to negotiate a mortgage to buy a farm. The system is for him. We are trying to get him, among other things, the lowest possible rate of interest by the mobilization and liquefication of his assets. Will this amendment help in this direction? It will, unquestionably, for the reason that the rate of interest to the farmer is fixed by the terms of this bill, by the rate of interest

at which the bonds will sell in the open market. The farmer can not pay more than 1 per cent in excess of the rate at which the bonds sell.

If the bond is made so secure, if it is made so good that the investor is willing to buy it at 103, for example, the borrowing farmer will be able to get his money on that issue of bonds at 4 per cent interest, so that the stronger we make the bonds the lower will be the rate of interest to the farmer, and it is the purpose of this amendment to make the bond so strong that it will reflect its strength in materially reducing the rate of interest charged the farmer for his loan. I believe it will reduce the rate possibly as much as 1 per cent, and the aggregate saving in that apparently small reduction is very great.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. LEVER. Yes.

Mr. HOWARD. Does the gentleman not create by this very amendment a superior lien in the Government of the United States over any outstanding bondholders of the bank, and does not the Government have the superior lien upon the entire assets of the bank as against the bondholder, thereby weakening instead of strengthening the system?

Mr. LEVER. I recognize the force of the gentleman's suggestion, and I am willing to amend the proposition in that respect, and would have included it in my amendment except for tactical reasons which are clear to me.

Mr. HOWARD. If the gentleman does not amend it, he will *destroy all of* his argument.

Mr. LEVER. I am trying to suggest a principle here, and we will work out the details elsewhere. I want to call the attention of the committee to the fact that this is no new proposition. I am not asking the Congress or the Treasury to do anything more by this amendment for this system of rural banks than the Government now is authorized to do, and frequently does, for the commercial banks of the country. Time and time again the Federal Treasury has gone to the rescue of tottering banks and saved them and their depositors, and I am asking that the Treasury do no more and no less for the system of banks which we are establishing for the farmers of the country. The system of land banks which we inaugurate for the farmers is at least entitled to equal treatment with commercial banks at the hands of this Congress.

Mr. MILLER of Pennsylvania. Does the gentleman mean to say that the commercial banks give their own notes to the Government and get its assistance?

Mr. LEVER. I am going a little bit further than that.

Mr. MILLER of Pennsylvania. Do they now?

Mr. LEVER. I do not know about that; but if they do not, I am asking the farmers to do more in the way of giving security than the Government requires now of the banks in the country.

Mr. MILLER of Pennsylvania. Does not the gentleman know that the commercial banks have to give good paper to the Government for every dollar that they get?

Mr. LEVER. If there is any better paper on earth than mortgages on good farm land, I would like to see the paper.

Mr. MILLER of Pennsylvania. The gentleman is not saying that they are not good; he is just saying that he wants to make them good.

Mr. LEVER. I am not. I am trying to make assurance doubly sure that we are going to issue a bond the absolute safety of which the investing public will not doubt for a single instant, and that brings me to say this: We are about to establish an entirely new system of credits in this country. We have never tried it before. It is bound to be more or less of an experiment. We are sending out a ship, as it were, on an uncharted sea. We have an untried captain in the cabin, we have an untried pilot at the wheel, the crew is green and untried, and we do not know what may happen to the ship. I am certain it is safe and sound just as she stands, but it is a foolish shipmaster who sends his boat to sea without providing it with all necessaries to weather all kinds of storms. Out of an abundance of caution I am underwriting a certainty, putting the life preservers in their places.

Mr. MILLER of Pennsylvania. And pour in Government money.

Mr. LEVER. That is the gentleman's opinion, but I differ with him. I am trying to make it absolutely sure that in the initiation of this system we are going to have a ship strong enough to save us in the mightiest storm that may come upon us. [Applause.]

Mr. HENRY. Mr. Chairman, this amendment raises a very important question. I am glad the distinguished gentleman from South Carolina [Mr. LEVER] has introduced it. I wish the amendment went further than it does. *However, we must concede that it does extend Government aid in a large degree to this rural-credits system.* It seems to me that this Congress might well afford to go this length, and if I thought it possible to secure the adoption of a stronger amendment than this I would be glad to offer it, because it is strictly in keeping with the exact provisions of the Federal reserve act and would be doing no more for the farmer than we have already done for the commercial world.

If writing it I would make it read thus:

Whenever any Federal land bank presents to the Secretary of the Treasury farm-land bonds in any amount he shall advance therefor an equal amount of money out of the Treasury, not otherwise appropriated, at their par value: *Provided*, That the aggregate value of the sums so advanced by the Secretary of the Treasury in any fiscal year shall not exceed the sum of $50,000,000.

Mr. Chairman, a little more than a year ago this House, by a vote of nearly 3 to 1, decided, when we passed the rural-credits bill, known as the Bulkley-Henry-Bathrick bill, through the House, that the Government could purchase in any one year as much as $50,000,000 of the farm-loan bonds. Has anything occurred since that time to make us change our conclusions? I say the Government has already in the enactment of the Federal reserve act underwritten and guaranteed every Federal reserve note placed at the disposal of the business world.

Mr. PLATT. Will the gentleman yield?

Mr. HENRY. If I can get a little more time.

Mr. PLATT. Does the gentleman say the Bulkley bill passed the last House?

Mr. HENRY. It passed through the House.

Mr. PLATT. It never was reported to the House.

Mr. HENRY. Oh, yes.

Mr. RAGSDALE. That is so.

Mr. HENRY. I am not mistaken in what occurred. I stayed here for 18 hours and never left the House. We amended the bill that came before the House and put in every meritorious and substantial feature of the Bulkley bill, including section 3—Government aid—on the 2d day of March a year ago.

Mr. RAGSDALE. Will the gentleman yield?

Mr. HENRY. I am not mistaken; I remember distinctly.

Mr. RAGSDALE. It is very true the Republicans, consolidating with a few Democrats in the committee, prevented the bill from coming before the House, although it was moved by the gentleman from Arkansas to bring it out; but on the floor of the House amendments were offered to the Hollis-Bulkley bill and it passed the House, but it was defeated in the conference between the two Houses.

Mr. GLASS. If the gentleman will permit, as a matter of fact the bill which passed the House was the Agricultural bill with what is known as the McCumber amendment attached to it as a rider, and then one of the provisions of the Bulkley bill, which the gentleman is discussing, was proposed as an amendment to the McCumber bill and it did pass, but not upon its merits.

Mr. HENRY. Yes, I remember the history of all these occurrences. We took up the bill for consideration and every amendment proposed by the gentleman from Ohio, Mr. Bulkley, who is not now in the House, was adopted—every one of them—and by a vote of nearly 3 to 1 this House declared that the Government could purchase every year as much as $50,000,000 of these farm-loan bonds. I say we have extended to the commercial world the credit of this Government, and I want to make it more explicit, if need be, by quoting the exact language of that act. I think it ought to go into the RECORD here.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HENRY. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas? [After a pause.] The Chair hears none.

Mr. HENRY. Now, section 16 reads this way, and I ask Members to mark the language:

SEC. 16. *Federal reserve notes, to be issued at the discretion of the Federal Reserve Board for the purpose of making advances to Federal reserve banks through the Federal reserve agents as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States and shall be receivable by all national and member banks and Federal reserve banks and for all taxes, customs, and other public dues. They shall be redeemed in gold on demand at the Treasury Department of the United States, in the city of Washington, District of Columbia, or in gold or lawful money at any Federal reserve bank.*

And, Mr. Chairman, just so long as the 40 per cent gold requirement is observed the commercial world can bring its assets, its paper, into the Federal reserve bank and have the obligations of the Government issued to them upon that collateral.

Mr. GLASS. Will the gentleman yield?

Mr. HENRY. Yes.

Mr. GLASS. It occurs to me the gentleman does not go far enough in his illustration. Is it not a fact that the instant that

one of these Federal reserve notes is presented to the Treasury for payment in gold the Treasury in turn may send it instantly to the Federal reserve bank and require that bank to furnish the gold?

Mr. HENRY. I understand.

Mr. GLASS. And is not there a very material difference between advancing Government notes upon obligations which experience showed mature in 28 days and obligations issued for 36 years?

Mr. HENRY. I thought the gentleman would ask that question, and there the gentleman from New York [Mr. PLATT] stands in front of me and says when his party comes into power—which, I pray God, may never happen [laughter and applause]—that they will repeal this provision and will make the banks wholly responsible for Federal reserve notes.

Mr. PLATT. They are responsible now; they keep a reserve against them.

Mr. HENRY. I understand that; and the Federal Government is responsible and must redeem them in gold. The Government should be as just to the farmer—and you may call it demagogy if you please—when he brings his mortgages, based on the fertile lands of this country, and deposits them in the Federal land bank. They are as good and better security than the mere promise of any man to pay a sum at a certain date.

The Government should be as just to the farmer—and you may call it demagogy if you please—when he brings his mortgages, based on the fertile lands of this country, and deposits them in the Federal land bank. They are as good and better security than the mere promise of any man to pay a sum at a certain date.

Mr. Chairman, the farmer does not ask anything that we have not given the commercial world. All that he asks is equality. Here you have started in the right direction. You have said that you will take this $6,000,000 out of the Government Treasury and put it into the Federal land banks for the purpose of being loaned to the farmers. Let us go further and take off the limit, as you did when you issued the Federal reserve notes, and without restriction say that we will underwrite every one of these bonds, that we serve notice on the world that they are the obligations of the United States Government, and give them a marketable status wherever the sun shines, and then there will be no question of their value and marketable merit. If this Government will say that these bonds are good security, drawing 4 per cent, they will circulate and be salable wherever people inhabit the earth, and it will not be necessary for the Government to purchase a single dollar of them or to deposit one dollar of its funds in these banks. If you concede the principle, which you have done to-day, of Government aid, why not make it more substantial? Let us not reverse ourselves. Let us go back and reenter the verdict of the House of a little more than a year ago and say that we stand where we stood then, when rural-credits legislation died in conference, and guarantee these bonds, if necessary. If you gentlemen provide that the Government shall purchase them, it will make this system workable from the beginning. Why discriminate against the farmer? Let us deal as equitably with him as we have done with the business world.

Mr. MILLER of Pennsylvania. Mr. Chairman, I move to strike out the last word.

That address reminds me of the days of 1876, when the wild-eyed financier traveled over the United States stating that the only way to get cheap money was for the Government of the United States to start its printing presses and print the bills and distribute them among the people as they needed them. That is the old greenback theory revamped. I presume this gentleman was not old enough to know about it at the time.

Mr. HENRY. Will the gentleman yield a moment?

Mr. MILLER of Pennsylvania. Yes.

Mr. HENRY. It is true I was not born back in 1876, as I remember it, but I have never said that this Government should ever issue one dollar of its paper money that is not to be redeemed in gold in fact. Therefore I am not a greenbacker from any standpoint, and never have been, and never could be.

Mr. MANN. Was not the gentleman for free silver?

Mr. HENRY. Yes; and I have no apology to make for it.

Mr. MANN. That was not redeemable in gold.

Mr. MILLER of Pennsylvania. In the first place, they propose to have 12 banks each of $750,000 capital, and whatever amount is not subscribed by individuals is to be subscribed by the Government, and they provide for $9,000,000 to take up all the stock of these banks if need be. That is doing something for the farmer. Then this gentleman proposes by his amendment that whenever a drought occurs or a grasshopper pestilence happens to visit the farmers owing the banks, and are not able to pay the interest installments, then the Government shall take the money out of the United States Treasury and pay the interest; or, in other words, buy the bonds from the Federal banks to enable the banks to advance the interest. Why does not the Government do all this at once without the interference of these little associations? Why not propose that the Government shall loan the money direct to the farmers, take the mortgages, issue bonds on them, and guarantee the bonds? Why do they not do that? That is the old greenback theory. That is a plausible theory to go on. That makes the bonds good. That makes money plentiful. That gives it to everybody who wants it, no matter whether they have got the security or not.

We have been on this bill under the five-minute rule for two days, and we have gotten over pretty nearly four pages. If we keep on for 24 more days with the same dilatory tactics we will get through with it. Do you not think, Mr. Chairman, it is about time that somebody would propose some measure by which we can get through a little short of 24 days? [Applause on the Republican side.]

Mr. KINCHELOE. Mr. Chairman, the time has come in the history of this country when everyone realizes that to properly develop agriculture it requires capital. The American farmer is not a sluggard nor a mendicant seeking alms. He does not ask the Federal Government to give him a cent, but he is asking, and rightly so, that same equality before the law that the manufacturer, the large banking interests, and other commercial enterprises have.

There are two necessary prerequisites for the farmer's success in this country. They are money at a low rate of interest and a long-time loan. The manufacturer, the jobber, and the other business men of the country can use money advantageously on three or four months' time, because the most of them turn over their money three or four times in a year. Not so with the farmer. He makes only one crop during the year, and therefore realizes on his investment only once a year.

As an example, take a young man who starts out with the ambition to own a farm and to make farming a life business. What more laudible ambition could prompt him to human endeavor? He buys a farm, say, for $2,000, makes a cash payment of $500, and executes two notes for $750 each, due in one and two years, for the balance of the purchase price, with a lien on the land. He goes to work with high hopes and bright prospects, but the first year a drought burns up his crop and the second year floods drown them. Both notes are now due. The holder of the notes needs his money. The young man tries to borrow this money elsewhere and fails. The holder of the notes brings suit, gets judgment, and order of sale. The land is put up and sold at the courthouse door at public outcry, and brings barely enough to satisfy the debt and costs. This young man, under circumstances over which he had no control, has lost, not only two years' work and the farm but the cash payment he made. This is not overdrawn. Thousands of similar cases have actually happened in this country. We need a rural-credit law which will give every farmer a long time in which to pay for his land, and an opportunity to borrow the money at a low rate of interest.

This Democratic administration has done more for the American farmer in 3 years than the Republican Party did in 40 years. It passed the currency bill, which gives national banks authority to loan money to farmers and take mortgages on their land. And yet for 40 years under Republican administration the farmer was not allowed to borrow a dollar from national banks and secure the loan by mortgage on real estate. Under the provisions of this currency bill $359,000,000 are made available for loans on farm mortgages, having five years to run.

I am glad that this Democratic administration is going to pass a rural-credit bill at this session. Briefly, this bill provides for the establishment of 12 land-bank districts, in each of which is to be established a Federal land bank with a minimum capital of $750,000. In case the whole or any part of the amount required is not otherwise subscribed for, the Government makes subscriptions for the required amount. Provision is made for the return to the original subscribers, Government or otherwise, of the amounts subscribed after the land banks are firmly established. The management of each bank is intrusted to a board of nine directors, three of whom are selected by the Federal farm-loan board and six of whom are selected by the national farm association. Loans under the provisions of this bill shall be secured by first mortgage on farm lands, and no Federal land bank is permitted to loan on land outside of its district. Every mortgage deposited as security is on the amortization plan, so that part of the principal is paid up at least annually. The money must be borrowed either for productive purposes, to liquidate existing indebtedness, or to acquire ownership of farm lands. No loan shall exceed 60 per cent of the appraised value of the mortgaged land and 20 per cent of the

appraised value of permanent insured improvements. Every borrower takes stock in the farm-loan association to the amount of 5 per cent of his loan, but he shares the profits earned by the banks after expenses and charges have been deducted. The minimum loan to one borrower is $100 and the maximum loan to one borrower is $10,000. The rate of interest charged shall under no circumstances exceed 6 per cent. The farm-loan bonds are exempted from National, State, and local taxation, which will make them attractive investments for those who have money to lend. The time of the loan may extend from 5 to 36 years. So we see under this bill that the amount the Government subscribes can not exceed $750,000 to each of the 12 banks, or a total of $9,000,000.

This bill may not be just what we all would like to have. I confess it is not all I want, but it is a step in the right direction, and the law can be amended as the years go by to better suit the needs of the farmer. This being new legislation in this country, of course we can not expect a perfect law at first. If it were left to me to write this bill, I would not require the farmer to subscribe for any of the stock unless he so desired. I would also have the Government guarantee the payment of the bonds sold. It would be no imposition upon the Government to do this, because every $60,000 worth of bonds that it would guarantee the payment of would be secured by first mortgage on $100,000 worth of farm lands. By the Government guaranteeing the payment of these bonds, together with the fact that they are exempt from all taxation, a ready sale for them could be had at all times, and in addition to this they would sell at a premium, and I would let this premium be applied to lowering the rate of interest which the farmer would have to pay. I would also fix the maximum rate of interest at 4½ per cent. I think this would be practical. Practically all railroad bonds, municipal bonds, and road bonds bear less than this rate of interest and sell at a premium.

Everyone knows that a loan secured by a mortgage on farm lands is the best security obtainable in the business world. However, this is a cooperative bill, and the management and the administration of the association will be entirely in the hands of the borrower. Six of the nine Federal land-bank directors are elected by the members of the association.

The general average farm-mortgage interest rate in this country has been conservatively estimated at 7½ per cent. The total farm-mortgage indebtedness of this country is approximately $4,000,000,000. So we see that the annual interest which the American farmer pays is $300,000,000, with no reduction of the principal. The interest alone which the American farmer pays is equal to two-thirds of the value of the wheat crop of this country in ordinary seasons. If this indebtedness could be refunded under the provisions of this bill at the rate of 5 per cent per annum and the farmers would engage to pay annually $300,000,000, the same sum that is now being paid by them for interest alone, the entire debt—principal and interest—would be paid in 22 years and 6 months. This would mean a net saving to the American farmer of more than $175,000,000 per annum. It would mean the wiping out of the entire existing farm-mortgage debt by the operation of the system provided for in this bill in 22 years and 6 months without increasing the annual payment over that now made to meet the interest charges alone. I believe that when this bill is in good working order the farmer can borrow money at a rate of at least 5 per cent; and, if this can be done, we can see what a great blessing it will be to the agricultural interests of this country. There is no reason why the farmer when purchasing a farm at a fair valuation should not be given long enough time to pay his obligations through the proceeds arising from his intelligent and honest operation of the farm so purchased. I want to see the time when a rural-credits bill will be so practical and just that the tenant of to-day may become a landowner to-morrow.

Railroads, interurban lines, manufacturing plants, as well as all kinds of municipal corporations, have no difficulty in floating their securities at a low rate of interest and running from 10 to 20 years well up to the full value of the property on which the security is given. None of these securities can be any safer or better than the securities on land, because all of these industries in the final analysis depend upon agriculture for life and maintenance.

Practically every European Government lends aid to its farmers in the establishment of rural credits.

In Germany the landschaft, or German rural-credit scheme, has been in existence for 150 years, and the records show that there has not been a single failure under this system. There have been no foreclosures or other litigation, no losses of any kind, no repudiation, no depreciation or shrinkage of security. The landschaft debentures always find a ready market and are considered the safest investments for widows, orphans, savings banks, or anyone who has money to invest. These landschaft debentures are as staple as the bonds of the Government. The German Government now provides supervision and control of this system. Under the landschaft system the farmers of Silesia get money on land at 3½ per cent, adding 1½ per cent to 2½ per cent a year to apply on extinguishing the debt.

In France the Credit Poncier was subsidized by the Government and given a monopoly for 25 years. This Credit Poncier is simply a Government-subsidized and Government-controlled bank for lending money on real estate, and no other land-credit institutions have ever made any marked progress in France. Interest is 4.2 per cent. The Credit Agricole Mutual is subsidized by the French Government, money obtained from the Bank of France being supplied to district banks without interest, these lending to local associations upon suitable securities.

In 1913 England appropriated $500,000,000 to help the Irish tenants buy land, and they became owners by paying 3½ per cent a year—2¾ per cent interest, three-fourths per cent on principal—for 68 years. The history of land legislation in Great Britain and Ireland is a record of direct government aid.

Russia has even gone further than Great Britain in extending Government aid to purchasers of small farms. Through land-purchasing acts 20,000,000 small holdings, to the value of over $1,000,000,000, were created, the Government funds so advanced being payable on long-time and at a very low rate of interest. In 1883 the Russian Peasants' Land Bank was organized. Loans to the extent of 90 per cent and even 100 per cent of the value of the lands are made, repayable in from 13 to 55½ years, with interest at the rate of 4 per cent.

In Austria-Hungary the Government aided rural-credit institutions in starting.

Switzerland has 28 land-credit institutions owned or operated by the State, whose debentures are guaranteed by the State.

Denmark, a little country no bigger than the average congressional district, advanced $5,360,000 without interest to found the Mortgage Bank of the Kingdom of Denmark. It buys their debentures and makes annual appropriations out of the treasury amounting in 1909 to $1,720,000, to be lent to small holders.

Sweden endowed the Swedish General Mortgage Bank at its founding with $2,144,000, and in 1890 the bank was given a subsidy of $8,040,000 in Government bonds. This is a central institution to aid the 10 local landowners' mortgage associations in the sale of their debentures.

Egypt controls the Agricultural Bank of Egypt, and the Government guarantees the payment of its bonds.

Japan guarantees a 5 per cent dividend for 10 years on the stock of the Kwango Ginko or Central Land Credit Bank of Japan. It also gave subsidy of $4,980,000 to the 46 local or district land banks, called the Noko Ginko.

South Australia, Western Australia, New South Wales, Victoria, Queensland, and New Zealand, through State land-credit banks or direct appropriations, make loans to their farmers.

In the Philippine Islands the United States Government has subscribed the stock of the Philippine Agricultural Bank ($500,000), and among the lendable funds of this bank are the postal savings bank of the country. Should not Uncle Sam treat our loyal taxpayers, the American farmer, as well as he treats the Filipino farmers, his rebellious tax eaters?

If I were writing this bill, I would have the Government aid in the organization and starting of these 12 land banks to the amount of at least $36,000,000. It would not impair the credit of the Government in the least, and it could be done with impunity.

This Government in its early days helped to start commercial banking in this country. We will remember Alexander Hamilton proposed the organization of the first United States bank, with a capital of $10,000,000, and in 1791 the Congress of the United States authorized it and subscribed $2,000,000, or 20 per cent of the capital stock. Federalists and Republicans alike voted for it, and President Washington approved it. When the second United States Bank was incorporated in 1816 Democrats and Federalists alike voted for it, and President Madison approved it. The second bank had a capital of $35,000,000, and the United States subscribed $7,000,000, or 20 per cent of its capital stock.

This Congress is proposing Government aid to the extent of $50,000,000 for the establishment of a merchant marine in this country, which will aid the producers in getting their goods to market, but when it come to the Government assisting the farmer in any way you will always find some Members of Congress on this floor opposing it. What Europe has done for her farmers America should do for hers. What America has done for commercial interests America should do for agricultural interests.

Adam Smith, when he came to write his Wealth of Nations in 1776, remarked upon it as a truism that the policy of all great nations since the downfall of the Roman Empire "has been more favorable to arts, manufactures, and commerce, the industry of towns, than to agriculture, the industry of the country." No one who has read his history carefully can doubt that this great philosopher was right.

The time has come that if this country is to continue to prosper, if the rising generation is to be content to live on the farm, there must be some provisions made whereby there will be more farm owners and fewer tenants. The concentration of wealth in the hands of a few, the drift of the population from the country to the overcrowded cities, were two of the causes of the downfall of the Roman Empire, and I sometimes feel will eventually be the handwriting on the wall of our Government if something is not done to stop it, and the way to prevent it is to throw open the door of opportunity to everyone to buy and pay for his farm by an elastic and practical rural-credit system. I believe that the farmer's children should have an equal opportunity for an education with the children of others and an equal chance in the race of life.

I know the hardships with which the farmer has to contend, the obstructions which are in his path to progress, the difficulties which he has to overcome to own his farm, and the exorbitant rates of interest he has had to pay. So long as I am a Member of Congress and represent the patriotic and intelligent constituency that I do I shall always be found voting, working, and fighting for legislation that will redound to the happiness and prosperity of the American farmer, for in the doing of this I am conscious of the fact that agriculture is the bedrock upon which every other business of this country is based, and when I am assisting the farmer I am thereby promoting every other legitimate business in this country and assisting every other man, regardless of the business in which he is engaged. [Loud and continuous applause.]

Mr. MANN. Mr. Chairman, the distinguished gentleman [Mr. KINCHELOE] who has just taken his seat thanked God that he had voted against an appropriation to construct a bridge connecting Fort Myer, the military defense of the Capital, with the Capital itself, in order that the troops maintained at Fort Myer might come into the District of Columbia and protect the Capital if there were any occasion for it.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Kentucky?

Mr. MANN. He thanked God for that.

The CHAIRMAN. Does the gentleman yield?

Mr. MANN. Certainly.

Mr. KINCHELOE. I am glad that I did not vote to put a million dollars into that bridge; yes, sir; because there is one there now, and it could be repaired so that it would serve the same purpose.

Mr. MANN. Well, the gentleman is not informed. There is a bridge there now which the War Department, after careful investigation, has reported is unsafe to travel on now, and the War Department has declared that it can not be repaired. Doubtless the gentleman, thinking that he knows all about farming, thinks that he also knows more about bridge building than the experts in bridge building, but I doubt it.

My distinguished friend from Texas [Mr. HENRY], whom we are all glad to welcome here for a few days [laughter], a few years ago, in fact only two years ago this coming summer, kept the House here on tenterhooks quite a while. He shed tears, which flowed from his eyes as well as through his voice, telling how trials and tribulations had come upon the South, owing to the war depressing the price of cotton, and asserting that unless Congress appropriated money out of the National Treasury for the benefit of the southern farmers every one of them would starve to death. We all remember. The gentleman was enthusiastic, even ecstatic, in his declarations of grewsomeness. [Laughter.] There was nothing that would not happen to the southern farmers unless my friend from Texas had his way about appropriating money out of the National Treasury for their help and aid. [Laughter.] Yet now he is telling the farmers in Texas how prosperous they are because of the legislation he did not get. [Renewed laughter.]

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. HENRY. I did not say the farmers would starve to death.

Mr. MANN. I leave it to the House to determine what the gentleman said. The Members who were here will remember what the gentleman said, as I remember. There was no tale which imagination could think up that the gentleman did not tell about the distress that was imminent in the South at that time unless we appropriated money out of the National Treasury.

Mr. HENRY. Mr. Chairman, will the gentleman allow me to ask him a question?

Mr. MANN. The gentleman was shedding tears every day, every hour, all the time. [Laughter.]

Mr. HENRY. Mr. Chairman, will the gentleman let me ask him a question?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Texas?

Mr. MANN. I yield.

Mr. HENRY. Do you think the farmers who had produced that crop of cotton in 1914 at a cost of 8 and 10 cents a pound should have been forced to sell it at 4 or 5 cents a pound?

Mr. MANN. Oh, I myself was carried away by the tearsome tale of the gentleman from Texas about the farmers in the South, until I was almost led myself to favor an appropriation from the Public Treasury. But, lo and behold, they did not get it. They are not unprosperous now, are they? Are they bankrupt now?

Mr. HENRY. We got $30,000,000 last year that the Secretary of the Treasury deposited down there.

Mr. MANN. Oh, they did not.

Mr. HENRY. So far as that is concerned, the farmers of the South would be prosperous despite the Republican administration.

Mr. MANN. Well, they will have occasion and opportunity to try that very soon. [Laughter on the Republican side.] The gentleman from Texas is great as a doleful prophesier of what will happen——

Mr. HENRY. The gentleman from Illinois himself has spoken in a very melancholy vein about what will happen from time to time. [Laughter on the Democratic side.]

Mr. MANN. But the gentleman from Texas never admits what has happened. Those who are new Members in this House can not understand how tearful my friend from Texas can become, how doleful his tales, because there is no one else in the country who has ever been able to match him anywhere, in my experience, and I expect that the tales he tells now about the difficulties at present are very much on the same lines as his tales were then.

Mr. HENRY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Texas?

Mr. MANN. You have been making doleful prophecies——

Mr. HENRY. You have been making doleful prophecies yourself about this Democratic administration.

Mr. MANN. That is not a true statement.

Mr. HENRY. And the gentleman must confess that the country is more prosperous under a Democratic administration than it has even been under a Republican administration.

Mr. MANN. I will confess this, if the gentleman wants it: I will confess that owing to the European war the country is more prosperous under this Democratic administration than it ever has been under any Democratic administration before. It will be a long time before we can find out whether it is more prosperous than it would be under a Democratic administration hereafter, because there will be none.

Mr. HENRY. If that is the best analysis the gentleman can give, I will let it go at that.

Mr. MANN. I suppose the gentleman does not understand it. It is very hard for him to understand anything.

[Mr. SISSON addressed the committee. See Appendix.]

Mr. MORGAN of Oklahoma was recognized.

Mr. MORGAN of Oklahoma. I yield to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. I only want two or three minutes. Mr. Chairman, I am very much interested in this bill. There has been much said about it that would tend to deceive people, and which has tended to deceive me, because I am only one of the people; but I want to know about it, and I am learning some things about it.

The bill as reported is much preferable to the bill as it will be in the event that this amendment is adopted. I think perhaps the gentleman from Virginia [Mr. GLASS], who comes very near being the author of the bill, the chairman of the Committee on Banking and Currency, will bear me out in that statement.

Mr. GLASS. I will bear the gentleman out in his statement, but I would not like to admit the authorship of the bill, because I am not the author of it.

Mr. CANNON. Very well, then, we will take the bill without regard to its authorship.

Mr. GLASS. I would not want to convey the idea that I am not heartily in favor of the bill. I am in favor of it, but I do

not want to take the credit of authorship which belongs to other people.

Mr. CANNON. I understand that. Now, there is a great hurrah about the farmer—that the poor farmer needs relief. The farmer is very well off. Now, take Texas. I have here the estimates of wealth made officially in 1904 and again in 1912. Take the States west, south-central division, namely, Arkansas, Louisiana, Oklahoma, and Texas—four States. In 1904 the wealth of those four States was $5,567,000,000. In 1912 it was $15,435,000,000, nearly three times as much as in 1904—300 per cent. That is the best record any four States ever made. For comparison take New England—Maine, New Hampshire, Vermont, Rhode Island, and Connecticut—five States. In 1904 their aggregate wealth was $8,500,000,000. In 1912 it was nearly $12,000,000,000, an increase of about 50 per cent; whereas the increase in the States of Arkansas, Louisiana, Oklahoma, and Texas was from $5,767,000,000 in the year 1904 to $15,435,000,000 in the year 1912, or 200 per cent. It is wonderful, if you take the statement which I have had tabulated and see what it shows.

Now, I think I have been as much of a farmer as a great many other Members here. Some people think I am a better farmer than I was a lawyer, although I practiced law for 16 years; and I can find a whole lot of people who think that I was a better lawyer and a better farmer than I am a Member of Congress. [Laughter.]

Mr. Chairman, the farmers are one-third of our population. They have greater wealth in proportion than the other two-thirds of our people, and I am glad of it. Their products increase in price and their lands increase in price from decade to decade, while the price of capital—I mean interest on money—decreases in price; and the farmers are rapidly becoming capitalists as well as farmers.

Many Representatives, especially from the South and some of the newer Western States, are seeking to enact this legislation and other legislation to advance the price of farm products by law—especially cotton—notwithstanding the official records show that the sections of the country which they represent increase in wealth much faster than other portions of the country.

Mr. Chairman, I place in my remarks the official estimated wealth of the several States of the United States, by groups, in the years 1904 and 1912:

*Official estimated wealth.*

| | 1912 | 1904 |
|---|---|---|
| New England (Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut) | $11,805,000,000 | $8,823,000,000 |
| Middle Atlantic (New York, New Jersey, Pennsylvania) | 46,211,000,000 | 29,478,000,000 |
| East North Central (Ohio, Indiana, Illinois, Michigan, Wisconsin) | 39,208,000,000 | 23,990,000,000 |
| West North Central (Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas) | 31,208,000,000 | 16,830,000,000 |
| South Atlantic (Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida) | 14,843,000,000 | 7,936,000,000 |
| East South Central (Kentucky, Tennessee, Alabama, Mississippi) | 7,660,000,000 | 4,284,000,000 |
| West South Central (Arkansas, Louisiana, Oklahoma, Texas) | 15,435,000,000 | 5,767,000,000 |
| Mountain (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada) | 6,753,000,000 | 3,973,000,000 |
| Pacific (Washington, Oregon, California) | 13,626,000,000 | 6,019,000,000 |
| United States | 187,739,000,000 | 107,104,000,000 |

Mr. BYRNES of South Carolina was recognized.

Mr. GLASS. Mr. Chairman, I would like to reach some agreement now if I can as to concluding debate on this amendment. We have been discussing it for 40 minutes. I ask unanimous consent to close debate on this section and all amendments thereto in 20 minutes, half the time to be used by the proponents and the other half of the time by those opposed to it.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment be closed in 20 minutes, one half to be controlled by those in favor of it and the other half by those opposed to it. Is there objection?

Mr. NORTON. Reserving the right to object, may I have five minutes of that time?

Mr. GLASS. I can not say as to that.

Mr. MOORE of Pennsylvania. Mr. Chairman, my colleague, Mr. MCFADDEN, a member of the committee, would like to speak.

Mr. GLASS. Well, Mr. Chairman, I will make it 30 minutes.

The CHAIRMAN. The gentleman from Virginia modifies his request and makes it 30 minutes. Is there objection?

Mr. RAGSDALE. Who is going to control the time?

Mr. MOORE of Pennsylvania. Mr. Chairman, there are some gentlemen on this side against the amendment, and they ought to be heard. The gentleman from Ohio [Mr. RICKETTS] would like to have five minutes if an arrangement can be made to care for these gentlemen.

Mr. GLASS. Mr. Chairman, I do not want to be unreasonable, but I want to get through with the legislation some time. We have been discussing this amendment 40 minutes.

Mr. NORTON. This is a very important amendment, and I feel certain that when this is disposed of we shall make good progress in the consideration of the bill.

Mr. GLASS. Well, Mr. Chairman, I make the request for unanimous consent.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close in 30 minutes, one half to be controlled by those in favor and the other half by those opposed. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, who will control the time?

The CHAIRMAN. The Chair will control the time if there is no one else to dispose of it.

Mr. GLASS. Mr. Chairman, I move that all debate on this section and amendments thereto be closed in 30 minutes.

The CHAIRMAN. The gentleman from Virginia moves that all debate on this section and amendments thereto close in 30 minutes.

The question was taken; and on a division (demanded by Mr. MORGAN of Oklahoma) there were—67 ayes and 27 noes.

So the motion was agreed to.

The CHAIRMAN. Is the gentleman from South Carolina for the amendment or opposed to it?

Mr. BYRNES of South Carolina. I am for the amendment.

The CHAIRMAN. The gentleman from South Carolina.

Mr. BYRNES of South Carolina. Mr. Chairman, I am for this amendment because I do not believe it is the revolutionary legislation that some of my good friends would have us believe.

Mr. MADDEN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MADDEN. I understood the gentleman from South Carolina was recognized before the motion of the gentleman from Virginia was put.

The CHAIRMAN. He was.

Mr. MADDEN. Then his time is not included in the 30 minutes.

The CHAIRMAN. The Chair thinks not.

Mr. BYRNES of South Carolina. Mr. Chairman, the figures read by the gentleman from Illinois [Mr. CANNON], showing the marvelous growth in the wealth of the agricultural States of the Union, only tend to prove that farm values are increasing, and therefore a mortgage over farm lands is the best security that an investor can demand. This proposition is not a revolutionary one. It is almost identical with the provisions of section 34 of the rural-credits bill passed by the Senate. It provides that whenever one of the farm-mortgage banks shall not have on hand or immediately available a sufficient amount of cash to meet the interest upon any of its bonds, that it shall have the right to apply to the Secretary of the Treasury for a deposit of Treasury funds; that in case the assets of the farm-mortgage bank are as great or greater than its liabilities, the Secretary of the Treasury may deposit a sum not exceeding $500,000, and shall take as security for its deposit the certificate of indebtedness of the bank bearing interest at the rate of 2 per cent. Such deposit can be withdrawn by the Secretary of the Treasury at such time as may be fixed by him. Notwithstanding the criticism of the gentleman from Pennsylvania [Mr. MILLER], that this is a populistic scheme, I am heartily in favor of it. The national-bank act authorizes the Secretary of the Treasury to deposit funds in the national banks, and this is done by the Secretary of the Treasury every year. It has been said that the national banks are required by the national-bank act to act as fiscal agents of the Treasury Department. This is true; but it is also true that this bill requires the farm-mortgage banks to act as fiscal agents of the Treasury Department; and while it places upon the farm-mortgage banks the same burden as it places upon the national banks, it does not give to the farm bank the same privilege that is given to the commercial banks.

In practice I doubt seriously whether the Secretary of the Treasury will ever be called upon for such a deposit as is referred to in this amendment. The result of the adoption of the amendment will be to give the investing public unlimited confidence in the bonds to be issued by the farm-mortgage banks. The investor will be satisfied that when the interest on his bond

is due it will be promptly paid, because in case the bank does not have the necessary funds on hand at the time with which to make the payment, they will be able to secure from the Treasury Department a deposit sufficient to enable them to make the payment, and a result of this confidence will be a wider market for the bonds and a lower rate of interest for the farmer.

Mr. HOWARD. Do you not think that there should be stricken from the amendment that part of it which gives to the United States Government the first lien upon the assets of the bank?

Mr. BYRNES of South Carolina. I think so, because that would tend to lessen the confidence of investors, and I understand that your suggestion will be agreed to.

This bill does not contain all the features I would have included in it, but I know that all legislation is enacted as a result of compromise, and I am therefore in favor of its passage because it will establish this rural-credit system, and when it is put in operation, if it shall fail to provide the relief Congress intends to give to the farmer, it can be amended until it does prove an agency for securing money for the farmers of this country at a lower rate of interest than they have heretofore paid. It provides for farm loans payable in from 5 to 36 years, at a rate of interest not to exceed 6 per cent. Of course, it will not in a day or month be able to handle the entire situation. It is estimated that the aggregate wealth of the farms of the United States is about $40,000,000,000, and that their indebtedness totals about $6,000,000,000. Approximately one-half of this amount is secured by mortgages, the estimated rate of interest being 8½ per cent, which makes the interest paid by the farmers of the Nation about $500,000,000. This gives some idea of the magnitude of the problem that we are endeavoring to solve by the passage of this bill. If this system can gradually enable the farmers who now are indebted in the sum of $3,000,000,000, secured by farm mortgages bearing interest at 8½ per cent per annum, to borrow from the farm-mortgage banks at 6 per cent and pay up the existing mortgages, the annual saving to the farmers will be $60,000,000. To-day 37 per cent of our farmers are tenants, and this condition will continue as long as it is impossible for a man to borrow money at a rate of interest less than 8 per cent. By enabling a man to borrow money at 6 per cent for agricultural purposes we will enable every man to own the farm he cultivates and thus materially contribute to the prosperity of the Nation.

Mr. RAGSDALE. Mr. Chairman, a question has arisen here as to what action was taken on the Bulkley-Hollis bill, and by referring to page 5048 of the CONGRESSIONAL RECORD of March 1, 1915, we find this colloquy took place between Mr. RAKER, of California, and Mr. Bulkley:

Mr. RAKER. Do I understand the Bulkley-Hollis bill is the one that the two committees of the House and the Senate in joint session have been considering?

Mr. BULKLEY. That is the one, and it included section 30, providing for the purchase of bonds by the Government.

Mr. RAKER. One other question.

Mr. BULKLEY. All right.

Mr. RAKER. Is the Hollis bill now before the House practically the Hollis-Bulkley bill with section 30 eliminated, which you are seeking to have inserted?

Mr. BULKLEY. It is practically the same.

Mr. RAKER. Then, if we vote for the Bulkley amendment it will be the bill in the shape that the Senate and House committees recommended it should be in?

Mr. BULKLEY. Yes.

Then on page 5049 it will be seen that on a division, demanded by Mr. Bulkley and Mr. RAGSDALE, there were ayes 130, noes 81, and the amendment offered—the Bulkley amendment—was adopted; so that the Hollis-Bulkley bill was considered by this body and it was passed, and it was defeated in a joint conference between the House and the Senate.

The great question that has arisen here nearly every time we have considered rural-credits legislation has been the extent to which the Government aid should be given to rural-credits banks. The opposition that has prevented it all of the way through has been this opposition of governmental aid; and yet, although our committee first considered it as a committee, although the Senate committee considered it as a committee, although subcommittees were appointed and brought in their reports, although the gentleman from Indiana [Mr. Moss] prepared his bill, although a subcommittee from the Committees on Agriculture and Banking and Currency of the House and Senate went out and drew bills, there has never been a bill reported to this House that was believed to be workable that did not carry something of governmental aid; and in my opinion there can be no legislation that will bring relief to the borrowers of the country who need long-time loans at reasonable rates of interest unless we do give them governmental aid. To my mind this bill without this amendment will fall far short of giving that relief that the people of the country need at this time.

The chairman of the Committee on Agriculture, the gentleman from South Carolina [Mr. LEVER], has given this matter careful study. Nobody considers him an extremist. Giving this matter, as he has, careful attention, he has come here after months of careful study and cooperation with the House and Senate subcommittees and he has offered this amendment, which he believes to be necessary to perfect the bill. What will this amendment do? Does the Government run the risk of loss, does the Government run any risk by lending this money for a short period of time? Does the Government assume any unlimited responsibility as to the amount it shall spend? Does the Government become an indorser or liable on any of the bonds outstanding? Nothing of the kind. The Government does not obligate itself to meet any of the bonds now outstanding. The deposits are made for the purpose of perfecting a system designed to reduce interest rates, provide long loans, and relieve the heavy burden now being carried by the borrowers in rural communities.

I would have preferred one large land bank located at the Capital here to the 12 land banks as I think it would have been stronger, more easily managed, run less expensively, and avoided constitutional questions that may be raised in some provisions in this bill creating the 12 banks and granting certain immunities. As the bill creates the 12 banks, I feel that the provision for these deposits should certainly be written in it.

We are providing that in certain contingencies the Secretary of the Treasury may deposit a sum total in the 12 banks aggregating $6,000,000 for the purpose of meeting the interest and principal that may fall due in one year; and, Mr. Chairman, a condition of affairs exists in this country that justifies the creation of a rural-credit system, that justifies any machinery necessary to bring this system into existence. Certainly then there is justification for these deposits to be made in the banks that will take care of this interest and payment of principal.

We are now creating a system to put bonds in the hands of purchasers all over the country. We are creating a system here that the Government itself may accept these bonds as security for Government depostis. We provide that these bonds may be accepted for fiduciary investment, and so forth. All over the country these bonds are going to be accepted and it seems to me when the United States Congress goes to the people of this Nation and invites them to become purchasers of these bonds, invites women and children, widows, executors, and administrators, invites all the people who are looking for safe investment that will pay interest annually to buy them, then it becomes a duty on the part of this Congress to take such action as makes it absolutely sure that this interest will be met annually, and this is the only way we can guarantee it, as I see it. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAYES. Mr. Chairman, this is only one of the many Populistic schemes presented to the Committee on Banking and Currency and the Joint Committee on Rural Credits appointed in the last Congress. If this House is not prepared to go much further than this, it should resist the attempt to put this amendment into this bill. Unless you are prepared to start the printing press and loan money not only to the farmers but to the laboring people in order that they may build their homes, or to every other class who think that they ought to have money, you should vote down this amendment. The time to stop that sort of thing is right now and to say that you will shut down on every proposition that will seriously involve the credit of the Government in any loan proposition. Any system of rural credits or any other kind of credits that can not carry itself after the liberal subvention by the Government provided for in this bill, that will not run itself after it has been started in a substantial way, ought not to pass. For one, I am unalterably opposed to involving the general credit of the Government in any system to loan to anybody. I believe that should be the attitude of every Member of this House and I hope it will be. I yield the balance of my time to the gentleman from Pennsylvania [Mr. MCFADDEN].

Mr. MOORE of Pennsylvania. Will the gentleman yield for a question?

Mr. HAYES. I will.

Mr. MOORE of Pennsylvania. No provision is made in this bill to loan money to anybody but the farmer?

Mr. HAYES. No.

Mr. MOORE of Pennsylvania. No workingman is permitted to borrow money under this bill?

Mr. HAYES. No.

Mr. MOORE of Pennsylvania. Is there any provision of law of which the gentleman has knowledge that enables the workingman, who is just as industrious as the farmer, but who does not happen to work on a farm, to obtain money from the Government in this way?

Mr. HAYES. I do not. But, of course, there is a strong, a special reason why it is for the interest of all the people that agriculture should be encouraged and stimulated in every legitimate way.

Mr. McFADDEN. Mr. Chairman, I rise to oppose the amendment of the gentleman from South Carolina [Mr. LEVER], because, in my judgment, it is a bad precedent to establish. I am also opposed to the tendency which exists in this country—and it evidently does exist to quite an extent in this House—of an attempt to make liquid fixed assets. I am absolutely opposed to the principle, and I am sorry to see it is advocated by even some bankers in the United States to make liquid railroad securities and other permanent assets. I am absolutely and unqualifiedly opposed to making or attempting to make liquid farm real estate. I think it is an extremely bad proposition and one we should avoid by all means. Since I have been a Member of this House I have sat here and watched the public hand go into the Treasury and take out sums of a million, ten millions, twenty millions for the establishment of a Government owned and operated nitrate plant, and possibly $50,000,000 in a few days for flood control of the Mississippi and Sacramento Rivers. The difference between these specific appropriations and this proposition is that on this proposition we leave our hand in the Treasury to fondle the Government's money, which is produced from taxes on all the people, and take it out as we see fit. I am absolutely opposed to this kind of legislation, and if this amendment is adopted which the gentleman from South Carolina offers, and which I understand has the approval of the present Secretary of Agriculture, I believe it will and should quite properly be just cause for defeating this bill.

Mr. NORTON. Mr. Chairman, this is a very large and most important subject of legislation with which we are dealing at this time. There is no real occasion for the friends and true supporters of rural-credit legislation to become alarmed and afraid of scarecrows of Populism which those unfriendly to this legislation have adroitly set up in this debate. The magnitude of the problem with which we are dealing will be appreciated if we bear in mind that the farm-mortgage loans of this country amount to between three and four millions of dollars. A reduction of the interest rate 1 per cent would amount to nearly $40,000,000 a year. It is generally conceded that a good Federal rural-credit system, if adopted in this country, would reduce the interest rate about 4 per cent, or about one-half of what it now is. This would mean to the farmers of the country a yearly saving in interest of about $160,000,000, which is quite a tidy sum in itself. The gentleman from Illinois [Mr. CANNON] has told you how well to do the farmers of the country are and he has told you of the great wealth of property they have. The conclusions that he would have you draw from the facts stated are not such as should be drawn, however. Yes; the farmers of this Nation now own property having a value of upward of $40,000,000,000, and the 6,500,000 farmers of this country last year produced farm products having a value of about $12,000,000,000. But, gentlemen, the fact that they own a large amount of property and produce each year a great amount of wealth is no reason in the world why we should continue a system in this country which burdens them with an average interest rate of about 8½ when we can adopt in the Congress legislation for a system of rural credits which will reduce the present average interest rate to an average interest rate of 4 or 5 per cent, saving them more than $100,000,000 a year. An unconscionable, heavy, and unjust burden in the way of interest charges has for generations in this country been imposed upon the farmers of the country by the money changers and the idle rich of the country. This condition should no longer be allowed to continue, particularly when the way is clear before us to remedy it.

Mr. PLATT. Will the gentleman yield for a question?

Mr. NORTON. Certainly.

Mr. PLATT. Is it not true that the high rates paid in some of the States are due to the laws of those States which require high rates of interest?

Mr. NORTON. No; I do not think so.

Mr. PLATT. I thought the gentleman from Arkansas [Mr. CARAWAY] told us the other day of one man in Missouri who paid 8½ per cent on a loan on one side of his farm and on the other side he paid 6 per cent, where the line of his farm crossed the border. Now, is not that due to State laws?

Mr. NORTON. If the gentleman had made any study of this question, and he now thinks that the high rates of interest in some of the States that the farmers are paying are due principally to the interest laws of the States, I am sure that he wholly misses the purpose and object of this character of legislation and the economic laws which determine interest rates.

Mr. PLATT. I know it is so in some cases. I can prove it.

Mr. NORTON. The gentleman may know that the rates of interest are different in different States, but he does not know that the interest laws of the States are the principal cause of these high or low rates.

The amendment before the committee proposes that in case the land banks, due to some emergency, are not able to meet their interest payments or payments on bonds coming due, the Government will loan each land bank not to exceed $500,000; that is, an amount altogether not exceeding $6,000,000. If that will make this proposed system a better system, and I believe it will, I think that it would be a very good proposition for the Government to advance this amount of money. Six million dollars is not a large amount of money as we deal with funds here. In this case it is not an amount of money of which the Government will lose a single cent. The time has arrived in this country when we should cease thinking that because the farmers have a great amount of property the money loaners and idle rich have a good right to prey upon them like parasites. This amendment should be adopted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FERRIS. Mr. Chairman, I desire to offer an amendment to the Lever amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment to the amendment of the gentleman from South Carolina, which the Clerk will report.

The Clerk read as follows:

Amend, on page 2, by striking out, in lines 4 and 5, after the word "indebtedness," in line 4, the following:
"And the United States shall have a first lien upon the assets of the State Federal land bank."

Mr. FERRIS. Mr. Chairman, it is patent what I am trying to do. I am trying to strike out the language in the Lever amendment which makes the Government, after depositing its funds in a perfectly solvent bank, a preferred creditor. I feel sure any such provision as that would in all probability destroy the sale of the bonds. I am in favor of the Lever amendment. I will vote for it. I think the bulk of it is good. I am not sure, but the gentleman from South Carolina said something about accepting such an amendment.

Mr. LEVER. I will say to the gentleman from Oklahoma that, personally, I would be very glad to accept the amendment.

Mr. FERRIS. In the first place, there can be no deposit made until the assets are the equivalent of the liabilities. That makes the bank a perfectly solvent concern. Now, if the Federal Government elects to deposit funds in the bank as in other United States depositories, it is not the thing to do to make it a preferred creditor.

Mr. PHELAN. Does it require the deposit of securities when it puts these notes in national banks?

Mr. FERRIS. Some of them require bonds and some do not, but certainly none of them make the Government a preferred creditor, and if you do it you destroy the sale of your bonds.

Mr. MADDEN. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. MADDEN. I wanted to ask the gentleman whether or not he did not believe if these deposits are made in the Federal land banks the same kind of security should be given by these banks for deposits that is now required by the national banks?

Mr. FERRIS. This requires more security than they do in the national banks, and for the further reason that this original subscription is nothing but a loan anyway, and they put a provision in here that amortizes and regains to the Treasury every cent of this money at an earlier period than I think it ought to do.

This is a good bill, but it is our duty to vote for good amendments when we are sure we can make it better. I would not favor complicated amendments, not easily understood, to be added on the floor, but this is an amendment easily understood, and is undoubtedly a help to make this a better bill. I hope my amendment to the Lever amendment will be first agreed to, then adopt the Lever amendment as perfected.

Mr. MOSS of Indiana. The purpose of this amendment is to obligate the Government more deeply to the Federal land-bank system as proposed in this bill. When we read section 16, the gentlemen who want to put this amendment on this bill on the theory that a system of banks that has $9,000,000 of public money given to it, in connection with other large governmental favors, is a failure in its present form, will ask you to strike out section 16, and will assert that purely private banks, acting on their own capital and on their own initiative, will be able to drive this system of Government-aided banks out of existence.

Under this bill in its present form we endow each of the 12 banks with $750,000 of Government money. That money must stay there until the borrowers who may take out loans shall have paid in $750,000 more. Then these banks will each have $1,500,000 of capital, $750,000 of which belongs to the Government. Under the terms of the bill, before the Government money can be taken out of any bank, the proposed borrowers will have paid in $4,500,000 as capital. It is proposed in this motion to make possible a further contribution of $500,000, but the Government will have $500,000 in each land bank at the time when the capital of that bank amounts to $2,500,000. We have so organized the system that at that period of the bank's growth its capital will amount to the sum of $2,500,000; the sum of $2,000,000 will have been paid in by the cooperative borrowers and $500,000 by the Government. Now, at the time the Government money shall have been completely retired from all of the 11 banks the system itself will have a capital of $54,000,000 over and above every possible debt it can have contracted, if it has been honestly managed. By this motion gentlemen are asserting that a bank with a capital of $4,500,000 in absolute cash that has been paid in there by the borrowers of that system is possibly insolvent, and they ask you to deposit $500,000 more in its treasury. That is the situation which will then present itself under the conditions of this bill before the Government money can be retired from the system. The farmers of this country will have paid in $54,000,000 to the bank on capital and 25 per cent of all net earnings will be held for reserves, and yet the proponents of this amendment stand here and assert that the system is unstable and that the land banks may become insolvent. The banks must hold as assets as many dollars in first mortgages on the lands of the people of the United States, plus $54,000,000, as they can possibly have bonds outsanding, and yet this amendment is offered on the theory that the interest to the bondholder may not be promptly paid. I repudiate the intimation, Mr. Chairman, and confidently assert that this proposed support is not necessary for the successful operation of the banks as organized under the provisions of this bill.

I yield the rest of my time to the gentleman from Virginia [Mr. GLASS].

Mr. GLASS. Mr. Chairman, my colleague on the committee, the gentleman from Indiana [Mr. MOSS], has so clearly stated the objections to this amendment that I scarcely feel it necessary to say a word except in response to the specious argument that nothing is asked here for the farmers that is not asked for the business men and merchants of the country. As a matter of fact, that is not true. You are asking something here that is not granted by any provision of the national-bank act or the Federal reserve act or any other statute. You are asking that the Government of the United States be authorized to tie up its current funds in time loans, and there is nothing in any Federal statute that makes provision for any such thing now. There is a vast deal of difference between the Government of the United States depositing its current funds in Government depositories at the discretion of the Secretary of the Treasury, to be instantly withdrawn whenever the Government needs those funds, and this thing of depositing Government funds on time obligations. It ought not to be done. It is not expedient or businesslike to do it, and I sincerely hope the House will vote down this amendment.

Mr. WINGO. Mr. Chairman, we have had something like an hour's debate on this amendment, and only seven minutes have been used in discussing it. There have been but two men who spoke and by their statements show that they knew what the amendment is. I, for one, have been much amused by this "tempest in a teapot" over the weakest form of Government aid that could be put into this bill. What is there in this amendment that caused my genial friend from California [Mr. HAYES] to cry out "Populism!" and protest against this as being one of the many schemes to ram the arms of the farmer into the Federal Treasury? No farmer will do it under the amendment that is now pending; and if the gentleman from California will study it—as he has had an opportunity to study it ever since the 24th day of February—he would know that that is so. First, let us see what relation these Federal land banks bear to the Government. Under the act as reported by the committee each and every one of these Federal land banks is a fiscal agent of the United States Government.

Is it Populism for the United States Government to deposit in an emergency, in order to protect the interest upon bonds that have been issued under the supervision of the United States Government, $500,000? Is that Populism? If it is, then Populism has been practiced in the State of California and is being practiced to-day by the Secretary of the Treasury, because greater deposits than that are being put into the banks in the State of California.

Mr. HAYES. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Arkansas yield to the gentleman from California?

Mr. WINGO. No; I can not yield. What does the gentleman from South Carolina [Mr. LEVER] propose to do by his amendment? He says that if at any time any Federal land bank shall find that it will soon be without funds immediately available sufficient to meet its obligations—with respect to what? To the payment, when required, of the principal or interest on bonds issued under this act. Then it may make application to the Federal farm-loan board for a temporary deposit by the Secretary of the Treasury of the sum needed to make such payments during the period for which its funds immediately available will be insufficient. If, after investigation, the Federal farm-loan board shall approve the application, it shall give notice thereof to the Secretary of the Treasury, stating the sum required, the period for which it is needed, and such other facts as may be necessary. Thereupon the Secretary of the Treasury may deposit such sums, or from time to time so much thereof as may be required, with the Federal land bank for one purpose, and that is to prevent default of interest and principal of the bonds that the Federal land bank of the United States, operating under this provision of this act has issued, back of which, whether you put it in the bill or not, are the faith and credit of the United States.

Is there any Populism in that? It occurs to me it is the weakest kind of Government aid you could give to this bill. I would go much further. I regret that we do not go further, and that is one reason why I have not said more on this bill. I regret that we could not give to the farmer of this country such a rural-credit bill as meets my view of what rural credits are and should be. How any man who favors this bill can oppose this amendment I can not understand. This aid that is proposed here is not aid to the farmer but aid and protection to the investors who buy these bonds; and the only benefit that the farmer can get from it is that the bonds will be paid, and thereby the farmers, by reason of the confidence in the security, may get a low rate of interest.

Shall it be a permanent deposit? Is it a loan? No; it is simply a deposit like that which the Secretary of the Treasury makes with a depository of the United States Government under existing law. The Secretary of the Treasury fixes the time, and the bank must make provision to return the deposit not later than the expiration of the period fixed by the Secretary of the Treasury.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. PLATT. Mr. Chairman, I hope this amendment will be voted down by a large majority. If such a scheme as this is put into the bill I shall have to vote against the bill, and others of us who have worked long and earnestly on this bill will have to vote against it.

I was a member of the Subcommittee on Farm Credits in the last Congress, when the Bulkley bill was written, and that bill contained Government aid in two forms. One was in the form of subscriptions to farm-land banks, but the Government entered into the farm-land banks on an investment basis, and was to receive dividends. Under this bill the Government subscribes without interest or dividends. The bonds are guaranteed with every sort of safeguard that we could possibly devise.

The gentleman from Arkansas [Mr. WINGO] has just told us that the Government deposits were wanted in the banks to safeguard the bonds. The bonds do not need any safeguarding. They will be as safe as any investment that anybody could get, in my opinion. I trust that the amendment will be voted down.

Mr. Chairman, I yield the balance of my time to the gentleman from Ohio [Mr. FESS].

The CHAIRMAN. The gentleman from Ohio [Mr. FESS] is recognized.

Mr. FESS. Mr. Chairman, this amendment assumes that this proposed legislation will not be successful. It asks that in case any land bank is unable to pay the interest on the bonds or the principal, or both, it will have that ability supplied by the Federal Government. The General Government is to come to the support of an incompetent institution whether because wrongly built or badly conducted and fill in the weak places that somebody fears will be in this law. This is a confession of lack of faith in the institution proposed.

That is the very feature that we want to avoid. If an institution is not sufficient to stand on its own feet without the support of the General Government, the proposal to lend the credit of the Government with no guaranty other than the institution's assets is an expression of the wildest Populism.

There are people on this floor that believe that it is possible for the Government to stamp a piece of paper and make it

money simply because it is stamped. You can put on one side of the paper the obligation of "$2" and on the other side of it "$5," and use it as of either denomination at your convenience [laughter], and you can make a $5,000 bill with as little effort as you can make a $1 bill. It will require no more ink or paper. Just so the Government stands ready to make good a self-confessed bad business deal. In other words, it is the Government itself that is making the credit, without regard to whether the institution is going to be a success or not. It is a serious question whether such a proposal can be made workable in certain sections, hence this call upon the Government.

Mr. HENRY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Texas?

Mr. FESS. Yes.

Mr. HENRY. Does the gentleman think that the greenbacks that were issued under the Lincoln administration were good money?

Mr. FESS. The first $60,000,000 were good money, because they were redeemable on demand and in gold. The other $450,000,000 were not, because they were not so redeemable. They went down to 37 cents on the dollar.

Mr. HENRY. They are in existence to-day, are they not?

Mr. FESS. Yes; but because every dollar of them is made equal in value to every dollar in gold, under the law of 1879 providing for the resumption of specie payments. But you provide under this amendment that in case the bank can not pay its interest the Government shall come in and do it. It is not to take care of the bonds. The bond itself rests upon the assets upon which it is issued, but you propose to take care of a bank that is unable to pay its interest or unable to pay its principal. What is bad as a business proposition is certainly not sound as a Government proposition.

Mr. RAGSDALE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. FESS. No; I regret I can not yield. In other words, it is a question of the Government coming in and making something out of nothing. That is the dangerous feature of this proposed amendment which revives the soft-money idea, and should be defeated.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. HENRY. Will the gentleman yield further just there?

The CHAIRMAN. The time of the gentleman has expired. All time has expired. Is there objection to the acceptance of the amendment of the gentleman from Oklahoma [Mr. FERRIS] to the amendment of the gentleman from South Carolina [Mr. LEVER]?

Mr. MANN. I object.

The CHAIRMAN. The gentleman from Illinois objects. The question is on the amendment of the gentleman from Oklahoma [Mr. FERRIS] to the amendment of the gentleman from South Carolina [Mr. LEVER].

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment as amended.

The question being taken, on a division (demanded by Mr. LEVER] there were—ayes 63, noes 58.

Mr. GLASS. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. LEVER and Mr. GLASS.

The committee again divided; and the tellers reported—ayes 80, noes 66.

Accordingly the amendment of Mr. LEVER as amended was agreed to.

The announcement of the result was received with applause.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

Mr. LEVER. Will the gentleman withhold his amendment a moment, so that I can perfect this?

Mr. MORGAN of Oklahoma. Certainly.

Mr. LEVER. I offer the following amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. LEVER: On page 79, line 8, within the parenthesis, strike out the letter "g" and insert in lieu thereof the letter "h."

The amendment was agreed to.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MORGAN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. MORGAN of Oklahoma: Page 79, after the word "act," in line 10, insert a new section, as follows:

"THE UNITED FEDERAL LAND BANK.

"SEC. 4a. That the United Federal Land Bank is hereby created. It shall be located in such State and at such city as shall be determined by the board of directors of such bank, subject to the approval of the Federal farm-loan board. Said bank shall have no capital stock or shareholders and no funds, except such as shall be contributed by Federal land banks. It shall not be conducted for profit. Its chief work shall be to issue Federal farm-loan bonds for and in behalf of Federal land banks, to aid Federal land banks in the sale of their bonds and to act for such banks, subject to the approval of the Federal farm-loan board, in all matters which will contribute to the unity of such banks, to the standardization of their business methods, to their economical administration, to the strengthening of their credit, or to the success in general of the land-credit system hereby established. The United Federal Land Bank shall be controlled by a board of 12 directors. Each Federal land bank shall elect one of said directors. At the time of his election such director must be a director of the bank by which he is elected. Should a director of the United Federal Land Bank cease to be a director of the bank by which he was elected, he shall thereby cease to be a director of the United Federal Land Bank. The terms of office of such directors and the officers of such bank shall be fixed by the Federal farm-loan board. The board of directors of the United Federal Land Bank shall elect a president, vice president, secretary, and treasurer. Such officers shall be directors of such bank at the time of their election.

"The officers of such bank shall give their entire time to the business thereof, and shall receive such compensation as shall be fixed by the Federal farm-loan board. The board of directors may employ all the necessary assistants for the proper transaction of the business of such bank and fix their compensation, subject to the approval of the Federal farm-loan board. Within 90 days after its organization each Federal land bank, through its board of directors, shall elect one of its directors as a director of the united Federal land bank. Such directors, under a call or notice issued by the farm-loan commissioner, shall under their hands forthwith make an organization certificate containing such statements as shall be prescribed by the Federal farm-loan board, and file the same with said board, where it shall be preserved and made of record. The certificate shall be acknowledged before the judge of a court of record or a notary public.

"Upon duly making and filing such organization certificate the bank shall become, as from the date of the execution of its organization certificate, a body corporate, and as such, and in the name designated in the organization certificate, it shall have power—

"First. To adopt and use a corporate seal.

"Second. To have succession until it is dissolved by act of Congress, or under the provisions of this act.

"Third. To make contracts.

"Fourth. To sue and be sued, complain and defend, in any court of law or equity, as fully as natural persons.

"Fifth. To elect a president and a vice president, appoint a secretary and a treasurer and other officers and employees, define their duties, require bonds of them and fix the penalty thereof; by action of its board of directors dismiss such officers and employees, or any of them, at pleasure, and appoint others to fill their places.

"Sixth. To prescribe, by its board of directors, subject to the supervision and regulation of the Federal farm-loan board, by-laws not inconsistent with law, regulating the manner in which its officers shall be elected or appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

"Seventh. To establish a uniform rate of interest which every Federal land bank shall charge upon farm loans for the ensuing year and until otherwise ordered by said bank; to fix a uniform rate of interest which Federal farm-loan bonds issued under the provisions of this act shall bear, and a uniform rate of discount at which such bonds may be sold by any Federal land bank until otherwise changed by said bank, and to fix uniform fees or commissions which Federal land banks shall pay agents for receiving applications for farm loans and services connected therewith, and for the sale of farm-loan bonds, all of which shall be subject to the approval of the Federal farm-loan board and within the limitation and restrictions of the law.

"Eighth. It shall have power, subject to the approval of the Federal farm-loan board, to act upon all propositions which will aid the Federal land banks to cooperate in conducting the business which they are authorized by this act to perform, with a view to standardizing business methods, appraisements, bookkeeping, forms, records, and any other things which will contribute to the economical administration of such banks, the welfare of borrowers, the security of investors, and to the prosperity of agriculture.

"Ninth. To exercise, by its board of directors or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business herein described.

"The funds necessary for the operation of the united Federal land bank shall be contributed by the Federal land banks in such proportions as shall be fixed by the Federal farm-loan board, based upon the amount of loans made by such bank."

Mr. GLASS. Mr. Chairman, I make the point of order against this amendment that it is clearly not germane to this section.

Mr. MORGAN of Oklahoma. It is offered as a new section.

The CHAIRMAN. The gentleman offers it as a new section.

Mr. GLASS. I ask unanimous consent that all debate on the amendment be closed in five minutes.

Mr. MOORE of Pennsylvania. Reserving the right to object, I wish the gentleman would extend that to 10 minutes, so that the gentleman from Ohio [Mr. RICKETTS] can be recognized.

Mr. GLASS. Well, in 10 minutes, then.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this amendment be closed in 10 minutes. Is there objection?

There was no objection.

Mr. MORGAN of Oklahoma. Mr. Chairman and members of the committee, if this amendment were adopted it would in no way interfere with the general plan of the committee bill. The committee bill, as you know, creates 12 Federal land banks. This amendment creates the united Federal land bank, a central institution uniting the 12 banks. It provides that each one of these 12 Federal land banks, through their directors, shall each select one member of the board of directors of the united Federal land bank. This united Federal land bank is not to be a money-making institution. It is not to have capital stock. Its sole purpose is to aid and assist the 12 Federal land banks.

I think every student of rural credits knows that in almost every country where they have numerous land-credit institutions there comes a time when the need of a central institution is recognized. The landschaften of Germany were each independent; but the time came when a central landschaft was organized, in which at least eight landschaften were united. The object was to secure better credit for the local institutions. Bonds issued by the central landschaft had a better market. This means a better credit and a lower rate of interest. The committee bill creates 12 district banks. In reality these constitute but one institution, because they are responsible for one another's contracts and must pay on demand the interest on one another's bonds. This makes them one institution, working in 12 divisions; but under the committee bill there is no legal authority, no legal corporate body created, whereby those 12 parts or divisions may get together and act in unison in the interest of all. We have 48 States, but we have only one Union, which acts in the interest of the whole country. You here create 12 States, so to speak—12 departments—but you do not unite those departments. The amendment which I have offered creates the united Federal land bank and gives it power to do a number of things. First, it has power to act generally to promote the success of all the banks. I can not now go into detail, but I will mention two important things the united Federal land bank, with the approval of the Federal farm-loan board, may do.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. MORGAN of Oklahoma. Yes.

Mr. MADDEN. What is this Federal farm-loan board that is created in the committee bill? Is that the institution that the gentleman is seeking to set aside?

Mr. MORGAN of Oklahoma. No; I do not seek to set that aside.

Mr. MADDEN. Does the gentleman want another board of control?

Mr. MORGAN of Oklahoma. I think the central corporation which I propose can do much in the administration of the business affairs that do not come within the line of the duties of the Federal farm-loan board.

Now to go back to where I was, the united Federal land bank, through its directors, is required to do two important things, namely, fix a uniform rate of interest at which loans shall be made until changed and fix a uniform rate of interest at which farm-loan bonds shall be sold, until such time as a different rate shall be established.

To create 12 Federal land banks, great public institutions, to act for all the farmers of the United States, and yet leave these banks to act entirely independent of each other, as competitors of each other, and give them no legal corporate body through which they may cooperate and work together in the interests of all the farmers of the United States, to my mind would be a great blunder. The institutions we are creating are designed to promote the development of agriculture and bring greater profits and greater prosperity to our farmers. We are creating corporations through which the farmers may cooperate to secure better credit facilities and lower rates of interest. We should make these instruments as efficient and perfect as possible. These are farmers' institutions. They will be supported by the farmers. They are to serve the farmers. But, beyond this, they are intended to render a service to the Nation, and this they will do. The success of these institutions depends largely upon the sale of the farm-mortgage bonds issued by these institutions. Who can not see the advantage in having all these bonds issued in the name of one institution—the united Federal land bank? And yet the primary liability to pay the bond would rest upon the land bank for whose benefit and in whose behalf the bonds were issued. But these bonds would gain the confidence of investors more readily if they were all issued in the name of a great central institution, representing the combined credit of these 12 banks. The central institution—the united Federal land bank—will strengthen the credit of the farmers, promote economy in the administration of these institutions, and contribute largely to their success.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN of Oklahoma. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman has that permission by order of the House.

Mr. MORGAN of Oklahoma. Do I understand that we can extend our remarks on any of these five-minute speeches?

The CHAIRMAN. Yes.

Mr. GLASS. All Members have leave to extend their remarks for 10 days.

Mr. MORGAN of Oklahoma. That means unlimited authority to extend remarks, as I understand it?

Mr. GLASS. For 10 days.

Mr. RICKETTS. Mr. Chairman and gentlemen of the House, I had not intended to discuss this bill during this debate, but the more I study it the more clearly I am convinced that the bill contains many objectionable features.

This is no new question to me. I have been considering the subject for a couple of years, and last year I had the pleasure of reading a book on this subject compiled by Hon. Myron T. Herrick, of Cleveland, Ohio. I think it will be conceded that he is the best-posted man in the country on the subject of rural credits. He has given the subject more careful study and greater investigation than even the proponents of this bill.

It is proposed by the enactment of this law to benefit the farmers of the country, and I fear that unless certain features of the bill are amended, and especially section 16, that the benefit to the farmer will not prove to be what is claimed for it, or what is expected on the part of the farmer. I frankly admit that the bill, in a great measure, is a meritorious one; and I do not mean to say that I shall not support it, even though the objectionable features in it are not corrected. My present impression is that it is my duty to support it, and I shall be governed accordingly. However, should this bill be enacted into law, unless it is properly guarded it will give rise to what is known as "wildcat speculation."

I think Col. Herrick has very clearly pointed out in his work on this subject the weak points in this bill, and I fully concur in his conclusions.

There are important as well as minor objections to the bill. It contravenes the spirit of American Government in its plan to enact special as distinguished from general law, and to create a Federal bureau clothed with both executive and judicial powers and authorized to establish a system through which, when Congress is not in session, it may abstract money for use of private individuals from the Treasury and involve the credit of the United States in the issue of unlimited millions of dollars of bonds bearing interest at a rate as high as 5 per cent, and possibly 6 per cent, per annum, besides the overhead charges, and running for indefinite periods, even to several future generations. The bureau may establish any number of Government banks in addition to the 12 first ones; and since no maximum is prescribed for capital stock, such public institutions may emit, upon forms prepared by the Secretary of the Treasury and Comptroller of the Currency, upon the certificate of officials of the United States, continual issues of bonds that may be endless, so long as qualified mortgages may be supplied.

The bureau may withhold the benefits of the proposed system from any State or from any groups of farmers; it may shift the public funds, and, through its registrars, certain other funds of the land banks, and direct such funds to any section of the country as it pleases. The bureau may arbitrarily entirely forbid bond issues and fix different rates of interest for bonds and loans according to district, and even fix the rate after the bonds have been issued, and thus it can favor one land bank to the detriment of any other land bank, and force the latter to suspend business. The bureau has absolute authority to grant or disallow charters, and to dissolve any land bank or association. It may, upon dissolution, appoint the receiver, compound debts and claims, cancel obligations to the United States, and dispose of assets in any way it sees fit. The courts can not intervene if it acts first, and no dissolution shall occur without its written consent. No appeal can be taken from any of its decisions. The bureau is a supreme autocratic body, with its great powers absolutely unrestrained except by its own discretion and prejudice. In my judgment this method is un-American.

The report of the committee asserts that the system is cooperative, and that all profits are to be distributed among the borrowers. The bill itself contains a clause authorizing the Federal board to encourage and promote cooperative credit and cooperative organization. This report and provision are glaringly inconsistent with the plan of the bill. The basic principle of cooperation is organized mutal self help, resting upon individual initiative and private enterprise. The essentials of a cooperative association are that the management shall consist

of members elected by members, and that any distribution of profit should be confined to members. Nevertheless, this bill provides for Government initiative, aid, and direction; authorizes national farm-loan associations to be managed by directors and officers not members; prevents them from making any loans except with the consent of outside parties—a Federal land bank and official appraisers; and permits any individual, firm, association, corporation, or State, whether a member or not, to participate in the profits through ownership of dividend-paying stock in the land banks. Similarly also, the Federal land banks may divert from borrowers and turn over to agents one-half of 1 per cent of the profits on loans made through them. The bill, it is true, requires collective liability, either limited or unlimited, but the effect of this would be to subject the borrowers to all the risk of loss, while allowing them only a part of the profit. So the system not only violates cooperative principles, but it would work an injustice to borrowers.

The investment of deposits in loans which must run for 5 and may run for 36 years is dangerous finance. It would be equally wrong and dangerous also to permit a savings institution to pyramid on its credit and encumber its assets with debt through bond issues. Such methods and practices brought the public savings banks of Italy so near to ruin a few years ago that they would have become bankrupt if the Government had not come to their assistance, repealed the laws, and refunded their obligations on terms which it compelled the creditors to accept.

The main trouble with this bill is the fact that it contains too much machinery, to much harness. It is distinguished by its "red tape," and it will be entirely unsatisfactory to the farmers. The farmer has been led to believe that the establishment of a rural-credit law gives him the right of way, unobstructed, to the Public Treasury to secure a loan necessary in the prosecution of his business and relieve him of any financial embarrassment. If this bill should be passed by Congress it will be a sad disappointment to a great many farmers who are expecting Federal aid through the rural-credit system. There are 6,500,000 farmers in the United States, who are looking to Congress for a practical law.

The principle upon which rural credits is based is a sound one, and the legislation necessary to put it into operation should be distinguished for its simplicity and rapid and quick relief. This bill in its present form does not measure up to that standard; and should the bill pass, I predict that in 25 years from now Congress will be endeavoring to correct its imperfections.

For several years rural credits has been the subject of great public discussion. Interest in it has been aroused in the farming communities of this Nation, and the farmers are looking forward to the time with considerable anticipation when they can be accommodated and thereby assisted in developing the agricultural resources of this country.

This bill is denominated "An act to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes."

This title sounds well, and every farmer who reads it will conclude that when this bill shall become a law all he needs to do is to mount a train for the National Treasury and receive the amount of money which he needs in the prosecution of his business by simply placing a mortgage upon his farm at 50 or 60 per cent of its true value in money. When he reaches his destination he will be confronted with a procedure necessary to obtain the loan that will at once bewilder him and lead him to believe that he has been buncoed under the guise of Federal aid in establishing a rural credit system. So far as I am concerned, I want this bill so simplified that these loans may be made with as little red tape as possible and at the same time in a strictly businesslike manner.

I am deeply in sympathy with the principle involved in this bill and I most heartily concur in the theory of rural credits, and want to assist the farmer to obtain reasonable loans on the best security that any man can offer in the world—that of a farm mortgage.

While this bill does not conform to my views and while I clearly understand that there is quite a diversity of opinion with reference to the establishment of a law which will meet the requirements, in order to assist the farming communities of this country in the development of their resources, yet I shall not vote against the bill. I make these suggestions at this time that the committee may take the proper steps to correct and perfect the bill so as to comply with the basic principle of the rural credit theory. I know that the farmers of the district which I have the honor to represent, or at least quite a large per cent of them, are heartily in favor of the rural credit system, and for that reason I am going to support this bill, believing that in time it will be more nearly perfected to suit the purposes for which it is intended. No more important legislation has been before this House during this session, and we should consider it carefully and with a view to give the farmer what he wants in order to more successfully prosecute his business and develop his land. [Applause.]

The Clerk, proceeding with the reading of the bill, read as follows:

SEC. 5. That as soon as practicable the Federal farm-loan board shall divide the continental United States, excluding Alaska, into 12 districts, which shall be known as Federal land-bank districts, and may be designated by number. Said districts shall be apportioned with due regard to the farm loan needs of the country, but no such district shall contain a fractional part of any State. Said districts may be readjusted from time to time. In no case shall a Federal land bank be established with less than $750,000 capital stock.

The Federal farm-loan board shall establish in each Federal land-bank district a Federal land bank, with its principal office located in such city within the district as said board shall designate. Each Federal land bank shall include in its title the name of the city in which it is located. Subject to the approval of the Federal farm-loan board, any Federal land bank may establish branches within the land-bank district.

Each Federal land bank shall be temporarily managed by three directors appointed by the Federal farm-loan board. Said directors shall be citizens of the United States and residents of the district. They shall each give a surety bond, the premium on which shall be paid from the funds of the bank. They shall receive such compensation as the Federal farm-loan board shall fix. They shall choose from their number, by majority vote, a president, a vice president, and a secretary, who shall also act as treasurer. They are further authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as they may deem necessary and to fix their compensation, subject to the approval of the Federal farm-loan board.

Said temporary directors shall, under their hands, forthwith make an organization certificate, which shall specifically state:

First. The name assumed by such bank.

Second. The district within which its operations are to be carried on, and the particular city in which its principal office is to be located.

Third. The amount of capital stock and the number of shares into which the same is to be divided: *Provided*, That every Federal land bank organized under this act shall by its articles of association permit an increase of its capital stock from time to time for the purpose of providing for the issue of shares to national farm-loan associations and stockholders who may secure loans through agents of Federal land banks in accordance with the provisions of this act.

Fourth. The fact that the certificate is made to enable such persons to avail themselves of the advantages of this act.

The organization certificate shall be acknowledged before a judge or clerk of some court of record or notary public, and, together with the acknowledgment thereof, authenticated by the seal of such court or notary, shall be transmitted to the farm-loan commissioner, who shall record and carefully preserve the same in his office, where it shall be at all times open to public inspection.

The Federal farm-loan board is authorized to direct such changes in or additions to any such organization certificate not inconsistent with this act as it may deem necessary or expedient.

Upon duly making and filing such organization certificate the bank shall become, as from the date of the execution of its organization certificate, a body corporate, and as such, and in the name designated in the organization certificate, it shall have power—

First. To adopt and use a corporate seal.

Second. To have succession until it is dissolved by act of Congress or under the provisions of this act.

Third. To make contracts.

Fourth. To sue and be sued, complain and defend, in any court of law or equity, as fully as natural persons.

Fifth. To elect or appoint directors, and by its board of directors to elect a president and a vice president, appoint a secretary and a treasurer and other officers and employees, define their duties, require bonds of them, and fix the penalty thereof; by action of its board of directors dismiss such officers and employees, or any of them, at pleasure and appoint others to fill their places.

Sixth. To prescribe, by its board of directors, subject to the supervision and regulation of the Federal farm-loan board, by-laws not inconsistent with law, regulating the manner in which its stock shall be transferred, its directors elected, its officers elected or appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

Seventh. To exercise, by its board of directors or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business herein described.

After the subscriptions to stock in any Federal land bank by national farm-loan associations, hereinafter created, shall have reached the sum of $100,000, the officers and directors of said land bank shall be chosen as herein provided and shall, upon becoming duly qualified, take over the management of said land bank from the temporary officers selected under this section.

The board of directors of every Federal land bank shall be selected as hereinafter specified and shall consist of nine members, each holding office for three years. Six of said directors shall be known as local directors, and shall be chosen by and be representative of national farm-loan associations, and the remaining three directors shall be known as district directors, and shall be appointed by the Federal farm-loan board and represent the public interest.

At least two months before the date specified by the Federal farm-loan board for the first election the farm-loan commissioner shall notify each national farm-loan association in writing that such election is to be held, giving the number of directors to be elected for its district and requesting each association to nominate one candidate for each director to be elected. Within 10 days of the receipt of such notice each association shall forward its nominations to said farm-loan commissioner. Said commissioner shall prepare a list of candidates for local directors consisting of the 20 persons receiving the highest number

of votes from national farm-loan associations making such nominations. At least one month before said election said farm-loan commissioner shall mail to each national farm-loan association the list of candidates. The directors of each national farm-loan association shall cast the vote of said association for as many candidates on said list as there are vacancies to be filled, and shall forward said vote to the farm-loan commissioner within 10 days after said list of candidates is received by them. The candidates receiving the highest number of votes shall be elected as local directors. In case of a tie the farm-loan commissioner shall determine the choice.

The Federal farm-loan board shall designate one of the district directors to serve for three years and to act as chairman of the board of directors. It shall designate one of said directors to serve for a term of two years and one to serve for a term of one year. After the first appointments each director shall be appointed for a term of three years.

At the first regular meeting of the board of directors of each Federal land bank it shall be the duty of the local dicetors to designate two of the local directors whose term of office shall expire in one year from the date of such meeting, two whose term of office shall expire in two years from said date, and two whose term of office shall expire in three years from said date. Thereafter every director of a Federal land bank chosen as heretofore provided shall hold office for a term of three years. Vacancies that may occur in the board of directors shall be filled for the unexpired term in the manner provided for the original selection of such directors.

Directors of Federal land banks shall have been for at least two years residents of the district for which they are appointed or elected, and at least one district director shall be experienced in practical farming and actually engaged at the time of his appointment in farming operations within the district. No director of a Federal land bank shall, during his continuance in office, act as an officer, director, or employee of any other institution, association, or partnership engaged in banking or in the business of making or selling land-mortgage loans.

Directors of Federal land banks shall receive, in addition to any compensation otherwise provided, a reasonable allowance for necessary expenses in attending meetings of their respective boards, to be paid by the respective Federal land banks. Any compensation that may be provided by boards of directors of Federal land banks for directors, officers, or employees shall be subject to the approval of the Federal farm-loan board.

Mr. McFADDEN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 79, line 12, strike out all after the words "Sec. 5," to and including line 4, page 80, and insert the following: "That as soon as practicable the Federal farm-loan board shall establish its principal office in the city of St. Louis, Mo., and the capital stock of the Federal farm-loan board so established shall not be less than $9,000,000."

Mr. HOWARD. Mr. Chairman, I desire to offer an amendment to the amendment, and I would like to offer it now.

Mr. McFADDEN. I have no objection.

Mr. HOWARD. I offer it as a substitute for the amendment of the gentleman from Pennsylvania.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

ORGANIZATION OF UNITED STATES FARM-LAND BANKS.

SEC. 31. That there is hereby incorporated the United States farm-land bank, with an authorized capital of not less than $12,000,000 and with the right of indefinite increase. The principal place of business of said bank shall be at Washington, D. C. Its charter rights and privileges shall continue for a term of 50 years, with the right of renewal by Congress, subject to amendment or repeal by Congress during that time: *Provided*, That the rights of creditors of such institution shall not be changed or affected by any such amendment, repeal, or change.

Mr. McFADDEN. Mr. Chairman——

Mr. GLASS. Mr. Chairman, I would like to have some agreement as to the time.

Mr. MANN. This is rather an important proposition, and I think we ought to have the debate started before we close it. We just adopted one amendment, for which I did not vote, because we did not have long enough discussion.

Mr. McFADDEN. I do not desire over 10 minutes.

Mr. HOWARD. I want 10 minutes. I will state to the chairman that this is a proposition I have been pretty much wedded to, and I would like to discuss it intelligently.

Mr. GLASS. Mr. Chairman, I ask unanimous consent to close debate in 30 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to close debate on this section and all amendments thereto in 30 minutes. Is there objection?

Mr. MANN. I object.

Mr. GLASS. Mr. Chairman, I move that debate close in 30 minutes.

Mr. MANN. And I make the point of order that that motion is not in order at this time.

The CHAIRMAN. The gentleman from Pennsylvania is recognized.

Mr. McFADDEN. Mr. Chairman, I want to say a word or two in connection with the consideration of this bill and by way of explanation. As a member of the Banking and Currency Committee, I would like to say that I have given as much attention and consideration to this subject as I have been permitted to, and I have not looked at or considered the proposition in a factional or political way in any sense. My efforts on the committee have been, with other gentlemen of the committee, to get just as good a bill perfected for the benefit of the American farmer as it was possible to get. In that connection, however, I have not become satisfied with the result of the work and accomplishment of the Banking and Currency Committee thus far. The other day I made reference to certain sections of this bill that I did not approve of, and judging from some of the discussion we have had on the floor of the House to-day, I think my assertions have been confirmed.

Now, in regard to this special amendment.

Section 5 of this act provides that the Federal farm-loan board shall divide the continental United States, including Alaska, into 12 districts which shall be known as Federal land-bank districts. The said districts shall be apportioned with due regard to the farm-loan needs of the country, and it is further provided that any district shall not contain a fractional part of any State, and the section also provides that readjustments may be made from time to time. It also provides that district Federal land banks shall have a capital of $750,000, and that each Federal land bank shall include in its title the name of the city in which the bank is located, and each bank shall be managed by boards of directors and the usual quota of officers, clerical force, including attorneys, experts, laborers, and such other employees as they may deem necessary.

This plan of dividing the continental United States into 12 districts is patterned after the plan adopted by the Federal Reserve System, but for the purposes of this system is entirely superfluous and will tend to complications and will retard the successful operation of the system, and it seems to me entirely uncalled for. Under the plans as proposed by this act many farm-loan associations and joint-stock banks are to be organized, or at least they are to be organized where there is a demand for such associations. It would therefore seem to me that these associations and joint-stock banks will fulfill every purpose for which these 12 banks are an excuse.

In addition to this, in the matter of issuance and guarantee of mortgage bonds which are to be taken, issued, and sold under this system by the 12 separate banks, each of the 12 banks issuing bonds must guarantee the bonds issued by each other. How much more simple this whole matter could be made if but one bank were in existence, and I contend that there would be a tremendous saving in the cost of the operation of this system by having but one bank, centrally located in the city of St. Louis, Mo., as it would be if my amendment is adopted.

In the sale of the bonds to be issued under this act prospective purchasers are going to be confused by the designation of different classes of bonds offered for sale, and prejudices are sure to arise against bonds issued by banks located in the south and southwestern parts of the United States by scrutinizing investors of the East and North, and I need only to cite the fact that there exists at the present time in the minds of the investing public in this country uncertainty as regards investments in these sections, and is one of the causes why interest rates in the South and West are higher to-day than in more favorable investment sections of this country.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. McFADDEN. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to proceed for five minutes more. Is there objection?

Mr. GLASS. Mr. Chairman, reserving the right to object, I ask unanimous consent that all debate on this section and all amendments thereto shall conclude in 30 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and all amendments thereto close in 30 minutes. Is there objection?

Mr. MANN. Mr. Chairman, reserving the right to object, this is a long section, and there are some things in it that I would like to find out about, myself. Several gentlemen would like to be heard briefly in reference to it. I do not think it is fair to close debate in that way.

Mr. GLASS. Mr. Chairman, I do not want to shut off any real serious discussion of any provision in this bill.

Mr. MANN. We do not want to do anything except discuss the real provisions of the bill.

Mr. GLASS. That is all I want. I tried to elicit from the gentleman from Illinois [Mr. MANN] a while ago what would be a reasonable time upon which we could agree.

Mr. MANN. I think it is wiser on a section so long as this, where we can not tell what is coming up, to let the debate run on for a time. Some proposition may be developed, as there was on the last section, that will prove very important. It will soon develop whether there is any such thing.

Mr. GLASS. Would the gentleman agree to close debate on these particular amendments in 15 minutes?

Mr. MANN. I am perfectly willing to do that, as far as I am concerned.

Mr. GLASS. Then, Mr. Chairman, I ask unanimous consent that debate on these particular amendments that are now pending be closed in 15 minutes.

The CHAIRMAN. Is there objection?

Mr. HOWARD. I object.

Mr. GLASS. Then, Mr. Chairman, I move that debate on these particular amendments now pending be closed in 15 minutes.

The CHAIRMAN. The question is on the motion of the gentleman from Virginia that all debate on the pending amendments close in 15 minutes.

The question was taken; and on a division (demanded by Mr. HOWARD) there were—ayes 55, noes 21.

Mr. HOWARD. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Georgia makes the point of order that there is no quorum present. The Chair will count.

Mr. HOWARD. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for five minutes.

Mr. McFADDEN. Mr. Chairman, I make the contention that these bonds could be sold on a more favorable basis if but one issue were made, and it would work a decided benefit to the sections of country where high interest rates now prevail and might continue to prevail if they are kept in a class by themselves. There is going to be no influx of people daily entering these 12 institutions and these Federal land banks can be of no particular value to the cities in which they are to be located, as they are not going to deal primarily with the people in the cities in which they are located, except as they may or might become sales agent for these securities for the bonds issued. My prediction is, however, that bonds offered for sale by this system would be offered by advertisement in lots of probably not less than $1,000,000, and that in all probability many of these issues would be taken by the larger bond houses existing in the United States to-day.

Mr. MEEKER. Mr. Chairman, it seems to me that there are two features to the amendment that has just been offered. The first is the centralization of this entire system. It is said that people wonder why the rates of interest vary so widely in the different parts of the country; but if one has ever invested in land in some sections of the country he will know why. Purchasing land in certain sections at $30 an acre and selling it at five is not conducive to a low rate of interest.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. MEEKER. Yes.

Mr. MOORE of Pennsylvania. What difference does it make if you have the United States Treasury to fall back on?

Mr. MEEKER. It would make no difference, inasmuch as the guaranty feature has been voted in this afternoon, that the Government will make this a fool-proof bill. Nobody except Uncle Sam can lose.

Mr. FESS. What effect would it have on the Treasury of the United States?

Mr. MEEKER. The Treasury of the United States, so far as this administration is concerned, is a mere bag of shells. We pay no attention to the Treasury, so far as getting something into it is concerned. Our attention seems to be devoted under this administration to getting something out of it.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. MEEKER. Yes.

Mr. LEVER. I would like to ask the gentleman if he knows a provision similar to the one referred to by the gentleman from Pennsylvania passed the other body of this Congress with only 5 dissenting votes?

Mr. MEEKER. That shows the wisdom of the Senate as to this particular measure. I believe that only by the pooling of these bonds in one institution will it ever be possible to in any degree whatever make bonds from certain sections of the country salable, and I do not think that would be true of 12 separate institutions located in different parts of the Nation for the purpose of evening up as much as possible the rates at which the bonds are to sell. If they are in one institution, the purchasing public, especially since the United States Treasury is back of the bonds, will look with more favor upon them. I heard a gentleman say just a few moments ago that he would now purchase these bonds since the Government would back them up. I said, How about the Government guaranteeing the bonds; are you in favor of that? Inasmuch as this last amendment has just been put in—the Lever amendment—it would seem evident that now there is no longer any necessity for these 12 districts, and that it would be better to permit the Government to manage this through one institution. So far as the other part of the amendment is concerned, it has simply to do with the location of this one central bank. St. Louis is suggested. It was named in the amendment. It is not because I come from the city of St. Louis, but because St. Louis is near to some of these sections where possibly the rate will be a little high; because St. Louis is near to the people who will ask for this assistance; because it is near the section of the United States from which appeals on the floor of this House have been coming since this bill has been up; because of the proximity of St. Louis to that particular territory it certainly makes it a very desirable location. If you are going to back it up with United States funds, you are welcome to come now with any sum.

Mr. HOWARD. Mr. Chairman and gentlemen of the committee, the proposition now before the committee is one which appeals to the judgment of every man who wants an economical administration of this system. The great European experts, where they have had in operation a rural-credit system for over 100 years, admit to-day that the only mistake they have made in the organization of the rural-credit banks was in not mobilizing the entire credit of all the agricultural assets of the country into one central institution and that institution issuing all the bonds.

Now, what do you do about it? You practically admit the weakness of the 12 systems. You practically establish a central bank! You tied them tigether. When the Bulkley-Hollis bill was here before us you had them all separate, and now you make the liability of one the liability of the other in degree. Now, you want to reduce expenses to the farmer. You say that you desire his interest rate to be low. What do you do? You go and create 12 times more machinery than is necessary to get the farmer's debenture bonds upon the market, and you know it is a fact. [Applause.]

Let us see. You talk about 1 per cent, and you say that 1 per cent is an arbitrary amount for the expense of this system. The minimum and maximum amount of expense of the great landschaft system of Germany has been fifteen one-hundredths of 1 per cent and sixty-five one-hundredths of 1 per cent, respectively.

Now, let us see what is the difference between a central bank in commercial banking and a central land bank in mortgage banking. I will admit that a central bank in commercial banking can be used for the oppression of the people in any section, but what is the difference? What function does a commercial bank perform? A commercial bank gathers together all of the cash in the community into one institution, and they sell that cash for interest-bearing notes or bonds. What does a rural-credit bank do? It gathers together all the credit in a community and it sells that credit for cash. They are the exact antithesis of each other, as I said on the floor of this House two years ago. Now, I want to appeal to you gentlemen on the Republican side and you gentlemen on the Democratic side from the West and you gentlemen on the Democratic side from the South. You put in these 12 regional banks and there is no more reason for the establishment or the division of this country into 12 regional rural-credit districts—and you gentlemen know it—there is no more reason for the division of it into land banks than there is for the division of the heavens into 12 regions for the study of the solar system, not a bit.

Mr. PLATT. Will the gentleman yield?

Mr. HOWARD. I will.

Mr. PLATT. There was no more reason for dividing the country into 12 Federal reserve districts.

Mr. HOWARD. Yes, there was; and I will tell the gentleman why. The country was divided into 12 districts according to the channels of trade and the movements of business in a given area. The curse of the country was the centralization of money in Wall Street, and you divided it up into 12 systems to keep the money in those regions that produced the wealth for the benefit of the region.

Mr. SMITH of Michigan. Will the gentleman yield for a question?

Mr. HOWARD. A short question.

Mr. SMITH of Michigan. Suppose a person lived in Washington or Oregon and wanted to mortgage his farm, would you not suppose it would be more convenient to have a regional bank in that locality than here in Washington? [Applause.]

Mr. HOWARD. Let us see. You all applaud that. The sensible, sane system is to start this system with the county, and the local institution confined in its operation to the county, and bring all the counties of a given State into a central institution in the Sate, the State bank to be owned by the local banks, and bring all the collective credit of all the States of the Union into

one central institution—a bond-issuing institution for the entire system.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent for five minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. HOWARD. Now, what is the objection? Just as the gentleman from Missouri [Mr. MEEKER] said and my friend on the Banking and Currency Committee said. The concentration of the credit in one institution strengthens it, and when you establish a central bank in farm-mortgage credits you make it twelve times stronger than these 12 units that you establish all over the country.

Now, let me say to you gentlemen from the South, that many of the commercial banks of the South have been robbing the poor farmers of that section. They with unblushing shame admitted in their sworn reports to the Comptroller of the Currency that they have been charging the farmers of the South from 10 to 2,000 per cent. The farmers of Georgia to-day are paying on an average of 14 per cent for the money they are borrowing to make the present cotton crop with.

Mr. STEAGALL. Do you not think that with the system now obtaining the reserves of the bank are assembled at a few centers, which are far removed from the people to whom you refer?

Mr. HOWARD. I will tell you what effect it will have. The gentleman from New York [Mr. PLATT] hit the nail on the head awhile ago. The legislatures in the West and the legislatures in the South have been doing this sort of business ever since the Civil War. When they elect bankers to the legislature they put all those bankers on the banking committee of the State legislature, and they do nothing to reform the usury law. If you had put some of these skinflint, Shylock, pawnbroker bankers in the chain gang, this country would prosper a great deal more than it is prospering now. [Applause.] They are openly violating the usury laws in 30 States in the Union every day.

But I have not time now to discuss the iniquities of the commercial banking business of the country. I will have to refer you gentlemen to the able and fearless Comptroller of the Currency, Hon. John Skelton Williams. He will let the white light in for you. But I have time to appeal to you gentlemen who know something of this subject. The gentleman from Oklahoma to-day—and I have given him a great deal of credit for his courage—went back on a principle in which he believes as I do. He wanted to have the one bank of issue, to wit, a central bank, but he wanted to leave in existence the other 12 absolutely useless institutions, which would perform no real function of any value to the farmer.

When this system gets under way, you will have 12 Federal land banks, with their bonds seeking the investing public in competition with each other, which inevitably means high-interest rates, giving the advantage to the developed and highly prosperous sections of country over the sparsely settled and undeveloped sections of the country. The investing public will always fix the rate of interest by comparison of the bond offered them with the bond of the most prosperous and best developed agricultural region.

A central bank of issue would do away with the competition for investment money necessarily incident to having 12 different institutions, and by bringing the collective credit of all the farmers of all the States in the Union together in one central institution one bond would be as good as another and each and every one would be placed on the same footing, thereby giving strength to the bonds from the States yet undeveloped and at the same time detracting nothing from the salability of the bonds from the well-developed and more prosperous States.

My judgment is that we are making a grave mistake in creating a system causing competition among the land banks that will be to the disadvantage of the farmer and to the very great advantage of the investor.

The bill I introduced in the Sixty-third Congress and in this Congress placed the control of the entire system eventually in the hands of the borrowers, starting with the farmer in the local community, confining the operations of the local association to a county, bringing the counties of a State together in a central bank in the State and bringing the States together in the one central bank at the Nation's Capital. My amendment, if adopted, will make one central institution to start off with twelve millions of capital, this stock to be eventually absorbed by the local and State banks of the Nation and the entire system eventually owned by the farmers of the Nation. The distinct advantages of this system are that the farmer is given the benefit of—

First. The collective credit of the community, as represented by the guaranty of his mortgage by the local bank.

Second. The collective credit of the farm-land banks of the State, as represented by the guaranty of his mortgage by the State bank.

Third. The collective credit of the farm-land bank of the Nation, as represented by the guaranty of his mortgage by the central bank.

Each farmer borrower, no matter where he may be, will get the benefit of the collective credit of his community, of the collective credit of the farm-land banks of his State, and of the collective credit of the farm-land bank of the Nation, as represented by the central bank. Can there be any question that, as a consequence, he will be able to obtain money on the best terms and at the lowest interest rates?

Mr. Chairman, what I have said is not in criticism of the painstaking work of this committee. I have directed my remarks to the expediency of the system created by the bill and the system of marketing bonds which I have tried to explain. I think the committee recognized the soundness of this principle when they made the 12 Federal banks restricted guarantors of each other's obligation. If they had made the system of the 12 banks joint makers of farm-loan bonds they would have accomplished exactly what my bill accomplishes, but the other banks of the system, in case of the default of any one of them, only become responsible for the payment of unpaid principal and interest after all the assets of the issuing bank are liquidated and distributed. Consequently this restricted guaranty of the farm-loan bonds of each land bank by the other 11 banks in no sense gives to these bonds the full benefit of the collective credit of the entire system, as would be the case with a central bank alone issuing land-bank bonds, and it will be impossible to prevent the investing public from looking upon the 12 Federal land banks as separate and distinct institutions acting for separate sections of the country. The poorer farmers in the poorer sections will not get the full benefit of the system, and one of the great objects for the creation of this system will be defeated.

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

Mr. SMITH of Michigan. Mr. Chairman, I ask unanimous consent to address the House for five minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. SMITH of Michigan. If you will pardon me, gentlemen, I will try not to detain you long. The gentleman from Georgia [Mr. HOWARD], who last spoke, had something to say about usury laws. Down in his State I notice the usury law provides:

A deed given to secure a loan tainted with usury is voidable. In a note containing homestead waiver tainted with usury, the waiver is voidable.

I would like to say that in the gentleman's State of Georgia the savings banks have loaned on real-estate mortgages $14,828,323 at an average rate of 6.28 per cent interest. A good many gentlemen have spoken here about the robbery committed by the banks in loaning money, and I have heard it frequently mentioned here on the floor of this House that the rate of interest is from 8 per cent to 10 per cent. There is loaned in the United States by the insurance companies alone on farm lands $646,961,371 at the average rate of interest of 5.55 per cent.

Mr. McKELLAR. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from Tennessee?

Mr. SMITH of Michigan. Yes.

Mr. McKELLAR. Those figures did not give the commissions that are charged by the insurance companies in making the loans. If they did, you would find that they cost the farmer from 7 to 8 per cent.

Mr. HOWARD. Mr. Chairman, will the gentleman yield right there?

The CHAIRMAN. Does the gentleman yield?

Mr. SMITH of Michigan. Yes.

Mr. HOWARD. Out of 114 banks doing business in the State of Georgia, 66 of them swore that they charged on their entire loans in the State of Georgia from 10 to 134 per cent, and their oaths are on file in the office of the Comptroller of the Currency now.

Mr. SMITH of Michigan. I will say to the gentleman that that is not an interest rate. That is not fixed by law or in any

other way. A charge of 100 per cent is compounding. It is not interest or anything else.

Mr. HOWARD. A bank down in Oklahoma charged 2,000 per cent.

Mr. SMITH of Michigan. That is not a matter of interest; that is simply robbery. Why do you not, you gentlemen down in Georgia and Oklahoma, pass State laws waiving all interest upon mortgages if the rate is too high? Your people are not in favor of that or they would do it. The gentleman from Illinois raised an interesting question a little while ago. He says because these land banks are an instrumentality of the Government all the taxes on those bonds and those mortgages are to be waived and their assessable tax value raised on the other taxable property. My friends, this bill will only apply to less than one-half of the people who borrow money. Why do you restrict it to the person actually engaged in the cultivation of the farm? Why, a mortgage is just as good whether the owner lives on the farm or does not live on the farm. If you are going to secure bonds by real estate, why not apply them to all the mortgages that are given on real estate? I have not the time, but I would like to show you that even down in Mississippi they get only 6 per cent on their farm-mortgage loans. There is not any hardships down there in securing money on real-estate mortgages at 6 per cent.

Let me tell you this, gentlemen from the Southland: You will benefit your country a great deal more if you will refrain from passing laws that destroy the best interest you have—the sugar interest. Now, you want $20,000,000 for Muscle Shoals and $45,000,000 for the Mississippi River, and you are asking an appropriation of $2,000,000, or some large amount, for the extermination of the boll weevil, and more millions for the eradication of the cattle tick; and yet by your own law you have destroyed the best industry in the South, namely, the sugar industry. Now you come along and ask for Government aid in loaning money on farm mortgages. You are changing this bill—and I have no objection to that—but I would like to read you something about that report that the joint committee sent in here. You are getting the matter arranged around so that there will be Government security of these bonds. That may be all right, providing there are good first-class real-estate farm mortgages behind them. [Applause.]

The CHAIRMAN. The time of the gentleman from Michigan has expired. The question is on agreeing to the substitute offered by the gentleman from Georgia [Mr. HOWARD].

The question was taken, and the substitute was rejected.

The CHAIRMAN. The question recurs on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. MCFADDEN].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. MCFADDEN. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 21, noes 64.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close in 25 minutes.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on this section and amendments thereto close in 25 minutes. Is there objection?

Mr. MANN. Let the gentleman save some time for himself.

Mr. GLASS. Then I will make it 35 minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close in 35 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 79, line 20, after the word "than," strike out "$750,000" and insert "$500,000."

Mr. MOORE of Pennsylvania. Mr. Chairman, in view of the adoption of the Lever amendment, which puts the Treasury of the United States behind the bonds that are to be issued by these farm banking associations, it seems to me that a little money ought to be saved to the people who have to contribute to the general fund; so I have offered this amendment, cutting down the amount to be taken out of the Treasury of the United States for each of the 12 Federal land banks, from $750,000, as recommended by the committee, to $500,000.

In advocating his amendment the gentleman from South Carolina [Mr. LEVER], together with others who have spoken, indicated that it was necessary, or at least advisable, in order that investors should be secured, that the United States Treasury should be made responsible for these bonds. That is to say, if any one of these 12 associations fail, by reason of bad management, by reason of defalcation, by reason of poor judgment in making the loans, by reason of a variation in prices after the loans have been made, by reason of a general tendency to falling prices, then the Treasury of the United States, to which all people contribute, shall be called in to make good the loss. The gentleman pleaded for the investor. Other gentleman have pleaded for the investor. It is the first time since I have been in this House that I have heard any real, true, honest, sincere "friend of the farmer" plead for the investor. According to the gentleman from South Carolina [Mr. LEVER] and others, we ought to pass this bill in order to protect the man whose money is to be invested in these bonds. In other words, we will drop the farmer for the moment, to look after the Rockefellers; we will take care of the Carnegies now. If Wall Street will only buy these bonds, we will assure Wall Street and Rockefeller and Carnegie, and the whole rich caboodle of them, that if the farmer's local associations fail to make good, or the farmer's cattle die, or the farmer's crop fails and he can not pay the Treasury of the United States will make good the bonds to the investor.

Mr. LEVER. Will the gentleman yield for a question?

Mr. MOORE of Pennsylvania. I yield to the gentleman from South Carolina.

Mr. LEVER. Does the gentleman recall that under the Taft administration the gentleman's party passed a bill permitting the Philippine government to guarantee to the stockholders in a Philippine bank a 4 per cent dividend on their money?

Mr. MOORE of Pennsylvania. The gentleman has got no comeback on that proposition, because the Democratic Party in its Philippine bill is ready to repudiate the assurance given to investors when they bought Philippine bonds. The situation is different, because the United States authorized the Philippine government to issue those bonds.

Mr. WINGO. Will the gentleman yield for a question on the merits of the proposition he is discussing?

Mr. MOORE of Pennsylvania. I yield to the gentleman from Arkansas.

Mr. WINGO. The gentleman understands that these bonds will be issued for a specific term. They would not necessarily be issued at the beginning or at the middle of the fiscal year, so that the time of payment of the interest on the bond would not be the same as the semiannual or annual payment upon the loan. Suppose that the interest payment should fall due in May, and the semiannual installment upon the loan should not fall due until the 1st of June, and by reason of something that was not foreseen there should be a small difference, or a lack of availability of immediate funds. Does the gentleman see anything wrong or unbusinesslike in the Federal Government depositing with its fiscal agent a small sum, if the Secretary of the Treasury approves it, for that temporary purpose? Is there anything wrong in that from a business standpoint?

Mr. MOORE of Pennsylvania. I think so. I think it is an immoral financial proposition as affecting Government money.

Mr. WINGO. Let me ask the gentleman another question——

Mr. MOORE of Pennsylvania. I think it is playing favorites with the farmer or whoever is the beneficiary against the workingmen generally, who have to pay the taxes along with the farmer.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. I ask unanimous consent to proceed for five minutes?

The CHAIRMAN. The Chair will call attention to the fact that debate on this paragraph and all amendments thereto has been ordered closed in 35 minutes. The gentleman asks unanimous consent to proceed for 5 minutes. Is there objection?

There was no objection.

Mr. WINGO. The gentleman said that that was an immoral financial transaction. Was it an immoral financial transaction for the Secretary of the Treasury, both under Republican administrations and under Democratic administrations, to deposit public funds in national banks in the city of Philadelphia to meet an emergency?

Mr. MURRAY. Oh, that was different.

Mr. MOORE of Pennsylvania. The gentleman from Virginia very clearly explained that situation; he explained the difference.

Mr. WINGO. I ask the gentleman to state the difference.

Mr. MOORE of Pennsylvania. I will refer the gentleman from Arkansas to the answer given by the gentleman from Virginia.

Mr. WINGO. I ask the gentleman if he considers it an immoral financial transaction?

Mr. GLASS. "The gentleman from Virginia" did not say it was immoral; he said it was an inexpedient and unbusinesslike transaction.

Mr. LEVER. Will the gentleman yield?

Mr. MOORE of Pennsylvania. No; I want to get in a few words for the workingman who does not work on the farm, and who is not considered in this legislation.

Mr. LEVER. I want to call the gentleman's attention to some benefits that the Government is conferring on some of the gentleman's friends.

Mr. MOORE of Pennsylvania. Will not the gentleman do that in his own time? The gentleman has worked out a beautiful scheme which has gone into this bill and which will make him famous among the borrowing farmers and those men who have farm lands to dispose of.

I observed that I was delighted to hear the gentleman break away from his usual agricultural trend and say something for the "poor, downtrodden investor." Usually the gentleman from South Carolina stands with the gentleman from Texas [Mr. HENRY] on this proposition of using the Government Treasury to back up a rural-credit bill. The gentleman from Texas some time ago—and I must differ somewhat from my own leader when I make the statement—had with him when he wanted to valorize cotton at least 120 Members on that side of the House who were in favor of sticking their hands into the Treasury of the United States to pay the cotton farmers of Texas and other Southern States for their product. They wanted the Government Treasury to boost the price of cotton. They stood up for cotton all right, and if they keep it up I do not know where the rest of the producers will get off.

Why, only yesterday we nearly passed a bill appropriating $50,000,000 to reclaim lands along the Mississippi to raise more cotton. I was amazed at it, because gentlemen from Texas and others who valorously champion the cotton interests have been endeavoring to restrict the output of cotton. It was difficult, therefore, to understand the great rush to get money out of the Treasury to reclaim swamp lands so that they could raise more cotton.

Mr. HENRY. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I decline to yield. Before we get through making the various appropriations that the Democratic Party is taking unto itself while it happens to be in power we will be taxing the cotton of the gentleman from Texas, possibly, and maybe we will add a little to the tobacco of the gentleman from Oklahoma. We will have to find the money somewhere.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. In view of the interruptions, Mr. Chairman, I ask to proceed for five minutes more.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that he may proceed for five minutes more. Is there objection?

Mr. MURRAY. Reserving the right to object——

Mr. IGOE. The regular order!

Mr. FERRIS. I object.

Mr. PHELAN. Mr. Chairman, I am sorry that there has been so much politics discussed in this bill, which ought not to have any politics or partisanship in it. I want to state that I have served on two committees in the preparation of this bill, with Republican members on both committees. There never for one second has been any partisanship raised in any of the meetings by Democrats or Republicans. I hope that for the remainder of the discussion of this very important bill, at least, some of this partisan discussion may be eliminated. [Applause.]

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. PHELAN. Yes.

Mr. MOORE of Pennsylvania. The gentleman comes from a great industrial district, and he is in favor of voting $9,000,000 for the farmers of the country. Now, would the gentleman favor a bank with $9,000,000 of Government money to enable those who borrow money of building associations to have the backing of the United States Treasury?

Mr. PHELAN. I will take that up when we come to it. I want to call the attention——

Mr. MOORE of Pennsylvania. In view of the gentleman's statement about partisanship I wish to suggest that there is some favoritism in this bill.

Mr. PHELAN. Mr. Chairman, I want to call the attention of the gentleman to the fact that the committee of which I am a member has now had two great legislative matters before it—in the last Congress the Federal reserve act and in this Congress the rural-credits bill—and that we are doing something that the Republican Party never has done in the quarter of a century that it was in power. [Applause on the Democratic side.] We are getting results, and we will meet every one of these propositions as it comes to us.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. PHELAN. I can not yield any more. I want to speak about the proposition raised by the gentleman from Pennsylvania [Mr. MOORE]. I hope his amendment will not prevail. We have gone over this matter very carefully, and I am glad that the gentleman, in moving to cut down the appropriation from $750,000 to $500,000, indicates that he favors the principle of the proposition. I hope his motion will not prevail. If it does, he will defeat the very purpose which he advocates on the floor with reference to the other provision.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. PHELAN. I have not the time. We want to start these banks with sufficient capital so that they can make loans to some reasonable amount before they are obliged to go to the public and ask the public to buy bonds. In other words, we want to get the system well started before the banks go to the public and attempt to obtain money by the sale of bonds. That is the reason we have made it $750,000. It is an arbitrary amount. You might argue all day whether it ought to be $500,000, $750,000, or $800,000, or any other amount. We think we have hit upon a reasonable and proper amount, and that with that amount the banks will get well started.

Mr. HAYES. Mr. Chairman, I have been very slow to bring myself to the point where I could consent to any Government aid to start these rural-credit banks, and I would not be willing now to vote for any sum to be appropriated from the Treasury to put these banks on their feet if I could see any other way to do it; but having brought myself to the point where I am willing that some money may be temporarily advanced by the Government in order that this very important matter may be started properly, I am anxious that a sufficient amount shall be advanced so that the banks may be put upon their feet in a manner to get the confidence and respect of the investing public. In my humble opinion $750,000 is all too small. [Applause.] I am not sure but it ought to be a million dollars. If the Government is going to do this thing at all, it ought to do it right. I think $500,000 is too little. I hope the amendment will not prevail.

Mr. MURRAY. Let's make it a million.

Mr. CANNON. Oh, make it two.

Mr. MEEKER. Mr. Chairman, I would like to ask the gentleman a question. On the principle of this endless-chain proposition of buying mortgages and issuing bonds and selling bonds and buying mortgages why would not $100,000 be enough?

Mr. HAYES. It would be enough if any considerable number of the bonds had been sold and the thing was on its feet.

Mr. MEEKER. The Government is back of it now.

Mr. HAYES. The only purpose of $750,000 is to start it on its road.

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. HAYES. In a moment. The bill requires that this money shall be returned to the Government after the system is fully under way. This is not a gift on the part of the Government. It is only intended to put it on its feet and get it started, and in my opinion $750,000 is none too much for that purpose.

Mr. HENRY. Will the gentleman yield for a moment? Will the gentleman vote for an amendment increasing it to $1,000,000 for each one of these banks?

Mr. HAYES. No; I can not. I might be willing to do so if I had not agreed to the $750,000 in the committee. After a thorough discussion and some compromises back and forth, the committee arrived at that sum as the proper sum to put behind each bank, and I shall stand by it.

Mr. HENRY. The gentleman sees no objection to it?

Mr. HAYES. I see objections under the circumstances. We fixed it at $750,000 as the least that the majority of the committee thought it was safe to put behind this proposition. I am still of the opinion that $750,000 is as little as should be used to put this system into operation. For that reason I hope the amendment of the gentleman will not prevail.

Mr. LEVER. Mr. Chairman, the gentleman from Pennsylvania [Mr. MOORE] is disturbing his peaceful soul a good deal about the amendment which the Committee of the Whole adopted by an overwhelming vote a moment ago, the amendment which I had the honor to offer. I desire to call the attention of the gentleman to the fact that under the last Republican administration—the last, by the way, we are going to have for a good

long while [applause on the Democratic side]—the Republican Party passed a bill to provide for the establishment of an agricultural bank in the Philippine Islands. Among the provisions in that bill is this:

For the purpose of aiding in the establishment and operation of such an agricultural bank in the Philippine Islands as the general government thereof may hereafter specifically authorize the Philippine government is empowered to guarantee an income not exceeding 4 per cent per annum upon the cash capital actually invested by individuals or corporations in such agricultural bank.

It does not lie in the mouth of the gentleman from Pennsylvania to complain about this proposition here which looks to making the farmer's loan bond, issued under this bill, so strong that it will bring back to the farmer, the borrowing farmer, a lower rate of interest. [Applause.]

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. LEVER. For a question.

Mr. MOORE of Pennsylvania. Does not that act which the gentleman quotes simply authorize the Philippine government to do something?

Mr. LEVER. It does.

Mr. MOORE of Pennsylvania. That is all.

Mr. LEVER. Surely. The gentleman was willing to write his approval to the Philippine government that the government should have the power to guarantee to individual and corporate investors in the bank a certain dividend upon their investment, but he now complains when we are undertaking to write such a bond as will bring back the lowest possible rate of interest to the borrowing farmers of this country.

Mr. MOORE of Pennsylvania. Will the gentleman again yield?

Mr. LEVER. For a question.

Mr. MOORE of Pennsylvania. Are any farmers in this country in any State in such a position as were the Filipinos when that act was passed giving them a chance for civilization?

Mr. LEVER. Oh, but the gentleman was complaining of the principle and not of the circumstances or the facts, and now when I confront him with the fact that his own party has gone a long way further in guaranteeing the stockholder in a Philippine bank against loss than we go by this amendment in helping our own farmers, he wants to fall back and say that the poor Filipinos were in a worse fix than we are in this country, which I, of course, admit.

Mr. GLASS. May I call the attention of the gentleman to the fact that, while I do not want to inject any partisan feeling into this sort of a discussion, if it is to be persisted in I want to have the opportunity of calling attention to the fact that every single, solitary Republican in the Senate who voted on the proposition at all voted for the proposition of the gentleman from South Carolina, only in a very much worse form. [Applause on the Democratic side.]

Mr. LEVER. With the exception of five.

Mr. GLASS. With the exception of none.

Mr. LEVER. I believe the gentleman is right.

Mr. MOORE of Pennsylvania. Will the gentleman yield for one question?

Mr. LEVER. I can not at this point. I want to call the attention of the gentleman to another thing. In 1862, when Southerners were not in control in either branch of Congress, you passed another act, an act to aid in the construction of a railroad and telegraph line from the Missouri River to the Pacific Ocean and to secure to the Government the use of the same for postal, military, and other purposes, and you authorized the Treasury to issue its 30-year 6 per cent bonds to these railroads to the extent of from $16,000 per mile to $48,000 per mile to aid them in their work. There the party of the gentleman was guaranteeing the Government's credit and the Government's money, issuing its own bonds to help a railroad corporation build a transcontinental railroad, and yet when we offer a modest proposition which will get for the producing farmer of this country a lower rate of interest than he can get under existing conditions the gentleman throws 15 fits a minute. [Laughter and applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. DAVENPORT. Mr. Chairman, I desire to offer an amendment to the amendment of the gentleman from Pennsylvania [Mr. MOORE] by striking out the figures "$500,000" and inserting "$1,000,000." [Applause.]

The CHAIRMAN. The Clerk will report the amendment to the amendment.

The Clerk read as follows:

Amend the amendment by striking out "$500,000" and inserting in lieu thereof "$1,000,000."

Mr. DAVENPORT. Mr. Chairman, for many years we have been providing for all classes of business and all classes of enterprises in Congress, and in doing so every man on both sides of the aisle has been advocating that it was for the interest of the farmer. We come now to a proposition where we can do some good to the farmer if we are willing so to do, and if we are going to do it let us provide each of those banks with a sufficient amount of capital in starting, that the farmers may secure loans and get their money without taking time to issue bonds and float them and then await a reissue and sale before we can make other loans. I say to you that $1,000,000 is a small amount to start these banks with. It is going to take some time under the system and the machinery provided in this bill to put those banks in operation, and it is going to take some time after getting them started to get a sufficient number of mortgages executed in order that you may place upon the market a sufficient amount of bonds in order to have sufficient funds to accommodate the new loans.

It is but a few years since we authorized and in a way donated to 34,000 white people in Alaska a $35,000,000 contribution to build a railroad. Only a few days ago we authorized or donated, if it gets through the other end of this Capitol, about $20,000,000 for a nitrate plant, and, if the bill passes that we are now considering, known as the flood-control bill, in a few days you will appropriate about $45,000,000 for those living in the Mississippi Valley. And if we are going to be so liberal with our contributions let us donate, or place at the command of the farmers of this country where they may get it upon proper security a sufficient sum of money, or at least let us give them $12,000,000 for the many farmers throughout the United States.

Mr. FESS. You use the word "donate" advisedly, do you not?

Mr. DAVENPORT. It is nothing more or less, so far as the Alaskan Railroad is concerned, but a donation, as we have not been able to do much up there but spend money and will not for many years, if ever. And the appropriations for the other enterprise mentioned are purely local, and I am not now complaining of them, but mention them so that our liberality should be as generous toward the farmers throughout the United States as in any special locality.

Mr. HENRY. Let me suggest to the gentleman that this Congress has placed in the hands of the 16 Western States the proceeds from the public lands for irrigation and reclamation work, which amount to nearly $100,000,000.

Mr. DAVENPORT. We have been giving benefits to certain localities and industries in certain localities, and here is a time when we can give something to the average farmer from the Lakes to the Gulf and from Maine to California.

Mr. MOORE of Pennsylvania. In fact, there is nothing that this Congress could give away but what Congress has given away?

Mr. DAVENPORT. In fact, the Delaware River could have gotten a good deal more if the wishes of my friend from Pennsylvania had been realized. I am like my friend from Pennsylvania or the gentleman from the Mississippi Valley, I am ready to take all that we believe we are rightfully entitled to, and I do not believe that we have ever gotten any more than we were entitled to. And for that reason I believe that, as a matter of legislation, we ought to have more than $1,000,000 capital in each of these land banks.

Mr. GLASS. Mr. Chairman, I would like to inquire how much time is remaining.

The CHAIRMAN. There are five minutes more remaining.

Mr. MANN. There was 35 minutes allowed at 5 o'clock.

The CHAIRMAN. It was 6 minutes of 5 o'clock, as the Chair recalls it, and the Chair can call all those who have used the time. The gentleman from Pennsylvania [Mr. MOORE] consumed 10 minutes, the gentleman from Massachusetts [Mr. PHELAN] used 5, the gentleman from California [Mr. HAYES] used 5, the gentleman from South Carolina [Mr. LEVER] 5, the gentleman from Oklahoma [Mr. DAVENPORT] used 5.

Mr. MANN. It was 1 minute of 5 o'clock when we made the order.

The CHAIRMAN. That is so, and these gentlemen have all had the floor and have had their five minutes.

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. Was the arrangement made before the amendment offered by myself?

The CHAIRMAN. All to this section and all amendments thereto, and the gentleman from Oklahoma [Mr. DAVENPORT] offered an amendment in his time to the amendment offered by the gentleman from Pennsylvania.

Mr. GLASS. Mr. Chairman, if there were any real necessity for the proposed increase in the capitalization of these regional farm-land banks, I should not object; but there is absolutely no necessity in the world for it. And I warn gentlemen that they

are in danger of proceeding too far in matters of this kind, and that the first thing they will know we will have no rural-credits legislation by this Congress at all. The matter of fixing the capital of these banks at $750,000 was gone into with the utmost care. The figure was reached after careful estimate of what was required, and I hope the committee will not change it.

Mr. DAVENPORT. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Oklahoma?

Mr. GLASS. Yes.

Mr. DAVENPORT. I would like to ask the gentleman if that figure was not agreed upon by the committee as the basis of what possibly might be necessary? If it were fixed at $1,000,000, does the gentleman think that Members would vote against it, even if it were necessary and they believed it should be passed, simply because it was fixed at $1,000,000?

Mr. GLASS. The committees charged with the solution of the problem gave to this subject intelligent study, and the members of the committee think that a $750,000 advance by the Government for the purpose indicated is more than ample. Some thought $500,000 ample; but in order to reach a harmonious conclusion and bring out a practically unanimous report from the committee concessions were made and we put the amount at $750,000. That is quite enough, in the judgment of those who have given the matter careful consideration.

Mr. EAGLE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Texas?

Mr. GLASS. Yes.

Mr. EAGLE. I want to ask my friend if this be not also true, in his opinion, that it is largely immaterial whether the initial amount of capital stock of any one of these 12 banks be $250,000, $500,000, $750,000, or even $1,000,000; for is not this true, that automatically under this bill the amount of the capital stock will increase as the people adopt and put into effect this system by the farm-land associations themselves subscribing to and thereby increasing the capital stock of these land-credit banks?

Mr. GLASS. Practically, that is a very accurate statement of the case; so that $750,000 is easily ample for the purpose. It is the judgment of the committee that this amendment should not prevail.

Mr. TILSON. Mr. Chairman, will the gentleman yield?

Mr. GLASS. Yes.

Mr. TILSON. Then, as I understand the gentleman, in his opinion and in the opinion of the committee that have had this subject under consideration there would be no good purpose served by adding to this $750,000, and it might be harmful. Is that the correct understanding?

Mr. GLASS. It would be psychologically harmful; harmful to the bill, and might endanger the legislation.

Mr. SISSON. The gentleman does not mean to convey the idea that the committee agreed unanimously to something that they regarded as harmful?

Mr. GLASS. No. I did not say that.

Mr. SISSON. In other words, the opinion of the committee was that $750,000 was a proper amount, and therefore the committee unanimously reported it?

Mr. GLASS. Precisely.

Mr. FERRIS. Mr. Chairman, will the gentleman yield?

Mr. GLASS. Yes.

Mr. FERRIS. Inasmuch as the Senate passed the bill, I believe, at $500,000 per bank, or $6,000,000 all told, there can not be anything sacred either about the $9,000,000 or the $6,000,000?

Mr. GLASS. There is nothing sacred about any part of it. Nevertheless, there is a question of sound economics involved in this particular item, which should not be too greatly accentuated if we really desire to have rural-credits legislation at this session of Congress.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Oklahoma [Mr. FERRIS] to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the Chairman announced that the "noes" appeared to have it.

Mr. FERRIS. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 22, noes 46.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question recurs on the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the Chairman announced that the "noes" seemed to have it.

Mr. MOORE of Pennsylvania. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 11, noes 67.

So the amendment was rejected.

Mr. CULLOP. Mr. Chairman, I offer the following amendment.

Mr. MANN. I suggest to the gentleman from Virginia that it is time to move to rise.

The CHAIRMAN. The gentleman from Indiana [Mr. CULLOP] offers an amendment, which the Clerk will report.

Mr. CULLOP. It is to amend page 82, line 8, after the word "complain" by inserting the word "interplead." I have conferred with the committee, and that amendment is satisfactory to the members of the committee.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 82, line 8, after the word "complain" insert the word "interplead."

The CHAIRMAN. Without objection, the amendment will be agreed to.

There was no objection.

Mr. CULLOP. Also insert a comma after the word "complain" and before the word "interplead."

The CHAIRMAN. Without objection, the amendment will be agreed to. Is there objection?

There was no objection.

Mr. DILLON. I move to strike out the last word.

The CHAIRMAN. All debate on the paragraph is closed. The gentleman can make his motion if he desires to do so.

Mr. GLASS. Let us read the next section.

Mr. MANN. What is the object in reading it? Nobody will know what it is to-morrow.

Mr. GLASS. The object in reading it is to make some progress on this bill.

Mr. MANN. I doubt whether it will make any progress simply to read the section.

Mr. GLASS. I had hoped to finish the section. It is a short one, and I can not conceive that there will be any amendment proposed to it.

Mr. MANN. It will not take any longer to-morrow than it will to-night.

Mr. GLASS. We have gotten into this situation: It was supposed when the special rule was adopted that none of these conference reports would intercept the consideration of this bill, but I am told that a conference report will be brought up here to-morrow. In addition to that I have a request that the House proceed with the consideration of pension business after 5 o'clock to-morrow, to which I do not want to raise any objection, and therefore I hope we may get through with this section before 6 this afternoon.

Mr. MANN. I thought we had an understanding that if we met at 11 o'clock we would quit at half past 5. I do not think the conference report on the Indian appropriation bill will take very long, if that is the one the gentleman has reference to.

Mr. GLASS. I wish the gentleman would assist me in getting through with this section, at least, to-night. It will take only a minute.

Mr. MANN. It will not take any longer to-morrow than it will to-night. I do not know whether there will be any amendments to it or not.

Mr. GLASS. It will not take any longer to-night than it will to-morrow.

Mr. MANN. It is the adjourning hour.

Mr. GLASS. I think the gentleman from Illinois ought not to be too unyielding about these matters. [Laughter.]

Mr. MANN. The gentleman has his responsibility while this bill is pending, but I have to do this every day to protect the House.

Mr. GLASS. The gentleman is inured to this sort of trouble, and I want to get rid of it if possible.

Mr. MANN. I think we had better quit at half past 5.

Mr. GLASS. All right. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents

for the United States, and for other purposes, and had come to no resolution thereon.

PENSIONS.

Mr. SHOUSE. Mr. Speaker, I ask unanimous consent that to-morrow, Friday afternoon, at 5 o'clock the House shall take up pension bills on the Private Calendar.

Mr. MANN. Mr. Speaker, it does not require unanimous consent. All the gentleman needs to do is to arrange with the gentleman from Virginia.

Mr. SHOUSE. It is arranged with the gentleman from Virginia.

The SPEAKER. It is understood that we will take it up at 5 o'clock.

Mr. MANN. To-morrow is pension day, and it is in order.

LEAVE TO EXTEND REMARKS.

Mr. OLIVER. Mr. Speaker, I ask unanimous consent to insert in the RECORD a letter received from Hon. Robert J. Bulkley, in reply to a request from me relative to an expression of opinion on the pending bill on rural credits.

The SPEAKER. The gentleman asks leave to extend his remarks by printing a letter from Hon. Robert J. Bulkley.

Mr. MANN. The gentleman has that authority. I have no objection.

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent to extend remarks in the RECORD on the subject of equal suffrage.

The SPEAKER. The gentleman from Oregon asks unanimous consent to extend remarks in the RECORD on the subject of equal suffrage. Is there objection?

There was no objection.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3304. An act concerning the exportation of alcohol and other distilled spirits; to the Committee on Ways and Means.

S. 5708. An act for the establishment of Winston-Salem, in the State of North Carolina, as a port of delivery under the act of June 10, 1880, governing the immediate transportation without appraisement of dutiable merchandise; to the Committee on Ways and Means.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 37 minutes p. m.) the House adjourned until Friday, May 12, 1916, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Navy submitting additional estimates of deficiencies in appropriations for the Marine Corps, required by the Navy Department to complete the service of the fiscal year ending June 30, 1916 (H. Doc. No. 1107); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of State requesting that the unexpended balance of the appropriation made by public resolution No. 48, September 11, 1914, and reappropriated in 1915 and 1916, be again reappropriated and made available for like purposes for the fiscal year ending June 30, 1917 (H. Doc. No. 1108); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and a resolution were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. RAYBURN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 11864) to provide Federal aid in caring for indigent tuberculous persons, and for other purposes, reported the same with amendment, accompanied by a report (No. 676), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM, from the Committee on the Judiciary, to which was referred the bill (H. R. 12541) authorizing insurance companies and fraternal beneficiary societies to file bills of interpleader, reported the same with amendment, accompanied by a report (No. 677), which said bill and report were referred to the House Calendar.

Mr. GARD, from the Committee on the Judiciary, to which was referred the bill (H. R. 15316) to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes, reported the same without amendment, accompanied by a report (No. 678), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ALEXANDER, from the Committee on the Merchant Marine and Fisheries, to which was referred the joint resolution (H. J. Res. 63) authorizing the Secretary of Commerce to sell skins taken from fur seals killed on the Pribilof Islands for food purposes, reported the same without amendment, accompanied by a report (No. 675), which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. DIES, from the Committee on Claims, to which was referred the bill (H. R. 14570) for the relief of Cathrine Grace, reported the same with amendment, accompanied by a report (No. 666), which said bill and report were referred to the Private Calendar.

Mr. POU, from the Committee on Claims, to which was referred the bill (H. R. 13636) for the relief of R. L. Jennings, reported the same without amendment, accompanied by a report (No. 667), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 14645) for the relief of the legal representatives of P. H. Aylett, reported the same with amendment, accompanied by a report (No. 668), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 13247) for the relief of The Ferries Co., reported the same with amendment, accompanied by a report (No. 669), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 3253) for the relief of Hudson Bros., of Norfolk, Va., reported the same without amendment, accompanied by a report (No. 670), which said bill and report were referred to the Private Calendar.

Mr. RUSSELL of Ohio, from the Committee on Claims, to which was referred the bill (H. R. 7396) for the relief of Hiram P. Geaslin, reported the same with amendment, accompanied by a report (No. 671), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (S. 606) for the relief of James C. Hilton, reported the same without amendment, accompanied by a report (No. 672), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 2601) for the relief of William W. Fineren, reported the same with amendment, accompanied by a report (No. 673), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 4581) for the relief of Victor A. Ermerins, reported the same without amendment, accompanied by a report (No. 674), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 2859) granting a pension to Ellen T. Harris, and the same was referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. HINDS: A bill (H. R. 15573) to define the standing of officers of the Coast Survey during the late Civil War; to the Committee on Military Affairs.

By Mr. GARDNER: A bill (H. R. 15574) to authorize the acquisition of a site and the erection of a Federal building at Salem, Mass.; to the Committee on Public Buildings and Grounds.

By Mr. DILL: A bill (H. R. 15575) to amend the act of March 22, 1906, entitled "An act to authorize the sale and disposition of surplus or unallotted lands of the diminished Colville Indian Reservation, in the State of Washington, and for other purposes; to the Committee on Indian Affairs.

By Mr. QUIN (by request): A bill (H. R. 15576) providing for the creation of optometrists corps in the Army; to the Committee on Military Affairs.

By Mr. KONOP: A bill (H. R. 15577) authorizing the Secretary of War to donate condemned cannon and balls to the village of Lena, Wis.; to the Committee on Military Affairs.

By Mr. HAYDEN: A bill (H. R. 15578) granting public lands to the State of Arizona for the construction, repair, and maintenance of public roads and highways; to the Committee on the Public Lands.

By Mr. GRAHAM: A bill (H. R. 15579) to authorize the purchase of a site for a post office in the city of Philadelphia, State of Pennsylvania, and to make an appropriation therefor; to the Committee on Appropriations.

Also, a bill (H. R. 15580) to make an appropriation for the purchase of a site and erection of a building thereon for a post office in the city of Philadelphia, State of Pennsylvania; to the Committee on Appropriations.

By Mr. SABATH: A bill (H. R. 15581) for the relief of the victims of the *Eastland* disaster; to the Committee on Claims.

By Mr. HOLLINGSWORTH: A bill (H. R. 15582) to increase the pensions of the blind who served in the War with Mexico or the Civil War; to the Committee on Invalid Pensions.

By Mr. GREEN of Iowa: Concurrent resolution (H. Con. Res. 38) requesting the President to invite neutral powers to join in a conference in the interest of peace; to the Committee on Foreign Affairs.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and a resolution were introduced and severally referred as follows:

By Mr. ADAIR: A bill (H. R. 15583) granting an increase of pension to George W. Bowers; to the Committee on Invalid Pensions.

By Mr. CONNELLY: A bill (H. R. 15584) granting an increase of pension to Lisetta Bundy; to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 15585) granting a pension to Margaret M. Smith; to the Committee on Invalid Pensions.

By Mr. DEMPSEY: A bill (H. R. 15586) for the relief of Frank Collins; to the Committee on Claims.

By Mr. DOWELL: A bill (H. R. 15587) granting an increase of pension to Samuel E. Edmondson; to the Committee on Invalid Pensions.

By Mr. EAGAN: A bill (H. R. 15588) granting an increase of pension to Louise Menkel; to the Committee on Invalid Pensions.

By Mr. FLOOD: A bill (H. R. 15589) for the relief of the legal representatives of Thomas, Winn & Holman; to the Committee on War Claims.

Also, a bill (H. R. 15590) for the relief of Sarah E. Edmondson; to the Committee on Pensions.

By Mr. FOSTER: A bill (H. R. 15591) granting an increase of pension to William M. Sprinkle; to the Committee on Invalid Pensions.

By Mr. GLYNN: A bill (H. R. 15592) granting a pension to Sarah H. Parker; to the Committee on Invalid Pensions.

By Mr. GREENE of Vermont: A bill (H. R. 15593) granting a pension to Mary S. Lovejoy; to the Committee on Invalid Pensions.

By Mr. HART: A bill (H. R. 15594) granting an increase of pension to Hannah Couse; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15595) granting an increase of pension to Whitfield H. Lance; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15596) granting an increase of pension to Lewis W. Mills; to the Committee on Invalid Pensions.

By Mr. HAYDEN: A bill (H. R. 15597) granting a pension to Mrs. Rachel Hill; to the Committee on Invalid Pensions.

By Mr. McCULLOCH: A bill (H. R. 15598) granting an increase of pension to Raymond E. Fisher; to the Committee on Pensions.

By Mr. MOTT: A bill (H. R. 15599) granting a pension to Phoebe Jane Pickard Edwards; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 15600) for the relief of W. D. Wilson; to the Committee on War Claims.

By Mr. RANDALL: A bill (H. R. 15601) granting a pension to Nora Dickerson; to the Committee on Invalid Pensions.

By Mr. REILLY: A bill (H. R. 15602) granting an honorable discharge to Thomas Baker; to the Committee on Military Affairs.

By Mr. RUBEY: A bill (H. R. 15603) granting an increase of pension to Winthrop Johnson; to the Committee on Invalid Pensions.

By Mr. SANFORD: A bill (H. R. 15604) for the relief of Peter T. Coons; to the Committee on Military Affairs.

By Mr. SHERLEY: A bill (H. R. 15605) granting an increase of pension to Ella M. Robards; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15606) granting an increase of pension to Hezekiah Allen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15607) granting an increase of pension to Mary E. Gibson; to the Committee on Invalid Pensions.

By Mr. SULLOWAY: A bill (H. R. 15608) granting an increase of pension to Lois F. Eaton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15609) granting an increase of pension to Josephine P. Ham; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15610) granting an increase of pension to John C. Toombs; to the Committee on Invalid Pensions.

By Mr. WASON: A bill (H. R. 15611) granting an increase of pension to Charles S. Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15612) granting an increase of pension to Elery Wheeler; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 15613) granting a pension to William Warren; to the Committee on Invalid Pensions.

By Mr. GARD: A bill (H. R. 15614) granting an increase of pension to Charles Holstein; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15615) granting an increase of pension to Chauncey W. Young; to the Committee on Invalid Pensions.

By Mr. KELLEY: A bill (H. R. 15616) for the relief of John H. Cowley; to the Committee on Military Affairs.

By Mr. IGOE: Resolution (H. Res. 234) for the relief of William S. Eames and Thomas C. Young, composing firm of Eames & Young; to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of National Association of Conservation Commissioners, favoring legislation for game sanctuaries; to the Committee on Agriculture.

Also (by request), memorial of Interstate Sportsmen's Protective Association, Kansas City, Mo., relative to certain regulations provided for in the migratory-bird law; to the Committee on Agriculture.

By Mr. CAREW: Petition of American Statistical Society, in re Public Health Service; to the Committee on Reform in the Civil Service.

Also, petition of Irish-American Athletic Club, in re bill to establish a national athletic stadium; to the Committee on Appropriations.

By Mr. DALE of New York: Memorial of United States Openers and Packers' Benevolent Association of the Port of New York, favoring passage of House bill 11876, the Nolan bill; to the Committee on Labor.

Also, petition of James C. S. Bates, of Hoboken, N. J., favoring increase in Army and Navy, etc.; to the Committee on Military Affairs.

Also, petition of New York State Society of Oregon, favoring the Chamberlain bill relative to 40 per cent of sales from Oregon and California land grant to Oregon school fund; to the Committee on the Public Lands.

By Mr. DOOLING: Petition of Irish-American Athletic Club, in re bill to establish a national athletic stadium; to the Committee on Appropriations.

By Mr. EMERSON: Memorial of citizens of the twenty-second district of Ohio, against passage of Senate bill 645; to the Committee on the District of Columbia.

By Mr. FLYNN: Petition of James H. S. Bates, M. E., of New York, in re military preparedness; to the Committee on Military Affairs.

Also, memorial of New York State Society of Oregon, favoring the Chamberlain bill in re land grant; to the Committee on the Public Lands.

By Mr. GALLIVAN: Petition of Boston Music Publishers' Association, favoring the Stevens bill; to the Committee on Interstate and Foreign Commerce.

By Mr. HAMILTON of New York: Papers to accompany House bill 15537, granting an increase of pension to Stillman P. Daily; to the Committee on Invalid Pensions.

By Mr. HAWLEY: Petition of citizens of Woodburn, Oreg., favoring national constitutional prohibition amendment; to the Committee on the Judiciary.

By Mr. KIESS of Pennsylvania: Statements to accompany House bill 11505, for the relief of Ashley H. Shoot; to the Committee on Military Affairs.

By Mr. LOUD: Petition of E. E. Moher and Baptist Church of Twining, Mich., for national prohibition; to the Committee on the Judiciary.

By Mr. MEEKER: Petition of 24 citizens of St. Louis, Mo., against bills to amend the postal law; to the Committee on the Post Office and Post Roads.

By Mr. O'SHAUNESSY: Petition of sundry citizens of Bristol, R. I., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of Builders' Iron Foundry, of Providence, R. I., against House bill 8665; to the Committee on Labor.

Also, petition of E. E. Trowbridge, of Peace Dale, R. I., favoring House bill 11250 and Senate bill 703; to the Committee on Education.

Also, petition of Builders' Iron Foundry, of Providence, R. I., in re use of the metric system; to the Committee on Coinage, Weights, and Measures.

Also, memorial of American Statistical Association, opposing the Works resolution; to the Committee on Reform in the Civil Service.

Also, petition of Gilbert Johnson, jr., of Providence, R. I., favoring House bill 8828 and Senate bill 3456; to the Committee on Appropriations.

Also, memorial of New York State Retail Jewelers' Association, favoring House bill 13305; to the Committee on Interstate and Foreign Commerce.

Also, memorial of Bristol Improvement Association, favoring the establishment of a naval base on Narragansett Bay; to the Committee on Naval Affairs.

By Mr. PHELAN: Petition of sundry societies of Massachusetts, favoring national prohibition; to the Committee on the Judiciary.

By Mr. RANDALL: Memorial of sundry citizens of Los Angeles, Cal., favoring woman suffrage; to the Committee on the Judiciary.

By Mr. STEENERSON: Petition of citizens of Pequot, Minn., protesting against the passage of House bill 652, Sunday closing of barber shops in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of citizens of Pequot, Minn., protesting against the passage of House bills 491 and 6468, to amend the postal laws, etc.; to the Committee on the Post Office and Post Roads.

By Mr. TEMPLE: Petition of citizens of New Wilmington, Ellwood City, and New Castle, Pa., favoring the passage of House bill 270, Roberts mail-order bill; to the Committee on Ways and Means.

Also, petition protesting against the Taylor system in Government workshops, signed by 40 citizens of Beaver Falls and New Brighton, Pa.; to the Committee on Naval Affairs.

## SENATE.

### FRIDAY, *May 12, 1916.*

*(Legislative day of Tuesday, May 9, 1916.)*

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

Mr. KENYON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Dillingham | Lea, Tenn. | Smith, Md. |
| Beckham | du Pont | Lodge | Smoot |
| Brady | Gallinger | Martin, Va. | Stone |
| Bandegee | Hardwick | Martine, N. J. | Sutherland |
| Broussard | Hitchcock | Myers | Swanson |
| Catron | Hughes | Norris | Taggart |
| Chamberlain | Husting | Page | Thomas |
| Chilton | James | Poindexter | Thompson |
| Clapp | Johnson, Me. | Pomerene | Townsend |
| Clarke, Ark. | Johnson, S. Dak. | Ransdell | Vardaman |
| Colt | Kenyon | Shafroth | Warren |
| Culberson | Kern | Sheppard | |
| Curtis | Lane | Sherman | |

Mr. CURTIS. I have been requested to announce that the Senator from Montana [Mr. WALSH], the Senator from North Dakota [Mr. GRONNA], the Senator from Idaho [Mr. BORAH], and the Senator from California [Mr. WORKS] are detained in committee.

Mr. CHILTON. I wish to announce that my colleague [Mr. GOFF] is absent on account of illness. I make this announcement for the day.

Mr. LEA of Tennessee. I have been requested to announce the unavoidable absence of the senior Senator from Mississippi [Mr. WILLIAMS].

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

#### WITHDRAWAL OF ALCOHOL FROM BOND.

Mr. LODGE. I ask unanimous consent to submit a favorable report from the Committee on Finance.

I am directed by the Committee on Finance, to which was referred the bill (S. 5966) to amend an act entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," approved October 3, 1913, to report it favorably without amendment. I ask for its present consideration.

There being no objection, the Senate, as in Committee of the whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.,* That subsection 2, paragraph N, of section 4, be amended as follows: At the end of the first paragraph add the words "That any person or persons heretofore mentioned may, under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, also withdraw alcohol from bond, free of tax, for denaturation only."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

#### NEW JERSEY DAY.

Mr. MARTINE of New Jersey. Mr. President, I desire to ask unanimous consent for a matter that is in a way personal. In my little Commonwealth this day has been set apart by our governor as New Jersey Day, and I desire to make a few little comments upon the merits of my State. I ask for unanimous consent. It will take but a few minutes.

Mr. JAMES and others. All right.

Mr. MARTINE of New Jersey. Is there objection?

The VICE PRESIDENT. It comes in under the pending bill very well.

Mr. MARTINE of New Jersey. Mr. President, as Senators, I deem it is our privilege and duty to advance the welfare of our land and the people thereof, and to that end I feel that we may be justified in proclaiming the merits and claims of our respective States. Mr. President, with us to-day, May 12, in my State is New Jersey Day. New Jersey was one of the original thirteen Colonies to join the Union. New Jersey was the third State to ratify the Federal Constitution, which it did unanimously on December 18, 1787. The spirit of our fathers bade them to pit their lives and their fortunes against Great Britain that liberty might live. Their warm, rich blood soaked the battle fields of Monmouth, Princeton, Trenton, Springfield, and Elizabeth to gain the heritage that to-day we enjoy.

But in recent years New Jersey, through her sons, has contributed honor and glory to our country. That superb son of New Jersey, Grover Cleveland, added fame and honor to our history. Another painstaking and patriotic son, the present President of the United States, Woodrow Wilson, has by his unselfishness and patriotism honored and blessed our land, and placed his name high on the scroll of fame. And, too, the honored position you to-day so ably and acceptably fill, was occupied by a distinguished son of New Jersey, Garrett Hobart; his genial presence shed sunshine wherever he might be.

New Jersey was the first to float our flag over the Continental Armies.

To-day our State is a veritable hive of industry. The clang of our anvils, the buzz and hum of our mills, sing the tune of industry, liberty, prosperity, and happiness.

From a point in our State, taking the city of Trenton as a center, in a radius of 60 miles there is a throbbing population of over 12,000,000 souls.

Our State is sandwiched between the great States of New York and Pennsylvania. The cities of New York and Philadelphia affording rich markets for our products. The great railroads of our country must cross our favored Commonwealth in their effort to seek the world's market. The great pipe lines, draining half the continent of mineral oil, cross our State and flow to the great refineries located on our coast.

Senators, we are proud in the thought that we are the gateway of our Nation. No State exceeds New Jersey in variety of manufacture. We lead in copper smelting and refining, in

manufacture of silk, linoleum, sewing machines, rubber goods, jewelry, varnish, and pottery. We boast of more miles of railways per square mile of territory than any other State of the Union. Nine-tenths of our State is water bounded, thus affording ample bays and dockage for shipping.

The manufacturing capital invested in New Jersey is about twice as much as was invested in the whole of the United States in 1850. Transportation in our State is developed to a marked degree; we have 1 mile of railroad for every 3 square miles of land.

New Jersey was the first to adopt the State-aid system in the system of road construction. We now have 7,344 miles of improved roads. Our schools rank among the best, under a total expenditure of $17,000,000. Our State school property is valued at over $65,000,000. In this connection let me state that under our system we convey, in the rural districts, high-school pupils to and from the schools to their homes when far distant. The upland area of New Jersey is 4,808,960 acres; improved farm land, 1,803,336 acres; land in forest, 2,069,819 acres. Our population in 1915 was 2,844,342, or about 378 per square mile.

As a State we are and have been blessed by good legislation; we are favored with glorious climatic conditions; our territory is ramified by a superb road system. Beautiful and happy homes dot our hills and dales, all combining to make a most charming landscape.

The glories of our wonderful Atlantic seacoast, the health-giving air along the sea, bring to us tens of thousands of visitors each year. The green clad hills of Union, Sussex, Warren, Morris, and Somerset reach to an elevation of 1,300 feet, with crystal lakes nestling in the valleys throughout the northern section, transforming that territory into a veritable Switzerland. To this fair-pictured land New Jersey bids welcome to all seeking health, wealth, and happiness. In this historic Commonwealth one will find more completely combined the advantages of the city with the delights and blessings of the green fields than any other section of our country. We bid you come; our latchstring hangs out; a warm hand will greet you.

NEW JERSEY.

"The rolling wave is on thy shore,
Jersey land, my Jersey land!
Aloft thine azured mountains soar,
Jersey land, my Jersey land!
Hilltop and vale, low-lying plain,
Thy pines, thy streams with murmuring strain,
These ne'er will let thy beauty wane,
Jersey land, my Jersey land!
On fame's bright roll thy name is found,
Jersey land, my Jersey land!
Thine every road is hallowed ground,
Jersey land, my Jersey land!
At Trenton and on Princeton's field,
On Monmouth's plain, with valor steeled,
Thy sons their lives for freedom sealed,
Jersey land, my Jersey land!
Minerva holds thee near her heart,
Jersey land, my Jersey land!
Their gifts the sacred nine impart,
Jersey land, my Jersey land!
Fair wisdom's sons thou lov'st to call
From wayside shrine or college hall,
Thine altar fires bid welcome all,
Jersey land, my Jersey land!"

[Applause.]

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SHERMAN resumed the speech begun by him on yesterday. After having spoken for some time,

INDIAN APPROPRIATIONS—CONFERENCE REPORT.

Mr. ASHURST. Mr. President, will the Senator from Illinois yield to me for a moment?

Mr. SHERMAN. Certainly.

Mr. ASHURST. Mr. President, a message from the House of Representatives received a few moments ago announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the Indian appropriation bill (H. R. 10385). I should like to have the report considered by the Senate now. I think it will take only about five minutes to dispose of it. No one wishes to speak at length against it, and I ask unanimous consent that the Senate consider the conference report at this time, assuming, of course, that it will not take the Senator from Illinois off the floor. The report has already been submitted by me and has been printed in the RECORD. I do not think it will be necessary to read it.

The PRESIDING OFFICER (Mr. JOHNSON of South Dakota in the chair). Is there objection to the request of the Senator from Arizona?

Mr. CLARKE of Arkansas. I shall not object, with the qualification that if it leads to protracted debate or controversy the Senator will ask that the further consideration of the conference report be postponed to another time.

Mr. ASHURST. If the report leads to extended debate, I will ask to postpone its consideration for the time.

Mr. GRONNA. Mr. President, will the chairman of the Committee on Indian Affairs be kind enough to tell the Senate what changes have been made in the report, so that we may know on what we are voting?

Mr. ASHURST. Mr. President, this is, I might say, the third time this report has been made to the Senate. It was twice rejected. It was rejected the last time because the Senate found serious objection to the way in which the conferees had altered amendment numbered 2. Amendment No. 2, as adopted by the Senate, read as follows:

The provisions of sections 2140 and 2141 of the Revised Statutes of the United States shall also apply to beer and other intoxicating liquors named in the act of January 30, 1897 (29 Stats. L., p. 506).

That amendment was adopted on the motion of the Senator from Oklahoma [Mr. OWEN], and what follows was the amendment adopted on the motion of the Senator from North Dakota [Mr. GRONNA]:

And the possession by a person of intoxicating liquors in the country where the introduction is prohibited shall be prima facie evidence of unlawful introduction.

The conferees made that rule of evidence apply only to Indian country, which was not satisfactory to the Senate, whereupon the report was recommitted to the conference committee, and the conferees then changed it by inserting the words "by treaty or Federal statute," so that it now reads:

The provisions of sections 2140 and 2141 of the Revised Statutes of the United States shall also apply to beer and other intoxicating liquors named in the act of January 30, 1897 (29 Stat. L., p. 506), and the possession by a person of intoxicating liquors in the country where the introduction is prohibited by treaty or Federal statute shall be prima facie evidence of unlawful introduction.

It merely shifts the burden of proof, so that whenever any person with intoxicating liquor in his possession is found in any country where liquor is prohibited the burden of proof is on him; he must prove that he has it there lawfully, instead of the United States being required to prove that he has it there unlawfully.

I desire to state further that before the conferees agreed to that provision, knowing that that item was in controversy, we called before us a number of Senators interested in it and consulted with them, and we were assured that it was satisfactory.

Mr. LANE. Mr. President, in relation to that clause——

Mr. JONES. Mr. President——

Mr. LANE. Does the Senator from Washington desire to speak to the conference report?

Mr. JONES. I desire to take about a minute.

Mr. LANE. Very well, I yield to the Senator.

Mr. JONES. Mr. President, I have here a paper, which was read before the conference of the Society of American Indians at Lawrence, Kans., September 30, 1915. It is a paper prepared by a full-blooded Apache Indian, who, I understand, is a very successful business man in Chicago. I ask that the paper be printed in the RECORD, together with a brief sketch of the author's life, which appears on the back of the last page.

Mr. LANE. Mr. President, I ask that the paper be read at this time. There is no better time to have that matter brought to the attention of the Senate than right now, and I ask unanimous consent that it be read. If I can not secure unanimous consent for that purpose, I will read it myself.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

Mr. JONES. Mr. President, I have no objection to its being read, but I did not want to take the time of the Senate to have it read.

Mr. LANE. This is a good time to have it read.

Mr. JONES. In presenting it I will say that I do not wish to be understood as indorsing everything that is in the paper, but I present it partly to show the views of an educated full-blooded Indian with reference to the conduct of Indian affairs.

Mr. ASHURST. What is his name?

Mr. JONES. Dr. Montezuma. I understand the Senator from Oregon has secured unanimous consent that it may be read, and I send it to the Secretary's desk.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary proceeded to read the document referred to. After reading for about five minutes,

Mr. LANE. Mr. President, I ask that the rest of the document be printed in the RECORD. No one is paying any attention to it. You might just as well go out on the front porch and whistle against the east wind as to read that in here, so far as its receiving any attention is concerned, so I ask that the further reading of it be dispensed with.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The document referred to is, in full, as follows:

LET MY PEOPLE GO.

[Dr. Montezuma, speaking in the interest of his race, the American Indians, read before the conference of the Society of American Indians, at Lawrence, Kans., Sept. 30, 1915.]

From time immemorial, in the beginning of man's history, there come echoes and reechoes of pleas that are deeper than life.

This is an age of abusiveness, "man's inhumanity to man," where man experiments with man; it is an age where money (the idol) is dominant; it is an age of tyranny, where might is right; yet producing such material achievements and advancement as the world has never seen. It is an age where we hide and ask God, "Am I my brother's keeper?" It is an age where man's noblest character that reaches to God must not waver but must be strong and see the right.

The Society of American Indians has met and met. This coming together every year has been the mere routine of shaking hands, appointing committees, listening to papers, hearing discussions, passing a few resolutions, electing officers, then reorganizing—and that has been the extent of our outlook and usefulness for our race. Our placing too much faith and confidence in the Indian Bureau has caused us to evade the vital, the most important and fundamental, object of our society. Mohonk Conferences, Indian Rights Association, Indian Friends, and other similar organizations have also evaded the vital, paramount issue; if they did touch on it, they did it in the form of a whisper.

In the bloody and gloomy days of Indian history public sentiment was against the Indians, that they could not be civilized; they could not be educated; they were somewhat like human beings, but not quite within the line of human rights; the only hope was to let the bullets do the work, cover up the bloody deeds, and say no more—God and humanity were forgotten.

At that hour, when Indians were made "good Indians," as a lightning from the clear sky, out from the frontier, among Indian-fighting soldiers, a voice came: "Stay the sword; the Indian is a man." That voice was no less than Lieut. R. H. Pratt (founder of the United States Indian School, Carlisle, Pa., 1879), now our most beloved and honored benefactor, a brigadier general.

Patient, silent, and distant the Indian race has been these many years.

There comes a time in human events when abandonment of racial responsibilities becomes very oppressive, unbearable, intolerable, and there seems to be no hope—then man must exert himself, speak, and act.

The status of our people is not on the square for that reason. Brothers, that time has come to our race. The Society of American Indians is not free. We are wards; we are not free! In a free country we are not free; our heritage is freedom, but we are not free. Wake up, Indians, all over America! We are hoodwinked, duped more and more every year; we are made to feel that we are free when we are not. We are chained hand and foot; we stand helpless, innocently waiting for the fulfillment of promises that will never be fulfilled in the overwhelming great ocean of civilization.

Civilization is our monarch. As a race we are at a crisis. Our position as a race and our rights must not be questioned. Looking from all points of the compass there is only one object for this Society of Indians to work for, namely, "freedom for our people."

It seems so strange that some members of the society can not understand the object of this paper, and these are their questions: "We are ready to abolish the Indian Bureau, but how?" "Wait, let us settle this and that first." Another one says, "Doctor, I stand pat with you on doing away with the Indian Bureau, but let us get an understanding of this and that first." "Do not stir up a revolution until we are ready." "Evolution and not revolution."

Some well-meaning people feel very bad over this matter of taking away the support of the Indians. They pass their hands over their foreheads, take a long sigh, sadly look into space, and wonder how we are going to free the Indians and what will become of the poor Indians then. This going here and there seeking to find a solution to the Indian problem is all nonsense. It has been a problem so long that it has become a problem.

Gen. Pratt's words are true that "the Indian (paper read by Capt. Pratt before the Women's New Century Club, Philadelphia, Pa., Jan. 10, 1896) is no problem." It is all in our mind. To free the Indian is to free the Indian. There is nothing complicated about that. It is so simple that we can not believe it.

Common sense teaches us that when you free the Indian in civilization, the Indian will civilize himself—it is automatic and involuntary—and that to free the Indian from bureauism is to free him from bureaucism.

My coworkers, if we disagree as a society of Indians in this matter, those who do not think as we do will just chuckle and gloat over our factions. It is just what they want. It favors them and weakens us as an Indian organization. If we can not attend to our own affairs as a society of American Indians, they will point to us and say, "I thought so. They are Indians; they can't do anything." Now, we must do something and show that the Indians can do.

The question of abolishing the Indian Bureau is not a new idea. Eleven years ago the progress of the Indian race had reached that stage of preparation that enabled them to be independent of Government supervision and to be told to go their own way and be their own self-supporters.

Gen. Pratt sounded the keynote when he said:

"I believe that nothing better could have happened to the Indians than the complete destruction of the bureau, which keeps them so carefully laid away in the dark of its numerous drawers, together with all its varied influences, which only serve to bolster and maintain tribal conditions.

"The early death of the 'Freedmen's Bureau' was an infinite blessing to the negro himself and to the country as well. If you say the turning loose of this large number of ignorant and unprepared people would threaten the peace of our communities, I say that not a year within the last 30 but we have imported from foreign countries and turned loose in the United States a much greater number of no less unprepared and ignorant people. One thing is certain, this bureau will never lift its finger to end its own life, and we can rely on it that its emotions are most pleasurable when Congress adds to it increased responsibilities in the distribution of money, etc. It is a barnacle to be knocked off sometime.

"Better, far better for the Indians had there never been a bureau. Then self-preservation would have led the individual Indian to find his true place, and his real emancipation would have been speedily consummated." (Address delivered before the Baptist ministers' meeting in New York City, 1904.)

When Gen. Pratt uttered these words, he thought that the country and the President were with him in heart and soul for the betterment of the Indians as in the past. Not so—humiliatingly he was made to realize that there was some one higher than he, some one to be considered, some one to be reckoned with. He found himself relieved from the great institution he founded and cherished, and where he had hoped to see his last days. He had said too much. He was in the Indian Service under the bureau and his head was cut off—1904.

With regret the writer must mention the fact that the Mohonk Conference, Indian Rights Association, and National Indian Association were silent and dumb. Not a word of protest was heard from them. Shame upon them! If they were true and loyal friends of the Indians, such would not have occurred.

Government: "Say, Sitting Bull, I know you are a good fellow, but you are as a child in looking after your business, you are easily cheated and robbed. I know it, because I have done it myself. Now, my good friend, Sitting Bull, I will tell you what to do. You give everything over to me, and I will do everything for you."

That is about how we came to be wards of the Government. They and we as their children have paid dearly in every way to have the United States Government in charge of us as wards.

It is a psychological fact that by everlastingly harping and pointing that "you are an Indian," that "you are a ward," that "you are a child and must be protected," that "you have property, and we must be your real estate agent," that "you must not do anything without your superintendent's approval," that "you are not ready to live as a free man," it is a scientific fact that after a while you will actually believe that it is all true, that you are different from other races, that you have "Washington" for your father, that he feels your weakness as a child, and that the Government is so good as to protect you, that the superintendent and "Washington" will attend to your rights, and that if they want you to sign your thumb mark or name to their papers, you have to. The Indian knows nothing else. Alas, everything is taken from him without his consent and without his being consulted. The jail is close by if the Indian does not obey.

To-day the Indian Bureau is founded on a wrong basis. It is un-American. It is pursuing unnatural methods to reap natural results. Being unnatural, it has come to be a heavy burden instead of a help to the Indians. It is dominated by the Indian Service regulations, thus dominating the Indians and perpetuating itself. It has swerved from its noble course. It has derailed the Indians from the main road that other races travel. It has gone into commercial business; it is methods and methods and promotions.

The original grand, noble, and ideal object of the Indian Bureau was to aid and protect the Indian and prepare him to emerge from his wigwam into civilization, and it has been a total failure.

Within my period of years there have been 10 or 12 Commissioners of Indian Affairs. Most of them are dead, and the machine still exists to be greased and tinkered with. It is a political machine, where one goes out and another comes in, taking turns greasing and adjusting the Indian machine.

The gradual process of civilizing the Indian seems well enough, but experience teaches us, and as we study the case it seems more and more like the good saint's method of shortening his dog's long tail. He was a very sympathetic and humane man. He concluded to shorten it by the gradual process. To do it nicely he cut off a little piece of the tail one day and another piece off at another time, and so he continued to sever the dog's tail by installments, so as not to hurt the dear dog too much.

This humane and sentimental process has not been practical and has done the Indian a great deal of harm before the world. It has been a blind; a pretention that you are doing something. It is never ceasing, never ending.

There is a wrong feeling, a wrong thought, and a wrong judgment that we must fight. It is an individual battle! It is called "prejudice."

Keep in mind that Indian Bureau, Indian reservations, Indian schools, Indian college, Indian art, Indian novels, Indian music, Indian shows, Indian movies, and Indian everything create prejudice and do not help our race. To tackle prejudice it is better to do it face to face in the busy world. To play the same card as the other fellow we must know him.

Before leaving the Indian Service I wrote to a good friend asking him what he thought of my leaving the Government service and hanging out my shingle in Chicago. He replied, "Well, Doctor, I would advise you to stick to the Government job where the pay is sure. If you come to Chicago, I am afraid you will not make a success here, because there will be prejudice against you, even though you may be the best physician—you are an Indian."

When I read these words my Apache blood rushed into my head, and I said, "God helping me, I will resign the Government service and go back to Chicago and fight prejudice." I was willing to sacrifice everything for my race, so I took the choice of coming in contact with prejudice and going against the current of life and defying the world for the rights with which God has endowed the Indian, as one of His creatures, and I assure you I am not discouraged or dismayed.

To fight is to forget ourselves as Indians in the world. To think of oneself as different from the mass is not healthy. Push forward as one of them, be congenial, and be in harmony with your environments and make yourselves feel at home as one of the units in the big family of America. Make good, deliver the goods, and convince the world by your character that the Indians are not as they have been misrepresented to be.

Members of this society, we have been drilling in our uniforms, but not fighting. Now we must fight or go out of existence. When Gen. Pratt was unjustly dismissed from the Indian Service, the bar that debarred special-interest people was let down. The Indians were no longer protected by a wise father. These would-be friends of the Indians discovered the Indian to be an ideal and fit subject to be exploited by the Indian Bureau, by the missionaries, by the philanthropists, by the anthropologists, by the sociologists, by the psycholo-

gists, by the archaeologists, by the artists, by the novelists, and, O Lord, no telling how many can use the Indian. Scientifically the native child of the forest is so useful. They rushed in pell-mell, tumbling over one another, and the Indian was used as an Indian—as a man he was lost sight of. Our race fell back in its advancement 50 years, and where is our Gen. Pratt?

The reservation is a hothouse, the wrong "melting pot," a demoralizing prison of idleness, beggary, gambling, pauperism, and ruin, where the Indians remain as Indians, a barrier against enlightenment and knowledge. There is not on redeeming feature on the Indian reservations for the Indians. The Indians condemn it; anyone who knows the reservation condemns it, and those who have thought seriously to ascertain its redeeming qualities have condemned it; even the Indian Department condemns it, but does not dare to say so or it would be without a job. The one feeds the other.

The reservation system is a ruinous phantom for the Indians, a deceptive dream of hope that has rainbow spectrum. It is like that mirage upon the burning sands of the desert—now you see it, now you don't see it, and you die dreaming of it. It is a decoy that leads us to our doom.

The paleface boys and girls are kept at home and sent to public schools and sent away to colleges. When they finish school, these same boys and girls go away from home and make their own way in the busy, active life of the country—to succeed or fail, survive or perish. They know not what may befall them; they only take their chance away from home. For in this journey of life God's decree is that we can not see the path all the way—only from day to day—nor the hereafter, only by faith. The start is hard; we know it is hard and killing, but it fits us to compete with the world.

The Indian boys and girls are schooled on reservations near their Indian homes. By promotion they go into nonreservation Indian boarding schools. To go higher, they enter Carlisle, Haskell, or other Government Indian boarding schools; and when these same boys and girls finish the eighth grade they are carefully sent back to their homes on the reservations. That ends his or her school chapter, and what has been the outcome of such method of Indian schooling? Back, back in everything, of course.

But, thanks be to God, illustrious names can be mentioned whose owners did not get all their education on reservations—Senator OWEN, Congressman CARTER, ex-Senator CURTIS, Dr. Eastman, the late Dr. Oronhyatekha, Mr. Parker, formerly of the Treasury, Rev. Wright, Dr. Favill, and many others. Now, where are the names of those Indians who have been educated on reservations? It is not surprising that no name can be mentioned.

Somehow or other the idea prevails that the Indian's sphere of action in this life and in America should be limited within the wigwam, and when an Indian boy or girl goes away to school you hear the hounding voices saying, "Go back, go back to your home and people." These good people and many others seem to convey the idea that Indians are strangers in America; and, strange to say, these people have the whole world for their action, and they are far away from their place of birth, and when they came the Indian was here; and, of course, the Indians, too, must have the whole world for their sphere of action.

There are hundreds of Indian employees in the Indian Service. To a casual observer this may appear as though the United States Government is magnanimous, considerate of its wards by giving employment to the schooled Indian boys and girls and to others who can fill positions and pass civil-service examinations. Man is the outcome of his environment. If employed in the Indian Service of the Government, that person will carry with him the atmosphere of that service, be he from any race. Anyone who conscientiously and unselfishly starts in the Indian Service to sacrifice his ambition in behalf of the Indian in time will fall into the rut, get tired, disgusted, and lose interest, and finally see no use, and he will fall into the level of his surroundings and stick to his job. He has lost sight of the grand object that he had at first, but he sticks to his job.

Just so with the Indian employees in the Indian Service; their personality is destroyed. To keep their positions, to be in the swim, they must not express themselves; they have nothing to say. They stick to the Indian Service and hate to lose their jobs.

Indian employees in the Indian Service are working against the freedom of their race.

Truth hurts, but it is never wrong, and in the long run it conquers. The Indian Bureau is the only obstacle that stands in the way, that hinders our people's freedom. It seems so strange, so incredible, and so unheard of that we Indians must fight and kill the very organ that was organized to free us in order to free ourselves.

What is the Society of American Indians good for? Dare we shy? Dare we run? Dare we cower? And dare we hide when our duty is so plainly written before us? As a society with the greatest object for our people, it should be no longer possible to evade the issue; the responsibility rests with us to be message runners to every camp and to let every Indian know that it remains with every individual Indian to be free.

It is apalling and inexplicable that the palefaces have taken all of the Indian's property—the continent of America—which was all he had in the world. The Indian asks for public school, college, and university education for his children. To refuse such a noble request would be as cruel as to give a stone when he asks for bread. Will the department defray the expenses of any college or university Indian students? The Indian Bureau's motto seems to be, "Eighth grade and no more." And therefore we may assume that the Indian Department does not want the Indian educated. It may be wise, and is afraid that they will make too many lawyers who will fight to a finish. It may be that the Indian Bureau fears something may happen from the Indian's knowledge of doing something.

To dominate a race you do not want to educate them. All one needs to do is to make them believe black is white and get them to believe everything you do is all right. Let them live Indian life. Let them fear you. Let them quibble among themselves. Give them plenty of sweets and tell them things will come out all right, for them not to worry, but leave it all to their "Washington father"; he is "good medicine," and all will be well. Blessed is the superintendent who has this executive ability.

The life of the Indian Bureau is supported by plausibilities and by civil service. No discredit to the principles of civil service, but when it somes to clinch and hold the lid down and keep the Indians from their liberty by its good name, then it is time that a loud protest should come from the Society of American Indians. The merit system has a limit when it stands in the way of human rights.

The Indian Bureau is willing and anxious to do everything for the Indians, but! It says: "If there is anything wrong, we can remedy it ourselves, because we are in a position to know the needs of the Indians, and do not believe, but!

"Thou good and faithful servant" can not be applied to the Indian Bureau; from a lamb it has grown to be a strong monster. It looks with furious glare at every movement we make, lest we take away the Indians from its blood-stained paws, because it pays to continue the same old policy, to keep us within due bonds.

The Indian Bureau could dissolve itself and go out of business, but what is the use? Just think, 8,000 employees would be jobless and there would be no $11,000,000 appropriation. By dissolving it would be killing its hen that lays the golden egg. Having nursed the Indians for so long, they might be lonesome living without Indians. There is no other race to draw upon to keep the wolf from the door. The last thing it thinks of is to let go of the Indians. It will fight to the last ditch, because they are its bread and butter; they are its money and have sacrificed their service to the cause.

Therefore it is useless to look within the Indian Department for relief. It must come from the outside—from Congress and the people.

Some may ask, Can we not adjust or reform the Indian Bureau so that it will accomplish something for the Indians? The Indian Bureau system is wrong. The only way to adjust wrong is to abolish it, and the only reform is to let my people go. After freeing the Indian from the shackles of Government supervision, what is the Indian going to do? Leave that with the Indian, and it is none of your business. Leave an Indian and a Yankee on a desert to live or die. I will vouch on an Indian every time—that he will make a living. This idea that the Indian will starve to death when the Indian Bureau is abolished is all talk, and there is nothing to it. He has to settle everything for himself. He has to do the same as you and I—and that is freedom.

The Indian Bureau has not left the Indians, but is awfully busy with a third party. The third party wants this and wants that, backed by Congressmen and by Senators and by a long list of petitioners. The Indian Bureau jibes in with the third party, and they both agree that the Indian has too much land. "He has no use for so much. Let us open up a part of it to the public, sell the land, and deposit the money to his credit in the Treasury, and have the interest money paid to him quarterly." If the Indian wants 50 cents and the tribe has $200 in the Treasury, the department takes the 50 cents from the $200, and the Indian believes it comes from Washington by taxing the public. That honest, if you can call it honest, method is called the reimbursement fund.

Reimbursement charity is the most damnable charity conceivable, and it takes away as much burden from the Indians as that good and kind-hearted old lady did when she held her heavy market basket out of the wagon on scaling the steep hill so that the poor horses would not have such a heavy load to pull up the hill. The Indians have to pull the heavy load up the hill of the Indian Bureau system, while the Indian Bureau rides and thinks it is helping us by holding its heavy basket out of the wagon.

What did the Indians get for their land that is flooded? How much did the Indians get for the land that irrigation ditches pass through? How much did the Indians get from the forest reserve and the natural park reserve? These are the questions yet to be settled, if the Government has not protected us as its wards.

Is the Indian's reimbursement fund Government appropriation, or is it the Indian paying himself?

Has the Indian no right to express himself or to be consulted and give his approval and disapproval of the construction of a dam on his domain?

Has he no right to say what part of his reservation may be sold?

Coming down to the fine point, has the Indian any right to open his mouth, to think for himself, or to do for himself, or even to live and breathe for himself?

Not at all; not at all! The Indian Bureau—the Indian Bureau does it all. If there is such a place as hell, O, it's like hell! O, it's like hell to me.

Fairly speaking, the Century of Dishonor, by Helen Hunt Jackson, bears a tale that is mild in comparison to the present Indian administration.

The iron hand of the Indian Bureau has us in charge. The slimy clutches of horrid greed and selfish interests are gripping the Indian's property. Little by little the Indian's land and everything else is fading into a dim and unknown realm.

The Indian's prognosis is bad—unfavorable, no hope. The foreboding prodromic signs are visible here and there now; and when all the Indian's money in the United States Treasury is disposed of; when the Indian's property is all taken from him; when the Indians have nothing in this wide, wide world; when the Indians will have no rights, no place to lay their heads; and when the Indians will be permitted to exist only on the outskirts of the towns; when they must go to the garbage boxes in alleys to keep them from starving; when the Indians will be driven into the streets, and finally the streets will be no place for them, then, what will the Indian Bureau do for them? Nothing, but drop them. The Indian Department will go out of business.

In other words, when the Indians will need the most help in this world, that philanthropic department of the Government that we call the Indian Bureau will cease to exist; bankrupt with liabilities—billions and billions—no assets. O Lord, my God, what a fate has the Indian Bureau for my people.

If we depend upon the employees of the Indian Bureau for our life, liberty, and pursuit of happiness, we wait a long while. They are too busy looking after the machinery of Indian Affairs; they have no time to look ahead; they have no time to feel the pulse of the Indian; they have no time to think of outside matters; they have no time to adjust matters. "Well, what time have they?" you may ask. All of their time is devoted to the pleasure and will of their master at Washington that we call the Indian Bureau.

Blindly they think they are helping and uplifting, when in reality they are a hindrance, a drawback, and a blockade on the road that would lead the Indian to freedom, that he may find his true place in the realms of mortal beings.

The reservation Indians are prisoners; they can not do anything for themselves. We are on the outside, and it is the outsiders that must work to free the Indians from bureauism. There is no fear of the general public; they are our friends. When they find out that we are not free they will free us. We have a running chance with the public, but no chance with the Indian Bureau.

The abolishment of the Indian Bureau will not only benefit the Indians, but the country will derive more money annually from the Indians than the Government has appropriated to them. Why? Because by doing away with the Indian Bureau you stop making paupers and useless beings and start the making of producers and workers.

Does this seem like a dream to you? Is your position a foreign attitude? From aloft, do you look down? Have you gone so far as to forget your race? Have you quenched the spirit of our fathers? As their children, dare we stay back, hide ourselves, and be dumb at this hour when we see our race abused, misused, and driven to its doom? If this be not so, then let whatever loyalty and racial pride be in you awaken and manifest itself in this greatest movement of "Let my people go!"

The highest duty and greatest object of the Society of American Indians is to have a bill introduced in our next Congress to have the Indian Bureau abolished and to let the Indians go. We can not be disinterested in this matter; we can not be jealous or hate one another; we can not quibble or be personal in this matter. There must be no suspicion.

We must act as one. Our hearts must throb with love, our souls must reach to God to guide us, and our bodies and souls must be used to gain our people's freedom.

In behalf of our people, with the spirit of Moses, I ask this—the United States of America—"Let my people go."

---

The author of this article (Dr. Montezuma) is a full-blood Apache of Arizona. His tribe was considered the most ferocious, unpromising specimen and the most primitive of the aborigines. When but 4 years of age he was taken prisoner by the Pima Indians, who sold him for $30 to Mr. C. Gentile, one of the founders of the Chicago Press Club and the Chicago Art Institute, who brought the Apache boy East, and traveled together, and after a short stay at Grand Rapids, Mich., they came to Chicago, where the Apache Indian entered the public schools (spring, 1873) before he could command the English language intelligently. In a short time the little Indian boy curiosity unconsciously did just the same things as his white school playmates—played marbles, ran away from school to go fishing on the lake front, watered P. T. Barnum's elephant, sold newspapers, hitched behind buses, and in every way he was just like any other street-orphan boy.

In 1875 and 1876 he went to a country school near Galesburg, Ill. Mr. Gentile sold out his business in Chicago and went to New York City and took along his Indian boy. Unfortunately, Mr. Gentile's new gallery in New York City burnt out and he failed in business in 1877. He could no longer finance, even though it was against his wish, his Apache protégé.

At an early age of 11 years the boy from Arizona had to shift for himself. After one year's schooling in Brooklyn, N. Y., he was brought back to Urbana, Ill., where he was tutored for the preparatory course connected with the State University of Illinois. He matriculated in 1880 and in 1884 graduated in the school of chemistry with the degree of bachelor of science. While at Illinois University he worked at anything and everything, and during vacation he worked on a farm. After his graduation he launched out and landed in Chicago, secured a place in a drug store, where he worked and made his home. In the fall of 1884 he began to attend lectures at the Chicago Medical College while working and living in the drug store. Five years at the Medical College of the Northwestern University, at the same time behind a drug counter, he killed two birds with one shot—he secured the degree of doctor of medicine as well as being a practical pharmacist. It is worthy of note to say that Montezuma made his own road and traveled in it alone, and for every step of the way he earned and paid for it himself, with now and then kind helping hands.

Gen. T. J. Morgan, Commissioner of Indian Affairs, learned of the Apache's graduation in medicine; he offered him a position in the Indian Service, and in 1889 the young physician accepted and was stationed as Indian school clerk and physician at Fort Stevenson, N. Dak., agency physician at Western Shoshone, Nev., Colville Agency, Wash., and resident physician at the renowned United States Indian school at Carlisle, Pa., where he came face to face with Gen. Pratt and his work. After serving the United States Government for seven years and a half the doctor resigned his position at Carlisle in 1896 and again returned to Chicago to "buck up" against the world, where he is making a successful demonstration for his race in his profession and as a citizen.

Mr. LANE. I wish to say a word in regard to the item governing the introduction of liquor upon Indian reservations, and making the having in one's possession whisky or alcoholic liquor of any kind prima facia evidence that you have brought it in there for evil purposes.

I am sorry the Senator from Minnesota [Mr. CLAPP] is not here; but it is a measure, while well intentioned, can be used with deadly effect for evil. For instance, in the State of Oregon there is a reservation known as the Klamath Reservation that is some 400 miles by rail from the Federal court in Portland, Oreg. Many of those Indians, the half-breeds, are as white as we are. You would not know them from many Members of the Senate, so far as their complexion is concerned. There is a reward or a salary attached to convicting as many men as possible for introducing liquor on the reservation, or for selling liquor to the Indians. A hobo will come along through the country, or some man hunting work, a stranger, unfamiliar with the law or the pale-faced Indian—absolutely ignorant of both, in fact. A young fellow will approach him, a white man, apparently, and he will say to him: "Here is a dollar. Go and get me a 50-cent bottle of whisky, and keep the change." "Why don't you go and get it yourself?" "Well, the barkeeper down there and I don't agree. We had a little trouble yesterday; and I would consider it a great favor, and would be willing to give you half a dollar commission."

Well, the unfortunate greenhorn goes into the saloon, buys the whisky, and hands him the bottle—the quart or pint, or whatever it is, of "Sheep-herder's Delight"; and then that man is placed under arrest and taken down to Portland, 400 miles away, at a heavy expense to the Government, with this Indian and others as witnesses.

It became a business, a regular occupation, to catch strangers in that way to make these fees, to get this trip back and forth, and $2 a day for witness fees and board and lodging. It became so much of a regular business that the late Judge Bellinger, when he sat upon the bench, after he found out what was going on, dismissed every case of the kind that was brought before him. He would not try them. He threw them out of court, and threatened to fine people for contempt if they brought in such cases. Half of the time, perhaps, of the Federal court and district attorney in Portland, Oreg., is put in trying such cases as that—mere manufactured, humbug cases. If the amendment of the Senator from Minnesota fastens more of that sort of work on the people of this country, I do not like it or think much of it.

This so-called "Sheep-herder's Delight" is a very poor quality of whisky which is sold to Indians. If they sold the Indians fairly good whisky, they would probably last longer; but they do not. They have to buy the cheapest quality and pay the highest price for it.

If this amendment further fastens that condition of affairs upon the Government, I am opposed to it. As a matter of fact, it costs the Government hundreds of thousands of dollars. About half the time of the court and the district attorney is put in trying these cases, many of which are fraudulent and manufactured. I introduced a bill to remedy it a short time ago. Now, can we not have a provision in the bill protecting the people of the country and the Government from such work as that?

Mr. CLAPP. Mr. President, there is a provision in this bill the purpose of which—its operation may fall short of the purpose—is to protect the Indian from strong drink.

Mr. LANE. Yes; "fire water."

Mr. CLAPP. That is the purpose of this measure. I hope and trust it will be a factor in affording that protection.

Mr. LANE. I hope so, Mr. President. I was down in that country last summer, and I went on that reservation and found 13 Indians locked up in the "caboose." It was a wretched building, dilapidated, dirty, without any conveniences. Among these Indians were two married women. When an Indian is thrown into that jail he is compelled to furnish his own bedding. If he does not, he sleeps without any. It was in the fall when I was there. It was getting nipping cold at night. A little later it would get down to zero; at times perhaps below zero. Probably you do not know just how it feels to sleep without bedding when the temperature is around about zero. They had brought their bedding, most of them. Some of them had no bedding, and they were sleeping on the floor in their clothing.

I asked, "What were these Indians arrested for? What have they been doing?" They said, "Gambling. We have a new man here, an expert in capturing gamblers, and he is making a reconnoissance through the country and getting in all the gamblers he can," and he had the jail loaded with them. Two or three of the Indians were out doing chores for some of the officials during my visit and I did not see all of them. At any rate, I asked them what kind of gambling they had been doing. I said, "Have they been playing faro, three-card monte, poker, fan-tan, or what?" They said they had been playing "sticks."

I do not know whether you know what "sticks" is or not. It is the game which the Indians have always played. They played it when I was a boy. They will play it when my children are dead, if they are alive and have the opportunity. It is an old game. They had been given sentences of from 30 to 40 days for playing this game of "sticks," which is the old game of "hull-gull." One places a pebble or a button, anything will do, in his hand and hiding his hands behind him shifts it from one hand to the other back and forth. The opponent guesses which hand holds it. If he guesses right he puts a stick down in the ground and has won one point. If he guesses wrong the other Indian sticks one in the ground, and wins one point, and so on. It is the old game of "hull-gull," for playing which they got from 30 to 40 days. At that rate of punishment I have a thousand years in jail coming to me, for when I was a boy I played it many a time. [Laughter.]

At any rate, one of these Indian prisoners asked me: "How do you ever expect to civilize the Indians when you send them in here for 30 or 40 days for playing 'sticks' at 5 cents a game?" I said: "Well, I do not. There are others, perhaps, who do, but not me." He said: "I have had to leave my family who are over on the farm, with nobody to care for them or my cattle. My hay crop needs to be put away at this time. It has not been put under the barn; and here I am, confined for 40 days, for having played a game of 'sticks.' You are a Member of the Senate. Do you think you are going to civilize me, or my family, by keeping me jailed to the neglect of them and their

affairs?" I said: "No; I do not think so. There are others however who think it is a highly moral and very righteous way of treating you. As far as I am concerned, I think it is tommyrot."

This bill provides ample salaries for sending men around over the country to catch Indians who are playing "sticks"—"hull-gull," if you please—and others who it is alleged induce Indians to take half a dollar or a dollar, give it to a white man to buy whiskey in order to obtain preferment for the one and witness fees for the other. Such work is fraudulent.

Mr. MARTINE of New Jersey. Mr. President, I should like to ask the Senator from Oregon whether, in the gambling that exists there, they have any gambling in cotton futures, or Standard Oil stocks, or railroad stocks, or things of that character?

Mr. LANE. No; that is only indulged in by the better class of people; not by the poor Indians.

Mr. MARTINE of New Jersey. I should like to ask the Senator whether he considers the enormity of the crime or wrong any less than in the case of these poor Indians?

Mr. LANE. I think it is an awfully wicked thing for Indians to play "hull-gull" for nickels. [Laughter.]

Mr. MARTINE of New Jersey. I should like to ask the Senator what he thinks of the man who gambles in cotton futures and Standard Oil stock?

Mr. LANE. They are persons of much larger influence with Members of the House and of the Senate than are the Indians who play "hull-gull."

Mr. ASHURST. I ask that the question be put on agreeing to the conference report.

The PRESIDING OFFICER. Consent having been obtained to consider this conference report at this time, I think I am within my rights to announce from the Chair that I am opposed to its passage, and shall discuss my objections fully at a later time in the near future.

Mr. LANE. I understand the Presiding Officer is willing that the motion should be put at this time, but that he is not in favor of the conference report.

Mr. ASHURST. That is true. The present occupant of the Chair has been very fair. He has stated that he is opposed to the adoption of the report, but that he will not at this time discuss it. He is perfectly willing to have the question put, and has given notice that he will discuss the report later, as he has a perfect right to do. I ask that the question be put.

Mr. LANE. Before the question is put, as there probably will not be a call of the roll, I wish to say that if there were a call of the roll, and my name were called to vote upon this report, I should vote against its adoption with a great deal of pleasure.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

### POSTAL SAVINGS SYSTEM—CONFERENCE REPORT.

Mr. BANKHEAD. Mr. President, I desire to call up for consideration at this time the conference report on the bill (H. R. 562) to amend the act approved June 25, 1910, authorizing a Postal Savings System.

Mr. CLARKE of Arkansas. Mr. President, I will consent to that only on condition that the report will not provoke any debate.

Mr. SMOOT. I ask the Senator to withhold that request, I have sent the conference report to the senior Senator from New Hampshire [Mr. GALLINGER] to look it over, as he is interested in the matter. I have no objection, but I very much prefer that the Senator should withhold the request until the Senator from New Hampshire has completed his examination.

Mr. BANKHEAD. Very well, Mr. President. I withdraw the request for the present.

### STATISTICS ON IMPORTS (S. DOC. NO. 441).

Mr. SMOOT. Mr. President, will the Senator from Illinois yield for just a moment?

Mr. SHERMAN. Yes, sir.

Mr. SMOOT. I have certain statistics collected relative to the general imports of merchandise, and a letter transmitted in connection with them, all of which I ask may be printed as a public document for the use of the Senate.

The PRESIDING OFFICER. If there is no objection, the matter will be printed as a public document.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a concurrent resolution requesting the President to return to the House the enrolled bill (H. R. 759) entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof," in which it requested the concurrence of the Senate.

The message also announced that the House agrees to the report of the committtee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917.

### RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

[Mr. SHERMAN resumed and concluded his speech. The entire speech is printed in the Appendix.

Upon concluding his speech,

Mr. SHERMAN said: I wish, Mr. President, if the Senate will permit me to offer an amendment to the amendment concerning this $5,000,000 expenditure. It recites specifically the date of the passage of the act which I had not before me at the time I drew it in the committee, giving the date approved June 18, 1915, and further some amendment providing that the Interstate Commerce Commission is hereby given power to fix reasonable charges and tolls for the use of navigation upon the waterway created under said act of the general assembly of said State in all interstate transportation, covering the questions raised by the Chief Engineer. I ask that it may be printed.

Mr. CLARKE of Arkansas. Let it be printed and lie on the table until that item is reached in the consideration of the bill.

Mr. LEWIS. Mr. President, my colleague, in closing his address, tendered an amendment which recited an act concerning the expenditure of $5,000,000. May I ask my colleague, if the question be so important, will he be so kind as to add that it refers to the $5,000,000 to be expended not by the Federal Government but by the State of Illinois?

Mr. SHERMAN. Certainly, nothing whatever from the Government but entirely out of the treasury of Illinois.

Mr. LEWIS. I thank my colleague for making that clear in the RECORD.

Mr. KENYON obtained the floor.

Mr. BANKHEAD. Will the Senator from Iowa yield to me?

Mr. KENYON. I yield to the Senator.

### POSTAL SAVINGS SYSTEM—CONFERENCE REPORT.

Mr. BANKHEAD. Mr. President, I again call up the conference report on the bill (H. R. 562) to amend the act approved June 25, 1910, authorizing a Postal Savings System, and ask that it be considered at this time.

The PRESIDING OFFICER (Mr. HUSTING in the chair). Is there objection to agreeing to the report?

Mr. SMOOT. Will not the Senator have the report read?

Mr. BANKHEAD. There is no objection to its reading, but it has been printed as a document and printed in the RECORD.

Mr. SMOOT. There is no objection to the adoption of the report.

Mr. CLARKE of Arkansas. It is not necessary to read the report. It has been printed.

Mr. SMOOT. Very well; I will not ask to have it read.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

### RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. KENYON resumed the speech begun by him on Tuesday. After having spoken for some time, he said:

Mr. President, I should like to stop at this point, unless the chairman of the committee desires to go on.

Mr. CLARKE of Arkansas. If it suits the Senator from Iowa to suspend at this point, it is entirely agreeable to this side of the Chamber to take a recess until to-morrow.

[Mr. KENYON's entire speech is printed in the proceedings of May 9, 1916.]

### PETITIONS AND MEMORIALS.

Mr. WADSWORTH presented a petition of sundry citizens of Oswego, N. Y., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

Mr. SMITH of Maryland presented a memorial of the Merchants and Manufacturers' Association of Baltimore, Md., remonstrating against the enactment of legislation to provide methods of directing the work of Government employees, which was referred to the Committee on Education and Labor.

He also presented a memorial of Merchants and Manufacturers' Association, of Baltimore, Md., remonstrating against the enactment of legislation to prohibit the use of stop-watch devices in the Postal Service, which was referred to the Committee on Post Offices and Post Roads.

REPORTS OF COMMITTEE ON FINANCE.

Mr. LODGE, from the Committee on Finance, to which was referred the bill (S. 5495) for the relief of Edward J. Lynch, collector of internal revenue for the district of Minnesota, reported it without amendment.

Mr. HUGHES, from the Committee on Finance, to which was referred the bill (S. 4384) providing for the refund of duties collected on flax-preparatory machines, parts, and accessories imported subsequently to August 5, 1909, and prior to January 1, 1911, reported it without amendment and submitted a report (No. 432) thereon.

Mr. THOMAS, from the Committee on Finance, to which was referred the bill (S. 5268) for the relief of Copper River & Northwestern Railway Co., reported it without amendment and submitted a report (No. 433) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHEPPARD:

A bill (S. 5973) to establish the National Chamber of Agriculture for the purpose of promoting the equitable distribution of farm products; to the Committee on Agriculture and Forestry.

By Mr. CATRON:

A bill (S. 5974) for the relief of Ellen B. Walker; to the Committee on Indian Affairs.

By Mr. KERN:

A bill (S. 5975) to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes; to the Committee on Education and Labor.

By Mr. SMITH of Maryland:

A bill (S. 5976) to amend an act approved May 29, 1908, entitled "An act to amend an act to authorize the Baltimore & Washington Transit Co., of Maryland, to enter the District of Columbia," approved June 8, 1896; to the Committee on the District of Columbia.

By Mr. CURTIS (for Mr. PENROSE):

A bill (S. 5977) granting a pension to Uain A. Bigler; to the Committee on Pensions.

By Mr. CHILTON:

A bill (S. 5978) providing for the payment of the amounts due the employees in, and the contractors who furnished castings to, the United States armory at Harpers Ferry, Va., in March and April, 1861; to the Committee on Claims.

A bill (S. 5979) granting an increase of pension to Dora Broom (with accompanying papers);

A bill (S. 5980) granting a pension to George W. Parks (with accompanying papers); and

A bill (S. 5981) granting a pension to Ida P. Duffy (with accompanying papers); to the Committee on Pensions.

RIVER AND HARBOR APPROPRIATIONS (H. R. 12193).

Mr. HARDWICK submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

Mr. ASHURST submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

Mr. SHERMAN submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

Mr. GORE submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

Mr. SMITH of South Carolina submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

WITHDRAWAL OF PAPERS—A. PURDEE.

On motion of Mr. FLETCHER, it was

*Ordered*, That the papers in the case of Senate bill No. 2647, Sixty-third Congress, for the relief of A. Purdee be withdrawn from the files of the Senate, no adverse report having been made thereon.

PROPOSED RULE RELATIVE TO EXECUTIVE SESSIONS.

Mr. KENYON. I submit a resolution and ask that it lie on the table.

The resolution (S. Res. 191) was read and ordered to lie on the table, as follows:

*Resolved*, That it is the judgment of the Senate that all executive sessions shall hereafter be open to the public, except when treaties are considered, or when the Senate by unanimous consent orders otherwise.

And the Committee on Rules is directed to prepare such amendments to the present rules, or to prepare new rules, or both, as may be necessary to carry out the terms of this resolution, and present the same to the Senate for action thereon.

THE NEW AQUEDUCT BRIDGE.

The VICE PRESIDENT laid before the Senate the following concurrent resolution (No. 39) of the House of Representatives, which was read:

*Resolved by the House of Representatives (the Senate concurring)*, That the President be requested to return to the House of Representatives the enrolled bill (H. R. 759) entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof."

Mr. SWANSON. I move that the Senate concur in the resolution of the House.

The motion was agreed to.

RECESS.

Mr. CLARKE of Arkansas. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock and 8 minutes p. m., Friday, May 12, 1916) the Senate took a recess until to-morrow, Saturday, May 13, 1916, at 12 o'clock m.

## HOUSE OF REPRESENTATIVES.

### FRIDAY, *May 12, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We thank Thee, our Father in heaven, for the faith which holds us close to Thee, a most potent influence among the civilizing forces of the world, inspiring, cheering in the struggle for existence, purifying and ennobling amid the temptations which surround us. It comforts us in our sorrows and bids us wait on Thy goodness. Increase and strengthen it in all our hearts, that we may be true to Thee, to ourselves, and to our fellow men. In His name. Amen.

The Journal of the proceedings of yesterday was read and approved.

THE AQUEDUCT BRIDGE.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the desk.

The SPEAKER. The gentleman from Georgia asks unanimous consent for the present consideration of a concurrent resolution, which the Clerk will report.

The Clerk read as follows:

House concurrent resolution 39.

*Resolved by the House of Representatives (the Senate concurring)*, That the President be requested to return to the House of Representatives the enrolled bill H. R. 759 entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge across the Potomac River, and for the building of a bridge in place thereof."

The SPEAKER. Is there objection?

Mr. MANN. I shall not object, but I would like to make this remark in view of the statement in the evening paper and the morning paper of this morning, which would indicate that there had been an error in the enrollment or engrossment of the bill. There was no error in the enrollment of the bill. If it was the fault of anybody, it was the fault of the Members of Congress.

Mr. ADAMSON. The gentleman from Illinois is entirely correct. I inadvertently misled the House by stating that the Senate amendment had not hurt the bill much. I failed to notice, what the Senate failed to notice, that in renumbering the section we referred to the preceding section making provision for the appropriation of money and failed to note that the section had been renumbered. We referred to it as section 5 when it should have been section 4.

Mr. MANN. I was not criticizing the gentleman from Georgia, because it was no more his fault than the fault of others.

Mr. ADAMSON. I take my part of the blame, for I allowed the Senate to mislead me, and I never will do it again. [Laughter.]

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 1274. An act for the relief of Edward Stewart; to the Committee on Military Affairs.

S. 1296. An act for the relief of John P. Wagner; to the Committee on Military Affairs.

S. 1860. An act in reference to the issuance of patents and copies of surveys of private land claims; to the Committee on the Public Lands.

THE CORBETT TUNNEL.

Mr. STOUT. Mr. Speaker, I ask unanimous consent that Senate joint resolution 51 be re-referred to the Committee on Irrigation of Arid Lands.

The SPEAKER. What does it relate to?

Mr. STOUT. To the Corbett Tunnel claim.

The SPEAKER. The gentleman from Alabama asks unanimous consent that Senate joint resolution 51 be re-referred to the Committee on Irrigation of Arid Lands. Is there objection?

There was no objection.

INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma. Mr. Speaker, I call up for consideration the conference report on the bill H. R. 10385, the Indian appropriation bill, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that the statement be read in lieu of the report. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, I think the statement is a good deal longer than the conference report.

Mr. CARTER of Oklahoma. That is the customary request.

Mr. MANN. I know, but that is because the statement is usually shorter than the conference report and is more explicit, but in this case the statement happens to be longer.

Mr. CARTER of Oklahoma. Very well, Mr. Speaker, I will withdraw the request.

The SPEAKER. The Clerk will read the report.

The Clerk read as follows:

CONFERENCE REPORT (NO. 665).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 6, 8, 11, 12, 15, 23, 30, 31, 32, 38, 40, 43, 44, 45, 49, 69, 73, 77, 88, 91, 92, 100, 108, 117, 118, 119, 120, 123, 133, 135, 147, and 149.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 9, 13, 16, 17, 18, 19, 20, 21, 22, 24, 25, 27, 28, 29, 33, 39, 46, 48, 50, 51, 52, 53, 54, 56, 58, 60, 61, 62, 63, 64, 66, 67, 68, 70, 71, 76, 80, 81, 85, 86, 89, 90, 93, 94, 96, 98, 99, 101, 103, 104, 106, 107, 109, 111, 112, 114, 115, 121, 122, 125, 126, 128, 130, 131, 134, 136, 138, 139, 140, 141, 143, 144, 145, 148, 150, 151, 152, 153, 154, and 155, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"The provisions of sections 2140 and 2141 of the Revised Statutes of the United States shall also apply to beer and other intoxicating liquors named in the act of January 30, 1897 (29 Stat. L., p. 506), and the possession by a person of intoxicating liquors in the country where the introduction is prohibited by treaty or Federal statute shall be prima facie evidence of unlawful introduction."

And the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the word "to" and insert in lieu thereof the following: "$5,000 of which shall"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following: "*Provided further*, That not more than $200,000 of the amount herein appropriated may be expended for the tuition of Indian children enrolled in the public schools"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "two permanent warehouses"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the words "which has been" and in line 2 of said amendment strike out the words "heretofore or"; and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For beginning the construction by the Indian Service, of a dam with a bridge superstructure and the necessary controlling works for diverting water from the Gila River for the irrigation of Indian land and Indian allotments on the Gila River Indian Reservation, Ariz., as recommended by the Board of Engineers of the United States Army in paragraph 217 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $75,000 to be immediately available and to remain available until expended, reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., p. 522), the total cost not to exceed $200,000."

And the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For beginning the construction by the Indian Service of a diversion dam and necessary controlling works for diverting water from the Gila River at a site above Florence, Ariz., as estimated by the Board of Engineer Officers of the United States Army in paragraph 138 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $75,000, to remain available until expended, the total cost not to exceed $175,000: *Provided*, That said dam shall be constructed as a part of a project for the irrigation from the natural flow of the Gila River of Indian lands on the Gila River Indian Reservation and private and public lands in Pinal County, Ariz.: *And provided further*, That the water diverted from the Gila River by said diversion dam shall be distributed by the Secretary of the Interior to the Indian lands of said reservation and to the private and public lands in said county in accordance with the respective rights and priorities of such lands to the beneficial use of said water as may be determined by agreement of the owners thereof with the Secretary of the Interior or by a court of competent jurisdiction: *And provided further*, That the construction charge for the actual cost of said diversion dam and other works and rights shall be divided equitably by the Secretary of the Interior between the Indian lands and the private and public lands in said county; and said cost as fixed for said Indian lands shall be reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., 522); but the construction charge as fixed for the private and public lands in said county shall be paid by the owner or entryman in accordance with the terms of an act extending the period of payment under reclamation projects, approved August 13, 1914 (38 Stat. L., 686): *And provided further*, That said project shall only be undertaken if the Secretary of the Interior shall be able to make or provide for what he shall deem to be satisfactory adjustments of the rights to the water to be diverted by said diversion dam or carried in canals, and satisfactory arrangements for the inclusion of lands within said project and the purchase of property rights which he shall deem necessary to be acquired, and shall determine and declare said project to be feasible."

And the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For extension of the Ganado irrigation project on the Navajo Indian Reservation in Arizona for the irrigation of approximately 600 acres of land in addition to the area to be irrigated by said project, as authorized in section 2 of the act of August 24, 1912, $20,000; and for maintenance and operation of the project, $3,000; in all, $23,000, reimbursable and to remain available until expended."

And the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and

agree to the same with an amendment as follows: In line 16 of said amendment strike out the figures "$15,000" and insert in lieu thereof the following: "$10,000"; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 100 Indian pupils at the Greenville Indian School, California, including pay of superintendent, $18,400; for general repairs and improvements, including purchase of additional land for school farm, $8,000; in all, $26,400."

And the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For the improvement and construction of roads and bridges on the Yuma Indian Reservation in California, $10,000, to be immediately available, reimbursable to the United States by the Indians having tribal rights on said reservation."

And the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $10,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Pottawatomi Indians in the State of Kansas, and to be expended under his direction for the construction of bridges across the Big Soldier Creek and Little Soldier Creek, within the Pottawatomi Indian Reservation, Jackson County, Kans.: *Provided*, That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of the county of Jackson satisfactory guaranties of the payment by the said county of Jackson of at least one-half of the cost of said bridges, and that the said proper authorities of the said county of Jackson shall assume full responsibility for and will at all times maintain and repair said bridges: *And provided further*, That any and all expenses above the amount herein named in connection with the building and maintaining of said bridges shall be borne by the said county of Jackson: *And provided further*, That this appropriation shall not become effective until approved by an Indian council to be called for that purpose."

And the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: Strike out the following language of the amendment: "Hereafter on ceded lands in the State of Minnesota embraced within the provisions of the law entitled 'An act for the relief and civilization of the Chippewa Indians in the State of Minnesota,' approved January 14, 1889, the minerals in and mineral rights pertaining to any of the lands the cession of which was provided for in said act and for which the United States has not conveyed title shall be and remain in and are reserved for the use and benefit of the Chippewa Indians in the State of Minnesota"; and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment as follows: In line 6 of said amendment strike out the following: "at Keewaton Academy, Wisconsin" and the comma; and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In line 1 of said amendment, after the word "balance," insert the following: "of $3,436.03"; and the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the word "section" and in line 3 strike out the word "one" and insert in lieu thereof the words "this act"; and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the figures "$50,000" and insert in lieu thereof "$25,000"; and the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The work to be done with the amounts herein appropriated for the completion of the Blackfeet, Flathead, and Fort Peck projects may be done by the Reclamation Service on plans and estimates furnished by that service and approved by the Commissioner of Indian Affairs: *Provided*, That not to exceed $15,000 of applicable appropriations made for the Flathead, Blackfeet, and Fort Peck irrigation projects shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles for official use upon the aforesaid irrigation projects: *Provided further*, That not to exceed $7,500 may be used for the purchase of horse-drawn passenger-carrying vehicles, and that not to exceed $1,500 may be used for the purchase of motor-propelled passenger-carrying vehicles."

And the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to announce, at such time as in his opinion seems proper, the charge for construction of irrigation systems on the Blackfeet, Flathead, and Fort Peck Indian Reservations in Montana which shall be made against each acre of land irrigable by the systems on each of said reservations. Such charges shall be assessed against the land irrigable by the systems on each said reservation in the proportion of the total construction cost which each acre of such land bears to the whole area of irrigable land thereunder.

"On the first day of December after the announcement by the Secretary of the Interior of the construction charge the allottee, entryman, purchaser, or owner of such irrigable land which might have been furnished water for irrigation during the whole of the preceding irrigation season, from ditches actually constructed, shall pay to the superintendent of the reservation where the land is located, for deposit to the credit of the United States as a reimbursement of the appropriations made or to be made for construction of said irrigation systems, 5 per cent of the construction charge fixed for his land, as an initial installment, and shall pay the balance of the charge in 15 annual installments, the first 5 of which shall each be 5 per cent of the construction charge and the remainder shall each be 7 per cent of the construction charge. The first of the annual installments shall become due and payable on December 1 of the fifth calendar year after the initial installment: *Provided*, That any allottee, entrymen, purchaser, or owner may, if he so elects, pay the whole or any part of the construction charges within any shorter period: *Provided further*, That the Secretary of the Interior may, in his discretion, grant such extension of the time for payments herein required from Indian allottees or their heirs as he may determine proper and necessary, so long as such land remains in Indian title.

"That the tribal funds heretofore covered into the Treasury of the United States in partial reimbursement of appropriations made for constructing irrigation systems on said reservations shall be placed to the credit of the tribe and be available for such expenditure for the benefit of the tribe as Congress may hereafter direct.

"The cost of constructing the irrigation systems to irrigate allotted lands of the Indians on these reservations shall be reimbursed to the United States as hereinbefore provided, and no further reimbursements from the tribal funds shall be made on account of said irrigation works except that all charges against Indian allottees or their heirs herein authorized, unless otherwise paid, may be paid from the individual shares in the tribal funds, when the same is available for distribution, in the discretion of the Secretary of the Interior.

"That in addition to the construction charges every allottee, entryman, purchaser, or owner shall pay to the superintendent of the reservation a maintenance and operation charge based upon the total cost of maintenance and operation of the systems on the several reservations, and the Secretary of the Interior is hereby authorized to fix such maintenance and operation charge upon such basis as shall be equitable to the owners of the irrigable land. Such charges when collected shall be available for expenditure in the maintenance and operation of the systems on the reservation where collected: *Provided*, That delivery of water to any tract of land may be refused on account of nonpayment of any charges herein authorized, and the same may, in the discretion of the Secretary of the Interior, be collected by a suit for money owed: *Provided further*, That the rights of the United States heretofore acquired to water for Indian lands referred to in the foregoing provision, namely, the Blackfeet, Fort Peck, and Flathead Reservation land, shall be

continued in full force and effect until the Indian title to such land is extinguished.

"That the Secretary of the Interior be, and he is hereby, authorized to prescribe such rules and regulations and issue such notices as may be necessary to carry into effect the provisions of this act, and he is hereby authorized and directed to determine the area of land on each reservation which may be irrigated from constructed ditches and to determine what allowance, if any, shall be made for ditches constructed by individuals for the diversion and distribution of a partial or total water supply for allotted or surplus unallotted land: *Provided*, That if water be available prior to the announcement of the charge herein authorized, the Secretary of the Interior may furnish water to land under the systems on the said reservations, making a reasonable charge therefor, and such charges when collected may be used for construction or maintenance of the systems through which such water shall have been furnished."

And the Senate agree to the same.

Amendment numbered 78: That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "for the purpose of making necessary repairs on the Government bridge across the Niobrara River near Niobrara, Nebr.; also to reconstruct one span of 90 feet over the back channel of the Niobrara River at the same point, the sum of $6,500; said sum to be expended under the direction of the Secretary of the Interior"; and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$91,100"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 290 Indian pupils at the Indian school at Carson City, Nev., including pay of superintendent, $50,430; for general repairs and improvements, $8,000; for irrigating school farm, $4,000; in all, $62,430."

And the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In line 4 of the amendment, after the figures "$15,000," strike out the period, insert a colon, and the following: "*Provided*, That no part of this appropriation shall be expended for mileage, salaries, or expenses of employees"; and the Senate agree to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In line 2 of the amendment strike out the following: "and to remain available until expended"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 350 Indian pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $59,550; for general repairs and improvements, $6,000; for water supply, $1,600; for the construction of an assembly hall and gymnasium, $25,000; in all, $92,150."

And the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 220 Indian pupils at the Indian school, Wahpeton, N. Dak., and pay of superintendent, $38,540; for general repairs and improvements, $5,000; for new school building, $20,000; in all, $63,540."

And the Senate agree to the same.

Amendment numbered 97: That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment as follows: Strike out all of said amendment and insert the following:

"To enable the Secretary of the Interior to redeem a mortgage on the allotment selection of Starr McGillis, a Turtle Mountain Chippewa Indian, described as the northwest quarter of section 34, township 164 north, range 70 west of the fifth principal meridian, North Dakota, $1,500, or so much thereof as may be necessary."

And the Senate agree to the same.

Amendment numbered 102: That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the unexpended balance of $9,533.38 is hereby reappropriated and made available for continuing the relief and settlement of the Apache Indians formerly confined as prisoners of war on the Fort Sill Military Reservation, Okla., for the purchase of allotments in Oklahoma, as provided for in the act of June 30, 1913 (38 Stat. L., p. 77), for the three adult heads of families who have not heretofore received allotments."

And the Senate agree to the same.

Amendment numbered 105: That the House recede from its disagreement to the amendment of the Senate numbered 105, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "except that the Secretary of the Interior is hereby authorized, within 30 days after the passage of this act, to investigate claims not to exceed $1,950 growing out of contracts alleged to be in existence between John Calvin Gray, William T. Lancaster, Arthur Jennings, and Cylde Jennings as enrolled members of the Choctaw or Chickasaw Nations, and Henry W. Blair, Kappler & Merillat, James K. Jones, Charles M. Fechheimer and Eugene Hamilton, as attorneys, and in case such claims are found to be valid and the contracts approved in accordance with existing law, the said Secretary of the Interior may, in his discretion, apply any amounts that may be found due under this paragraph to the aforesaid enrolled members of the Choctaw or Chickasaw Nations to the payment of such fee, but the amounts due hereunder to other enrolled members of the Choctaw and Chickasaw Nations shall not be held in abeyance to this claim but shall be paid promptly without reference to same";. and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$15,000"; and the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "$12,000; for remodeling sewer system, $5,000; for three high-pressure steam boilers, $7,200: *Provided*, That the unused balance of $9,830 of the amount appropriated by the act of August 1, 1914 (38 Stat. L., p. 602), and an additional amount of $2,500 may be expended for an addition to the assembly hall; in all, $128,700"; and the Senate agree to the same.

Adendment numbered 116: That the House recede from its disagreement to the amendment of the Senate numbered 116, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $3,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Klamath Indians of the State of Oregon, and use the same for the construction of a bridge across the Williamson River, on the Klamath Indian Reservation, Oregon, under such rules and regulations as he may prescribe."

And the Senate agree to the same.

Amendment numbered 124: That the House recede from its disagreement to the amendment of the Senate numbered 124, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "$67,500: *Provided*, That the unexpended balance of $1,607.44 appropriated by the act approved August 1, 1914, for repairing buildings and replacing equipment destroyed or damaged by the tornado of June 10, 1914, at Flandreau Indian School, South Dakota, is hereby reappropriated and made immediately available for the purchase and installation of a water tank and the purchase of dairy cattle for said school"; and the Senate agree to the same.

Amendment numbered 127: That the House recede from its disagreement to the amendment of the Senate numbered 127, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized and directed to cause investigation to be made as to the probable cost of providing on the various Sioux Indian reservations adequate school facilities for the children of the Sioux Tribes who are now without Government or public-school facilities on the respective reservations, and to make a report thereof to Congress on or before the first Monday in January, 1917, together with a complete and detailed statement of the per capita cost per annum, including mileage paid, now expended for the education of the Sioux Indian children in all the schools, whether on or off the respective reservations; and there is hereby appropriated for the expense of such investigation and

report the sum of $1,000, or so much thereof as may be necessary, to be immediately available."

And the Senate agree to the same.

Amendment numbered 129: That the House recede from its disagreement to the amendment of the Senate numbered 129, and agree to the same with an amendment as follows: In line 7 of said amendment, after the word "highway," insert a comma and the following: "reimbursable out of any funds now or hereafter placed to the credit of said Indians in the Treasury of the United States"; and the Senate agree to the same.

Amendment numbered 132: That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $1,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Uintah Tribe of Indians, in the State of Utah, and to use the same to protect the north abutment of the Government bridge at Myton, Utah, under such rules and regulations as he may prescribe, said sum to be immediately available."

And the Senate agree to the same.

Amendment numbered 137: That the House recede from its disagreement to the amendment of the Senate numbered 137, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior be, and he hereby is, authorized to sell and dispose of not to exceed 20 acres of that portion of the lands situated on the north side of and within the limits of the abandoned Fort Spokane Military Reservation, State of Washington, not necessary for hospital purposes, as provided for in the act approved August 1, 1914 (38 Stat. L., p. 584), at not less than the appraised value thereof, and to place the proceeds thereof in the Treasury of the United States to the credit of the Spokane Indians in said State."

And the Senate agree to the same.

Amendment numbered 142: That the House recede from its disagreement to the amendment of the Senate numbered 142, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,000"; and the Senate agree to the same.

Amendment numbered 146: That the House recede from its disagreement to the amendment of the Senate numbered 146, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That without bias or prejudice to the rights or interests of any party to the litigation now pending, the Secretary of the Interior be, and he hereby is, authorized to sell the timber on the so-called 'school lands' and 'swamp lands' within the boundaries of the Bad River and Lac du Flambeau Indian Reservations in Wisconsin, and to which the State of Wisconsin has asserted a claim; to keep a separate account of the proceeds of such sale with each legal subdivision of such land and to deposit the said proceeds at interest in a national bank, bonded for the safe-keeping of individual Indian moneys, to be paid over, together with the interest thereon, to the party or parties who shall finally be adjudged to be entitled to such fund: *Provided*, That the consent of the State or parties claiming title therefrom be obtained before any such sale shall be made."

And the Senate agree to the same.

Amendment numbered 156: That the House recede from its disagreement to the amendment of the Senate numbered 156, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"SEC. 27. On the first Monday in December, 1917, and annually thereafter, the Secretary of the Treasury shall transmit to the Speaker of the House of Representatives estimates of the amounts of the receipts to and expenditures which the Secretary of the Interior recommends to be made for the benefit of the Indians from all tribal funds of Indians for the ensuing fiscal years; and such statement shall show (first) the total amounts estimated to be received from any and all sources whatsoever, which will be placed to the credit of each tribe of Indians, in trust or otherwise, at the close of the ensuing fiscal year, (second) an analysis showing the amounts which the Federal Government is directed and required by treaty stipulations and agreements to expend from each of said funds or from the Federal Treasury, giving references to the existing treaty or agreement or statute, (third) the amounts which the Secretary of the Interior recommends to be spent from each of the tribal funds held in trust or otherwise, and the purpose for which said amounts are to be expended; and said statement shall show the amounts which he recommends to be disbursed (a) for per capita payments in money to the Indians, (b) for salaries or compensation of officers and employees, (c) for compensation of counsel and attorney fees, and (d) for support and civilization: *Provided*, That thereafter no money shall be expended from Indian tribal funds without specific appropriation by Congress except as follows: Equalization of allotments, education of Indian children in accordance with existing law, per capita and other payments, all of which are hereby continued in full force and effect: *Provided further*, That this shall not change existing law with reference to the Five Civilized Tribes."

And the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"SEC. 28. On or before the 31st day of December, 1916, the Bureau of Efficiency shall prepare and submit to the Secretary of the Interior a system of bookkeeping and accounting for the Bureau of Indian Affairs that will enable the said Secretary, on or before July 1, 1917, to meet the requirements of section 26 of the Indian appropriation act approved June 30, 1913 (38 Stats. L., p. 103)."

And the Senate agree to the same.

The statement is as follows:

STATEMENT.

The effect of the recession of the House conferees on the amendments on which they have unqualifiedly receded is as follows:

No. 1. Makes the reimbursable appropriation for repairs and maintenance of irrigation ditches available until expended.

No. 5. Increases limit of cost of hospitals from $15,000 to $17,500, which are now under construction.

No. 9. Strikes out the word "and" and inserts the word "or" to include blind children, so they can receive benefit of the fund to educate Indian children.

No. 13. Provides that hereafter Indian farmers must hold and file a certificate of competency from some college recognized before employment in the service.

No. 16. Increases the reimbursable appropriation for determining heirs of deceased Indian allottees $10,000.

No. 17. Permits the use of $25,000 of the reimbursable appropriation for determining heirs of deceased Indian allottees for employment of clerks in the Indian Office here.

No. 18. Corrects total in accordance with amendment 16.

No. 19. Strikes out the word "heir" and inserts "heirs."

No. 20. Places a limit of value of $250 or more upon an heirship in order to charge the fee for determining the heirs.

No. 21. Permits the partition of an allotment of a deceased Indian regardless of competency of heirs.

No. 22. Permits extension of trust period specified in patent to incompetent heirs if necessary.

No. 24. When an Indian allottee, by reason of old age or incapability, can not personally occupy their allotment that is susceptible of irrigation, the Secretary of the Interior may, in his discretion, lease said allotment for a term not to exceed 10 years for benefit of said Indian.

No. 25. Any Indian who is mentally or physically incapable of managing his or her affairs may apply to Secretary of Interior, who may, in his discretion, withdraw from the Treasury any part of said Indian's pro rata share of funds to their credit and use for their benefit.

No. 27. An appropriation of $2,000 to pay Charles J. Kappler for compiling, annotating, and indexing the third volume of Indian Laws and Treaties.

No. 28. Provides that all bidders for supplies for goods furnished the Indian Service may deposit a certified check or approved bond to guarantee the fulfillment of contract instead of the money in amounts exceeding $5,000.

No. 29. Increases the appropriation $3,500 for the purchase of additional land adjacent to the Phoenix (Ariz.) Indian School.

No. 33. Strikes out the words "to remain available until expended."

No. 39. Makes an appropriation of $3,000 for preservation and repair of prehistoric pueblo ruins and cliff dwellings in Arizona, under supervision of the Smithsonian Institution.

No. 46. Provides for an appropriation of $8,000 for erection of a barn at Haskell Institute, Lawrence, Kans.

No. 48. For traveling and incidental expenses amounting to $250 to Joseph Bradley, for appearing before Congress in behalf of Indians in Michigan.

No. 50. An appropriation of $3,000 to improve road and to blast out and deepen the ditch and creek leading to the Pipestone Indian School, in Minnesota.

No. 51. Provides that not to exceed $60,000 of the $185,000 withdrawn from the trust funds of the Chippewas in Minnesota, and one-fourth of the interest on said tribal funds, may be used for school purposes and compensation of employees, and that $10,000 may be used for road improvements, and that $10,000 may be used for the installation of an electric-light plant at White Earth Agency, provided the residents pay a proportionate share.

No. 52. Provides for sale and conveyance, at not less than appraised value, of certain lands to independent school district 1 of Mahnomen County, Minn.

No. 53. Provides for the issuance of a fee patent to 40 acres of land on the Nett Lake Indian Reservation in Minnesota to the Methodist Episcopal Church.

No. 54. Appropriates not to exceed $25,000 from amounts derived from sale of timber of the Chippewa Indians in Minnesota, for payment of scalers and check scalers.

No. 56. Appropriates $6,000 out of tribal funds of the Chippewa Indians to pay expenses of general council of said tribe to meet in July, 1916.

No. 58. Amends the act of June 30, 1913 (38 Stat. L., p. 89), by appointing an Assistant Attorney General instead of a selection to be made by the Attorney General.

No. 60. Provides for the completion of the enrollment of allottees within the White Earth Reservation in Minnesota and appropriates $5,000 for that purpose.

No. 61. Provides for the establishment and administration of a forest reserve and for sale of timber within the Red Lake Indian Reservation in Minnesota.

No. 62. That lands within said Red Lake Indian Forest Reserve not covered with merchantable timber and suited for agricultural purposes and that front lake shores may be allotted to individual Red Lake Indians under certain conditions.

No. 63. Authorizes the Secretary of the Interior to issue permits or grant leases on such lands in said forest reserve covered in amendment 61, for a limited time.

No. 64. Authorizes the Secretary of the Interior to select not exceeding 200 acres in sections 20, 21, 28, and 29 for town-site purposes and to be held subject to future legislation of Congress.

No. 66. Authorizes investigation of condition of Indians living in Mississippi and appropriates $1,000 for that purpose.

No. 67. Corrects section number.

No. 68. Increases appropriation for civilization of Indians at Flathead Agency, Mont., from $14,000 to $20,000 and limits amount to expend in salaries to not exceeding $4,500.

No. 70. Appropriates $750,000 (reimbursable) for continuing construction of the irrigation system on the Flathead Indian Reservation, Mont.

No. 71. Appropriates $100,000 (reimbursable) for continuing construction of the irrigation systems on the Fort Peck Indian Reservation, Mont.

No. 76. Corrects section number.

No. 80. Is a reimbursable appropriation of $30,000 to pay drainage assessments and grant right of way for location of drainage ditches on lands belonging to Omaha and Winnebago Indians in Dixon, Wayne, and Thurston Counties, Nebr.

No. 81. Corrects section number.

No. 85. Corrects section number.

No. 86. Adds the words "in the vicinity of," so that additional land either adjoining or in the vicinity of may be purchased as a school farm for the Indian school at Albuquerque, N. Mex.

No. 89. Corrects section number.

No. 90. Corrects section number.

No. 93. Corrects section number.

No. 94. Makes the appropriation of $4,000 for sinking wells and improving the water system at the Fort Totten Indian School, N. Dak., immediately available.

No. 96. Authorizes the Secretary of the Interior from time to time within his discretion to withdraw from the Treasury money derived from sale of surplus lands and any interest thereon accrued belonging to the Fort Berthold Indians in North Dakota, and distribute same per capita, or where any Indian is incompetent said share may be withheld and deposited in some bank and used for benefit of said incompetent Indian.

No. 98. Is an appropriation of $1,497.44 to reimburse Benson County, N. Dak., for caring for certain insane Indians.

No. 99. An appropriation of $100 for the erection of a headstone to mark the grave of Scarlet Crow, a Sioux Indian chief.

No. 101. Corrects section number.

No. 103. Corrects section number.

No. 104. An increase of $10,000 for expenses and administration of affairs of the Five Civilized Tribes, and makes it immediately available.

No. 106. Authorizes the Secretary of the Interior to make a per capita payment of $300 to each Seminole Indian in Oklahoma, same to be paid out of their tribal or trust funds.

No. 107. An appropriation of $275,000 for the benefit and aid of the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations, and the Quapaw Agency in Oklahoma.

No. 109. Authorizes the Secretary of the Interior to use tribal funds of the Choctaws, Chickasaws, Creeks, and Seminoles, Oklahoma, for school purposes.

No. 111. Authorizes a settlement of a compromise of a suit between the United States and E. Dowden in regard to the Tuttle town site, Oklahoma.

No. 112. Corrects section number.

No. 114. Provides that the money derived from sale of lands belonging to Indians on the Siletz Indian Reservation, in Oregon, may be paid out to said Indians, share and share alike.

No. 115. Permits the withdrawal of not exceeding $1,000 from tribal funds of the Klamath Indians in Oregon to pay the expenses of two delegates elected by their council to come to Washington.

No. 121. Corrects section number.

No. 122. Corrects section number.

No. 125. Strikes out the word "boiler" and inserts the word "boilers," to be installed at the Indian School, Pierre, S. Dak.

No. 126. Increases the appropriation $5,000 for the construction of a barn at the Indian School, Pierre, S. Dak., and corrects total.

No. 128. Corrects section number.

No. 130. An appropriation of $1,684 to reimburse the board of education of Box Elder County, State of Utah, for education of 23 Indian pupils during the years 1913 and 1914 and for the education of 21 pupils during the years 1914 and 1915.

No. 131. An appropriation of $832 for the education of 22 Indian pupils at Washakie, Box Elder County, Utah, for the years 1915 and 1916.

No. 134. Corrects section number.

No. 136. A reimbursable appropriation of $100,000 to pay the third installment for water supply of 40 acres of each Indian allotment on the Yakima Indian Reservation, in the State of Washington.

No. 138. Authorizes the Secretary of the Interior to lease for mining purposes the unallotted mineral lands on the diminished Spokane Reservation, in Washington.

No. 139. An appropriation, reimbursable, of $95,000 and authorizes the Secretary of the Interior to negotiate and pay for water rights for lands heretofore allotted to Indians situated within the boundaries of the West Okanogan Valley irrigation district, Okanogan County, Wash.

No. 140. Corrects section number.

No. 141. This amendment is intended to provide an appropriation to pay certain members of the Stockbridge and Munsee Tribe of Indians enrolled under the act of March 3, 1893 (37 Stat. L., 744), the amount of payments made prior to their respective enrollments. Section 6 of the act of February 6, 1871, provided for the determination of the persons who were members of the Stockbridge and Munsee Tribe and their future relations to the Government. Two rolls were prepared, one containing Indians who it was thought desired to separate their relations from the tribe and become citizens, and the other those who desired to retain their tribal character and remain under the guardianship of the Government. It subsequently appeared that some of those Indians who were placed on the first roll did not desire to sever their relations with the tribe, and they were again enrolled under the provisions of the act of March 3, 1893 (37 Stat. L., 744–745).

No. 143. In order to train Indians in the use and handling of money, not exceeding $25,000 of the appropriation allowed may be paid them per capita or deposited in some bank for their use and beenfit under such rules as the department may prescribe.

No. 144. That no lands of the Menominee Indians in Wisconsin shall be cleared for agricultural purposes excepting such lands as have been heretofore completely cut over.

No. 145. Amends the act of March 28, 1908, by permitting the Secretary of the Interior to sell lumber, laths, shingles, crating, ties, piles, poles, posts, bolts, logs, bark, pulp, and other materials, under such rules as he may prescribe, and deposit the money in the Treasury for the benefit of the Menominee Indians in Wisconsin.

No. 148. Provides for the granting of flowage rights over unallotted Indian lands under rules and regulations prescribed by the Secretary of the Interior and consent of Indians and

the leasing of the allotted lands with consent of allottee for flowage and storage reservoir purposes, and allottee to determine, subject to approval of Secretary of the Interior, as to consideration therefor.

No. 150. A reimbursable appropriation of $6,500 for the completion of a road on the Red Cliff Reservation, in Wisconsin.

No. 151. Corrects section number.

No. 152. Reduces the appropriation 66 cents for repairs at the abandoned military post of Fort Washakie, Wyo.

No. 153. To enable the Secretary of the Interior to prepare and submit to Congress plans and estimates of cost for completing the irrigation of all irrigable lands in the Shoshone or Wind River Reservation, in Wyoming, to also include in the estimates for the ceded lands within said reservation.

No. 154. Provides an appropriation of $5,000 to carry the provisions of amendment No. 153 into effect.

No. 155. For payment of salary and expenses of Joseph H. Norris as supervisor of Indian schools from October 21 to November 11, 1912, $257.

On the following amendments the House conferees receded with modifying or substitute amendments, to wit:

No. 2. Makes the provisions of sections 2140 and 2141, Revised Statutes, apply to beer as an intoxicating liquor, and the possession of intoxicating liquor prima facie evidence of unlawful introduction in any country where prohibited by treaty or Federal statute.

No. 7. Makes $5,000 of the appropriation for maintenance of the sanatoria for the Choctaw and Chickasaw Indians immediately available.

No. 10. Provides that $200,000 of the appropriation for day and industrial schools may be expended for tuition of Indian pupils in public schools.

No. 14. Provides for two permanent warehouses for use of Indian Service.

No. 26. Is an appropriation of $100,000 to reimburse Indians for live stock that may be hereafter destroyed on account of dourine.

No. 34. For beginning the construction of a dam with bridge superstructure for diverting the water of the Gila River in Arizona for irrigating Indian lands on the Gila River Indian Reservation. Reduces appropriation from $200,000 to $75,000 and limits the cost of said work to $200,000.

No. 35. For beginning the construction of a diversion dam and necessary canals in Pinal County, Ariz., at or near Florence, for irrigation of Indian lands. Reduces amount appropriated from $175,000 to $75,000 and limits cost of work to $175,000.

No. 36. For extension of the Ganado irrigation project in Arizona and makes it reimbursable.

No. 37. An appropriation of $10,000 for the purpose of making investigation, survey, and cost of practicable means of holding the Gila River in its channel in Graham County, Ariz.

No. 41. Increases the number of pupils, also appropriation for care of said increase allowed, and permits the purchase of additional land for school farm at the Indian school in Greenville, Cal.

No. 42. Makes the appropriation for improvement and construction of roads on the Yuma Indian Reservation in California reimbursable.

No. 47. Authorizes the Secretary of the Interior to withdraw from the tribal funds on deposit in the Treasury to the credit of the Potawatomi Indians, the sum of $10,000 for the construction of a bridge across the Big and Little Soldier Creeks on their said reservation.

No. 55. Strikes from the bill the entire paragraph.

No. 57. Strikes from the bill the words "Keewaton Academy, Wisconsin."

No. 59. Makes the unexpended balance of $3,436.03 available for payment of expenses incurred in preparing a roll of the Indians within the White Earth Reservation, Minn.

No. 65. Provides for sale of timber on lands of the Red Lake Indian Reservation outside of the forest reserve created by amendment No. 61.

No. 72. Decreases the reimbursable appropriation for continuing construction of the irrigation systems on the Blackfeet Indian Reservation, Mont., from $50,000 to $25,000.

No. 74. The work to be done on the irrigation projects on the Blackfeet, Flathead, and Fort Peck Indian Reservations, Mont., may be done by the Reclamation Service with plans approved by Indian Bureau, and authority is also given that a limited amount of said appropriations may be used for purchase of motor vehicles, horses, and horse-drawn vehicles.

No. 75. That the Secretary of the Interior shall assess the charge for cost of irrigation projects as mentioned in amendment No. 74 against the persons who own the land and are receiving benefit of said system.

No. 78. An appropriation of $6,500 for repairs on the Government bridge across the Niobrara River in Nebraska.

No. 79. Corrects total.

No. 82. Increases the number of pupils at the Indian school, Carson City, Nev., and provides for their care.

No. 83. An appropriation of $15,000 to purchase homes, farm sites, water rights, and aid to nonreservation Indians in Nevada; also provides that no part of said appropriation shall be used for payment of salaries, mileage, or expenses of employees.

No. 84. Strikes out the words "to remain available until expended" in the appropriation for support and civilization and purchase of land and water rights for the Washoe Indians in Nevada.

No. 87. Increases the amount for repairs and improvements, and for the construction of an assembly hall at the Indian school, Santa Fe, N. Mex.

No. 95. Increases the number of pupils and provides for their care at the Wahpeton Indian School, Wahpeton, N. Dak., decreases appropriation for repairs and improvements from $8,000 to $5,000, and provides for the construction of a new building to cost $20,000.

No. 97. Makes an appropriation of $1,500 to redeem a mortgage on the allotment selection of Starr McGillis, a Turtle Mountain Chippewa Indian.

No. 102. Making the unexpended balance of $9,533.38 available for the purpose of continuing the relief of the Apache Indians, and for the purchase of lands in Oklahoma.

No. 105. Authorizes the Secretary of the Interior to adjudicate, and, if he deem it proper, to apply the per capita payment or any part of the same herein authorized to be made, to John Calvin Gray, Williams T. Lancaster, Arthur Jennings, and Clyde Jennings, enrolled members of the Choctaw and Chickasaw Nations, in the settlement of attorneys' fees for services rendered said Indians in being restored to the rolls.

No. 110. An appropriation of $15,000 for the salaries and the expenses of six oil-and-gas inspectors to supervise the oil, gas, and mining operations in the Five Civilized Tribes.

No. 113. Appropriates $7,200 for the purchase and the installation of boilers at the Indian school at Salem, Oreg., and makes available an unexpended balance of $9,830, and an additional amount of $2,500 for an addition to the assembly hall.

No. 116. Permits the Secretary of the Interior to withdraw from the Treasury $3,000 out of the tribal funds belonging to the Klamath Indians in Oregon, to construct a bridge across the Williamson River.

No. 124. Corrects the total and also makes available an unexpended balance of $1,670 out of a $10,000 appropriation, approved August 1, 1914, for the installation of a water tank, and the purchase of dairy cattle.

No. 127. Is an appropriation of $1,000, and authorizes the Secretary of the Interior to make an investigation as to the school facilities among the different Sioux Tribes of Indians, and to report to Congress on or before January 1, 1917.

No. 129. Makes the appropriation of $9,000 to pay a proportionate share for the construction of a highway or wagon road through the Kaibab Indian Reservation, Utah, reimbursable.

No. 132. Authorizes the Secretary of the Interior to withdraw $1,000 from the tribal funds now in the Treasury to credit Indians in Utah, and use the same to protect abutment of the bridge at Myton, Utah.

No. 137. Authorizes Secretary of the Interior to sell not to exceed 20 acres of land on the north side and within the limits of the abandoned Fort Spokane Military Reservation, Wash., that will not be needed for hospital purposes, and place the proceeds in the Treasury to the credit of the Spokane Indians.

No. 142. An appropriation of $5,000 to purchase dairy cattle for the Indian school at Oneida, Wis.

No. 146. Provides that the Secretary of the Interior may sell the timber on the so-called "school lands" and "swamp lands" within the Bad River and Lac du Flambeau Indian Reservations in Wisconsin, and to which there is a disputed claim, and to hold the money derived therefrom until it is ascertained to whom it belongs.

No. 156. Requires the Secretary of the Interior to submit annually to Congress a certain detailed statement as to appropriations and disbursements of tribal funds belonging to Indians.

No. 157. Provides that the Bureau of Efficiency shall submit a system of bookkeeping and accounting for the Indian Bureau in order that the Secretary of the Interior may meet the requirements of existing law.

The following table shows the amounts carried in the bill as it passed the House, the Senate, and as agreed to by your conferees, and is exclusive of amounts appropriated out of trust funds belonging to the Indians.

C. D. CARTER,
THOS. F. KONOP,
CARL HAYDEN,
P. P. CAMPBELL,
P. D. NORTON,
*Managers on the part of the House.*

Mr. CARTER of Oklahoma. Mr. Speaker, in view of the fact that we are very anxious to pass the rural-credits bill at the earliest possible moment, I shall only make this short statement in justification of the conference report:

The consideration of this Indian appropriation bill was taken up by the House Committee on Indian Affairs prior to the Christmas holidays. The estimates as presented by the departments contained several claims and a great many legislative provisions, most all of which were eliminated by your House Committee on Indian Affairs and reported to the House on January 28. The House passed the bill with a few amendments on February 8, and it was taken up by the Senate Committee on Indian Affairs and reported to the Senate on March 9. The Senate passed the bill, with 157 amendments, on March 28, and returned it to the House with a request for a conference. The House did not agree to the conference immediately, but sent the bill to the House Committee on Indian Affairs, where each Senate amendment was taken up, department representatives and others called before the committee, and all the information possible obtained. The House committee then again reported the bill back to the House with recommendation that all Senate amendments be disagreed to and the conference requested by the Senate agreed to. The recommendation of the committee was concurred in by the House, and the bill was sent to conference on April 11.

Your managers on the part of the House then found themselves confronted with what I believe to be the most difficult situation that any House conferees on the Indian bill had faced during my service in the House. Amongst the 157 Senate amendments which had been added to the bill we found every character

of claim and legislation imaginable, running from small items, not in order upon the bill, to sweeping legislative provisions sending vast and complicated matters to the Court of Claims and other matters over which the Committee on Indian Affairs had no semblance of jurisdiction.

Moreover, it will be remembered that the conference report on the Indian bill last year failed of passage on account of a filibuster conducted in the United States Senate until a few minutes before Congress was forced to adjourn on March 4. To my mind no more deplorable or extravagant thing can be done than to pass a joint resolution in the place of a bill carefully worked out to meet existing conditions. For these reasons the affairs in the Indian Service are changing day by day, week by week, and year by year, so that the appropriations necessary for one year do not begin to fit the occasion in the succeeding year. On account of certain temporary conditions we are often called upon to appropriate very large amounts for certain branches of the service, while items for other branches of the service can be correspondingly reduced. When a joint resolution is passed the amounts necessary in excess of the usual amounts can not be taken care of, while the amounts which can and should be reduced are really not reduced at all, but the excessive appropriations of the year before are placed in the hands of our administrative officials for disbursement. The result is that the excessive amounts are usually all expended and the insufficient amounts have to be cared for in the following year by the succeeding Indian appropriation bill.

Take for instance the so-called industrial item. On account of conditions existing at that time, the bill passed in 1914 carried $600,000 for "encouraging industry and self-support among Indians," while the department, if I remember correctly, only requested some $400,000 for that appropriation last year, and, if I mistake not, only $300,000 was carried in the bill that failed. Consequently the joint resolution carried just twice the amount, or $300,000, in excess of the amount which Congress had decided, after careful investigation, was sufficient for the ensuing fiscal year. So it is throughout the bill.

While your conferees on the part of the House felt impelled to agree to some of the claims that had been placed in the bill by the Senate, we did not agree to any at all until we were convinced of the justice of same and the necessity of an agreement in order to secure the passage of the bill.

I further call your attention to the fact that all the large, complex items sending matters to the Court of Claims were rejected.

The Senate amendments provided for construction of many roads and bridges on Indian reservations, all to be paid out of the funds in the Federal Treasury. The House had provided for the construction of some roads and bridges out of tribal funds and in these instances the language was changed by the Senate so that the tribal funds might be relieved of this expense and the payment made direct from the Treasury. The House Committee on Indian Affairs has always taken the position in the past that no funds should be appropriated from the Federal Treasury for roads and bridges on Indian reservations and that Indian funds should only be appropriated when the expenditure of the funds and construction of roads and bridges were manifestly for the benefit of the Indian. In each of these road and bridge items our managers succeeded in having payment come from the tribal funds in case any tribal funds were available and, when not available, the conferees insisted that the appropriations should be made reimbursable in case the tribe had any reimbursable assets and, in case the tribe had no reimbursable assets, your conferees insisted upon the elimination of the items.

Different Senate amendments provided $310,000 for the establishment of new schools in addition to the $1,550,000 carried for this purpose in the general item and over and above all other specific appropriations. The House conferees insisted upon the elimination of the establishment of these extra schools on the meager information obtainable and provided for an investigation in one case to ascertain if the construction of these schools is really necessary.

On account of the conditions I have stated, your conferees were not able to make as clean a job of this bill as we desired but we have done the very best we could under existing circumstances, and I want to thank my fellow conferees for the diligent manner in which they stuck to the task, for their prompt and punctual attendance upon the conference meetings, and their loyalty to the contentions of the House.

Unless some gentleman desires some information about the pending measure, I shall move the previous question on the report.

Mr. MONDELL. Mr. Speaker, I would like a little time to discuss some items in the conference report.

Mr. CARTER of Oklahoma. How much time does the gentleman want?

Mr. MONDELL. About 15 minutes.

Mr. CARTER of Oklahoma. Can not the gentleman cut it down to five?

Mr. MONDELL. No; I want to discuss three items.

Mr. CARTER of Oklahoma. Can not the gentleman make it 10 minutes?

Mr. MONDELL. The gentleman from Pennsylvania [Mr. MOORE] wants 5 minutes, and I do not see how I can get through in less than 15.

Mr. CARTER of Oklahoma. Very well, Mr. Speaker, I ask that the previous question be considered as ordered at the end of 20 minutes.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that at the end of 20 minutes the previous question be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Wyoming [Mr. MONDELL] is recognized for 15 minutes.

Mr. MONDELL. Mr. Speaker, there are quite a number of items in the conference report, in the Senate amendments, that are, in my opinion, very questionable. There are a number of them that can not well be defended, but in the time allotted to me I can not discuss the items at length. I shall therefore confine my remarks to three items in the bill.

The first one is Senate amendment No. 35. The House recedes from its disagreement to amendment No. 35 and agrees to the same with an amendment. The amendment is lengthy, and the Members have heard it read. I do not think that the matter as it stands, the provision in the bill, is particularly objectionable. I think it rather important, however, that it be clearly stated just what the conference report contemplates, just what is intended to be done.

It is very clear that the original Senate amendment contemplates, at least would have authorized, the undertaking of what has been known at one time and another as the Gila or the San Carlos reclamation project, a project estimated to cost anywhere from six and a half million to seven million dollars, and a project with very many questionable features. Now, it may or may not have been the intent of those who drafted the Senate amendment to authorize the construction of that great and very questionable irrigation enterprise. The language of the Senate amendment would, however, have authorized it and every feature of it. The language of the House amendment, however, I am sure does not, on a fair interpretation, authorize the undertaking of the San Carlos project, and particularly does not authorize the building of the San Carlos Dam, and I understand the gentleman from Arizona [Mr. HAYDEN] so takes it. The gentleman nods his head in affirmation of my statement.

Mr. HAYDEN. Mr. Speaker, as to whether this amendment authorizes the construction of the San Carlos project the gentleman can save his own time and that of the House. It does not do it. Amendment No. 35 contemplates nothing more than the construction of a diversion dam.

Mr. MONDELL. I do not desire to take the time of the House, and yet I am not wasting the time of the House if I may make it quite clear that the conferees have agreed to a provision that does not contemplate and does not authorize the building of the San Carlos project.

Mr. HAYDEN. Such is the fact.

Mr. MONDELL. And I will say to my friend I am never worried when we undertake an irrigation project in the West. On the contrary, I am always highly pleased when some good irrigation project is undertaken in the West, but I think, in the first place, the House ought to know what it is doing when it undertakes a great project of any kind, and in the second place as a Member from the West I do not want to see a project undertaken which is not feasible, and which could not possibly be carried out in a way to be helpful and beneficial to anything like the amount of the expenditure involved.

Mr. HAYDEN. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. HAYDEN. I will state to the gentleman that there has been no irrigation project of any character ever submitted to this House that has had a more full investigation than that item in this bill. During the past 20 years there has been spent nearly $100,000 upon various investigations on the Gila River. The construction of this diversion dam has been recommended as the result of all that time and study and is fully justified by the facts regardless of whether the San Carlos project is ever undertaken or not.

Mr. MONDELL. What the gentleman says is true in a sense. The San Carlos project has never been approved as a complete

project fully and unqualifiedly by anyone at any time. It can not be by an honest man who knows his business.

Mr. HAYDEN. And is not approved in this bill.

Mr. MONDELL. The item as it stands is not altogether meritorious, and I doubt if it is the sort of an item that ought to be on an Indian bill, because I think the benefits the Indians will receive from this expenditure will be very small, indeed. By building a dam and thereby putting in good headworks at the head of a privately owned ditch and then extending the canals down to the Indian reservation later we may benefit the Indians somewhat, and bring this item within the proper scope of an Indian bill, but the expenditure that shall be made under this appropriation will not, in my opinion, benefit any Indian a particle or irrigate any of his land. While the appropriation contained in the bill is not large, it will require further expenditure to carry out even the moderate program begun by this item. It is the difference between five or six or seven million dollars for a questionable project, as provided by the Senate amendment, and the possible expenditure in all of $250,000 or $300,000 on a flood-water project which, perhaps, has more virtue.

Mr. HAYDEN. I can say to the gentleman that I do not believe that this project will ever run to such figures as that.

Mr. MONDELL. Never run to $300,000? Well, I shall be surprised if it does not in future bills and appropriations aggregate that amount; but, at any rate, it does not authorize the San Carlos project; that is very clear. It authorizes the building of a dam and eventually the extending of some ditches.

Now, I want to discuss for just a moment amendment No. 37 of the Senate. Just how this sort of an amendment got into an Indian bill it is difficult for me to understand. I take it for granted that the fact that the gentleman from Arizona in the House and the gentleman from Arizona in the Senate are on the Indian committees and in the conference had nothing whatever to do with having an item in the Indian bill that does not relate in any way, shape, or form to any Indian project, and the carrying out of which will not benefit any Indian, an item that if it has a place anywhere it is on the bill reported by the Flood Control Committee.

I know my friend from Arizona will say there are a few Apaches down on the San Carlos Reservation who have a few tracts of bottom land, and that this money for revetment and control of the Gila River would be of some benefit to them, but my opinion is that but little of this money will be spent on the reservation. There is nothing in the language of the appropriation which requires that it shall be spent on the reservation. As a matter of fact, the difficulties are in Graham County, below Solomonville, where the river has been cutting into the bank. They have a condition there no different from that found on streams throughout the country everywhere—north, south, east, and west—the river cutting into the bank and washing out farms. It is quite an unfortunate situation, no doubt, but just why we should provide for remedying it by a Federal appropriation and in an item on the Indian bill I am at a loss to understand. If we are to start on the work of flood protection, we should do it after full consideration and on a report from the proper committee. We have organized a committee with that object in view, to cure conditions of that sort, and the Indian bill is not the place to begin that sort of work. It has no relation to Indian work of any sort or kind.

Now, my friend from Arizona [Mr. HAYDEN] rose a moment ago. I do not know whether he wanted to propound a question or make a statement.

Mr. HAYDEN. In my opinion, the money appropriated by this amendment will probably be expended within the limits of the San Carlos Reservation, which contains about 3,000 acres of irrigable land.

Mr. MONDELL. The report only says 1,200 acres, and my experience with Indian reports with regard to the irrigation of land by Indians is that they never overlook any patch, and they never get the area too small. They call it 1,200. From other sources of information I gathered the notion it was about 600; but the fact is there has been very little difficulty down in the lower river, I am told.

Mr. HAYDEN. The gentleman is entirely mistaken. The heads of all the irrigation ditches were washed out by the recent floods, and the experiments conducted there will be very valuable, whether the money is expended within the limits of the San Carlos Reservation or not. The purpose of this appropriation is to ascertain an inexpensive way of controlling the Gila River when it is in flood. The conditions on this stream are rapidly growing from bad to worse, and it is absolutely necessary that something be done at once.

Mr. MONDELL. If the intent of the gentleman from Arizona was to have this work carried on in an Indian reservation in order that it may be properly on an Indian bill, why did not the gentleman so provide? Whoever drafted this provision provided that it could be used anywhere in the broad expanse of Graham County. This river runs through Graham County for many miles.

Mr. HAYDEN. About half of that distance being within the San Carlos Indian Reservation in the same county.

Mr. GREEN of Iowa. I understood the gentleman from Wyoming to say that he did not exactly understand why the provision was put in this bill. Would it not furnish more jobs in this way than it would under the Flood Commission?

Mr. MONDELL. I do not know as to that. It may furnish Indian jobs instead of jobs under some other department, but I am not worried about that. But I do think if we are going to undertake this work of flood control, not on Indian reservations, but anywhere in Graham County—and that county is bigger than the State of Massachusetts—the item should not be on the Indian bill.

Mr. STEPHENS of Texas. The gentleman overlooked that part of the language of the amendment in this, that he states this entire amount may be used on lands other than Indian lands. This provides that this appropriation shall be used only for the purpose of irrigating Indian lands.

Mr. MONDELL. Where is the gentleman reading?

Mr. STEPHENS of Texas. I am reading from amendment No. 35.

Mr. MONDELL. But I am discussing amendment No. 37. The gentleman is not keeping up with the procession.

Mr. STEPHENS of Texas. I know that, but this proposition——

Mr. MONDELL. I have made no criticism of amendment No. 35 at all. I have passed that over as one of those questionable things which you can not help, and the less said about it the better.

Mr. STEPHENS of Texas. Do they not have to be considered together? Does not the gentleman so concede? And under amendment No. 35 the matters you complain of will be regulated.

Mr. MONDELL. Not at all. They are entirely separate and distinct items. They have no relation to each other and do not have to do with the same situation.

The SPEAKER pro tempore (Mr. CANTRILL). The time of the gentleman has expired.

Mr. CARTER of Oklahoma. Mr. Speaker, I yield two minutes to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. The understanding was that 20 minutes was to be used, as I recall it, and I would like to know how much time has been consumed?

The SPEAKER pro tempore. Fifteen minutes has been used.

Mr. MOORE of Pennsylvania. Then I have five minutes.

Mr. CARTER of Oklahoma. I wanted to yield three minutes to the gentleman from Utah [Mr. MAYS].

Mr. STEENERSON. I want one minute.

Mr. MONDELL. I hope the gentleman can extend the time so that the gentleman from Pennsylvania [Mr. MOORE] can have five minutes.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent that the time be extended five minutes.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MADDEN] asks unanimous consent that the time be extended five minutes.

Mr. CARTER of Oklahoma. Five to be used by the gentleman from Pennsylvania [Mr. MOORE] and five to be controlled by me.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Speaker, I wish the chairman of the Committee on Indian Affairs would explain whether the improvement contemplated in amendment No. 37 is wholly within an Indian reservation. That is the amendment the gentleman from Wyoming [Mr. MONDELL] was discussing a minute ago.

Mr. HAYDEN. That amendment was in the Senate, providing for the expenditure of $15,000 within Graham County, Ariz., about half of which is within the San Carlos Indian Reservation.

Mr. MOORE of Pennsylvania. It has been cut by agreement to $10,000?

Mr. HAYDEN. For the reason that the conferees did not think that more than $10,000 was necessary for experimental work at this time.

Mr. MOORE of Pennsylvania. The amendment provides that the Secretary of the Interior shall set competent engineers to work to determine the most practicable method, and so forth, of "constructing levees, revetments, or other suitable work sufficient to prevent the Gila River from further eroding and

wearing and washing away its banks, and from further overflowing its banks at any point in Graham County, Ariz."

Now that, as it appears in the amendment, is clearly such work as should come within the jurisdiction of the new Committee on Flood Control, which has a bill now pending before the House.

Mr. HAYDEN. I think the gentleman is absolutely correct about that, so far as the House is concerned. But the gentleman will understand that this is an amendment adopted in the Senate, where they have no Committee on Flood Control.

Mr. MOORE of Pennsylvania. The Committee on Flood Control is to have jurisdiction of all flood matters. The language of this amendment shows that the project is clearly one falling within the jurisdiction of the Committee on Flood Control.

Mr. HAYDEN. I intend to bring this project to the attention of the Committee on Flood Control. There is no question but that the gentleman is correct in his statement that this is a matter wholly within the jurisdiction of that committee.

Mr. MOORE of Pennsylvania. This work is not wholly within the Indian reservation, is it?

Mr. HAYDEN. No; but whether it is or not, it is a matter having to do with the control of floods.

Mr. MOORE of Pennsylvania. I am interested in the work of flood control. The Committee on Flood Control has taken away from the Committee on Rivers and Harbors a great deal of the work heretofore assigned to that committee. Now, if the Committee on Indian Affairs is going to take away from the Committee on Flood Control jurisdiction of matters that were formerly lodged with the Committee on Rivers and Harbors or the Committee on Indian Affairs is going to take over matters which apparently belong to the new Committee on Flood Control, I would like to know where to go with respect to these matters.

Mr. HAYDEN. We have no such intention, I will say to the gentleman; and hereafter all matters of this kind will go to the Committee on Flood Control. When this amendment was offered and adopted at the other end of the Capitol there was no such committee as the Committee on Flood Control.

Mr. MOORE of Pennsylvania. The gentleman says he will bring this to the attention of the Committee on Flood Control?

Mr. HAYDEN. Yes.

Mr. MOORE of Pennsylvania. How will the gentleman do that?

Mr. HAYDEN. I shall introduce a bill and have it referred to the Committee on Flood Control, directing attention to the damage caused by floods in my State, and particularly along the Gila River.

Mr. MOORE of Pennsylvania. Would that mean that this particular improvement mentioned in this paragraph is not on an Indian reservation, or will it mean that it is general?

Mr. HAYDEN. The fact that the lands to be benefited are not all on an Indian reservation has nothing to do with the case. We should ascertain what damage is done by the floods and then adopt a plan to control them. We should also determine what part of the expense should be borne by the landowners and what part should be paid by the Government.

Mr. MOORE of Pennsylvania. The other day, when the flood-control bill was brought into the House, the Speaker overruled a point of order that I made against it, that the bill was properly assignable to the Committee on Rivers and Harbors. Now, how can any of us get an opportunity to raise the question?

Mr. HAYDEN. That difficulty frequently happens when Senate amendments come over to the House. Now that the Committee on Flood Control has been established, undoubtedly amendments of this character will be hereafter stricken from the Indian bill.

Mr. MOORE of Pennsylvania. I understand that the gentleman appreciates the point I am making and intends to introduce a resolution?

Mr. HAYDEN. Far be it from me to take anything away from the jurisdiction of the Committee on Flood Control. I voted in favor of creating that committee, and I have every confidence that it will give careful consideration to all matters properly coming before it.

Mr. MOORE of Pennsylvania. It seems to me that the Committee on Flood Control, which proposes to be a general committee, but which has brought in a bill pertaining only to one or two rivers, ought to be alive to a situation like this. If the Committee on Flood Control has a general jurisdiction over a matter of this kind, up to date it has exercised its jurisdiction only with respect to the Mississippi River and the Sacramento River. Now, why does not the Committee on Flood Control, which promises to help all sections of the country, step forward and raise the point now, when a new river to be improved for flood control is brought in by the Committee on Indian Affairs? Where is the Committee on Flood Control?

Mr. CARTER of Oklahoma. Mr. Speaker, I yield three minutes to the gentleman from Utah [Mr. MAYS].

The SPEAKER. The gentleman from Utah [Mr. MAYS] is recognized for three minutes.

Mr. MAYS. Mr. Speaker, I wanted to inquire of the committee in regard to Senate amendment 133, on page 90, with reference to the opening up of the mineral lands of the former Uncompahgre Indian Reservation to entry.

Mr. CARTER of Oklahoma. That was an amendment over which the Committee on Indian Affairs had no jurisdiction. It was proposed to open up to mineral entry certain lands there which are public lands, but not Indian lands, and for that reason the managers on the part of the House refused to consider the amendment.

Mr. MAYS. I think the conferees should be commended for that. It is a peculiar situation out there. The former Uncompahgre Indian Reservation has not been considered Indian land since 1880. That land comprises the entire gilsonite deposits, all that are of any value, in the United States, and the Barber Asphalt Co., a monopoly, apparently, of Philadelphia, Pa., I believe, or St. Louis, Mo.——

Mr. DYER. Mr. Speaker, will the gentleman yield there?

Mr. MAYS. Yes.

Mr. DYER. I hope the gentleman will not use St. Louis as the home of the Barber Asphalt Co.

Mr. MAYS. I beg the gentleman's pardon. There is a company called the American Co., of St. Louis.

Mr. DYER. It is not a trust.

Mr. MAYS. No; I am told it is not a trust. There are people attempting to select this land through their dummies, and at the present time I understand they have hundreds of dummy entrymen around and about these deposits, ready to select any deposits of any value, should this measure be passed. It is not a proper amendment for the Indian appropriation bill to carry, and I believe that the Senator from Utah was imposed upon by this trust, the Barber Asphalt people. If they should secure these deposits in Utah they would control the entire deposits of gilsonite that are of any value in the United States. It is a very useful product.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. MAYS. Yes.

Mr. MANN. Is that provision carried in this conference report?

Mr. MAYS. No; it was carried in the bill, but the gentleman from Oklahoma [Mr. CARTER] has just informed me that the House conferees would not agree to it, and it was stricken out.

Mr. MANN. I have asked the question because if it were in this conference report I would do what I could to defeat the bill.

Mr. MAYS. Certainly it has no business in this bill.

Mr. FERRIS. Mr. Speaker, will the gentleman yield?

Mr. MAYS. Yes.

Mr. FERRIS. Is it not a fact that some of these claims are worth $20,000 for a 20-acre tract? Are they not?

Mr. MAYS. Yes. Members of the company came before the committee and said that this company would give $25,000 each for such gilsonite tracts—20-acre tracts, 1,500 feet long and 600 feet wide. There was a $32,000,000 trust there ready to get these claims. The Senator from Utah, who was instrumental in putting this amendment in the bill, was imposed upon, as I believe. I do not think he could afford to stand for a moment for the dummy entrymen acquiring all these lands in the interest of existing monopoly.

Mr. DYER. Mr. Speaker, will the gentleman yield?

Mr. MAYS. Yes.

Mr. DYER. Does not the gentleman think that something ought to be done whereby gilsonite should be made available for proper use?

Mr. MAYS. Yes. And I will say in that connection that a bill has just been reported that will carry out the idea that the gentleman has in mind. The Public Lands Committee, to which such matters should be referred, have conducted hearings upon this matter and have reported a bill which will serve to open up these lands to entry under regulations designed to prevent their being acquired by the trust and yet provide a source of revenue for taxation purposes. That bill, in brief, provides that a permit granting the right to prospect and mine the land may be issued for 10-year periods free of royalty, with a provision that bona fide citizens of the counties in which deposits occur are to be preferred, and that no assignments can be made without the consent of the Government. This will defeat the designs of the trust. It will cause the horde of dummy squatters to disperse to their legitimate avocations if they have any.

Having been assigned the task of reporting this bill, the attorneys and other representatives of the asphalt companies sought interviews and admitted that their "representative entrymen" were on the job ready to make selections. One attorney recommended that the land be sold under a sealed-bid system and stated that his company would pay high figures for the claims. But, Mr. Speaker, the Barber Asphalt Co., owning the only railroad into that field, and already owning practically all the gilsonite lands so far opened to entry, would very probably seek to perpetuate its obnoxious monopoly by purchasing the deposits. This would be especially easy to accomplish, because of the very limited supply of this useful resource. No other available supply of much value seems to have been yet discovered.

In the act of March 3, 1903, every odd-numbered section of this field was thrown open to entry, and this with the result that about everything of value was grabbed by the monopoly. The Senate amendment now seeks to open to entry all the remaining deposits, to be sold under the mineral laws in unlimited numbers of claims at $5 per acre.

Under the bill reported by the Public Lands Committee, the proper committee to deal with public-land matters, the Government will regulate the operation of these deposits and will permit the widest possible range of distribution.

The nature of the deposits permits the poor man to operate it at a profit with little initial investment. The deposits occur in veins from 3 to 20 feet in width and of indefinite depth, and often outcropping at the surface.

The product is easily mined and is sold, without treatment, to the market at from $25 to $30 per ton.

An attorney of the American Asphalt Association, which claims not to be a trust, but which admits that its "representative entrymen" are awaiting the passage of this Indian appropriation bill, states that his company would be glad to buy the product of these small miners who may operate under the lease or permit.

The Barber Asphalt Trust owns and operates the only railroad into that region, and, I am informed, a prohibitive freight rate is exacted from any operator who would have the temerity to compete with the trust. The rate for a distance of less than 60 miles of haul runs from eight to ten dollars per ton.

New railroad facilities are promised, but in the meantime steps should be taken to correct such apparent injustice, and the acquisition of further lands by this monopoly should be prevented.

The SPEAKER. The time of the gentleman from Utah has expired.

Mr. MAYS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. CARTER of Oklahoma. I yield to the gentleman from Minnesota [Mr. STEENERSON].

Mr. STEENERSON. Mr. Speaker, I wish to speak relative to amendments 61, 62, 63, 64, and 65, which pertain to the timber on the Red Lake Indian Reservation. Those amendments are as follows:

(61) To carry into effect the act entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota, approved January 14, 1889, to provide for the establishment and administration of a forest reserve and for the sale of timber within the Red Lake Indian Reservation, Minn.," that the following-described lands within the Red Lake Indian Reservation, Minn., be, and the same hereby are, created into a forest reserve, to be known as the Red Lake Indian Forest: Townships 150 and 151 north, ranges 32, 33, 34, 35, and 36 west, and townships 152 and 153 north, ranges 32, 33, and 34 west of the fifth principal meridian, except the lands in townships 151 north, range 36 west, which lie north of the north line of sections 26 to 30, inclusive, and except all lands within sections 4, 5, 6, 7, 8, 9, and 18, in township 153 north, range 34 west. The provisions of this paragraph shall not apply to any lands which have heretofore been reserved for school, agency, church, or town-site purposes or granted to private parties or corporations within the area described, nor to the town site of Red Lake, for the creation of which provision is made herein: *Provided*, That when any of said lands are no longer needed for the purpose for which they are reserved, the Secretary of the Interior may declare such lands to be a part of the Red Lake Indian Forest.

(62) That lands within said Red Lake Indian Forest, which are not covered with standing and growing merchantable pine timber and which are suited for the production of agricultural crops and which are fronting upon a lake shore, may be allotted to individual Red Lake Indians: *Provided*, That no such allotment shall exceed 80 acres nor have more than 80 rods fronting upon a lake shore: *Provided further*, That in case an Indian has improved and cultivated more than 80 acres, his allotment may embrace his improvements to the extent of 160 acres.

That said forest shall be administered by the Secretary of the Interior in accordance with the principles of scientific forestry, with a view to the production of successive timber crops thereon, and he is hereby authorized to sell and manufacture only such standing and growing pine and oak timber as is mature and has ceased to grow, and he is also authorized to sell and manufacture from time to time such other mature and marketable timber as he may deem advisable, and he is further authorized to construct and operate sawmills for the manufacture of the timber into merchantable products and to employ such persons as he shall find necessary to carry out the purposes of the foregoing provisions, including the establishment of nurseries and the purchase of seeds, seedlings, and transplants when needed for reforestation purposes: *Provided*, That all timber sold under the provisions herein shall be sold on what is known as the bank scale: *Provided further*, That no contract shall be made for the establishment of any mill, or to carry on any logging or lumbering operations which shall constitute a charge upon the proceeds of the timber, until an estimate of the cost thereof shall have first been submitted to and approved by Congress.

(63) That the Secretary of the Interior may issue permits or grant leases on such lands for camping or farming. No permit shall be issued for a longer term than one year and no lease shall be executed for a longer term than five years. Every permit or lease issued under authority of this act to Indians, or to other persons or corporations, and every patent for an allotment within the limits of the forest created by section 1, shall reserve to the United States the right to cross the land covered thereby with logging roads or railroads, to use the shore line, or to erect thereon and use such structures as shall be necessary to the proper and economical management of the Indian Forest created by this act; and the Secretary of the Interior may reserve from allotment tracts considered necessary for such administration.

After the payment of all expenses connected with the administration of these lands as herein provided, the net proceeds therefrom shall be covered into the Treasury of the United States to the credit of the Red Lake Indians and draw interest at the rate of 4 per cent per annum. The interest on this fund may be used by the Secretary of the Interior in such manner as he shall consider most advantageous and beneficial to the Red Lake Indians. Expenditure from the principal shall be made only after the approval by Congress of estimates submitted by the said Secretary.

(64) That the Secretary of the Interior shall select and set apart an area not exceeding 200 acres, in sections 20, 21, 28, and 29, township 151 north, range 34 west, cause the lands thus selected to be surveyed and platted into suitable lots, streets, and alleys, and dedicate said streets and alleys and such lots and parcels as he may consider necessary to public uses. The lands thus selected shall not be allotted, but held as an Indian town site subject to further legislation by Congress.

That the timber on lands of the Red Lake Indian Reservation outside the boundaries of the forest created by section 1 may be sold under regulations prescribed by the Secretary of the Interior, and the proceeds administered under the provisions of the general deficiency act of March 3, 1883 (22 Stat. L., 590), and the Indian appropriation act of March 2, 1887 (24 Stat. L., 463).

The timber on Red Lake Reservation, mostly spruce, pine, and tamarack, has been estimated as from 129,000,000 to 300,000,000 feet board measure. A large part is within the proposed forest, which will be administered under forestry methods and reproduce timber in perpetuity.

The balance of the timber outside of the forest reserve is authorized to be sold and the proceeds to be used for the benefit of the Indians. The Interior Department has favorably recommended these provisions.

The Red Lake and Pembina Bands own this reservation separate and apart from all other Chippewa bands, and the timber alone will probably bring two or three million dollars.

I introduced the first bill on this subject nearly four years ago, and three years ago, in company with officials of the Interior Department, inspected the timber and agricultural lands on the reservation. The western portion of the reservation is now swamp land, but if drained will be rich agricultural land. I obtained a drainage survey of this part of the reservation as a preliminary to putting a drainage project into operation. I insert the report on this survey in the RECORD (H. Doc. 971, 63d Cong., 2 sess.).

The Red Lake Indians have in the last years made considerable progress in industry and civilization, particularly agriculture. Great credit for this progress is due to the very able and diligent service of Walter F. Dickens, Indian superintendent at Red Lake Agency. He has, among other things, inaugurated an annual agricultural fair at the agency, which has been a great success. The interest of the Indians in this fair and the active competition for prizes for agricultural products is perfectly wonderful.

Even old Indians, men and women, have come in with samples of corn, grain, and vegetables of high quality.

The different schools have increased their attendance, and especially the Cross Lake School has done great work. This school is located among the most conservative of all the Chippewas, who until lately opposed schools and Christian churches in their midst.

In company with Indian Agent Dickens and the agency physician I visited the school recently, and the grade scholars in the evening rendered a program of literary exercises which would have been creditable anywhere. One of the pupils, John Everywind, took the prize a couple of years ago for the best essay on agriculture by any grade-school pupil in the county, and was given a free trip to the State fair by the State fair management.

By authorizing the sale of the mature timber we enable the department to help the Indians to further progress in farming.

When the swamp lands are reclaimed every family on the reservation can be supplied with a farm of 160 acres of fine agricultural lands, and there will still be a couple of townships over, which could readily be sold to white settlers for more than enough to repay the cost of the drainage of all the other land that require, drainage,

There is only one serious difficulty to be overcome in this drainage plan, and that is the lack of an adequate outlet.

The Red Lake River will have to be straightened and deepened and enlarged and regulating works at the outlet will have to be provided.

There is an item in the river and harbor bill for a survey of this whole river with a view to controlling the flow and to dividing the cost among local interests. It is hoped that through this comprehensive survey of the river from Red Lake to Grand Forks a plan can be devised that will prevent disastrous floods, conserve the water supply for domestic purposes, and improve navigation also. The successful solution of this problem will affect the drainage of all the land in the Red Lake Basin, in Koochiching and Beltrami Counties as well as west of the lake, and upon it will depend to a large extent the future development of northern Minnesota.

I congratulate the people on the fact that Congress has by this legislation taken the first step toward this development.

Mr. Speaker, this proposition has been embraced in several prior bills, both in this Congress and in the previous Congress, and I am very glad that it is contained in the Indian appropriation bill, because there is great urgency for its passage.

The Government has never been authorizd to cut timber on this reservation as it has on all other Indian reservations. They could only cut dead and down timber; but this bill, after establishing the Red Lake Indian Forest, authorizes the Government to lumber the timber outside of that forest and dispose of it.

I append the following letter from the Secretary of the Interior as a part of my remarks:

DEPARTMENT OF THE INTERIOR,
*Washington, April 20, 1914.*

MY DEAR MR. STEENERSON: In compliance with your request of April 17, I transmit herewith for your information copy of the report submitted by the United States Geological Survey on the drainage survey of the Red Lake Diminished Reservation, Minn., executed under the provisions of the Indian appropriation act approved June 30, 1913.

Cordially, yours,

FRANKLIN K. LANE.

Hon. HALVOR STEENERSON,
*House of Representatives.*

REPORT ON THE DRAINAGE SURVEY OF THE RED LAKE DIMINISHED RESERVATION, MINN.

A survey of the swamp lands of the Chippewa Indians in northern Minnesota was authorized by act of Congress June 30, 1913, the object being to determine whether such lands may not be profitably and economically reclaimed by drainage and converted to agricultural uses.

A similar survey of the ceded lands of the Chippewa Indians was made in 1906, 1907, 1908, and a report, including map, tables, ditching plans, and estimates was submitted in House Document No. 607 to the second session of the Fifty-ninth Congress, covering an area of about 630 square miles lying east and north of Thief River Falls. An additional report was submitted in House Document No. 27 to the first session of the Sixty-first Congress, covering an area of over 4,000 square miles, lying principally between Red Lake and the international boundary. That survey was preliminary in character and consisted practically of thousands of spirit-level determinations covering the area in such a way as to establish the divides between drainage basins and the general slope or grade of the land. Many permanent bench marks were established which will be of value in starting future surveys.

The township and subdivision surveys of the General Land Office represent the ground control upon which the topographic features determined by the survey of 1913 were shown. Since the first surveys were made there has been a great development in actual drainage construction under State and county supervision in the ceded land area, particularly to the east of Thief River Falls and extending to the boundary of the present diminished reservation.

The plan of drainage construction as outlined in House Document No. 607 (2d sess. 59th Cong.) and shown on the map accompanying same, has been followed in a general way by the engineers in charge of the work, who have expressed their appreciation of the data and plans and estimates furnished by the Government survey.

Within the district they have constructed about 550 miles of ditches, the same number of miles of good roads, with 1,800 culverts and 22 steel bridges, providing at least one-half mile of ditch bordering each quarter section, also contributing $62,000 to the improvement of Thief River, at a total cost of about $3 per acre. Agricultural development and increased land values have rapidly followed these improvements.

The swamp lands within the boundaries of the Indian reservation are similar in character to those outside which are already drained, and it is safe to assume that they will have equal value when converted to agricultural uses.

The survey of the Chippewa Indian Reservation has been of the same general character as that of the ceded lands above mentioned. The drainage of this area presents no difficult problems. The Red Lake and Clearwater Rivers afford a natural outlet for the surface and ground waters. The accepted method of excavation is by one or more of the different types of dredges. In the following plans there are but two long ditches, each about 24 miles in length, and both to the north of Red Lake River. Short laterals and local ditches draining into the rivers named fill the intervening area.

The plans and estimates given herewith are preliminary in character, and cover drainage only, not road construction nor the building of bridges. A more detailed survey would be necessary to properly locate ditches and establish grades, but it is believed the general plan would be about the same and that the actual number of cubic yards excavated and the final cost would be within the estimates.

In determining the size of ditches, a variable coefficient for run-off has been used, the run-off for small areas being proportionately greater than for large areas. A plan frequently used, and one which has given satisfactory results in completed drainage projects, is to provide for a run-off in each 24 hours equivalent to three-eighths inch for a drainage outlet of 10 square miles, one-fourth inch for an outlet of 25 square miles, and three-sixteenths inch for an outlet of 200 square miles. For an area of 25 square miles such ditches would have a capacity for a mean monthly run-off of 7½ inches, or 60 per cent greater than the mean monthly rainfall in that region occurring during the month of greatest rainfall. The heaviest rainfall recorded in any month, as shown by the precipitation records from 1899 to 1908, was 10.63 inches in August. Supposing a maximum monthly rainfall of 12 inches and a run-off of 50 per cent, or 6 inches, the ditch capacity would still exceed the run-off by 1½ inches.

Farm laterals to reach each quarter section of land have been provided for in the estimates. These will not be over 2 miles in length. Two sizes have been used, each with a bottom width of 3 feet and slopes of 1 to 1, one being 3 and the other 4 feet in depth and containing, respectively, 3,520 and 5,475 cubic yards per mile.

The main ditches are estimated at 13 cents per cubic yard, which is about the price for which dredge work is being done in adjacent territory. The smaller ditches and some of the laterals are estimated at 15 cents. The total area for which it seems desirable to provide drainage is 370 square miles, or 236,800 acres. The total estimated cost is $369,680, or an average of about $1.56 per acre, which is exclusive of any assessment of these lands that might be deemed equitable as a portion of the cost of the improvement of Red Lake River, should such improvement be found necessary. This estimate is less than it would be if there were no main outlet channels, such as the Red Lake and Clearwater Rivers afford.

No survey was made of that portion of the reservation lying south of the lower Red Lake and east of the Clearwater-Beltrami County line, nor of that portion between the upper and lower lake. These areas consist mostly of high timbered sand ridges and scarcely any swamp area, and have therefore not been considered in the foregoing drainage plans.

The question has arisen as to the effect of the proposed drainage of the Indian lands upon those just west of the reservation which are contiguous to Red Lake River. It would undoubtedly result in increasing the burden of water carried by the river, whose current is sluggish and banks low in many places, and this condition might be detrimental, if not destructive, to the agricultural development of these lands. It is obvious that in the improvement of the Indian lands it would not be right to cause damage or destruction to the lands outside the reservation.

The run-off from Indian lands already finds its way into Red Lake and Red Lake River, and there would be no greater annual run-off after than before drainage improvement, yet the construction of ditches would provide a much quicker means of run-off and would result in an increased flow during any flood period. It would seem, therefore, that there may be some foundation for the fears of white settlers who occupy lands below the Indian reservation along the Red Lake River.

At the present time the ditches already constructed in Red Lake and Marshall Counties extend eastward to the reservation line, and in Beltrami County, on the north side of the reservation, these ditches extend eastward parallel to the reservation boundary for a distance of 15 to 18 miles from the west boundary. It is not the intention to burden the capacity of any of these ditches by diverting any of the water from the reservation into them. Some of the drainage will be into the Clearwater River, but nearly all will be into the Red Lake River, and by constructing a ditch near the west boundary of the reservation, south into Red Lake River, the adjacent lands of white settlers on the west will be benefited by taking away from them the water which naturally finds its way in that direction. Probably one or more townships would be so benefited. The only people, therefore, whose lands might be harmed by the proposed drainage plans are those who live near the Red Lake River from the reservation line to High Landing, a distance of about 18 miles. Below High Landing the banks are probably sufficiently high to provide ample drainage for adjacent lands. The area outside the reservation thus subject to overflow can not be definitely stated without a more detailed survey, but can be approximately stated at 10,000 acres.

There are two possible plans for the relief of congested conditions in this river during flood periods. The capacity may be increased by dredging the present channel, and there are several opportunities to reduce the distance and increase the grade by cut-offs. From the outlet of Red Lake to the reservation line, a distance of 19 miles, there is a fall of little more than 6 inches per mile. In the next 14 miles there is a fall of about 0.9 foot per mile. For this distance the river is bordered by swampy banks whose elevation is nearly the same as the river. No measurement of run-off has ever been taken at the outlet, but approximately from the records at Thief River Falls and Crookston the maximum flood run-off at this point may reach as much as 5,000 cubic feet per second. With a grade of 6 inches per mile a channel sufficiently large to contain this volume of water within its banks would have a bottom width of 150 feet, a depth of 11 feet, and slopes of 1 to 1. To care for one-half this volume on the same grade would require a channel 90 feet wide on bottom and 10 feet deep. The expense would render impracticable the construction of so large a channel. The best that could be done would be to improve the present channel so as to assist the run-off and care for the water at ordinary stages. An estimate of the cost of such improvement can not be made with the data at hand, but may be roughly approximated at $4,000 per mile for a distance of 30 miles, or a total of $120,000.

A cheaper and more effective plan may be found in the construction of a storage dam at the outlet of Red Lake impounding the entire run-off, or so much as may be necessary, from an area of 2,000 square miles.

Red Lake is formed by two bodies of water connected by a narrow channel. The combined area is 440 square miles. The depth of water may be increased from 2 to 5 feet without in any way injuring or flooding the surrounding land. On the south and west shores the water is very shallow, and where docks have been established they have had to be extended recently because of the falling of the lake level. From October, 1907, to October, 1913, there was a fall of 17 inches, as shown by elevations taken at those dates.

The benefits of storage would be felt in the aid to navigation on the lake, some aid to navigation on Red River of the North, increased water power on Red Lake River, complete protection from floods on the same river, and some aid in reducing flood waters of the Red River.

During a period of 28 months, from May, 1899, to August, 1901, gauging records were taken by the United States Army Engineers at a point about 5 miles above Thief River Falls. During the period the annual rainfall was about 30 inches, or somewhat in excess of the average rainfall for that section. The average monthly run-off was about 2,500,000,000 cubic feet, or an equivalent to an annual run-off of 5¾ inches in depth over the drainage basin of 2,400 square miles. Assuming an annual rainfall of 30 inches and a run-off of 20 per cent,

or 6 inches, there would be a total of 28,000,000,000 cubic feet, all of which could be withheld in the reservoir without raising the lake level more than 27 inches. The retention of this vast volume of water, allowing a gradual run-off, would effectually relieve the congestion in Red Lake River during flood periods.

In a report on the water-resources investigation of Minnesota it is estimated that a dam at the outlet of Red Lake would have a length of 400 feet at the water surface, 950 feet at 2 feet elevation, and 1,050 feet at 4 feet elevation. A dam 4 feet above the lake level would probably cost not over $10,000. If it should be considered necessary to provide for navigation on Red Lake River and Red Lake, then a lock and dam would be required and the cost greatly increased. According to a report of the United States Engineer Corps, the cost of such a lock and dam would be $65,000, the necessary dredging of river and lake $180,000, and plant and equipment $25,000, or a total of $270,000.

The project was not approved by the Chief of Engineers, who stated that the amount of commerce itself would not warrant the expenditure of so large a sum of money. Later reports on the same project have confirmed this opinion.

In the years before the building of the International & Great Northern Railway and the line from Bemidji to Red Lake the only possible way to reach the Red Lake country was by way of Red Lake River. Several small steamers and some gasoline boats plied the river, carrying freight and passengers up and bringing back logs, lumber, and passengers. The maximum freight and passenger traffic was in 1899, when 997 tons of freight and 5,944 passengers were carried. The number of passengers that year was nearly five times greater than any other year. The maximum log and lumber traffic was in 1904, when 115,000,000 feet were brought down. The amount declined gradually to 31,000,000 feet in 1911. In 1910, 300 tons of freight and 600 passengers were carried. In 1911, on account of low water, there was no steamboat nor launch traffic, and there has been none since. An electric line now runs from Thief River Falls eastward for 16 miles, and is under construction to the reservation line. Other lines are projected which will give an outlet to all farm products to the immediate west and north of Red Lake. With the advent of electric and steam roads in the near future, it seems most probable that the need and demand for river navigation will cease.

The timber available in this region which might naturally find its way down Red Lake River is practically exhausted, with the exception of that on Indian land. Here there are approximately 125,000,000 feet b. m., of which 50 per cent is white pine. Whether this timber should eventually be taken down the river or sawed at some point on Red Lake matters little. Provision can easily be made for running logs through a sluiceway.

Leaving the question of river navigation out of the reckoning, we find an easy and economical solution of the problem of floods on Red Lake River in the construction of a storage dam at the lake outlet.

On the accompanying map there is outlined a system of main drainage ditches into which the smaller farm laterals are to drain.

In the northwest half of township 154 north, range 38 west, there are about 10,000 acres for which no specific drainage plans have been made. These lands, which are naturally drier than the usual swamp areas, have been considerably improved by the construction of ditches just outside the reservation, but adjacent to the north and west boundaries of the township. With the construction of ditches on the east and south it is believed there will be little need for any ditch construction on this area, unless it be the smaller type of farm lateral.

The following tables give the dimensions and excavation quantities for all ditches and the summary showing the number of miles of farm laterals for each general drainage area.

AREA NORTH OF RED LAKE RIVER.

The area drained by main ditches Nos. 1 and 2 lies north of Red Lake River and west of Red Lake and a high ridge, in range 36, extending north from Red Lake. It occupies the northwest corner of the reservation. Of a total area of about 153,000 acres, all but about 20,000 are swamp land and easily reclaimable.

*Main ditch No. 1 and laterals.*

| | Section. | Length. | Area drained. | Dimensions. | | Slope. | Grade per mile. | Velocity (feet per second). | Cubic yards. |

Area of swamp land drained, 117 square miles, or about 74,880 acres.
Average cost per acre, $1.57.

The area between Red Lake and Clearwater Rivers contains about 75,000 acres and is practically all swamp land, but can be drained by local ditches emptying into these rivers and into Red Lake. No ditch would be over 5 or 6 miles in length.

Forty-five square miles drained, or 28,800 acres, at average cost of $1.13 per acre.

Mr. CARTER of Oklahoma. I yield the remaining time to the gentleman from Utah [Mr. HOWELL].

Mr. HOWELL. Mr. Speaker, Senate amendment No. 133 in the Indian appropriation bill has been the subject of some unnecessary discussion by my colleague [Mr. MAYS] since it was disagreed to by the conference and eliminated from the bill and is not now before the House.

It was not my intention, therefore, to discuss the question at this time, but, in view of the criticism and strictures made by my colleague upon this provision and his remarks with respect to the propriety of such an amendment being placed upon the Indian appropriation bill, I feel constrained to give a brief history of the legislation affecting these lands, from which it will be seen that the Committee on Indian Affairs has heretofore had exclusive jurisdiction of the subject, and every law on the statute books pertaining to the lands has been enacted on the Indian bill.

By treaty dated March 6, 1880, the Indians relinquished to the United States the lands in the Uncompahgre Reservation, in Colorado, and were removed and settled upon lands in Utah, a part of which were embraced in the Uncompahgre Indian Reservation, in Utah, which was created by Executive order of January 5, 1882, and included the lands now in question.

In further pursuance of the said treaty of March 6, 1880, the Indian appropriation act of August 15, 1894, contained the following direction:

SEC. 21. That the remainder of the lands on said reservation shall, upon the approval of the allotments by the Secretary of the Interior, be immediately open to entry under the homestead and mineral laws of the United States: *Provided*, That no person shall be entitled to locate more than two claims, neither to exceed 10 acres, on any lands containing asphaltum, gilsonite, or like substance.

The Indian appropriation act of June 7, 1897 (30 Stat., 87), provided in part as follows:

The Secretary of the Interior is hereby directed to allot agricultural lands in severalty to the Uncompahgre Ute Indians now located upon or belonging to the Uncompahgre and Uintah Reservations or elsewhere in said State. And all the lands of said Uncompahgre Reservation not theretofore allotted in severalty to said Uncompahgre Utes shall, on and after the 1st day of April, 1898, be open for location and entry under all the and laws of the United States, excepting, however, therefrom all lands containing gilsonite, asphalt, elaterite, or other like substances.

And the title to all of the said lands containing gilsonite, asphaltum, elaterite, or other like substances is reserved to the United States.

The Indian appropriation act of March 3, 1903 (32 Stat., 998), provided as follows:

That in the lands within the former Uncompahgre Indian Reservation, in the State of Utah, containing gilsonite, asphaltum, elaterite, or other like substances, which were reserved from location and entry by provision in the act of Congress entitled "An act making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes," approved June 7, 1897, all discoveries and locations of any such mineral lands by qualified persons prior to January 1, 1891, not previously discovered and located, who recorded notices of such discoveries and location prior to January 1, 1891, either in the State of Colorado or in the office of the county recorder of Uintah County, Utah, shall have all the force and effect accorded by law to locations of mining claims upon the public domain. All such locations may hereafter be perfected, and patents shall be issued therefor upon compliance with the requirements of the mineral-land laws, provided that the owners of such locations shall relocate their respective claims and record the same in the office of the county recorder of Uintah County, Utah, within 90 days after the passage of this act. All locations of any such mineral lands made and recorded on or subsequent to January 1, 1891, are hereby declared to be null and void; and the remainder of the lands heretofore reserved as aforesaid because of the mineral substances contained in them, in so far as the same may be within even-numbered sections, shall be sold and disposed of in tracts not exceeding 40 acres, or a quarter of a quarter of a section, in such manner and upon such terms and with such restrictions as may be prescribed in a proclamation of the President of the United States issued for that purpose not less than 120 days after the passage of this act and not less than 90 days before the time of sale or disposal, and the balance of said lands, and also all the mineral therein, are hereby specifically reserved for future action of Congress.

The foregoing is a summary of the various acts relating to these lands, and in every instance the legislation was considered by the Committee on Indian Affairs and included in the various annual Indian appropriation acts, and it can not be said, therefore, that the Committee on Indian Affairs is not fully informed upon the subject and fully prepared to legislate upon it.

Senate bill No. 43, which is identical with Senate amendment No. 133, on the Indian appropriation bill, provides as follows:

That the lands and also all the mineral therein, within the former Uncompahgre Indian Reservation, in the State of Utah, which were specifically reserved for future action of Congress, in the act approved March 3, 1903 (32 Stat., 998), and the remainder of the lands within even-numbered sections, in said reservation, reserved in the act approved June 7, 1897 (30 Stat., 87), as containing gilsonite, asphaltum, elaterite, or other like substances, and which were, by said act of March 3, 1903, authorized to be sold and disposed of in tracts not exceeding 40 acres, shall, unless otherwise reserved, be immediately open to settlement, location, occupation, and entry under all the land laws of the United States according to the character of the lands or of the mineral deposits therein.

The bill was duly referred to the Secretary of the Interior for report, and after consideration the Secretary reported favorably upon the bill, as follows:

DEPARTMENT OF THE INTERIOR,
*Washington, January 7, 1915.*

Hon HENRY L. MYERS,
*Chairman Committee on Public Lands, United States Senate.*

MY DEAR SENATOR: I am in receipt of your request for report upon S. 6623, Sixty-third Congress, second session, providing that lands and the minerals therein within the former Uncompahgre Indian Reservation, in the State of Utah, reserved for future action of Congress by the acts of March 3, 1903 (32 Stat., 998), and June 7, 1897 (30 Stat., 87), as containing gilsonite, asphaltum, elaterite, or other like substances, shall, unless otherwise reserved, be immediately opened to settlement, location, occupation, and entry under all the land laws of the United States.

The act of June 7, 1897, supra, opened to location and entry under the land laws of the United States the unallotted lands in the former Uncompahgre Indian Reservation, except lands containing the substances named, the title to the latter being reserved to the United States.

The act of March 3, 1903, supra, validated certain locations made upon the lands in question under the mining laws, provided that the even-numbered sections containing the minerals named might be disposed of by the President in tracts not exceeding 40 acres each, and that the balance of the lands and all mineral therein should be specifically reserved for future action of Congress. This reservation, it will be noticed, was of the odd-numbered sections within said former reservation.

The act of June 21, 1906 (34 Stat., 376), validated and confirmed, as against the United States, certain patents issued upon said lands prior to March 3, 1903, upon locations made prior to January 1, 1891.

The Director of the Geological Survey reports that, in so far as he is advised, no elaterite, ozocerite, or sand asphaltum has been produced in commercial quantities from these lands, but there are in existence therein extensive and valuable veins of gilsonite, estimating that there are situated upon the even-numbered sections within said reservation upon unpatented lands 20 miles of veins and upon the odd-numbered sections 30.2 miles of veins.

Letters have been written to this department by some residents of the State of Utah, urging the opening of these minerals to disposition under the general mining laws, on the ground that this would open to location and entry by the general public considerable areas of land containing the minerals described, and promote a healthy competition with the owners of the deposits, the title to which has heretofore passed from the United States.

Upon careful consideration of the entire matter, I am of the opinion that the lands in question should be opened to disposition under the public-land laws. It is presumably the intent of the bill that lands containing valuable deposits of gilsonite or other minerals shall be subject to location, entry, and patent under the general mining laws of the United States, and the nonmineral lands, if any, be subject to disposition under appropriate nonmineral laws. In this connection, attention is directed to the act of July 17, 1914 (Public, No. 128), "An act to provide for agricultural entry of lands withdrawn, classified, or reported as containing phosphate, nitrate, potash, oil, gas, or asphaltic minerals."

In order to make it entirely clear that the lands in question, if mineral, shall be opened only to location and disposition under the

mining laws, and if nonmineral, only under the nonmineral land laws of the United States, it might be well to amend line 7, page 2, to read: "Entry under all the land laws of the United States according to the character of the lands or of the mineral deposits therein."

Cordially, yours,

FRANKLIN K. LANE.

The bill passed the Senate on March 9, 1916, and was referred by the Speaker to the Committee on Indian Affairs, which by practice and precedent had always taken jurisdiction of the subject. While the measure was pending before the Committee on Indian Affairs of the House, the Indian appropriation bill came up for consideration in the Senate, and the provision of Senate bill No. 43, very consistently, was placed upon it as an amendment.

The Committee on Indian Affairs of the House had the bill referred to the Committee on the Public Lands, and having lost jurisdiction of the subject the item embracing its provision as it came over from the Senate was disagreed to and eliminated, and the subject has now been acted upon by the Committee on the Public Lands.

A reference to the schedule of the various acts relating to these lands shows that since 1897, now 19 years ago, a portion of these lands containing gilsonite, asphalt, elaterite, or other like substances, has been reserved from all forms of entry or location. When the act of June 7, 1897, was passed that entire portion of the State of Utah was included in the Uintah Indian Reservation and uninhabited by white settlers. Even at that early day special privileges of leasing hydrocarbonous mineral lands on the Uintah Indian Reservation had been given, and when the Indian reservation was thrown open to homestead settlement these special interests were permitted to locate and acquire 2,640 acres of mineral lands, and this was the foundation of the monopoly that still controls the output of these minerals.

But the conditions which existed when Congress decided to reserve these lands have completely passed away. With the opening to settlement of the Uintah Indian Reservation, more than 10 years ago, there has been a steady flow of industrious and undismayed settlers to this part of the State who, despite the great difficulty and expense involved in diverting water for irrigation, which is absolutely essential to successful cultivation in that arid section, have constructed expensive canals and irrigation works, overcome the obstacles of nature, and by their pluck and industry have laid the foundation for one of the most populous and prosperous sections of the State. By their courage and industry they have accomplished marvelous results in developing the latent resources of that country.

The homesteader was required not only to reclaim his land, but, in addition, was obliged to pay full value for it. Under these conditions the homesteader ought justly to have his homestead right restored. These hardy, thrifty settlers in the van of civilization deserve well of their country, and Congress can well afford to be liberal and helpful to them in their efforts. These communities, bearing the burdens and hardships and expenses incident to a new country, with roads, bridges, schools, and public buildings to construct and maintain, can not understand why the natural resources which surround them ought not to be utilized for the growth and development of the country. They are restricted in a great measure in their pursuits by the lack of railroad transportation facilities. With adequate railway communication the country would grow in leaps and bounds. Its natural resources and agricultural possibilities are unsurpassed by any other part of the State.

But these resources are withheld from development, with the consequent delay in such inducements as would surely bring about the early extension of a railway to reach them. These people have been earnestly working to encourage the extension of railroads to their section, and while their prospects of success in this respect are very good, the opening of these mineral lands to development would prove the decisive factor in bringing about the early construction of such facilities of transportation.

Is it, then, strange that the people of that section are demanding that these resources be thrown open to development?

It is claimed that the unrestricted opening of the lands under the mining laws would result in their passing into the possession of the monopoly now controlling these minerals. This is a specious argument. The cry comes from the companies now enjoying the monopoly in the production of these minerals, because the companies plainly understand that if these lands were thrown open their profitable monopoly would be destroyed and there would be competition.

The sealing up of these resources plays most effectively into the hands of the monopoly and against the natural and rightful development of the country. There has, no doubt, been considerable interest aroused by the prospects of the passage of legislation making these lands subject to our general land and mining laws, and some people are ready to file promptly on the claims at the proper time. But any undue or disorderly scramble for possession of the lands could be easily averted by limiting the number of claims to each person and providing for an orderly method of preferential location by lot and restricting the right of location to bona fide residents of the land district.

These simple amendments would have safeguarded against the control by a monopoly and meet the criticisms leveled against unrestricted entry.

The leasing system proposed by the Committee on Public Lands as a solution of this question will not hasten the development of the country that is so urgently demanded and deserved by the intrepid pioneers who are struggling for the advancement and growth of their locality. These settlers have contended against many unjust and arbitrary regulations in the matter of acquiring rights of way for canals and ditches. Many of the best agricultural lands, contrary to the spirit of the law, were set aside as grazing lands for Indian stock. These open lands are a constant source of friction between the whites and the Indians, and these unhealthy conditions ought to be remedied. The citizens of the Uintah country very clearly set forth some of their grievances and the relief which they seek in the following petition, which they have asked me to transmit to Congress:

Your petitioners also beg to call attention to one of the clauses of congressional joint memorial No. 31, approved June 9, 1902 (32 Stat., 744), which reads as follows:

"In addition to the allotments in severality of the Uintah and White River Utes, the Secretary of the Interior shall, before any of the said lands are opened to disposition under any public-land law, select and set apart for the use of the Indians of the reservation such an amount of nonirrigable grazing lands therein at one or more places as will subserve the reasonable requirements of said Indians."

Your petitioners would respectfully represent that in the setting aside of said grazing lands the provisions of the above resolution were not adhered to as to the lands being nonirrigable. Much of the lands so set aside is along the rivers and streams of the basin and is highly agricultural and irrigable and the water is plentiful and easily accessible for the irrigation of the same. These lands now lie largely unused and unproductive to the settlers or the Indians, and lying as they do between the valleys and the mountain ranges it is impossible for the settlers to reach the latter for either timber or for grazing purposes without crossing these grazing lands, which are now, in fact, an Indian reservation to all intents and purposes as they were before the opening. Settlers, therefore, in taking their stock to and from the summer forest ranges and in getting lumber and timber from the forests trespass in crossing this Indian grazing land.

Your petitioners most respectfully represent that it would be to the best interests of the Indians and the settlers to have this grazing land pass to the control of the forest reserves, and while applying all regulations now enforced as to the white settler as to grazing and homesteading give the Indian free access to the same as he now has.

Your petitioners respectfully request that Congress enact legislation attaching said Indian grazing lands to the Ashley National Forest Reserve, and while reserving to the Indians free and unlimited grazing privileges of the same, that all irrigable, agricultural lands be subject to homestead entry and governed as other homestead lands within such reserves.

At the last session of the Utah Legislature, this menacing situation was considered and the following memorial adopted and forwarded to Congress:

House joint memorial 3.

A memorial to the Congress of the United States of America petitioning the United States Government to make a part of the Ashley National Forest certain lands formerly within the Uintah Indian Reservation.

*To the Senate and House of Representatives of the United States in Congress assembled:*

Your memorialists, the governor and the Legislature of the State of Utah, respectfully represent that—

Whereas certain lands located in Wasatch, Duchesne, and Uinta Counties, in the State of Utah, and formerly within the boundaries of the Uintah Reservation, are now held and set apart as Indian grazing lands; and

Whereas said lands are now patrolled by Indian police, whose actions in the handling of cattle owned by residents of said counties continually cause the said residents serious inconvenience and much damage:

Now, therefore, the governor and the Legislature of the State of Utah respectfully petition that the said lands so set apart as Indian grazing lands be made a part of the Ashley National Forest and placed under the control of the Forest Service.

Approved March 16, 1915.

STATE OF UTAH,
SECRETARY OF STATE'S OFFICE.

I, David Mattson, secretary of state of the State of Utah, do hereby certify:

That the foregoing memorial is a full, true, and complete copy of the original thereof, which was filed in the office of the secretary of state of the State of Utah on the 16th day of March, 1915.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Utah this 21st day of June, A. D. 1915.

[SEAL.] DAVID MATTSON,
*Secretary of State.*

I brought this grazing matter to the attention of the Commissioner of Indian Affairs, who instituted an investigation, but from the tenor of the report by the employees of that department there does not appear to be much chance for immediate relief, unless through remedial legislation. The following

correspondence with the Commissioner of Indian Affairs treats of the matter from his viewpoint, and sets forth his attitude upon it:

DECEMBER 24, 1915.

Hon. CATO SELLS,
*Commissioner of Indian Affairs, Washington, D. C.*

MY DEAR COMMISSIONER: The governor and the Legislature of Utah have memorialized Congress, earnestly asking on behalf of the people in that section that the lands of the Uintah Indian Reservation, which were set aside by the act of March 3, 1905 (33 Stat., 1048), as Indian grazing lands, be included in the Ashley National Forest. It is alleged that annoyances and losses occur to the white settlers who have grazing permits on said reserve and whose live stock occasionally stray upon the adjoining Indian lands and are promptly taken in custody by the patroling Indian police and driven off. I have presented this question to the Chief Forester, who expresses the opinion that these grazing lands could be economically and advantageously administered as a part of the Ashley National Forest. It is my sanguine opinion that if some plan can be proposed suitably safeguarding the interests and rights of the Indians by which these lands can be administered as a part of the Ashley National Forest it would materially conduce to the good relations and friendship between the whites and the Indians. I am presenting this matter to you in the hope that you will outline a plan that would effectuate this purpose and meet with your approval.

Yours, truly,

JOSEPH HOWELL.

—

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
*Washington, February 28, 1916.*

MY DEAR MR. HOWELL: This will refer further to your letter of December 24, 1915, in regard to the proposal to add the tribal grazing reserve of the Uintah and Ouray Indians to the Ashley National Forest.

The proposed action would place the tribal grazing reserve entirely under the control and management of the Forest Service, whose primary concern is the conservation of the forests of the United States rather than the welfare of the Indians. While the grazing of stock on forest reserves may be permitted under certain conditions, yet the regulations on this subject are somewhat complicated, and it would be very difficult and burdensome for the Indians to comply with them in order to obtain their proportionate share of the benefits of the range in competition with white stockmen, as, under the regulations, the range would be open to whites and Indians alike on equal terms, except that "special concessions may be made by the Secretary of Agriculture to Indians who are enrolled upon the records of the Office of Indian Affairs." However, such concessions are merely optional and not obligatory, in the discretion of the Secretary of Agriculture, and there is no assurance that they will be made, as I fear that strong and successful pressure might be brought to bear by white stockmen to prevent such action.

The only concessions which would adequately protect the interests of the Indians would require that they be given the preference right to free grazing privileges up to the capacity of the range, as at present, which their stock demands, with that of white lessees, as explained below. In other words, this would involve merely the placing of the tribal reserve under the jurisdiction of the Forest Service instead of the Indian Office, with practically no change whatever in the conditions upon which the Indians may range their stock thereon. This would accomplish no useful purpose in behalf of either the Indians or the whites; moreover, it is hardly conceivable that the Forest Service could consistently grant such liberal concessions to the Indians as entirely to exclude white stockmen from the reserve (except lessees of Indian land), who would likely crowd the Indians out if the latter were compelled to compete with them on equal terms, should the concessions not be granted, which might be the case.

Apparently the only reason for the proposed action, as set forth in the memorial of the Utah State Legislature, is as follows:

"Whereas said lands are now patrolled by Indian police, whose actions in the handling of cattle owned by residents of said counties continually cause the said residents serious inconvenience and much damage * * *."

I have had this matter thoroughly investigated and attach hereto for your information copies of the superintendent's report, with accompanying inclosures, from which it will be seen that this complaint is apparently unfounded, so far as the evidence shows. The superintendent's investigation was complete and exhaustive, and he transmits statements from old settlers in that vicinity controverting the charge that the Indian police have caused any trouble of the nature referred to in the memorial.

On most reservations the Indians are allotted individual tracts of both agricultural and grazing lands, but under the act of May 27, 1902 (32 Stat. L., 263), on this reservation they were allotted agricultural land only, in 40 and 80 acre tracts, the entire grazing reserve of 250,000 acres being held in common (joint resolution of June 19, 1902, 32 Stat. L., 744). According to the latest figures, the population of the reservation is 1,161. These Indians own live stock worth approximately $209,407, and with no individual range facilities they must depend entirely upon the tribal grazing reserve.

An irrigation project has been constructed on this reservation at a total cost (for construction) of $834,207.79, with 78,502 acres of land now under ditch. The water rights on this project expire under the State laws applicable thereto in 1919. Only 7,138 acres were cultivated by the Indians during the fiscal year 1915, and with but 291 able-bodied male adults it will be a physical impossibility for the Indians themselves to get all the land in cultivation by 1919 and save the water rights.

After exhaustive investigation it was decided that the only solution of the difficulty was to lease the surplus irrigable lands (beyond that which the Indians can cultivate) to white settlers on liberal terms, as the land is raw, rough, and unbroken sagebrush, and extraordinary inducements must be offered to prospective lessees. Pursuant thereto a comprehensive plan was put into effect on March 24, 1915, with that end in view.

An important and vital feature of this plan is that white lessees of Indian agricultural land are permitted to graze not to exceed 100 head of stock on the tribal grazing reserve at $1 per head per annum. Many five-year leases have been entered into with this grazing privilege as a part thereof, 2,284 head of stock belonging to white lessees of Indian allotments now being grazed thereunder. However, there is no law which authorizes the leasing of land within national forest reserves for grazing purposes, mere revocable permits being issued from year to year by the Secretary of Agriculture, who "has authority to permit, regulate, or prohibit grazing in the national forests * * * when it does not interfere with the purposes for which national forests are created." Should the tribal grazing reserve be taken from the Indians and placed under the jurisdiction of the Forest Service, the carrying out of these agreements would be greatly complicated if not made entirely impossible, thus seriously embarrassing the Indian Service in fulfilling such contracts.

It is estimated that the tribal grazing reserve of 250,000 acres will accommodate 6,000 head of cattle or horses, in addition to which the Indians may graze 2,000 head on the present forest reserve in return for the privilege of forest-permittee stock crossing the tribal reserve twice each year, making a total available capacity of 8,000 head. The superintendent reports that this range is now stocked as follows:

| | |
|---|---|
| Indian: | |
| Horses | 1,224 |
| Cattle | 2,759 |
| Sheep, equal to (cattle) | 250 |
| Total | 4,233 |
| White | 2,284 |
| Grand total | 6,517 |

This is only 1,483 head less than the total estimated capacity of the Indian range plus the 2,000 head which they may graze on the forest reserve. The live-stock holdings of the Indians are being increased each year, as this industry is necessarily an important item in their self-support, and additional leases of Indian allotments are constantly being made to white settlers, with the privilege of grazing not to exceed 100 head of stock on the tribal reserve at $1 per head per annum, as above stated. The comparative statement given below shows the excellent results thus far achieved under the leasing system adopted on March 24, 1915: In 1914, number of allotments leased, 177; acres, 8,982; 1915, number of allotments leased, 524; acres, 34,132.

With the 7,138 acres cultivated by Indians during the fiscal year 1915, this makes a total of 41,270 acres now actually under cultivation, the water rights to which have thus been saved, leaving 37,232 acres yet to be cultivated by 1919, which must necessarily be done largely by lessees, as explained herein.

If the privilege now allowed white lessees of grazing stock on the tribal reserve is withdrawn or made difficult of accomplishment, it will greatly interfere with the leasing of this land, and thus endanger the water rights. The Indians themselves are considerably alarmed over the prospect of losing their grazing reserve, as shown by the attached copy of letter addressed by them to the superintendent. Particular attention is invited to the following extracts therefrom:

"We were allotted very small tracts of land in severalty; heads of families receiving 80 acres and only 40 acres each to all others, and many married men who had no children were allotted as not heads of families. It was explained that this was done because we were to be allowed a grazing reserve for the use of the tribe.

"The balance of our reservation was thrown open to homestead entry. All of such land is now occupied by settlers, most of them owning 160 acres each, as compared to our 40-acre tracts. Many of these homesteaders were unmarried men or women, yet they were considered as heads of families and allowed homesteads equal to others who had children. Now comes the cry from the aforesaid homesteaders, that they have not enough room on their 160-acre ranches and must have our grazing lands turned over to the Forestry, that they may be allowed the use of the said land for their stock.

"In 1905 Congress set aside the best part of our grazing land as a forest reserve, leaving us only the foothills along the base of the mountains for our grazing lands, and the above-mentioned forest reserve has been open to homesteaders for the grazing of their stock.

"We Indians have cattle and horses, beside sheep, and as we understand stock raising better than we do other things, we want to continue in that business; therefore we must retain what little grazing lands we have left.

"We do not understand the rules and regulations governing the Forestry, and if we were placed under the supervision it would work a hardship on us, for white men would beat us to the grazing privileges just as they do now on the national forest reserve."

Some correspondence on this subject was published in the Roosevelt Standard of January 5, 1916, including copy of a letter addressed to you on December 22, 1915, by Mr. M. F. Potter, Acting Forester. I note particularly that portion thereof reading as follows:

"In 1902 a very thorough field examination was made by an experienced forest officer for the purpose of determining what lands in the then Uintah Indian Reservation should be permanently reserved for forest and watershed protection.

"The act of March 3, 1905 (33 Stat. L., 1048), authorized the President to set aside such lands before opening the Indian reservation, with the further proviso that the proceeds from any timber sold from such reserved lands prior to June 30, 1920, should be paid to the Indians. Under this authority and before opening the reservation the President reserved all lands valuable for national forest purposes.

"It appears from the records of this office that none of the remaining lands are such as should properly be included within a national forest, since they are neither valuable for timber nor for stream-flow regulation. This office could not, therefore, approve their addition to a national forest under the presumption of their being forest lands. On the other hand, it is realized that adjacent the national forests in that region are very valuable grazing lands which might be economically and advantageously administered in connection with the national forest lands. These lands, however, were specifically reserved for grazing purposes by the Indians, and in accordance with joint congressional resolution No. 31, approved June 9, 1902 (32 Stat. L., 744)."

It thus appears that the forest reserve authorized by law has already been set aside by the President; that none of the remaining lands should properly be included within a national forest; and that they are, in fact, classified as "grazing lands" which have been specifically reserved for the Indians.

To summarize, this proposal appears to be predicated entirely upon an alleged condition which does not, in fact, exist, so far as the evidence shows. Based on official reports, the land is apparently not such as should properly be included within a national forest reserve. It will greatly embarrass the Indian service in carrying out present grazing contracts entered into in good faith as an important part of plans to protect the water rights and complicate, if not prohibit, the execution of further necessary contracts of this nature. The entire grazing reserve is absolutely essential for Indian stock and that of white lessees. This service, rather than the forest service, is responsible for the proper and efficient management of Indian Affairs. The Indian

Service is now engaged in an aggressive campaign to save the water rights on this reservation, the success of which, so necessary to the future industrial welfare and progress of the Indians, depends upon its undisputed control of all contributory factors, including the tribal grazing reserve.

For these reasons, considered from every standpoint and taking the most optimistic and hopeful view of the situation, it is my opinion that the proposal necessarily involves such elements of danger to the welfare and progress of the Indians, which must at all times be my primary concern, that I can not consistently give it my approval.

I would therefore greatly regret to see any further action with the view of adding this tribal grazing reserve to the Ashley National Forest.

Very truly, yours, CATO SELLS, *Commissioner.*

Hon. JOSEPH HOWELL,
*House of Representatives.*

I have already referred to the justice of restoring the homestead rights to settlers upon the lands of the Uintah Indian Reservation, and who were required to pay the full cash value of the lands in addition to complying with the homestead law. The situation is so clearly expressed and the relief sought so convincingly stated in the petition of the citizens concerned that I take pleasure in inserting it as a part of my remarks and commend it to the attention of the Congress:

A PETITION FOR THE RELIEF OF SETTLERS OF THE FORMER UINTAH INDIAN RESERVATION IN UTAH.

*To the President of the United States and Members of the Senate and House of Representatives in Congress assembled, greeting:*

Your petitioners, citizens of the United States and residents of the former Uintah Indian Reservation, Utah, beg to respectfully represent that—

Whereas the act providing for the opening to settlement of the lands of the former Uintah Indian Reservation of Utah provided that the lands could be obtained only under homestead entry and full compliance with the homestead laws and the payment of $1.25 an acre at the time of making final proof; that

Whereas all said lands are arid and no crops can be raised without irrigation, and that entrymen were compelled to construct large and expensive canals with which to irrigate said lands before crops could be produced; that as a result of having to comply with the homestead laws, the constructing of expensive irrigation canals, and the payment of $1.25 per acre for the lands homesteaded said entrymen find themselves in financial embarrassment and their substance all spent before returns have been possible from crops raised from the lands so homesteaded; that

Whereas at the end of the five-year period after the opening of said reservation all lands not entered as homesteads or otherwise reserved by the department were offered at public sale to the highest bidder for cash at the land sales in Provo, Utah, and that many thousands of acres of agricultural, mineral, and grazing lands were thus sold, much of it bringing but the minimum price of 50 cents per acre, and sold without condition as to residence or occupancy; that said lands are held mostly by persons of large or unlimited means, are not occupied, save as grazing lands, nor are they being improved; that said lands are held and owned largely by nonresidents of the county in which the lands are situated, and their value is being appreciated by the occupancy and improvement of the homesteaded lands, whose owners must remain with said lands in order to comply with the conditions of the homestead laws.

Your petitioners respectfully represent the above conditions have been and now are unequal and unjust, and that the entryman who has had to comply with the exacting conditions of the homestead law ought not to have had to pay the purchase price of $1.25 an acre for his homesteaded lands.

Your petitioners therefore respectfully request that Congress immediately enact legislation restoring the homestead right to all entrymen on the former Uintah Indian Reservation who have complied with the homestead laws, submitted his final proof, and paid the $1.25 per acre for his land so homesteaded.

[By unanimous consent, Mr. HAYDEN was given leave to extend his remarks in the RECORD.]

Mr. CHIPERFIELD. Mr. Speaker, I ask unanimous consent to extend my remarks on that portion of the conference report that embraces the lands of the Red Lake Indian Reservation and the attempt to use them for timber purposes.

The SPEAKER. Is there objection?

There was no objection.

By unanimous consent, Mr. RAKER, Mr. JOHNSON of Washington, and Mr. STOUT were given leave to extend remarks on the Indian appropriation bill.

The SPEAKER. The question is on agreeing to the conference report. Without objection, it will be agreed to; and the House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of S. 2986——

Mr. CAMPBELL. Mr. Speaker, there was so much confusion that I did not hear the Chair announce the result of the vote on agreeing to the conference report.

The SPEAKER. Without objection, the conference report will be agreed to.

Mr. MANN. Mr. Speaker, I would rather have it voted on.

The question was taken, and the conference report was agreed to.

RURAL CREDITS.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of the rural-credits bill.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes, with Mr. GARNER in the chair.

The Clerk read as follows:

CAPITAL STOCK OF FEDERAL LAND BANKS.

SEC. 6. That every Federal land bank shall have, before beginning business, a subscribed capital of not less than $750,000. The Federal farm-loan board is authorized to prescribe the terms, conditions, and time of the payment of subscriptions to capital stock, to reject any subscription in its discretion, and to require subscribers to furnish adequate security for the payment thereof.

Mr. CULLOP. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CULLOP. As I understand it, the Clerk is reading section 6, when section 5 has not been disposed of.

The CHAIRMAN. Section 5 has been read, and that section and all amendments to it have been disposed of. The Clerk will read.

The Clerk read as follows:

At least 20 per cent of the capital stock of any Federal farm-land bank which is paid in by national farm-loan associations shall consist of cash in the vaults of said land bank or of deposits in member banks of the Federal reserve system or of investments in negotiable interest-bearing securities, approved by the Federal farm-loan board: *Provided*, That not less than 5 per cent of such capital stock shall be invested in bonds of the United States.

Mr. HENRY, Mr. MORGAN of Oklahoma, Mr. BENNET, and Mr. McFADDEN rose.

The CHAIRMAN. The gentleman from Texas.

Mr. HENRY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. HENRY offers as a new section the following——

Mr. MORGAN of Oklahoma. Mr. Chairman, I wish to offer a substitute for the section just read, and also an amendment to it.

The CHAIRMAN. The gentleman from Texas offers an amendment as a new section, and it would not prevent the gentleman from Oklahoma from offering his amendment. The Chair thinks the proper procedure, however, will be to perfect the section first.

Mr. HENRY. No one offered an amendment, and so I offered mine.

The CHAIRMAN. It is hardly correct to say that no one offered an amendment, because gentlemen were on their feet to offer amendments.

Mr. HENRY. Mr. Chairman, I withdraw my amendment for the present.

Mr. MORGAN of Oklahoma. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MORGAN of Oklahoma. I wish to ask the Chair if after the substitute is offered and it should fail it would be in order to offer an amendment to the section?

The CHAIRMAN. Yes; but the proper procedure is to offer the amendment to the section first before the substitute.

Mr. MANN. The substitute is in order to be offered, but the amendment takes precedence.

Mr. McFADDEN. Mr. Chairman, I offer an amendment to perfect the section.

Mr. MORGAN of Oklahoma. As I understand, I have the right to offer an amendment, even after the substitute should be voted down?

The CHAIRMAN. Yes; but the better practice is to offer the amendment first.

Mr. MORGAN of Oklahoma. From my discussion it will be better, I think, to offer the substitute first.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Pennsylvania [Mr. MCFADDEN].

The Clerk read as follows:

Page 86, section 6, strike out lines 18, 19, and 20, and insert the following:

"Stock owned by the Government of the United States in Federal land banks shall receive dividends at the rate of 2 per cent per annum."

Mr. McFADDEN. Mr. Chairman, the purpose of the amendment is to provide a reasonable rate of interest to be paid by this Federal land banking system into the Treasury of the United States to help compensate somewhat for the liability which the United States is assuming in advancing $9,000,000 as

an initial amount to set in motion this land-credit system, to say nothing about the additional liability which might and probably will occur if this present measure is enacted into law. I can see no reason why the United States should be discriminated against in this manner, and I think it is only just and right that, after this system makes reasonable earnings and before any distribution is made of these profits, after setting aside a proper reserve, the United States should be paid a small rate of 2 per cent per annum on the money invested in this system, which is the basis and the foundation of the whole system. It would be the rankest kind of hypocrisy and favoritism if this were not done; and I can see no reason, nor do I believe the farmers of the United States desire to be so favored at the expenses of the other two-thirds of the population of the United States. My knowledge of the American farmer is such that I do not believe he is asking a special privilege of this nature. [Applause.]

Mr. FESS. Will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. FESS. What was the purpose, may I ask, for exempting the Government from the right of receiving interest?

Mr. McFADDEN. It was to aid the system and eventually be a source of income to reduce the rate of interest to the borrowers.

Mr. FESS. In other words, the whole scheme is a subsidy by the Government.

Mr. McFADDEN. A subsidy pure and simple.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. McFADDEN].

The question was considered, and the amendment was rejected.

Mr. SHOUSE. Mr. Chairman, I offer two committee amendments.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

On page 88, line 1, strike out the word "farm."

Mr. SHOUSE. These amendments, Mr. Chairman, are to perfect the text.

The amendment was agreed to.

Mr. SHOUSE. I ask that the Clerk report the other amendment.

The Clerk read as follows:

Page 88, line 8, strike out the word "farm."

The amendment was agreed to.

Mr. MORGAN of Oklahoma. Mr. Chairman, I now offer my amendment as a substitute for the section.

The Clerk read as follows:

Strike out all of section 6 and insert in lieu thereof the following:

"CAPITAL OF FEDERAL LAND BANKS.

"SEC. 6. That every Federal land bank shall have three kinds of capital, namely: Operating capital, reserve capital, and guaranty capital.

"First. Every Federal land bank shall have operating capital stock of $1,000,000, which shall be divided into 100,000 shares of $10 each. Fifty thousand shares shall be known and designated as founders' shares and 50,000 shares shall be known and designated as public shares. Founders' share may be subscribed for by any individual or by the United States. Public shares may be subscribed for only by the United States. The Secretary of the Treasury is hereby authorized and directed for, and in behalf of, the United States to subscribe for 50,000 public shares in the operating capital stock of every Federal land bank, and pay for the same out of any funds in the Treasury not otherwise appropriated, and there is hereby appropriated $6,000,000 for such purpose.

"Within 30 days after organization of the Federal farm-loan board it shall open books of subscription for founders' shares of the operating capital stock of every Federal land bank. If within 90 days thereafter 50,000 shares of such stock shall not have been subscribed, the Secretary of the Treasury, for the United States, shall subscribe for the remainder thereof. He shall pay for the same out of any funds in the Treasury not otherwise appropriated.

"No dividends shall be paid upon the public shares of stock owned by the Government of the United States. Dividends upon the founders' shares of stock shall be paid in the same amount as shall be paid upon shares of stock in the reserve capital of each Federal land bank.

"The operating capital of any Federal land bank may be increased on petition of its directors and on the approval of the Federal farm-loan board: *Provided*, That said board shall not authorize the increase of the operating capital stock of any such bank to an amount that shall be more than one-twentieth of the reserve capital stock of said bank: *Provided further*, That should said board at any time authorize the increase of the operating capital stock of any Federal land bank, the original subscribers to such stock shall have a preferred right to subscribe for any increase in such stock under such rules and regulations as shall be prescribed by said board.

"The Federal farm-loan board is authorized to prescribe the times and conditions of the payment of subscriptions to capital stock, to reject any subscription in its discretion, and to require subscribers to furnish adequate security for the payment thereof.

"Founders' shares of stock owned by the United States shall be voted by the farm-loan commissioner, as directed by the Federal farm-loan board.

"Second. Every Federal land bank shall have a reserve capital equal to at least 5 per cent of its outstanding loans. Every person applying for a loan from any Federal land bank shall also apply for the purchase of stock in said bank in an amount equal to 5 per cent of the amount of his loan. He shall also authorize the bank to retain out of the proceeds of his loan, in full payment of such stock, a sum of money equal to 5 per cent of the amount of the loan granted under said application and shall authorize the bank to cancel such stock on the payment of his loan. The reserve capital stock of every Federal land bank shall be divided into shares of $1 each, which shall not be assigned or hypothecated in any manner whatever. Said stock shall be held by said bank as collateral security for the payment of said loan and for the payment of the loans of others, as provided in this act. When any loan is paid in full, the reserve stock held by the borrower shall be canceled and retired, and the borrower shall be paid the face value thereof. Semiannual dividends shall be paid on reserve capital stock in an amount equal to the semiannual interest rate on the loan of the holder of the stock, which dividend shall be cumulative.

"The reserve capital and the guaranty capital of every Federal land bank shall be managed separately and apart from other funds and shall constitute a trust fund for the use and benefit of the owners of Federal land-bank bonds and to secure the payment of such bonds, together with the interest thereon. Should any borrower fail to pay when due the interest on his loan, or the principal thereof, the Federal land bank in which said borrower holds reserve stock may enforce the lien on the reserve capital stock held by such borrower. Should such borrower at any time thereafter meet his obligations to said bank in full, so far as they may be due at any time, the said bank shall restore to said borrower such portion of his reserve capital stock which had been used to make good his defaults as aforesaid.

"The reserve capital stock held by any borrower in a Federal land bank shall not be utilized to meet the default or defaults of other borrowers until said bank shall have first used its entire guaranty capital stock in making good its obligation due on farm-mortgage bonds.

"When any portion of the reserve capital or of the guaranty capital of any Federal land bank has been used to pay the interest or principal on any mortgage or mortgages upon which the borrower or borrowers are in default and thereafter such borrower or borrowers shall meet such default or defaults, through voluntary payment or foreclosure proceedings, the sum or sums so paid or so recovered shall be credited to the guaranty capital or reserve capital of such bank in proper proportion, and each borrower whose reserve capital stock may have been used in part to meet the original default in such cases shall be given due credit on the reserve capital stock held by him in such bank.

"Third. That every Federal land bank shall have guaranty capital as follows:

"First. Every Federal land bank shall set aside as a part of its guaranty capital, from the annual interest payment of each borrower, a sum equal to one-fourth of 1 per cent of the amount of each loan until the operating capital, the reserve capital, and the guaranty capital of such bank combined shall be a sum equal to 10 per cent of the outstanding bonds of such bank, and thereafter only when necessary to maintain a like ratio between the outstanding bonds of such bank and the total amount of its operating capital, reserve capital, and guaranty capital.

"Second. Six millions of dollars is hereby appropriated, out of any funds not otherwise appropriated, which shall become a part of the guaranty capital of the 12 Federal land banks created by this act, which sum shall be divided equally between said banks. The Secretary of the Treasury is hereby authorized and directed to pay to each Federal land bank $500,000, which shall become a part of the guaranty capital of said bank.

"The guaranty capital shall be a trust fund to insure the payment of the farm-mortgage bonds issued by each Federal land bank and for the use and benefit of owners of such bonds who shall have a first and prior lien thereon over all other creditors of such bank. It shall be deposited in one or more of the depositaries of the Federal land bank, secured by an equal amount of farm-loan bonds or United States bonds, and as soon thereafter as possible shall be invested in farm-loan bonds or United States bonds, which shall be deposited for safe-keeping in such way as shall be prescribed by the Federal farm-loan board. The funds constituting the reserve capital of any Federal land bank shall be under the joint control of such bank and the Federal fiduciary agent for such bank.

"The guaranty capital of every Federal land bank shall constitute the first and primary fund upon which such bank shall draw to meet the payments of any bond or interest thereon issued for it when such payments can not be met through funds otherwise provided herein. After any Federal land bank has exhausted its guaranty capital in the payment of its bonds and interest thereon it may then use its reserve capital to meet any of its obligations due on farm-mortgage bonds.

"It shall be unlawful for any Federal land bank, or any officer, director, or employee thereof to use or appropriate any part or portion of the funds constituting the reserve capital or the guaranty capital of any Federal land bank for any other purpose than herein provided. It shall be the duty of the Federal land-bank board to provide special rules and regulations for safeguarding the reserve capital and the guaranty capital: *Provided*, That when the reserve capital, the guaranty capital, and the operating capital of any Federal land bank combined shall be equal to 10 per cent of the outstanding bonds of any Federal land bank, and so long as the same shall remain equal to 10 per cent of the outstanding bonds of any Federal land bank the annual contributions of borrowers to the guaranty capital shall be placed in the general fund of such bank and be used in the payment of dividends on founders' shares and shares in the reserve capital, or for any other purpose for which such fund may be used under the terms of this act."

Mr. MORGAN of Oklahoma. Mr. Chairman and members of the committee, I recognize the difficulty of getting clearly before the committee what is in the substitute which I have offered. I wish it to be understood that I am friendly to this legislation, and in many respects I believe a splendid bill has been presented here. All the amendments which I have offered or shall offer until the bill is finally acted upon I shall offer in good faith, solely for the purpose of perfecting and improving the bill, and not for the purpose of discrediting it or preventing its final passage.

This section provides for the capital stock, and I have offered an amendment which can be substituted without in any way affecting the other parts of the bill.

Under the section in the bill the capital stock is $750,000. In the substitute I offer the capital stock is placed in three divi-

sions. It may seem complex at first, but it is very simple. One division is the operating capital, the second the reserve capital, and the third the guaranty capital. The object of the operating capital is to give the bank funds to do business. The object of the guaranty capital and the reserve capital is to create a fund which will make the bonds which these banks issue secure beyond a question of doubt. I provide that the $1,000,000 of operating capital shall be divided into two kinds of shares, the founders' shares and the public shares.

The Government subscribes for the public shares to the amount of $500,000. The founders' shares are to be subscribed for by individuals, and the founders—those who subscribe for these shares—are allowed representation on the board of directors. I believe that if you have two of these directors to represent private capital on these banks to act with the public directors that you will get better administration than you would if it were entirely controlled by public directors. So I believe that $500,000 will be subscribed by private individuals, because they will have representation on the board of directors. Then we have $1,000,000 for operating capital, one-half subscribed by the Government and one-half by private individuals. Now, I provide that the reserve capital shall be equal to 5 per cent of the amount of loans, and that every borrower shall in his application make application for 5 per cent of the amount of the loans in the reserve capital of that bank; so that it would not make any difference how many loans you might make or how much the amount of the loans might be in the future—every time you make a loan you set aside 5 per cent of that loan as a reserve, to be specially invested, to be safeguarded in a way that it would not be under the exclusive control even of the bank. This would insure greater safety to the fund and give bondholders more confidence in the bonds issued by the bank.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN of Oklahoma. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that he may proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this amendment may close in five minutes unless some other gentleman indicates he wants to speak on it.

Mr. MANN. I have another amendment, but not on this.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment close in five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MORGAN of Oklahoma. Now, then, I provide that there shall be guaranty capital. The guaranty capital is secured in this way. Every bank is required to set aside annually one-fourth of 1 per cent from the interest payment of each borrower to the guaranty capital. That is to go on under the provisions of the amendment until the operating capital, the reserve capital and the guaranty capital combined, shall equal 10 per cent of the outstanding bonds. Now, some may say that that is a very large reserve to hold, but it is not too great. I know of no respectable land-credit institution of Europe that requires a less reserve than 5 per cent of the outstanding bonds, and in the amendment which I present I start out requiring 5 per cent shall be set apart as a reserve. Then I require one-fourth of 1 per cent annually on the face of the loan to be placed in the guaranty capital until it shall accumulate to about 8 per cent and until the guaranty capital with the operating capital and reserve capital shall equal 10 per cent of the outstanding bonds.

In addition to the annual contributions to the guaranty capital by borrowers under my amendment the Government contributes $500,000 to the guaranty capital of each bank.

My good friends who are in charge of this bill, I think I can show, and I will show before the day passes, that the reserve provisions of this committee bill are not sufficient; that you have not provided sufficient reserve funds to guarantee the losses, and that is the very great defect in the bill.

Now, I would have one and a half million capital for each bank. These 12 banks would have $18,000,000 capital, double the amount of capital the committee bill provides for. I believe in Government aid, but I believe in that kind of aid that will place these banks upon a solid foundation, that will place them in a position where they will not be required to go to the Government to borrow money. You take the amendment offered yesterday. It is a makeshift because it admits that these banks may get in a position where they will not have sufficient reserves to meet their losses from the nonpayment of interest, so you provide they shall go to the Federal Government and borrow the money. Now, while I am in favor of sufficient Government aid, I believe that kind is the poorest aid you can give to these public institutions. What the Government does it should do at the outset. What this Nation should do is to start these institutions out upon such a basis, upon such a foundation as to preclude the possibility that they should be compelled sometime to come to the National Treasury to get funds to prevent their becoming bankrupt. There is your difficulty. You are starting out timidly, and yesterday you adopted an amendment which provided that these banks might go to the Treasury of the United States and borrow money when they could not meet their payments. That might, of course, help out; but if you start them out with a sufficient reserve fund, which you have not done in this bill, you will put them in a position so they will never need to go to the Government—so they will never be required to go to the National Treasury and ask for a loan out of that Treasury to continue them in business. You are treading upon dangerous ground when you organize institutions and let them start out to do business without providing a sufficient reserve fund. I have provided a reserve fund that will make these institutions as strong and secure as any land-credit institution in the world. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 87, strike out lines 24 and 25, and lines 1 to 6, on page 88.

Mr. MORGAN of Oklahoma. Now, Mr. Chairman, if you notice, this amendment proposes to strike out all of that part of the section which provides for the repayment of $750,000 which the Government is supposed to subscribe at the beginning. I believe you are going to get into trouble through this matter of retiring these bonds, and I expect to show that in another amendment which I shall offer after this.

Mr. HOWARD. Will the gentleman yield right there?

Mr. MORGAN of Oklahoma. Yes.

Mr. HOWARD. You say you believe we are going to get into trouble. Now, then, if you really believe that, then you admit that this whole system is a failure; that it is going to prove an absolute farce if you say we are going to get into trouble by not retiring the original capital?

Mr. MORGAN of Oklahoma. I think the gentleman is hardly justified in that conclusion.

Mr. HOWARD. If this particular bank, as I understand it, and all of these Federal banks, are simply clearing houses for these securities, and if you have to subscribe the capital stock to take care of the mortgages that come into them, then your $1,500,000 is mere pretense as compared to the mortgages you are going to handle. If you can not make enough by charging 1½ per cent, it is going to be a complete failure.

Mr. MORGAN of Oklahoma. I say that the best aid that can be given is to give these banks outright what we are going to give them, and I believe that $750,000 or $1,000,000 in cash should be given to each of these Federal land banks.

Mr. MOORE of Pennsylvania. Will my colleague yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOORE of Pennsylvania. I do not know whether I am dragging the gentleman over old straw or not, but I would like to know of what earthly use these farm-land associations will be.

Mr. MORGAN of Oklahoma. I have an amendment which I will offer to that, if I get the opportunity.

Mr. MOORE of Pennsylvania. Is the gentleman favorable to that sort of red tape?

Mr. MORGAN of Oklahoma. I am opposed to the kind they have.

Mr. MOORE of Pennsylvania. I am wondering where the ordinary farmer comes in after he complies with the regulations and goes through this labyrinthian system.

Mr. MORGAN of Oklahoma. So I say that this entire provision ought to be stricken out, and whatever you give to these banks give to them outright, whether it be $200,000, $250,000, $500,000, $750,000, or $1,000,000. And then investors would know to what extent the Government would aid these banks. I have heard some people say, "Oh, well, it looks good to require it to be paid back, and that is not quite as populistic as to say we give it to them outright." But if we intend this to be a gift we ought to say so at the start.

Now, then, at the beginning of any system of land credit the expenses will be much larger. It will be a new proposition, and the greater care will have to be exercised, and, in addition to that, the loans will be smaller, and the banks can not stand the expense. But if you will give them outright this amount, you to some extent will give them an endowment fund, and that has

not been uncommon in the history of the land-credit legislation of the world. I know of no European nation of any importance that has not made donations to land-credit institutions. Now, when the great Republic of France founded the Credit Foncier it gave that bank $2,000,000 outright—not $2,000,000 to be paid back, but $2,000,000 outright—as a guaranty capital and as a help to secure the bonds which should be issued by that great institution.

Mr. TILSON. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. TILSON. Will the gentleman please explain why, if the Government should give $750,000 to each of these 12 banks outright, it would not be just as fair for the workingmen of my district or for any city in this country to come and ask that the Government contribute $750,000 for a bank upon which they can draw also?

Mr. MORGAN of Oklahoma. Well, of course, I believe that the National Government, through the Congress and through the Executive, can do anything for the public welfare under the Constitution, and I would favor such aid for institutions to aid laboring men in our towns and cities to acquire homes.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. MORGAN of Oklahoma. I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to proceed for five minutes more. Is there objection?

Mr. GLASS. Mr. Chairman, I ask unanimous consent that the debate on this section and all amendments thereto be concluded in five minutes.

Mr. HENRY. Mr. Chairman, I shall have to object to that, because it will take a little more time to consider another amendment.

Mr. MANN. I want to get a little information about one paragraph and offer an amendment to this section.

Mr. GLASS. How much time does the gentleman from Illinois want?

Mr. MANN. Personally I do not want very much time.

Mr. MORGAN of Oklahoma. I have one further amendment to this section.

Mr. GLASS. Say 10 or 15 minutes.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on this section and amendments thereto close in 15 minutes.

Mr. HENRY. That does not include the new section that I will offer?

The CHAIRMAN. No. Is there objection?

There was no objection.

Mr. FESS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Oklahoma yield to the gentleman from Ohio?

Mr. MORGAN of Oklahoma. Yes; I shall be glad to yield to the gentleman from Ohio.

Mr. FESS. Is it not true, according to the vote of yesterday, that it does not make much difference whether the bank can pay interest on the bonds or not? Will not the Government take care of it any way?

Mr. MORGAN of Oklahoma. I do not think that is true.

Mr. FESS. What is the use of limiting the amount?

Mr. MORGAN of Oklahoma. Because I believe that gentlemen of the committee on both sides of the House are honest in their convictions, doing the best they can for the interest of the country, trying to make this bill the best they can. I do not believe in creating these institutions in a way so that there is a possibility of their having to go to the Government to borrow money. It can be done. I do not believe that it has been so used in other land-credit propositions in other countries, because, going back to the very founding of the Landschaften, the idea has been to create for the farmer a security that will go out in the money market among investors of all kinds and that will be regarded as the highest type of security. That has been done so successfully that in most of the institutions the farmers' securities in debentures or farm-loan bonds are almost equal to the best Government bonds of Europe.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. HOWARD. What is your idea of the conditions thrown around joint-stock companies?

Mr. MORGAN of Oklahoma. I am going to discuss the question of reserves in the debate on the next amendment.

Mr. HOWARD. Now, as a matter of fact, the Landschaften bonds, which the gentleman has just mentioned, at the outbreak of the European war and for several months after the outbreak of the European war really sold for a higher value than the Prussian Government bonds themselves.

Mr. MORGAN of Oklahoma. You mean the late war?

Mr. HOWARD. Yes.

Mr. MORGAN of Oklahoma. I so understand, but I am not posted in a way so that I can assert it to be a fact.

Mr. HOWARD. Were they not quoted at $4 above the price of Government bonds themselves?

Mr. MORGAN of Oklahoma. I am not posted as to that.

Mr. McFADDEN. Mr. Chairman, will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. McFADDEN. It is your assertion that these 12 banks can issue and guarantee twelve times their capital?

Mr. MORGAN of Oklahoma. I will answer that in the debate on the next amendment.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

The question was taken, and the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I desire to offer another amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 88, line 6, after the word "par," strike out the period and insert a semicolon and also insert the following:

"*Provided*, That in no case shall the original stock be retired to an amount that will reduce the capital of any Federal land bank so that it will be less than one-twentieth of the outstanding bonds of the bank."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MORGAN of Oklahoma. Mr. Chairman, section 6 of this bill, which we are now considering, requires that every Federal land bank, before beginning business, shall have a subscribed capital of not less than $750,000. Any individual, firm, or corporation, or the government of any State or the United States is authorized to subscribe for this stock. After the books have been opened for a period of 90 days, if any part of the $750,000 capital shall have not been subscribed, the Secretary of the Treasury is authorized, in behalf of the United States, to subscribe for any amount that may not have been taken by other parties. Now, following this provision is the paragraph now under consideration, which provides that after the national farm-loan association shall have subscribed $750,000 to the capital of any Federal land bank, thereafter 25 per cent of all sums subscribed by national farm-loan associations shall be used to retire the capital stock held by the United States Government.

In the preceding amendment offered by me I moved to strike out this entire provision, because I believe that the United States Government would not be doing too much toward establishing a land-credit system for the farmers of the United States by subscribing permanently a reasonable amount to its capital. But the majority of the House have voted otherwise. The amendment which is now pending I have offered for the purpose of preventing any Federal land bank from issuing bonds in an amount which shall be greater than twenty times the capital of the bank. Under the provisions of this bill the capital stock of each Federal land bank automatically will be increased as new loans are made in an amount equal to one-twentieth of the amount of the loans, because every borrower is required to put up in capital an amount equal to 5 per cent of the amount of his loan. If no part of the capital shall be used to pay losses, the capital would always remain one-twentieth of the amount of loans. The amount of bonds issued can never exceed the amount of loans. However, we can not tell what emergencies may arise. Conditions may arise when the bank will be compelled to use a part of its capital to meet losses. The amendment which I have offered would simply prevent the retirement of the capital subscribed by the Government when such retirement would reduce the capital to an amount less than one-twentieth of the outstanding bonds. This would seem to be a wise provision.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, one more amendment.

Mr. MANN. Mr. Chairman, I move to strike out the last word for the purpose of asking a question which probably can be answered very shortly.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. I do not quite understand the last paragraph of this section, which provides that at least 20 per cent of the

capital stock of any Federal land bank which is paid in by any farm-loan association shall consist of cash in the vaults of said land bank, and various other things. Is it the purpose of that provision that 20 per cent of the amount of the capital stock shall be retained in the bank as cash or deposits or negotiable instruments?

Mr. PHELAN. Without that provision in the bill the banks were confined in their investments almost, if not entirely, to mortgages or United States bonds. We wanted to have a provision in the bill that some of the capital should be invested in liquid securities, so that if the banks were in need of cash at any time to pay their cash demands they would have it or could get it quickly; that was the reason for putting it in.

Mr. MANN. Let me get it straight in my head. The language of the bill is—

At least 20 per cent of the capital stock of any Federal farm land bank * * * shall consist of cash—

Of course that is an impossibility.

Mr. PHELAN. Yes; that is true.

Mr. MANN. Now, I did not know whether it meant that at least 20 per cent of the subscription should be paid in cash by the farm-loan association, or whether it was intended that when paid in the Federal land bank should retain 20 per cent in cash or other negotiable securities. What was it?

Mr. PHELAN. That is a mistake. What was meant was that it should be either kept in cash or invested in these liquid securities.

Mr. MANN. The language is not very fortunate.

Mr. PHELAN. We will ask to go back and perfect that.

Mr. MANN. You have not gone by it yet. It says—

Or of investments in negotiable interest-bearing securities.

These mortgages are negotiable securities.

Mr. PHELAN. I do not believe a mortgage is a negotiable security.

Mr. MANN. The mortgage may not be a negotiable security, but the note which it secures is a negotiable security. All of their money is invested in negotiable securities. I assume that when a man gives a mortgage on his land he signs a note.

Mr. PHELAN. The securities have to be approved by the Federal farm-loan board, and our intention was to have short-time liquid assets. I think the wording is not as clear as it ought to be, and we will be glad to make a change in the section for the purpose of making it clear.

Mr. MANN. I am asking for information, because I thought when I first read it that the 20 per cent had to be paid in in cash.

Mr. PHELAN. I am afraid the wording is not as clear as it ought to be.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. MANN. Yes; but first I want to go to another matter.

Mr. MOSS of Indiana. Go ahead.

Mr. MANN. I move to strike out, on page 86, lines 18 and 19.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 86 strike out lines 18 and 19.

Mr. MANN. Mr. Chairman, the language of the bill is that the stock owned by the Government shall receive no dividend. If my amendment prevails, it will read:

Stock shall share in dividend distributions without preference.

It seems to me if we take the Government money and put it into these banks, and the Government furnishes the most of the money and owns the most of the capital stock in the banks, and then the people who borrow own a portion of the capital stock, if there is a profit which is paid in the form of dividends, there is no reason why the profit which naturally would go to the Government should go to the borrowers. I would not say that the Government money should be deposited on interest, or that there should be any requirement that the money furnished by the Government should draw interest; but if there are dividends to be paid on the capital stock, suppose the Government owns most of the capital stock and there are considerable dividends to be paid, under the terms of the bill apparently a few borrowers would get all the dividends. I do not think that is a fair proposition. I do not say what I shall do, but I have been inclined to vote for this bill if it is left in a reasonable shape, and I am perfectly willing to have the Government advance some money for the purpose of putting into operation a plan somewhat experimental, in the hope that it will be successful; but I have always been opposed, and still am opposed, to the Government advancing money side by side with private individuals, and then if there is a profit which comes out of it, that the private individuals shall get all the profit and the Government get nothing. That is not a fair proposition, either in this or any other scheme where the Government intends to be a part owner.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PHELAN. Mr. Chairman, in explanation of that provision to which the gentleman from Illinois [Mr. MANN] has referred, I will state, first of all, that as with many provisions in many bills, there were differences of opinion in the committee as to just what the provision ought to be, and that particular provision was one upon which there was some disagreement in the original committee which sat between Congresses and also in our Banking and Currency Committee; but we had to come to an agreement at some time, and I am going to state one of the things which offsets some of the very pertinent objections of the gentleman from Illinois [Mr. MANN].

In the provisions of the bill you will notice that there is a provision for a reserve fund, and that a very large proportion of the original earnings are set aside until that reserve fund reaches a certain amount. Accordingly the greatest part of the reserve will come out of the first earnings of the bank. But in a general way those earnings will go into the reserve, while the Government money——

Mr. MANN. Nobody is objecting to that.

Mr. PHELAN. A certain part of the earnings will be going into the reserve; and, inasmuch as the Government is contributing to this system and trying to get it started, some of the members felt that it was reasonable enough to have the Government's money, or a certain part of it, in the Government reserve. That is not exactly mathematical——

Mr. MANN. Nobody objects to that; but does not the gentleman think it much more likely that it will not go into the Government reserve if the private individuals who have capital stock may receive it in dividends and the Government get nothing?

Mr. PHELAN. Except that there is a very definite provision that 25 per cent of the net earnings shall go to the reserve. It is not discretionary with the board of directors at all. They are absolutely obliged to take that much and put it into the reserve.

Mr. MANN. I should be perfectly willing that 25 per cent should go to the reserve; but, if the Government has 80 per cent of the stock and private individuals have 20 per cent, the private individuals would say, "You can afford to pay us a dividend instead of turning it all into the reserve in the first instance."

Mr. PHELAN. Yes; but I was pointing out that the proportion, which is a very large proportion—25 per cent—must go into the reserve, and it will have to go in for some years after the system starts.

Mr. MANN. Seventy-five per cent of the earnings might go to the owner of less than one-half of the capital stock as dividends.

Mr. PHELAN. I have told the gentleman that it is not scientific and it is not mathematical, but it is the conclusion we came to.

Mr. MANN. Nobody objects to building up the reserve and not paying any dividends; but when you do pay dividends, why should the dividends be paid to a class of small holders of the capital stock and nothing to the Government?

Mr. MOSS of Indiana. Will the gentleman from Massachusetts allow me to answer the gentleman from Illinois?

Mr. PHELAN. Yes.

Mr. MOSS of Indiana. I would like to call the attention of the gentleman from Illinois to the fact that in the beginning 25 per cent of all the net earnings of a land bank goes to the reserve until such reserves amount to 20 per cent of the capital of the bank, and then the reserves fall to 5 per cent of the net earnings. So at the beginning 75 per cent of the net earnings is distributed to the borrowers as a dividend, and later on 95 per cent may be distributed. It is manifest that after the bank shall have been in operation some years a larger proportion of the earnings will probably be distributed in dividends, thereby reducing the rate of interest which the borrower may actually pay. We believe that the earnings on the Government capital during the first generation of borrowers will not make the net rate of interest any lower than it will be during the second generation of borrowers, after such capital will be retired. The dividends to the first borrowers will not amount to more than 75 per cent of the earnings, while later such dividends will amount to 95 per cent. It is mutual.

Mr. MANN. Oh, it is not mutual; it is one-sided.

Mr. MOSS of Indiana. We take 25 per cent and build up the reserve fund, and after the reserve is built up the next generation will only contribute 5 per cent to the reserve fund and will get 95 per cent of the earnings in dividends, which will reduce their interest rates. It is evident that those borrowers who come in later will get a lower rate of interest than those who went in

earlier. This disadvantage is not more than offset by the advantages which the possession of Government funds will give. Then, again, we provide a definite time for the retirement of the Government capital.

Mr. MANN. I think it would be wiser not to endeavor to retire the Government capital, but pay dividends as you pay them to other people after you have built up your reserve.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. MANN) there were 31 ayes and 48 noes.

So the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 88, line 7, after the word "least," strike out "twenty" and insert "fifty."

The CHAIRMAN. All debate on this section is exhausted, and the question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

Mr. HENRY. Mr. Chairman, I offer my amendment.

The Clerk read as follows:

Amend, page 88, by inserting after line 14 the following:

"Whenever any Federal land bank presents to the Secretary of the Treasury farm-loan bonds of any amount he shall advance therefor at their par value an equal amount of money out of the Treasury not otherwise appropriated: *Provided*, That the aggregate of all sums so advanced by the Secretary of the Treasury in any fiscal year shall not exceed the sum of $50,000,000."

Mr. HENRY. Mr. Chairman, this amendment, in my judgment, is the one thing that will make it certain that this bill is workable. Why should this House balk at Government aid in this system in the most abundant fashion? Why, Mr. Chairman, the Senate, in section 34, in many respects went a long way, and that section has been practically rewritten into the bill in the amendment offered by the gentleman from South Carolina [Mr. LEVER].

A little more than a year ago this House voted by the most decisive majority of nearly 3 to 1 to insert section 30 of the Bulkley bill in the bill then pending, which really provided for genuine Government aid. This amendment provides that the Government stands ready to purchase $50,000,000 of farm-loan bonds in any one year, and by an overwhelming vote in this House we declared it to be our judgment that it was necessary in order to make the system effective.

Every country in the world that ever set up a rural-credit system has extended Government aid. Frederick the Great, more than 100 years ago, when the Silesian landschaft was established, provided for Government aid, and when the other landschaften of Germany were authorized Government aid in superabundance was provided. In 1852, when France wrote her rural-credit act, after 26 years of agitation, she came to the rescue of the men who till the soil and produce the food and raiment for the balance of the world.

To-day the farmer can go to the treasury of France, through the proper banks, and secure funds for the purpose of purchasing a home and improving it and financing his needs. Up to this good hour no Government has ever undertaken to establish a system of rural credits for the benefit of the farmer without coming to his rescue in a practical and sensible way. [Applause.] Then why should this Congress, composed of the Representatives of the American people, tender to the farmers something that may be doubtful?

We said more than a year ago that we were willing to write Government aid into the bill. Let us not reverse our record; let us do it to-day. Here is a simple amendment in a few words: Provided that whenever any Federal land bank shall present to the Secretary of the Treasury farm-loan bonds in any amount the Secretary shall advance upon those bonds an equal amount of money in payment therefor, provided that there shall not be more than $50,000,000 of these bonds purchased by the Government in any one year.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. HENRY. Yes.

Mr. MANN. In view of the provision of the Constitution which provides that no money shall be drawn from the Treasury but in consequence of appropriations made by law, does the gentleman think that his amendment would accomplish the purpose sought?

Mr. HENRY. Oh, I think so. I understand all that. The Secretary of the Treasury holds that he has authority to sell the Panama Canal bonds now if he desires to.

Mr. MANN. Oh, certainly.

Mr. HENRY. And we are providing for appropriating it by this very amendment.

Mr. MANN. Oh, no; not by the amendment.

Mr. HENRY. It will be appropriated.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HENRY. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. CANNON. Mr. Chairman, will the gentleman allow a suggestion?

Mr. HENRY. Yes.

Mr. CANNON. Why limit the matter to fifty million? Why not throw the whole Treasury open?

Mr. GLASS. Mr. Chairman, I would like to have a unanimous-consent agreement to close debate in five minutes.

Mr. MANN. Oh, no. I got skinned yesterday without talking. It may be the same hunch to-day, in favor of this. Their leader is in favor of this, and they have followed him pretty well so far.

Mr. GLASS. How much time would the gentleman suggest?

Mr. MANN. Oh, let it run along a little bit and see.

Mr. MADDEN. It seems to me that we ought to have an opportunity to discuss an important question like this.

Mr. GLASS. Is it an important proposition?

Mr. MANN. It is. It is the most important question that has been before the House. I want to know whether we are going to take all of the money in the Treasury under the amendment of the gentleman from Texas. He says fifty millions, but it is fifty millions now and fifty millions again. Why not take it all?

Mr. GLASS. Does the gentleman think that we are going to take any of it?

Mr. MADDEN. I seriously think that some gentlemen in the House think so.

Mr. MANN. Of course the Democratic majority in the last Congress was larger than in this, but they put it in once or twice.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment close in 15 minutes. Is there objection?

Mr. HENRY. That does not interfere with my request that was put for five minutes, does it?

Mr. MANN. I object, anyway.

Mr. GLASS. Mr. Chairman, make it 20 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate close in 20 minutes. Is there objection?

Mr. MANN. I object.

Mr. HENRY. Mr. Chairman, why should gentlemen squirm about this proposition? It is plain and simple. In the Federal reserve act you have placed the credit of the Government in pawn for the benefit of the banking and business world. You have placed the credit of 100,000,000 people at the disposal of the commercial interests of the country. You provide for issuing Federal reserve notes. Why should gentlemen who have placed the credit of this Government in the hands of the commercial world complain when we ask that a small portion of it be placed in a system for the benefit of the farmer? You have guaranteed every Federal reserve note for the benefit of the commercial interests, and provided that they may be issued almost without limit as long as you keep a 40 per cent gold reserve. Here is a proposition exactly on all fours with that. No man can differentiate and make any distinction in the principle. This amendment proposes to put the credit of the Government behind the farmer's banking system so that we will offer him nothing not bottomed upon the good faith and resources and credit of this Government. While I shall vote for the bill if the amendment fails, yet I believe it is the very quintessence of good judgment to make it a part of this measure. You have many admirable features in the bill already. It goes very far in the right direction and is a splendid basis upon which we may build in the future. You provide for a Federal farm-loan board, which is a long step toward effective legislation. Two years ago when we proposed a separate farm-loan board for such a system as this some gentlemen frowned at the idea and said no. They said the farmer's system must be put under the Federal reserve system and the farmer chained to the chariot of the banking fraternity in this country. And yet to-day you come with a system with a separate and distinct farm-loan board to direct and supervise this law for the benefit of the farmer. But you should go further. You provide for going into the Treasury and using $9,000,000 by taking stock in the 12 Federal land banks. That is Government aid and is all right, but it is not enough. You exempt these bonds and certain instrumentalities from taxation. This is Government aid and is all right, but you do not go far enough. If gentle-

men want to tender the farmer something really worth while, let them see to it that these bonds shall be underwritten and guaranteed by the Government. When it is understood that the Government will purchase $50,000,000 of these bonds every year, there is not a money market in the world where they will not sell at par at any and all times. Then it will not be necessary to take this money out of the Treasury and purchase them. Let us make assurance doubly sure and write this amendment into the law. [Applause.]

Mr. SMITH of Michigan rose.

Mr. STEAGALL. Mr. Chairman, I desire to offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Michigan is recognized; but, without objection, the amendment to the amendment will be considered as pending.

Mr. MANN. The gentleman has a right to offer his amendment to the amendment.

The CHAIRMAN. Does the gentleman desire his amendment reported at this time?

Mr. STEAGALL. I will wait until the gentleman from Michigan is through.

Mr. SMITH of Michigan. Mr. Chairman, some of the arguments and talk we hear in the discussion of this important question are strangely at variance with the talk we heard during the discussion of some of the revenue measures when they were presented to the House. We listened very frequently then to talks to the effect that the money to be so raised by levying a duty upon imports was money and a tax levied upon the backs of the people.

Now, they have all discussed this question as if it was Government money that is going to be used for the establishment of these banks. Now, that is a mistake. That money is the people's money, and, according to the discussion we have heard in the consideration of those revenue measures, it is the money that is taken out of the pockets and off the backs of the people, and is not Government money. Now, I want to take for my text a little extract from what the gentleman from Georgia [Mr. HOWARD] said about bankers in Georgia. He states:

> When they elect bankers to the legislature they put all those bankers on the banking committee of the State legislature, and they do nothing to reform the usury law. If you would put some of these skin-flint, Shylock, pawnbroker bankers in the chain gang, this country would prosper a great deal more than it is prospering now.

Now, I want to say about that that the insurance companies of this country have got $647,000,000 loaned upon farm mortgages of this country at the rate of 5.55 per cent. All the banks of this country have total bank assets of $27,000,000,000. The national banks have total assets of $12,000,000,000.

Mr. HARDY. Will the gentleman yield for a suggestion there——

Mr. SMITH of Michigan. Yes.

Mr. HARDY. In reference to the 5 per cent money. I want to say I have borrowed money, and that insurance money cost me 7 at the lowest and even 8 per cent on farm loans.

Mr. EAGLE. And commission.

Mr. HARDY. Eight per cent, including commission, and the farmers do not get in my section any 5 per cent money.

Mr. EAGLE. And on three years' time.

Mr. HARDY. Five years' time, paying 8 per cent.

Mr. SMITH of Michigan. Down in Texas. Now, the gentleman says, "commission." Now, the commission you pay is just exactly what you agree with the commission man to pay, and you pay commission under this land-bank system also.

Mr. HARDY. It is just what it costs the farmer.

Mr. FESS. Will the gentleman yield?

Mr. SMITH of Michigan. Yes.

Mr. FESS. If the insurance company does not lend for less than 7 per cent, is that an indication of bad credit on the part of the borrower? They are lending for less than that at other places.

Mr. SMITH of Michigan. Certainly. I wish to state that before coming here this morning I saw a copy of a paper published in my home city. It is dated the 28th day of January, 1916, and in this newspaper there are two notices in reference to commissions on the loaning of money upon farm mortgages, and I wish to call attention to one of them, a savings bank in my town:

> Money to loan on real estate security. No commission, no expenses.

That paper was sent to my colleague from Michigan, Congressman MAPES, whose name appears on the address slip here, from my own town. Now, I can remember the time, gentlemen, when up in Michigan a gentleman gave a mortgage for $500 and got $450 in money, and he paid 10 per cent interest upon the face of the mortgage; but that time has long since gone by. Michigan and Illinois are the only two States in the Union that have legal rates of interest at 5 per cent, and I can not see, gentlemen, how it comes that you stand here and plead for a lower rate of interest when under the laws of your own States the legal rate of interest is from 6 to 8 per cent. Why do not the people of your own States say there shall be no interest over 5 per cent collected upon a mortgage? What you are asking us to do is, as an instrumentality of the Government, to establish these banks and loan money on farm mortgages at a low rate of interest, but if you want to help the farmer with a low rate of interest why do you not enact a law in your own State providing that they shall not pay interest above a certain low per cent? Why not enact State laws upon the same theory? I have a little document here——

Mr. HARDY. May I ask the gentleman if he seriously——

Mr. SMITH of Michigan. Just wait a minute.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET. I ask unanimous consent that the gentleman have five more minutes.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that debate on this amendment be closed in 10 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this amendment close in 10 minutes. Is there objection?

Mr. FESS. I would like to have five minutes on this amendment.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment close in 10 minutes. Is there objection?

Mr. FESS. Reserving the right to object, I want five minutes.

Mr. SMITH of Michigan. And I would like to have five minutes more.

Mr. EAGLE. Mr. Chairman, reserving the right to object, I should request five minutes.

Mr. MANN. We would like to have 15 minutes over here.

Mr. GLASS. Mr. Chairman, it will be observed that gentlemen are not discussing this amendment. They are talking about other things, and I want to get along with this bill, and I think it is very advisable to close debate.

Mr. MANN. I think that the gentleman from Michigan means to talk to the amendment.

Mr. SMITH of Michigan. The only trouble is, I did not have the time.

Mr. GLASS. Mr. Chairman, I move that all debate close in 15 minutes.

Mr. MANN. We want 15 minutes over here.

Mr. GLASS. Well, 10 minutes over there and 5 over here.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment close in 15 minutes. Is there objection?

Mr. MANN. Mr. Chairman, reserving the right to object——

Mr. BARKLEY. Mr. Chairman, I object.

Mr. GLASS. Mr. Chairman, I move that all debate on the amendment close in 15 minutes.

The question was taken, and the Chair announced that the noes appeared to have it.

Mr. GLASS. Mr. Chairman, I move that all debate be closed in 20 minutes.

The CHAIRMAN. The gentleman from Virginia moves that all debate on this amendment be closed in 20 minutes.

Mr. MANN. I think the gentleman had better arrange something by unanimous consent.

Mr. GLASS. Mr. Chairman, I ask unanimous consent——

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment close in 25 minutes.

Mr. MANN. We want 15 minutes over on this side.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on this amendment close in 25 minutes. The Chair will say he understands that the gentleman from Alabama [Mr. STEAGALL] and the gentleman from Texas [Mr. EAGLE] and three gentlemen on the Republican side will be recognized. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan [Mr. SMITH] have five minutes.

The CHAIRMAN. In addition to the time?

Mr. MANN. Oh, no.

The CHAIRMAN. The gentleman from Michigan [Mr. SMITH] is recognized for five minutes. Is the gentleman one of the three on his side?

Mr. MANN. He is one of the three who desired time.

Mr. SWITZER. I would like to ask the gentleman a question.

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from Ohio?

Mr. SMITH of Michigan. Yes, sir.

Mr. SWITZER. Inasmuch as the proponents of this amendment refuse to allow me to ask a question, I would like it if the gentleman would explain how long this would be to the advantage of the farmers of the United States so long as there is no money in the United States that is unappropriated.

Mr. SMITH of Michigan. We may get the money by selling the Panama bonds. Now, the question becomes——

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. SMITH of Michigan. Yes.

Mr. MOORE of Pennsylvania. Suppose we use up the Panama Canal bonds in paying for the nitrate plant and the ships that we are to buy; then where will we go for money?

Mr. SMITH of Michigan. We heard it discussed here when we were talking about the warehouse bill that cotton was the best security in the world.

Now, I wish to read from a pamphlet I have here, entitled "What is Populism?" written by T. C. Jory, A. B., A. M. It says:

> What is "the subtreasury plan of the Farmers' Alliance"? This plan proposes, first, the establishment of Government warehouses in all countries having need of the same for the safe storage of nonperishable farm products; second, the issue of warehouse receipts by the Government agents in charge of said warehouses to depositors of such produce; third, Government loans, at 2 per cent, on said warehouse receipts as security, to the extent of not more than 80 per cent of the local market value of the produce represented by said receipt.

So it is not anything new to argue for Government aid, as it has been the hobby of quite a few.

Now, you can not, as the gentleman from Illinois stated here so succinctly one day on the floor of the House, relieve a certain part of the property in any community by taxation without increasing the burden upon the remaining taxable property in that community. That is true enough. Now, you are going to relieve certain taxable property, and I wish to make the statement that you have not asked for an instrumentality that can not be performed by the member banks that are already established under the regional reserve system. Any mortgage that comes to a National bank or a State bank is readily accepted in our part of the country. The money is readily provided by the bank or money lender to take it up, and the banking law provides that national banks can loan one-third of their time deposits, which means a very large amount.

This law was considered for three long weeks in the Senate of the United States by distinguished and most able men. I do not think it is fair to the House to bring this bill in here and speed it up and have it put through in such a short time without giving the Members time to give it due deliberation, discussion, and consideration.

Mr. STEAGALL. Mr. Chairman, I desire to have the amendment reported.

The CHAIRMAN. The Clerk will report the amendment to the amendment in the gentleman's time.

Mr. MANN. The reading of the amendment is not taken out of his time.

The CHAIRMAN. The Chair thinks it is. The time to report the amendment to the amendment is the time when it comes up.

Mr. MANN. But where debate is limited, the time occupied in reading or reporting an amendment is never taken out of the time for debate.

The CHAIRMAN. The Chair understands that fully. The gentleman asks that this amendment be reported, but the Chair thinks it is out of order.

Mr. MANN. It is not out of order.

The CHAIRMAN. The Chair thinks it is, but may be mistaken.

Mr. MANN. The amendment is an amendment to an amendment pending, and is in order.

The CHAIRMAN. The gentleman can offer it out of his time.

Mr. MANN. He can offer it and then is entitled to five minutes to debate it.

The CHAIRMAN. The Clerk will again report the amendment.

The Clerk read as follows:

> Amend the amendment by adding at the end thereof the following:
> "*Provided further*, That such bonds so to be purchased by the Secretary of the Treasury shall be furnished in equal amounts by each of the 12 Federal land banks."

Mr. HENRY. Mr. Chairman, I have no objection to that amendment. I accept it.

The CHAIRMAN. Does any other gentleman desire to be recognized? If not, the Chair will put the question.

Mr. HEFLIN. The gentleman from Alabama [Mr. STEAGALL] does not care to use his time. I wish to say a few words, Mr. Chairman.

The CHAIRMAN. The gentleman from Alabama [Mr. HEFLIN] is recognized.

Mr. HEFLIN. Mr. Chairman, the Government in substantial fashion gives aid to the commercial banking system now operating in the United States, and we must provide at least as much Government aid to this agricultural banking system.

The amendment of the gentleman from Texas [Mr. HENRY], I think, contains an important provision. It strikes me that it would be well to amend his amendment by saying that when, in the judgment of this Federal farm-loan board, the conditions warrant the same, said board may present to the Secretary of the Treasury farm-loan bonds, and then let his amendment follow the words that I have suggested. I would provide that when conditions required it the Federal farm-loan board could take the farm-land bonds to the Secretary of the Treasury and obtain money for each of the 12 regional banks to the amount of a million dollars each, if conditions warranted it. If for any reason disturbed conditions should suddenly come and the Federal farm-loan board deemed it necessary to obtain additional money to meet the requirements of this agricultural banking system, that board ought to be permitted to go to the Federal Treasury with farm-loan bonds and obtain that money and not be compelled to wait and cripple the bank in its business until the bonds could be placed upon the market and sold. [Applause.]

When our present banking system felt the need of a large sum of money in 1914, in order to prevent serious disturbances and financial injury to its business the Government gave assistance and loaned the banks millions of dollars, and I submit to this House that it is fair and just that we should provide for quick and immediate relief for this new banking system and arrange for it to obtain money from the Secretary of the Treasury by depositing with him farm-loan bonds. Republican Members protest against this recognition by the Government of farm-loan bonds, but they interposed no objection when under a Republican administration Mr. Cortelyou, as Secretary of the Treasury, issued money on railroad bonds. [Applause.]

There are no better bonds than farm-loan bonds, and yet the Republicans are willing to have money issued to railroads on their bonds, but they would deny to the business of millions of our farmers the same treatment by the Government.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Alabama yield to the gentleman from Michigan?

Mr. HEFLIN. I have not the time to yield. The Federal farm-loan board, when conditions required it, could go to the Treasury and say, "We have some farm-loan bonds. You know that they are good. We want some money for the farm-loan banks, and we want it now. We do not want to be forced to place these bonds on the market now." The gentleman from Michigan is a banker——

Mr. SMITH of Michigan. And a farmer.

Mr. HEFLIN. Well, a banker and a farmer, and both occupations are good. But he seems to be trying pretty hard to keep us from getting a farm-credit system in operation, fearing, I suppose, that it will be in competition with his banking system. The agricultural business of the United States is big enough to have a banking system suited to its demands, and we propose to pass this bill with amendments and provide a banking system for the millions of our farmers who produce that which helps to feed and clothe the world. [Applause.] I see some gentlemen over there from the large cities of the East shaking their heads. Of course some of you will vote against the bill. I have been amazed, Mr. Chairman, during this debate at the suggestions made by four or five gentlemen from these big cities, talking about what should constitute a good farm-credit system in the United States.

Mr. Chairman, these gentlemen, clever enough personally, are the very last men in the world that I would select to write a banking bill in the interest of the farmer. No, gentlemen. Lord God of Hosts, be with us yet, lest we forget! [Applause and laughter on the Democratic side.]

Mr. MADDEN. Mr. Chairman, the amendment offered by the gentleman from Texas [Mr. HENRY] is a most extraordinary piece of gall, it seems to me.

The CHAIRMAN. What did the gentleman say? [Laughter.]

Mr. MADDEN. But it is not to be wondered at, because only a year or two ago, when the Underwood bill was under consideration here, you opened the American markets to the farm products of every other country in the world, and the products of these farms in foreign countries have been admitted to the American market to the extent of hundreds of millions of dollars. You have emptied the Treasury by your extravagant expendi-

tures. You have destroyed the opportunity of the American farmer to maintain the American market, and now you propose to dive into an empty Treasury to take out $50,000,000 of money every year to buy bonds against which there are no liquid assets and no gold reserve.

Mr. HOWARD. Mr. Chairman, will the gentleman yield for a question?

Mr. MADDEN. No; I regret I can not yield now. I have only a minute. Why, that proposition would make a dog laugh. [Laughter.] No wonder the American farmer has no confidence in the integrity of purpose of the Democratic Party. There is not a farmer in America that has a particle of confidence in anything that you undertake to do. They do not want this legislation. They do not need it. The farmers of America, by and large, are better off than any other class of people in America.

You propose in this bill to charge them 5 per cent. They can get money at that rate at any place in America. Then you propose to permit the charge of 1 per cent for overhead charges. They do not have to pay more than three-tenths of 1 per cent for overhead charges when they are borrowing their money from private parties. You propose in this bill to deposit $9,000,000 to establish banks. You propose to deposit $6,000,000 more to pay the interest, and now you propose to charge the Treasury with an expenditure of $50,000,000 a year to buy the bonds.

Is there anything else you can think of? [Laughter.] If there is, put it in the bill. [Renewed laughter.] If you want this bill to be ridiculed by the American people, add all these iniquitous things you can think of to it, and you will have a bill that nobody would spit upon. [Laughter.]

Why, this bill is ridiculous, and you are making it more ridiculous by every amendment you offer. The farmer can get along without your legislation. There is no sentiment for this legislation in the country. I heard a lot of farmers here the other day. They were in the gallery, listening to what you had to say. They were laughing at you. They said you were ridiculous; that you did not know anything about the farmers; that they did not need you; that all they needed from you was to be let alone and allowed to work out their own destiny. Do not make the mistake of believing that you are pandering to the sentiment of the farmer, because the farmer has more sense in a single minute than all the aggregated sense combined on that side of the House. [Laughter and applause.]

Mr. HARDY. Hooray for Chicago. [Laughter.]

Mr. EAGLE. Mr. Chairman, the remarkable spectacle just observed, the remarkable temper just displayed by the gentleman from Illinois [Mr. MADDEN] is well worthy to be made [laughter], not in the American Congress, where the proud and free representatives of a great people devise means for the advancement of civilization in this noble country, but rather it is a fitting harangue to be made over in the down-east side of Chicago, where the gentleman dwells, where recently they had a banquet given to negro men who had married white women.

Mr. MADDEN. Chicago will take care of itself. It does not need any defense from the gentleman from Texas.

Mr. EAGLE. Yes; and the spirit of honorable men on both sides of this Chamber will not tolerate the further oppression of the American farmer by the misuse of financial power through usurious farm-mortgage dealings. The farmers who produce the wealth of this Nation do need but never get any defense from the gentleman from Illinois. [Applause.]

I have seen all sorts of things in the three years I have been here, but his is the most remarkable exhibition of agricultural ignorance, of smug self-assurance, of unblushing affrontery that I ever observed here or anywhere else. [Laughter.]

But during the two minutes left I at least want to say this: The particular proposition to which we are now giving consideration is not in the exact form or in the position in the bill in which I think it ought to be. But I do believe the Government ought to aid this system. Now, I want to assure this House, as a member of the Banking and Currency Committee, that, in my deliberate judgment, this measure is so framed that it constitutes the groundwork of a system through which the American farmer may work himself to freedom from obligations and from under the oppression of abnormal and enormous burdens. [Applause.] The $5,000,000,000 for which the farm lands of America are mortgaged at the present time bear an average of between 8 and 9 per cent. I know from personal experience in my great State of Texas, where nearly 5,000,000 people dwell, perhaps 65 per cent of whom are engaged in agriculture, that the burden of agents' commissions, of the interest rate expressed on the face of the mortgage, of attorneys' fees, of abstract charges, of renewals which are enforced by the short loans of three years, of the 10 per cent attorneys' fees for foreclosure and the starting again of the same loan, wipe out the annual increment of the average Texas farmer.

Mr. SLOAN. Will the gentleman yield?

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. EAGLE. You must give me a little more time and then I will yield to all of you. I yield first to the gentleman from Nebraska [Mr. SLOAN].

Mr. SLOAN. I want the gentleman's authority for the statement that interest rates on farm loans are 8 or 9 per cent. I challenge the correctness or the approximate accuracy of that statement. I am in favor of legislation of this character, but I challenge the accuracy of the statement and ask the gentleman to give his authority.

Mr. EAGLE. If the gentleman will read the 1,500 pages of hearings taken before the Bulkley-Hollis joint committee of the House and Senate during the Sixty-third Congress——

The CHAIRMAN. The time of the gentleman has expired.

Mr. EAGLE. I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for five minutes. Is there objection?

Mr. FESS. Is that to be taken out of the time already allotted?

The CHAIRMAN. Is there objection?

Mr. MANN. Can we have the time extended five minutes?

Mr. BUCHANAN of Illinois. I ask unanimous consent that the time be extended five minutes and that the gentleman from Texas have five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the time for debate be extended five minutes, and that the gentleman from Texas [Mr. EAGLE] have five minutes. Is there objection?

There was no objection.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. EAGLE. I have not answered the gentleman from Nebraska [Mr. SLOAN] yet. In the 1,500 pages of hearings which we caused to be printed, and which are subject to the gentleman's order in the document room, he will find the unmistakable evidences, in substance, of what I have said, except that I was really overmoderate in stating the outside amount of the exactions under the guise of interest charges which the American farming community is paying for that $5,000,000,000.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. HAMILTON of Michigan. Will the gentleman yield?

Mr. EAGLE. I want to get on with what I have to say, but I will yield to my friend from Illinois [Mr. BUCHANAN].

Mr. BUCHANAN of Illinois. Because of the remarks of my colleague from Chicago [Mr. MADDEN], I feel called upon to make a statement, in which I believe I represent the sentiments of the working people of the city of Chicago.

Mr. EAGLE. I do wish my friend would not do it in my time.

Mr. BUCHANAN of Illinois. I wish to say that the working people of the city of Chicago are in favor of Government aid to the farmer in the way of farm loans.

Mr. MADDEN. This does not apply to the working people of Chicago. This applies to the farmers of the country.

Mr. RAGSDALE. Mr. Chairman, I make the point of order that the gentleman from Chicago [Mr. MADDEN] has no right to "butt in" on this debate without the permission of the gentleman who has the floor.

Mr. BUCHANAN of Illinois. I want to say that the working people of Chicago, as well as myself, are pleased to have an opportunity to assist in passing legislation that is really beneficial to the farmer, in the way of making it easier for farmers to secure loans.

Mr. EAGLE. In the three years I have served here the votes of the gentleman from Illinois have always been on the side of the farmers and the laboring men of this Nation. [Applause.]

Now, I submit that the financial interests of this country are made up of the State and National banks and trust companies, and I submit that the manufacturing interests of this Nation are just as much interested as are the farming communities in every county in this Nation in the passage of this form of legislation, because a happy and contented rural people who own their own homes are better purchasers of the goods, wares, and merchandise of the manufacturer and are better and more secure borrowers of the funds of financial institutions than are a tenant farming community driven from "pillar to post" by excessive charges. [Applause.] I tell you that except in great States like Iowa, Indiana, Ohio, Illinois, and Pennsylvania, which have had a century already to advance to their present condition of farm development and farm ownership, and to free themselves from debt——

Mr. McFADDEN. Will the gentleman yield——

Mr. EAGLE. I wish to complete this statement. Except in such States as those I have mentioned the average total amount paid on farm loans by way of interest, bonuses, lawyers' fees and agents' commissions and for renewal charges amounts to the annual burden at least 18 or 20 per cent, just to carry the loans along, without any amortization or payment of the principal whatsoever. That is an intolerable thing. I say, as a man living in a city of 125,000 people, but born and reared in the country, and forming my impressions, therefore, by the course of my life as you do from the course of your lives, the foundations of this Nation, not alone in its food supply, in its clothing supply, in the opportunity for it to progress, but also in its fundamental stability and in the rock-ribbed adherence to constitutional principles, are the American farmers. [Applause.]

I helped with all my heart in a humble way and played a humble part in framing the Federal reserve bank system, under which in the midst of a financial crisis created by world-war conditions this Nation has stood as steady as a rock. It was in substance that which the 7,500 national banks and the 18,000 State banks and trust companies, with twenty or thirty billion dollars of assets, had to have in order to prevent panic. It is a law which has made them so secure in their stability that never again can a panic overrun this land. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. EAGLE. I am going to be presumptuous enough to ask for five minutes more, not to be taken out of the allotted time.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that he may proceed for five minutes. Is there objection?

There was no objection.

Mr. SWITZER. Will the gentleman yield?

Mr. EAGLE. Yes.

Mr. SWITZER. Is the gentleman interested in any banking institution in his State?

Mr. EAGLE. I have not a nickel invested in any enterprise of that kind.

Mr. SWITZER. But the gentleman says that these institutions are robbing the farmers.

Mr. EAGLE. My point is that the net result of the operation of the present methods of placing and carrying the farm-mortgage loans throughout the country, just as it is conducted in its many ways and methods and by the several disjointed instrumentalities, is to take away from the American farmers far too much of their annual earnings and to discourage farm owning and to create a tenant farming class. [Applause.]

Mr. SWITZER. But the gentlemen said that these institutions were robbing the farmers.

Mr. EAGLE. I said that these loan institutions of other States were coming into Texas, employing local agents in a legitimate way, and putting out their money in our State; that the local agents exacted 10 per cent out of the loans extended, to be deducted from the loan passed by the loan or trust company, and that was divided with the headquarters in that section. Then the farmer has to employ a lawyer to pass on the title, and to procure an abstract; and then they make the papers in such a way that the loan matures in three years, during which period of time the property can not pay the debt, and they foreclose and add 10 per cent more and start him off again on the same endless chain of extortion and almost despair; and so his "nose is kept to the grindstone." It shall not longer be done if I can help it.

Mr. SWITZER. Then the gentleman says that Texas lawyers conspire with the agents to rob the farmers in Texas.

Mr. EAGLE. Oh, no; that is the gentleman's fancy. It is the system I am describing. We want to change that into a sensible, workable, moral system giving hope and help to the farming class, and thereby blessing the entire Nation.

Mr. MANN. The gentleman is too amusing when he gets mad.

Mr. EAGLE. I am not conscious of having "lost my head"; but if what I say makes gentlemen wince, it is their misfortune and not mine. [Laughter and applause on the Democratic side.]

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. EAGLE. No; I decline further to yield.

Mr. Chairman, this system will, in 15 or 20 years' time, provide freedom to the American farmers from the exactions and oppressions of excessive interest rates and other charges on their outstanding $5,000,000,000 of farm-loan debts. So that in a period of 10 or 15 years the entire amount of $5,000,000,000 can be funded into bonds, the total annual payment thereon not exceeding 6 per cent, and that will include the interest, overhead charges, and pay the amortization portion of the principal to discharge it in less than 30 years. So you will have millions of American farmers owning the lands that they live on, free and independent, instead of being "drawers of water and hewers of wood."

Now, there is one error in this bill that I want to point out, and that is the reason that I wanted to address the committee. If at any time under the safeguarded provision of this measure there be no public ready market for the bonds provided for in the measure, this system would for the time being come to a standstill. Furthermore, the very fact that the Treasury is authorized to buy them, even in limited quantities, will operate to create a general market for them among the investing public.

Otherwise, a condition of war, or industrial depression, or the fact that the Treasury is not backing them, or the change of mind of the investing public for a time being might cripple the system in its very infancy. It ought to be provided in this bill that to the extent of at least $50,000,000 a year, to be apportioned according to the needs of the several Federal land banks, to be determined by the Federal farm-loan commission, that they can in such event present for purchase by the Treasury an amount of these bonds to such an extent as not in any one year to exceed $50,000,000. If the Federal Treasury should buy $50,000,000 of these valid first-mortgage bonds per year, it would take 100 years to absorb the debt against the farm lands in this country. But, after the system is fairly started, the investing public will be only too glad to buy so safe a bond at its satisfactory rate of interest, and the farmers will have a mountain of burden lifted from their shoulders. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. FESS. Mr. Chairman, this amendment in connection with the amendment we adopted yesterday is a great scheme. Yesterday we adopted an amendment which provides that the Government is to pay interest on the bond when any land bank is unable to do it. To-day comes an amendment requiring the Government to accept the bonds to the amount of $50,000,000. I am not sure, reading it carefully, whether it will not amount to $600,000,000, for it says that—

> Whenever any Federal land bank presents to the Secretary of the Treasury farm-loan bonds of any amount he shall advance therefor at their par value an equal amount of money out of the Treasury not otherwise appropriated: *Provided*, That the aggregate of all sums so advanced shall not exceed the sum of $50,000,000.

If that is to be limited to a Federal land bank, and there are 12 of them, that would make $600,000,000. A fair interpretation of the amendment will lead to such a conclusion. Yesterday we adopted an amendment which provided that the Government shall guarantee the bonds of this proposed institution.

Mr. CANDLER of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. FESS. I have only five minutes and I can not yield, and if I should ask for an extension of time somebody would object. Taken in connection with other parts of this law, that is a wonderful scheme, to the first part of which I call attention, aside from the amendment that was adopted yesterday. I refer to that part of section 6 which proposes to loan to farmers without interest. It provides that stock owned by the Government shall receive no dividend. Stock owned by the individual shall receive a dividend. The meaning of this is clear. The stock owned by the individual will pay a dividend to offset the interest he is required to pay on the bond that the individual holds. Therefore the dividend on the stock will cancel the interest on the bond, and if the Government is to remit that dividend by section 6 and pay the interest by the amendment we adopted yesterday, you have a beautiful scheme by which you indirectly undertake to loan to the farmer through the proposed land bank money without interest. There is not a farmer in my State who asks for any such discrimination as that. They do not wish to be treated as subjects of special governmental care. They are not paupers. They do not ask something for nothing.

I had occasion just recently as the head of an institution to try to find a place where I could loan $10,000 of the endowment of a college. This fund had been invested in 4 per cent nontaxable bonds. We hunted for the opportunity of a loan at a higher rate. We did not want to loan it to any distant corporation or any capitalist. We wanted to loan it on first mortgages on farm property in my own county. We loaned it ultimately at 5 per cent, the very best that we could do, and felt complimented that we had succeeded so well. This rate was not low because it was a large sum; small sums will not rule much higher. In other words, the people in our State, and I am quite certain in other States, are not asking for such a discrimination as this amendment and this bill in certain provisions would insist upon. For that reason I can not believe that

the situation which has been depicted so eloquently by our friends from Texas obtains in that State. I do not believe that there can be advantage taken of persons in Texas with credit capable of paying an obligation that would cause them to be robbed in the manner depicted by my eloquent friend who spoke a moment ago in respect to this amendment.

Mr. PLATT. Does the gentleman know that the laws of Texas are such that the farmer can not mortgage his farm and, therefore, has to use the poorest security he has in order to borrow at all?

Mr. HENRY. Oh, the gentleman is mistaken about that. You can encumber the homestead for the purchase money.

Mr. FESS. Mr. Chairman, I know this: That if the State of Texas, so ably represented upon this floor—for there is no stronger delegation on the floor than the one from Texas—if the State of Texas under the domination of men of that ability can continue to do what they say it does, then these people are not the people to say what this Nation shall do in matters of finance. Let them go home and take care of it there. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman from Ohio has expired. Without objection, the Steagall amendment will be considered a part of the Henry amendment.

Mr. BARKLEY. Mr. Chairman, I ask unanimous consent that the Henry amendment as amended be again reported.

The CHAIRMAN. The Chair hears no objection, and without objection the Henry amendment will be again reported as amended.

Mr. SHOUSE. Mr. Chairman, I ask unanimous consent that time be extended for five minutes so that the gentleman from South Carolina [Mr. LEVER] may address the committee.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent that the time may be extended for five minutes in order that the gentleman from South Carolina [Mr. LEVER] may address the committee. Is there objection?

Mr. CANNON. Make it 10 minutes.

The CHAIRMAN. The gentleman from Illinois asks that it be made 10 minutes.

Mr. SHERLEY. Mr. Chairman, reserving the right to object, I think the chairman in charge of the bill might desire in case there is additional debate to close that debate.

The CHAIRMAN. The gentleman from Virginia has not said anything about it.

Mr. GLASS. I had purposed asking unanimous consent to occupy the time of the committee for two minutes.

Mr. CANNON. Let it be made 10 minutes and I will yield the gentleman two minutes.

Mr. SHOUSE. Then, Mr. Chairman, I make my request for 10 minutes.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent that debate be extended for 10 minutes, 5 minutes to be controlled by the gentleman from South Carolina [Mr. LEVER] and 5 minutes by the gentleman from Illinois [Mr. CANNON]. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, this bill, which means so much, in my judgment, to the agricultural interests of the country, is in a very dangerous situation at this moment. I would not ask the House to hear me if I were not genuinely in favor of rural-credits legislation. I would not ask the House to give me its attention if I did not believe that the adoption of this amendment means a serious endangering of any rural-credits legislation of any character at this session of Congress.

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. LEVER. I can not yield in five minutes.

The CHAIRMAN. The gentleman declines to yield.

Mr. LEVER. Mr. Chairman, I spent many, many months of study as a member of the Joint Committee on Rural Credits and I read thousands and thousands of pages of literature upon the subject. I have tried to keep in the closest touch with the evolutions which have resulted in the framing of this bill, and I believe that the Banking and Currency Committee has reported to this House a measure which, amended in a few particulars, will prove to be a workable rural-credits system of real value to the farmer. I believe that it is an improvement under American conditions over any rural-credits system in existence in any country in the world. I make the assertion also that there is contained in the provisions of the pending bill, without any amendments whatever, more of Government aid in the way of subscription to capital stock, in the way of exemption from taxation, and the like than has ever been vouchsafed to any rural-credits system in the world since the stars shone together over the Garden of Eden, and I defy any man on the floor of this House to deny the accuracy of that statement. I am for Government aid, so called, that really aids the system and helps in a substantial and sane manner the workability of the system. I take second place to none in that respect.

I would be for the proposed amendment if, in my judgment, it meant practical help to the system. It does not afford such help as its sponsors think it will give.

Now, what does this amendment propose to do? It writes on the face of this bill that your system is a failure, to start with. I do not believe the system proposed is a failure. I believe it will work. If the system is not a failure, if these bonds will sell, as I believe they will sell in the open markets of the world, then we do not need to open the Treasury of the United States to buy them. That is a proposition from which no sane man can get away. If, on the contrary, the system that you have proposed here is a failure and must of necessity require an indefinite and indeterminate drain upon the Treasury, not this year, not next year, not the next, but year after year, forever and a day, then this Congress should have the courage and show the ability and the patriotism to draw a bill which will not make that kind of a proceeding necessary. [Applause.] We have done this already, in my opinion.

And I stand here, Mr. Chairman, representing a rural district, representing a State 85 per cent of whose population is agricultural, and I ask the friends of the farmer, the real friends of the farmer, those who do not want to feed him with words but with acts, to vote down this proposition, because I say in all the earnestness of my nature that I believe the adoption of this amendment means no rural-credits legislation at this session of Congress. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANNON. Mr. Chairman, I may say later on on a proforma amendment all which I desire to say now, and so far as I am concerned the gentleman from Virginia [Mr. GLASS] can have the five minutes to conclude the debate.

Mr. GLASS. Mr. Chairman, I thank the gentleman from Illinois [Mr. CANNON] for his courtesy. The gentleman from South Carolina [Mr. LEVER] has just said everything that I would care to say except this, which everybody here ought to know, that the repeated suggestion made here to the effect that this proposition is "intended to do for the farmers of the country what is done for commercial banking" is literally and utterly untrue. There is absolutely no special privilege akin to this proposition in any system of commercial banking in this or any other country on earth. There is an immeasurable difference between tying up annually and arbitrarily $50,000,000 of Government demand notes, payable in gold, on long-time obligations, as proposed by this amendment, and issuing notes to banks on a 40 per cent gold reserve and 100 per cent commercial paper having an average maturity of only 28 days. There is a vast difference in banking between liquid paper of quick maturity and investment securities running from 5 to 36 years; and the man who has not intelligence enough to comprehend that difference has not sense enough to participate in legislation here on this or any other question. [Applause.]

Mr. Chairman, I represent a constituency 85 per cent farmers, and I would dislike to stand here and so discredit either their intelligence or their patriotism as to signify my approval, in their behalf, of this grotesque and absurd proposition. It has no business here, and ought to be voted down.

That is all I have to say about the matter.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The question was taken, and the Chairman announced that the noes appeared to have it.

On a division (demanded by Mr. HENRY) there were—ayes 19, noes 81.

So the amendment was rejected.

The Clerk read as follows:

GOVERNMENT AGENCIES.

SEC. 7. That all Federal land banks and joint-stock land banks organized under this act shall perform all reasonable duties as financial agents of the Government that the Secretary of the Treasury may require of them.

Mr. BENNET. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. BENNET. To make a few remarks. I move to strike out the last word.

The CHAIRMAN. The gentleman from New York.

Mr. BENNET. Mr. Chairman, I was interested in the remarks of the gentleman from Alabama [Mr. HEFLIN], and so far as I am concerned, his remarks were entirely impersonal, because I had not said a single word on the bill, although I do represent in part a large city. The gentleman proceeded at some length and with some sarcasm in relation to the efforts by gentlemen from large cities to write a bill affecting rural communities.

I hold in my hand the bill H. R. 15455, which is a bill in relation to shipping, affecting largely the Atlantic coast, introduced by the distinguished gentleman from Missouri [Mr. ALEXANDER]. Now, does anyone think the distinguished gentleman from Missouri was not acting absolutely within his rights when he introduced a bill affecting the seaboard? No man would dare arise and say that, and any man representing a city either in whole or in part, who thinks he has views that are worthy, not only has the right to try to draft a bill relating to the rural portions of the country but under his sworn oath of office it is his duty to attempt to draft a bill.

Gentlemen from large cities are not per se opposed to a rural-credits bill. In the State of New York we have a land bank. We have had that law on the statute books for two years, and I will say to the gentleman from Alabama and others, in order to be not only exact but just, it is my recollection that the legislature that put that land-bank law on the statute books was one branch Republican and the other branch Democratic. This was not a partisan measure, and I will say in justice to my associates from the city of New York that the Democratic majority was made up from the city of New York, and that the men who put the land-bank bill on the statutes of the State of New York were city men. Why, because they are not narrow and provincial, and because they have an enlightened selfishness and they realize that a thing that is good for any portion of the country, if it is good, is good for the whole country.

Men from the cities have made studies of this rural-credit system for years. I would be very willing to debate with the gentleman from Alabama [Mr. HEFLIN] this minute that most interesting system called the Zemstvo system of Russia as modified by the Stolypin law of 1910, and probably I could give him some information. I would be glad to debate with him the three different land-bank systems of Italy, of which I made a study several years ago, and all over the country you will find city men that have studied this question, because it is one of the great big, oustanding questions. And I will say to the gentleman that as this bill originally came on the floor it was my intention to vote for it, and I was not alone among city men in that. But, of course, you can load this bill down with populistic amendments and raids on the Treasury until there is not any man from city or country that would dare to vote for it.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that debate on this section and all amendments thereto close in five minutes.

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object, I desire to strike out this section. I ask it to be considered when the proper time comes.

Mr. SMITH of Michigan. I would like five minutes, Mr. Chairman.

Mr. GLASS. Make it 10 minutes.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on this section and amendments thereto close in 10 minutes. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, I desire to offer a motion to strike out the paragraph.

The CHAIRMAN. The gentleman from Pennsylvania will be recognized by the Chair in one of these five minutes.

Mr. MOORE of Pennsylvania. I desire to get a vote on the proposition.

The CHAIRMAN. At the end of the five minutes we will vote on his amendment.

Is there objection to the request of the gentleman from Virginia? [After a pause.] The Chair hears none.

Mr. HEFLIN. Mr. Chairman, I did not expect to so stir and excite my friend and the financial expert from New York City [Mr. BENNET], who did not by word of mouth make reply to what I said a little while ago, but shook his head when I said something about some Members over there being for the bill. I understood the gentleman to mean that he was against it. I thought that before he even shook his head, and since he has spoken I know that he is against it. The gentleman undertakes to make what I said about him apply to other Members from New York City. I said nothing about any of them. With regard to New York, I had the gentleman, and the gentleman alone, in mind. There is another big city Republican over there who would like to write a farm-credit system for the farmers, and he is the gentleman from Chicago [Mr. MADDEN], but I am not willing for the gentleman to write it. Some gentlemen over there will vote for this bill. The gentleman from New York [Mr. BENNET], in keeping with the past conduct of his party in the matter of evasion and postponement, wants me to discuss with him the land-bank system of Russia, and he intimates strongly that he is fully capable of discussing with me the land-bank system of Germany. He desires me to leave the subject alone here and journey with him to France and discuss the farm-credit system over there. [Laughter.] How true, Mr. Chairman, to the teachings of the Republican Party. That party established an agricultural bank for the Filipino farmer in the Philippine Islands, but refused to establish one for the millions of American farmers in the United States. [Applause.] No wonder the gentleman wants to lead me and others who favor farm-credit legislation into the realm of farm-credit discussion in the land beyond the sea. [Laughter.] He no doubt does this in the hope that while we sail with him to the land over yonder we postpone legislation for the farmers here at home.

The gentleman says that men who come from the city can write good banking laws. That may be true, and I have no doubt that there are some good friends of the farmer in the city, but, unfortunately for the farmer, they are exceedingly scarce on that side of the House just now when we are trying to pass a real agricultural banking bill, one that will be useful to the farmers of our country. [Applause.]

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out this section.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 88, strike out lines 16 to 19, inclusive.

Mr. MOORE of Pennsylvania. This section refers to Government agencies and it brings up as squarely as any other section does the general Government-control proposition. I am opposed on general principles to Government ownership and control, which has been obtaining a very rapid and fast hold upon legislation in this country. There are a number of reasons why I fear the gradual encroachments of the Government upon legitimate business throughout the United States. I can understand why gentlemen coming from a particular State or a particular locality are anxious that their special interests should be served, but my idea of legislation generally is that it should be uniform. That was the spirit of the Constitution and that has been the spirit of the law. Now, it happens that we have a very fine illustration of the failure of Government ownership and control up to date in the construction of the Alaskan Railway——

Mr. GLASS. Will the gentleman permit an interruption?

Mr. MOORE of Pennsylvania. Yes.

Mr. GLASS. I will say to the gentleman that the purpose of this section of the bill is to insure the constitutionality of it. It was proposed, if I may be permitted to say so, by the member of the committee from New York [Mr. PLATT] to meet any constitutional objections to the bill.

It is a perfectly harmless section. If it will do no good, it will absolutely do no harm. It does not involve the question of Government ownership in any sense.

Mr. MOORE of Pennsylvania. Then I may reserve much of what I have to say for another paragraph.

But I was about to suggest that this bill proposes a certain governmental control of a certain specialized financial system. The eloquent gentleman from Alabama [Mr. HEFLIN] and the gentleman from Texas [Mr. HENRY] also and others constantly refer to the fact that what they want here for the farmer is exactly what is conceded by the Government to the commercial interests of the country. Now, if that is all they want, I presume the commercial interests of the country would at once concede the point, because the commercial interests have no such specialized or subsidized banking system. There is no Government appropriation to maintain commercial banks. There is no $9,000,000 appropriation to begin commercial or industrial institutions.

So much for commerce itself as it pertains to the commercial banks. No one seems to rise here except to speak for the special interest of the farmer.

Why, gentlemen, there are wage earners all over this land to be considered, wage earners in my district—as many wage earners in my district, I assume, as there are farmers in the district of any gentleman on this floor. They have no $9,000,000 appropriated for their special benefit or to help them buy homes. They organize building and loan associations and take care of themselves. What money they borrow upon their homes, or what money they borrow in advance to build homes, from such associations is money that they put into a common pot from which they draw. They have no Government funds to fall back upon.

But gentlemen pleading for the farmer only insist that the farmer shall be given public money, that the Treasury shall be used for the farmer's benefit. They do not seem to understand

that the Treasury of the Government ought to be as much the property of the man who works in the mill or in the factory as it should be of the farmer.

Gentlemen say they want to play fair with the cities. Let them remember that the city man is also a bearer of burdens. He has no such special favor, no such special interest, as is shown in this bill for the farmers of the country. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

NATIONAL FARM-LOAN ASSOCIATIONS.

SEC. 8. That corporations, to be known as national farm-loan associations, may be organized by persons desiring to borrow money on farm-mortgage security under the terms of this act. Persons desiring to form such an association shall enter into articles of association which shall specify in general terms the object for which the association is formed and the territory within which its operations are to be carried on, and which may contain any other provision, not inconsistent with law, which the association may see fit to adopt for the regulation of its business and the conduct of its affairs. Said articles shall be signed by the persons uniting to form the association, and a copy thereof shall be forwarded to the Federal land bank for the district, to be filed and preserved in its office.

Every national farm-loan association shall elect, in the manner prescribed for the election of directors of national banking associations, a board of not less than five directors, who shall hold office for the same period and under the same conditions as directors of national banking associations.

It shall be the duty of said board of directors to choose in such manner as they may prefer a secretary-treasurer, who may receive such compensation as said board of directors shall determine. The board of directors shall elect a president, a vice president, and a loan committee of three members.

The directors and all officers except the secretary-treasurer shall serve without compensation, unless the payment of salaries to them shall be approved by the Federal farm-loan board. All officers and directors except the secretary-treasurer shall, during their term of office, be bona fide residents of the territory within which the association is authorized to do business, and shall be shareholders of the association.

It shall be the duty of the secretary-treasurer of every national farm-loan association to act as custodian of its funds and to deposit the same in such bank as the board of directors may designate, to pay over to borrowers all sums received for their account from the Federal land bank upon first mortgage as in this act prescribed, and to meet all other obligations of the association, subject to the orders of the board of directors and in accordance with the by-laws of the association. Said secretary-treasurer shall likewise collect, receipt for, and transmit to the Federal land bank all payments of interest, amortization, installments, or principal arising out of loans made through the association. He shall be the custodian of the securities, records, papers, certificates of stock, and all documents relating to or bearing upon the conduct of the affairs of the association. He shall furnish a suitable surety bond to be prescribed and approved by the Federal farm-loan board for the proper performance of the duties imposed upon him under this act, which shall cover prompt collection and transmission of funds. He shall make a quarterly report to the Federal farm-loan board upon forms to be provided for that purpose. Upon request from said board said secretary-treasurer shall furnish information regarding the condition of the national farm-loan association for which he is acting, and he shall carry out all duly authorized orders of said board. He shall assure himself from time to time that the loans made through the national farm-loan association of which he is an officer are applied to the purposes set forth in the application of the borrower as approved, and shall forthwith report to the land bank of the district any failure of any borrower to comply with the terms of his application or mortgage. He shall also ascertain and report to said bank the amount of any delinquent taxes on land mortgaged to said bank and the name of the delinquent.

The reasonable expenses of the secretary-treasurer, the loan committee, and other officers and agents of national farm-loan associations, and the salary of the secretary-treasurer may be paid from the general funds of the association, and the board of directors is authorized to set aside such sums as it shall deem requisite for that purpose and for other expenses of said association. When no such funds are available, the board of directors may levy an assessment on members in proportion to the amount of stock held by each, which may be repaid as soon as funds are available, or it may secure an advance from the Federal land bank of the district, to be repaid with interest at the rate of 6 per cent per annum, from dividends belonging to said association. Said Federal land bank is hereby authorized to make such advance and to deduct such repayment.

Ten or more natural persons who are the owners, or about to become the owners, of farm land qualified as security for a mortgage loan under section 12 of this act, may unite to form a national farm-loan association. They shall organize subject to the requirements and the conditions specified in this section and in section 5 of this act, so far as the same may be applicable: *Provided*, That the board of directors may consist of five members only, and instead of a secretary and a treasurer there shall be a secretary-treasurer, who need not be a shareholder of the association.

When the articles of association are forwarded to the Federal land bank of the district as provided in this section, they shall be accompanied by the written report of the loan committee as required in section 10 of this act, and by an affidavit stating that each of the subscribers is the owner, or is about to become the owner, of farm land qualified under section 12 of this act as the basis of a mortgage loan; that the loan desired by each person is not more than $10,000, nor less than $100, and that the aggregate of the desired loans is not less than $20,000; that said affidavit is accompanied by a subscription to stock in the Federal land bank equal to 5 per cent of the aggregate sum desired on mortgage loans; and that a temporary organization of said association has been formed by the election of a board of directors, a loan committee, and a secretary-treasurer who subscribes to said affidavit, giving his residence and post-office address.

Upon receipt of such articles of association, with the accompanying affidavit and stock subscription, the directors of said Federal land bank shall send an appraiser to investigate the solvency and character of the applicants and the value of their lands, and shall then determine whether in their judgment a charter shall be granted to such association. They shall forward such articles of association and the accompanying affidavit to the Federal farm-loan board with their recommendation. If said recommendation is unfavorable, the charter shall be refused.

If said recommendation is favorable, the Federal farm-loan board shall thereupon grant a charter to the applicants therefor, designating the territory in which such association may make loans, and shall forward said charter to said applicants through said Federal land bank: *Provided*, That said Federal farm-loan board may for good cause shown in any case refuse to grant a charter.

Upon receipt of its charter such national farm-loan association shall be authorized and empowered to receive from the Federal land bank of the district sums to be loaned to its members under the terms and conditions of this act.

Whenever any national farm-loan association shall desire to secure for any member a loan on first mortgage from the Federal land bank of its district it shall subscribe for capital stock of said land bank to the amount of 5 per cent of such loan, such subscription to be paid in cash upon the granting of the loan by said land bank. Such capital stock shall be held by said land bank as collateral security for the payment of said loan, but said association shall be paid any dividends accruing and payable on said capital stock while it is outstanding. Such stock may, in the discretion of the directors, and with the approval of the Federal farm-loan board, be paid off at par and retired proportional to any reduction which may be made in the principal sum loaned to the member; and the directors shall pay off at par and retire such stock outstanding when the loan shall have been fully repaid. In such cases the national farm-loan association shall pay off at par and retire the corresponding share or shares of its stock which were issued when said land-bank stock was subscribed.

Mr. GREEN of Iowa and Mr. McKELLAR rose.

Mr. MURRAY. Mr. Chairman, I have an additional section to offer, if somebody has an amendment to either of these paragraphs.

The CHAIRMAN. The information of the Chair is that the gentleman from Tennessee [Mr. McKELLAR] also desires to offer a substitute.

Mr. McKELLAR. Yes; I desire to offer an amendment by way of substitute.

Mr. MOORE of Pennsylvania. I desire to offer a direct amendment.

Mr. MANN. Let us have the substitute read, so that we may know what it is before correcting the original text.

The CHAIRMAN. The gentleman from Tennessee [Mr. McKELLAR] offers a substitute, which the Clerk will report.

The Clerk read as follows:

Substitute offered by Mr. McKELLAR: Strike out section 8 of the bill and substitute therefor the following:

"It shall be the duty of said farm-land banks to choose in each land-bank district secretary-treasurers, who may receive such compensation as said farm-land banks shall determine.

"It shall be the duty of the secretary-treasurer of every farm-land bank district to act as custodian of its funds, and to deposit the same in such bank as the farm-land banks may designate, to pay over to borrowers all sums received for their account from the Federal land bank upon first mortgage as in this act prescribed, subject to the orders of the farm-land banks. Said secretary-treasurers shall likewise collect, receipt for, and transmit to the Federal land bank all payments of interest, amortization installments, or principal arising out of loans made through said secretary-treasurers. He shall be the custodian of the securities, records, papers, certificates of stock, and all documents relating to or bearing upon the conduct of the affairs of said land bank in his district. He shall furnish a suitable surety bond, to be prescribed and approved by the Federal farm-loan board for the proper performance of the duties imposed upon him under this act, which shall cover prompt collection and transmission of funds. He shall make a quarterly report to the Federal farm-loan board upon forms to be provided for that purpose. Upon request from said board, said secretary-treasurer shall furnish information regarding the condition of all farms in his district for which he is acting, and he shall carry out all duly authorized orders of said board. He shall assure himself from time to time that the loans made by him are applied to the purposes set forth in the application of the borrower as approved, and shall forthwith report to the land bank of the district any failure of any borrower to comply with the terms of his application or mortgage. He shall also ascertain and report to said bank the amount of any delinquent taxes on land mortgaged to said bank and the name of the delinquent."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Tennessee.

Mr. McKELLAR. Mr. Chairman, I would like to be heard.

Mr. GLASS. I would like to inquire how many substitutes and amendments there will be to this section, if I can develop that fact.

Mr. MORGAN of Oklahoma. I have a substitute and two amendments.

Mr. MOORE of Pennsylvania. I have an amendment.

Mr. DILLON. I have two amendments.

Mr. HOWARD. I have three.

Mr. PLATT. I have one.

Mr. GLASS. Then, at that rate, it will be about to-morrow before we finish this section. I ask unanimous consent, Mr. Chairman, that all debate on this section and amendments thereto be concluded at 3.30 o'clock.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto be concluded at 3.30 o'clock. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Chairman, of course yesterday they had 35 minutes' debate in 25 minutes. They could not do it to-day. That would be only 35 minutes. Some of that would be lost.

Mr. GLASS. Then say 3.45 o'clock.

Mr. MORGAN of Oklahoma. Mr. Chairman, reserving the right to object, I do not think 45 minutes would be sufficient time.

Mr. MANN. That would be 50 minutes from now. I think that is reasonable. The Chair will control the time.

Mr. OLIVER. Mr. Chairman, I would like to have two minutes in which to ask a question.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on the pending section and amendments thereto close at 3.45 o'clock.

Mr. GREEN of Iowa. How are we to control the time?

The CHAIRMAN. The Chair will do the best he can to recognize gentlemen who have bona fide amendments to offer to the section.

Mr. GREEN of Iowa. I have no amendment other than a pro forma amendment, but I want to speak to the section.

Mr. MORGAN of Oklahoma. Reserving the right to object, Mr. Chairman, I think there should be more time allowed.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Tennessee [Mr. MCKELLAR] is recognized for five minutes.

Mr. MCKELLAR. Mr. Chairman and gentlemen, the purpose of my amendment is to do away with some of the red tape in connection with this bill and what are to me two very unsatisfactory features—the 5 per cent stock subscriptions and the 10 per cent guaranty of other loans.

The CHAIRMAN. The committee will be in order. Gentlemen desiring to converse will please retire to the cloakroom. Some of these amendments may be of some importance. [Laughter.]

Mr. MCKELLAR. I think this amendment is important. It does away with a large amount of red tape in the bill. Under section 8 of the bill these farm-loan associations are created. My amendment is to strike out the section, which means to strike out the farm-loan associations and to substitute therefor the provisions of the bill as to secretary-treasurers, making the secretary-treasurers the secretary-treasurers of the farm-loan banks direct and not secretary-treasurers of the farm-loan associations.

Now, to my mind, to require the farmer to take 5 per cent of stock in the farm-loan association, and then have this farm-loan association in turn take 5 per cent of stock in the land bank, is wholly unnecessary.

Why, there is no use whatever for this double-stock subscription. It does not make the bill any better. It is a lot of red tape. It costs the farmer more, because the cost comes out of him in the end. Why have two associations or corporations to do the work of one? I think the direct plan is the better one. I think all that is necessary is to have the farm-land bank in the district and turn over to it the methods by which this rural-credit system is to be carried out. I do not see a particle of use in the provision for the borrower taking 5 per cent stock in the farm-loan association, and I certainly am opposed to making every borrower liable in the amount of 10 per cent of his loan for the debts of his neighbor. It is all wrong. It will not work. If we put it in this bill, we will have to strike it out again in some future bill. You gentlemen know it is not going to work. We are not going to have all that red tape. The scheme will not work if you keep it in. If you are going to have this a workable measure, you must make it simple. It is not going to work in its present form.

The farmers are not going to subscribe for this stock, in the first place, and, in the next place, they are not going to become responsible for one another's debts. We know that that will not work here in America. It is a part of the European scheme that is grafted onto this bill. I know that gentlemen have read the reports, which tell how beautifully this scheme works in foreign countries, and they want to adopt it here. They want to graft onto an American system the European system. We do not need to copy from these systems. I have read them all. They are not suited to our habits of business and customs of life. They are contrary to our democratic views. We believe in individualism. Let every man stand on his own merits. Do not require his neighbor to stand for him. When you let the merchant have money at a bank, you do not require him to go surety for all the other merchants in his city to the extent of 10 per cent of his loan. Then why make this requirement of the farmer borrower?

Mr. GLASS. If the gentleman will yield, it seems to me the statement that farmers are not willing to become responsible for other people's debts is a rather broad statement.

Mr. MCKELLAR. He does to the extent of 10 per cent of his loan.

Mr. GLASS. It is just 10 per cent.

Mr. MCKELLAR. Just 10 per cent! Would the gentleman, if he went to the bank to borrow money and was told all right, if he would also obligate himself to pay all his neighbors' debts to the extent of just 10 per cent of his loan—would the gentleman do it? Oh, no. Now, what does the farmer have to become responsible for? He loses the use of 5 per cent of his loan to begin with.

Mr. PHELAN. Will the gentleman allow me to interrupt him?

Mr. MCKELLAR. Just one moment. He first has to get nine neighbors together and organize an association. He can not borrow a cent till he does this. Then he has to take 5 per cent of stock. He has got that much dead money to begin with. Then what else does he have to do? He has to pay probably 6 per cent interest and all the expenses of organization, examination, appraisal, and purchase of title papers. And what else does he have to do? He has to become responsible to the amount of 10 per cent of what he borrows to secure his neighbors' loans. Gentlemen, that is not right. Let us make a workable measure out of this bill. Let us make a measure that will do the farmer some good. Let us make it simple. Let us make it direct. I think the bill is admirably arranged for the most part, but these provisions here complicate it and make it burdensome on the farmer, and do away with his individuality and attempt to graft on a worn-out system brought here from Europe, and these provisions are all wrong and ought to be stricken out of this bill. In my judgment, it is just a question of time when they will be stricken out, because they will not work. Let us pass a law that will be simple in its details and that all people may understand. Let us leave out the complications and unwise hardships.

Now I am glad to yield to any gentleman who wishes to interrupt me.

Mr. MORGAN of Oklahoma. I should like to ask the gentleman if under his amendment the farmers are not to subscribe for any part of the stock?

Mr. MCKELLAR. They do not subscribe to the stock at all. That part of it is stricken out. The amendment that I have offered just does this: It makes these secretary-treasurers who are provided for in this bill take the place of provisions for stock subscriptions, of agreements to pay in part the debts of his neighbors, and of all this red tape. It literally cuts out the farm-loan associations, the stock subscriptions, the 10 per cent guaranty of other loans of other stock subscribers, and practically all of the red tape in this bill.

Mr. PHELAN. Will the gentleman yield for a question?

Mr. MCKELLAR. Yes.

Mr. PHELAN. What security is there behind the mortgages on the farm lands?

Mr. MCKELLAR. They have the farm lands at 60 per cent of their value behind the mortgages, and they have all the farm-land banks themselves behind them and a Government board behind them. These backings will make them guilt-edge securities without the cumbersome and unnecessary farm-loan associations.

Mr. PHELAN. The money contributed by the Government.

Mr. MCKELLAR. Yes; and, besides, all the profits made by these banks are behind it. It is under the control of the farm-loan board; and, surely, under the control of the Federal farm-loan board, it will have the capital of all these various banks behind it, and the farm-loan board can see that enough profits are accumulated to make the bonds absolutely safe. In addition to all these is the additional security found in the amendment of the gentleman from South Carolina. Still, in addition, they have absolute exemption from all kinds of taxation.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. MCKELLAR. I ask unanimous consent for two minutes more.

Mr. DILLON. Is that to come out of the time already fixed?

The CHAIRMAN. Yes; the debate closes at 3.45 o'clock.

Mr. MCKELLAR. Then I will not ask for it.

Mr. SMITH of Michigan. The gentleman can ask that the time for debate extended.

Mr. MCKELLAR. I will not do that. I do not want to be unfair about it. The committee in charge of the bill are entitled

to consideration, and we should get along in the consideration of the bill.

The CHAIRMAN. The amendments will all be voted upon after the debate closes at 3.45 o'clock. Has the gentleman from Massachusetts [Mr. PHELAN] an amendment?

Mr. PHELAN. No; I want to answer the gentleman from Tennessee.

The CHAIRMAN. The Chair would like to make a statement. The indications are that gentlemen who have amendments to which they wish to address themselves will occupy the time from now until 3.30 or 3.35. The Chair thought he would reserve for the gentleman from Virginia [Mr. GLASS] at least five minutes.

Mr. MILLER of Pennsylvania. Mr. Chairman, before the time expires, I want to offer an amendment.

Mr. DILLON. I want to offer an amendment.

The CHAIRMAN. The gentleman from South Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DILLON: Page 92, line 12, after the word "association," strike out the period and insert the following:

"*Provided*, That no farm loan shall be made under the provisions of this act for speculative purposes, and that each borrower shall be limited to one loan: *And provided further*, That no loan shall be made to any borrower who owns property or equity in properties exceeding in value, above bona fide encumbrances, and debts, the sum of $10,000."

Mr. DILLON. Mr. Chairman, this amendment seeks to eliminate the speculator. It also seeks to allow the tenant or the small property owner to obtain the benefits of this act. If I mistake not, the real purpose of this bill is to help the tenant, to help the man to get a farm, to help him to get a start; it is not for the bankers, and they ought not to have any interest in it. It ought not to assist the speculator; it ought not to assist the large landowner.

In 1914 we loaned $210,000,000 of emergency currency to the banks at 3 per cent interest. Those really in need of money did not get any benefit from this loan. The banks, however, loaned it out at high rates of interest. The large property owner who owns large landed interests ought not to have any benefit from this bill, because he does not need it. I seek in this amendment to eliminate the speculator and the large landowner. If the amendment is adopted, the person obtaining the loan would have to show that he was not the owner of $10,000 of property above bona fide encumbrances and debts. If he is, he ought not to have a loan. We want the benefits to accrue to the small farmer, and it ought to be extended to the wage earner, so that these people may obtain homes under the provisions of this bill.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. DILLON. Yes.

Mr. LA FOLLETTE. Under the amendment you would prohibit a man from getting the maximum loan of $10,000, because he could not borrow over 60 per cent.

Mr. DILLON. If he has that much property, he could get his loan anywhere and would not need the benefits of the act.

Mr. LA FOLLETTE. Your amendment cuts down the amount that a man can borrow.

Mr. DILLON. Yes. What would be the procedure under the terms of the bill? In my judgment, the speculator would execute mortgages upon each piece of land. He would buy a number of quarter sections and obtain a mortgage upon each quarter, which would be held for speculation, and thus would root out the small tenant; he would root out the small property owner.

Mr. MOSS of Indiana. Is it the gentleman's understanding of the bill that the man could get a number of separate loans? I would like to say to the gentleman that my impression, and also that of the framers of the bill, is that no man could get more than $10,000 on a loan.

Mr. DILLON. He could borrow $10,000 upon one quarter and get other loans in the names of the different members of his family. He could also buy lands already mortgaged and thus carry on his speculations. The main purpose of the amendment is to exclude the large landowner.

The CHAIRMAN. The time of the gentleman from South Dakota has expired.

Mr. PLATT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 92, line 21, after the word "than," where it appears the second time, strike out the figures "$100" and insert "$200."

Mr. PLATT. Mr. Chairman, I have offered this amendment simply to point out the extraordinary efforts the committee has made to do something for the small farmer. The bill as originally written had $200 as the minimum for a loan, and it seems questionable whether any man should be encouraged to mortgage his farm for 36 years for $100 and try to pay it back by amortization.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. PLATT. Yes.

Mr. MOORE of Pennsylvania. What qualifies a man as a shareholder? The payment of $5?

Mr. PLATT. Yes.

Mr. MOORE of Pennsylvania. Then he is qualified to borrow $100?

Mr. PLATT. Yes. He must obtain a loan before he becomes a full member.

Mr. MOORE of Pennsylvania. On what kind of property?

Mr. PLATT. I do not see how this minimum of $100 could be of any service in my part of the country except possibly to a market gardener; but the gentleman from Arkansas [Mr. WINGO] said that there were hill farms in his country of 100 acres that were not worth more than two or three hundred dollars.

Mr. MOORE of Pennsylvania. There must be an appraisement of that land.

Mr. PLATT. Yes.

Mr. MOORE of Pennsylvania. And the appraisement must be paid for out of the Treasury of the United States. That is to say, the appraiser gets his salary directly from the Treasury.

Mr. PLATT. Yes.

Mr. MOORE of Pennsylvania. The appraiser appraises certain territory where land may be worth $50 this year and only $10 the next year.

Mr. PLATT. I think that is an extreme statement.

Mr. MOORE of Pennsylvania. Well, let it rise or fall. What I want to get at is whether the Government, or the association primarily and then the Government, would lose if the appraisement has been unwisely made on one of these small tracts.

Mr. PLATT. The association would lose. The expenses of looking up the title, registration, and appraisement, and everything else, if there was any considerable number of these small loans, would swamp the whole system.

Mr. OLDFIELD. Will the gentleman yield?

Mr. PLATT. Yes.

Mr. OLDFIELD. Might not a person want to buy an addition to his tract of land, 5 or 10 acres, in addition to his farm?

Mr. PLATT. The gentleman would hardly advise a man to mortgage his farm and go to the expense of appraisement and looking up the title, and all that sort of thing, for $100. The gentleman would indorse his note himself, would he not, or loan him the $100?

Mr. OLDFIELD. I can see how a man might want to do that; he might want a tract of land adjoining his and be ready to mortgage his farm to get it.

Mr. PLATT. The purpose is to allow the man who has a little bit of a farm to mortgage it—not to encourage a large farmer to buy more land.

Mr. OLDFIELD. There are places in the country where you can buy land for $5 an acre and make a living off it.

Mr. PLATT. Possibly.

Mr. OLDFIELD. I know a great deal of land like that.

Mr. PLATT. Such farms do not pay, as a rule.

Mr. YOUNG of North Dakota. Will the gentleman yield?

Mr. PLATT. Yes.

Mr. YOUNG of North Dakota. Would not the expense of making the loan, which falls upon the borrower, be so great as to make his interest unusually high?

Mr. PLATT. It would; he might pay about 50 per cent of his loan in expenses, which would be ridiculous.

Mr. McKELLAR. Will the gentleman yield?

Mr. PLATT. Yes.

Mr. McKELLAR. The gentleman is a farmer?

Mr. PLATT. I was brought up on a farm, in part.

Mr. McKELLAR. Does not the gentleman think the provision that requires the farmers to organize into farm-loan associations and pay 5 per cent, and so forth, is too much red tape?

Mr. PLATT. You have to have some such "red tape" in order to form a cooperative association. You can not have cooperation unless the borrowers become also stockholders. I admit that many farmers may prefer to borrow in some more direct way.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. MORGAN of Oklahoma. Mr. Chairman, I ask unanimous consent that the amendment which I offer may be considered as read.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that the amendment which he offers may be considered as read.

Mr. MADDEN. I object.

The CHAIRMAN. The Chair will state to the gentleman from Illinois that the substitute proposed by the gentleman from Oklahoma is of very great length.

Mr. MORGAN of Oklahoma. It is not of very great length, but it will take all of my five minutes to have it read. I would like to take the time in explanation of it.

Mr. MADDEN. I do not like to vote against it without hearing it read.

The CHAIRMAN. The gentleman from Pennsylvania.

Mr. MOORE of Pennsylvania. Mr. Chairman, I have an amendment that I desire to offer.

Mr. MORGAN of Oklahoma. Then, Mr. Chairman, can I not offer my amendment and have it read in my time?

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. MOORE of Pennsylvania. Who is recognized at present?

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 92, line 12, after the word "treasurer," strike out the words "who need not" and insert the word "shall."

Mr. MOORE of Pennsylvania. Mr. Chairman, the amendment offered by the gentleman from New York [Mr. PLATT] struck me very favorably because of the possibility of a speculator, or anyone who happens to own a small piece of ground and who can not otherwise dispose of it, borrowing a sufficient amount of money upon it to let him out and then leaving the Government in possession of the property. There is no question but that that will follow in numerous instances. Some lot owner, or small-tract owner, will find it greatly to his advantage to leave the property with the Government after the Government or the farm association has loaned the money upon it. I have known small owners who would have been very glad, after obtaining 50 or 60 per cent of the value of their farms, to step out and leave the lender in possession of the property. The taxes and depreciation have much to do with that.

My amendment proposes that the secretary and treasurer of these land associations shall be a farmer himself. If we are to specialize and this bill is purely for the benefit of the farmer—no wage earner is to participate in it—let us require that a farmer shall be the secretary and treasurer of this farmers' land association.

Mr. YOUNG of North Dakota. Does the gentleman's amendment provide that a farmer shall be?

Mr. MOORE of Pennsylvania. Yes.

Mr. YOUNG of North Dakota. The gentleman said shareholder.

Mr. MOORE of Pennsylvania. I said shall be a shareholder in the association. The language of the bill is "who need not be a shareholder," and my amendment provides that he shall be a shareholder of the association. Only a farmer can be a shareholder, as I understand it.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. It is evident that nearly all of the business of these land associations is going to devolve upon one paid officer, the secretary and treasurer, and if the bill is left to stand as it is, that paid officer may be an attorney, an agent, an editor, an expert, a land shark, a speculator, anybody, who is instrumental in organizing this national land association of 10 men, who by contributing $5 a piece can get a charter from the United States. Speaking of red tape, to which the gentleman from Tennessee referred a little while ago, the real farmer would never touch bottom on this proposition at all unless you put the business in his hands.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. MOSS of Indiana. The gentleman does not want to make a mistake in his statement which he will regret later on. Ten men can not by contributing $5 each get a charter from the Government.

Mr. MOORE of Pennsylvania. The bill provides that 10 or more natural persons who are the owners or who are about to become owners of farms shall be qualified to form a national association, but the values represented must be not more than $10,000 nor less than $100——

Mr. MOSS of Indiana. Oh, it does not say that at all.

Mr. MOORE of Pennsylvania. Therefore, if one share of stock at $5 will qualify a member, 10 men at $5 each—a total of $50—forms a national association, provided they ask for a loan of $20,000.

Mr. PHELAN. Mr. Chairman, will the gentleman yield?

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Oh, this is delightful!

The CHAIRMAN. Does the gentleman yield, and to whom?

Mr. MOORE of Pennsylvania. I yield to the gentleman who will put his question the quickest.

Mr. PHELAN. Mr. Chairman, I would like to ask the gentleman if he has read any other part of the bill in connection with this proposition than this part?

Mr. MOORE of Pennsylvania. I have done the best I could to understand it, and if the poor farmer can understand it and work under it he will do a great deal better than I can.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MORGAN of Oklahoma. Mr. Chairman, I renew my request now.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to offer an amendment and to have it considered as read, and consume five minutes in explanation of it. Is there objection?

Mr. MOSS of Indiana. Mr. Chairman, I would like to have unanimous consent for one minute of time in order to make a statement to correct the gentleman from Pennsylvania.

Mr. MOORE of Pennsylvania. I shall object to that, because I do not like to have my statements corrected without a chance to reply.

The CHAIRMAN. The gentleman from Pennsylvania objects. Is there objection to the request of the gentleman from Oklahoma?

Mr. WINGO. Mr. Chairman, what is the request—that this shall be five minutes additional?

The CHAIRMAN. No. Is there objection?

There was no objection.

The amendment of Mr. MORGAN of Oklahoma is as follows: Page 88, strike out section 8, and in lieu thereof the following:

FEDERAL FARM LOAN ASSOCIATION.

SEC. 12. That corporations to be known as Federal farm loan associations shall be organized as hereinafter prescribed. When five or more persons in any county shall have secured loans from any Federal land bank, such bank shall appoint three of such persons as directors of the Federal farm loan association of such county. Such directors shall hold their offices until their successors shall be duly elected at any regular meeting of the members of such association. The Federal Farm Loan Board shall prepare a form of an organization certificate to be used in the incorporation of Federal farm loan associations. At least two of such forms shall be transmitted to the persons so appointed as directors by the Federal land bank. Such directors shall sign such organization certificate and duly acknowledge the same before a notary public or some other officer duly authorized in such county to administer oaths. Such certificate shall be transmitted to the Federal Farm Loan Board, and a copy thereof shall be transmitted to the Federal land bank of such district.

If the Federal Farm Loan Board shall find that such organization certificate shall be duly executed and in proper form it shall approve the same and issue to said association a charter or certificate of its incorporation, and said Federal farm loan association shall become a corporation as of the date of the acknowledgment of its organization certificate.

Every person who shall obtain a loan from any Federal land bank shall thereby become a member of the Federal farm loan association of the county in which the land mortgaged to secure such loan shall be located, and in his application for loan he shall accept membership in such association, under the terms and conditions as prescribed in this act. He shall also, in such application, agree to assume all of the responsibilities and liabilities of such membership. He shall be entitled to all the advantages and benefits of membership in such association without the payment or any fee, commission, or assessment of any kind or character, except as provided in this act. His membership in such association shall continue until the payment in full of his loan, at which time his membership therein shall cease.

Federal farm loan associations shall have no capital stock and shall not be conducted for profit. Their objects shall be to assist in the administration of the system of land credits established by this act, to assist Federal land banks in conducting their business, and to provide an organization through which and by which the members thereof shall cooperate with each other in securing credit, in the payment of their loans and in other proper lines for their mutual benefit and for the promotion of agricultural development.

The directors elected at the first election of any Federal farm loan association shall hold their offices for one, two, and three years, respectively. Thereafter directors shall hold office for terms of three years each. The directors shall serve without pay. Any Federal land bank may, however, employ any director or member of any Federal farm loan association and pay him for such service. One of the directors shall be designated as chairman, one as vice chairman, and one as secretary-treasurer. Such officers shall perform such duties as are customary for such officers to perform and such other duties as may be prescribed by such association.

Every Federal farm loan association shall adopt by-laws and rules for its government on such form as shall be prepared and approved by the Federal Farm Loan Board.

Every Federal farm loan association shall appoint one or more appraisement committees consisting of three members, who shall perform such duties in the appraisement of land offered as security for loans in said county as shall be prescribed by the Federal Farm Loan Board.

Federal farm loan associations shall have power to adopt and use a corporate seal, to have succession until dissolved by act of Congress or under the provisions of this act, to sue and be sued, complain and defend, in any court of law or equity, as fully as natural persons, to do any other act prescribed by law and to make such contracts as may be prescribed by the Federal Farm Loan Board.

The directors of Federal farm loan associations shall meet at such time and place as shall be designated by the chairman of the board. A majority of such board shall constitute a quorum for the transaction of such business.

The members of every Federal land bank association shall meet every three months in regular meeting. Special meetings may be called by the chairman of the board of directors. A majority of such members shall constitute a quorum. The officers of the board of directors shall

be the officers of the general assembly of the members of the Federal farm loan association. In all meetings of Federal farm loan associations each member thereof shall have one vote.

Until such time as borrowers in any county or parish shall be organized as provided in this section, the individual borrowers in such county shall be regarded as a national farm loan association, and all the provisions in this act in any way referring to national farm loan associations shall be held to refer to individual borrowers in any county before organized as herein provided.

Where it shall be determined by any Federal land bank that a county includes a larger area than should be included in a single national farm loan association, such county may be subdivided into more than one district, and a national farm loan association may be organized in each of said subdivisions, and each of such subdivisions shall be held to constitute a county so far as the provisions of this act shall relate to the organization and administration of national farm loan associations and the liabilities of the members thereof.

Mr. MORGAN of Oklahoma. Mr. Chairman, the amendment which I offer is an entire substitute for all of the provisions in the committee bill relative to farm-loan associations. It provides for the organization of these farm-loan associations. It provides that each member shall contribute his 5 per cent of a loan just as in the committee bill, to the stock of the Federal land bank, not to the stock of the farm-loan association. Whenever there are five persons in any county who have made loans from the Federal land bank, automatically they become a farm-loan association. Up until that time they will get their loans individually; so automatically they would become a farm-loan association. They have a secretary and a treasurer, and they have an appraisal committee, and they have their annual meeting, but they do not make loans. They are not allowed to pay a salary to the secretary-treasurer. They are not given the power to assess fines, to make levies, or to make a single dollar's worth of expense upon the borrower.

Mr. MOSS of Indiana. Will the gentleman yield for a moment?

Mr. MORGAN of Oklahoma. I hope the gentleman will make his question brief, because I have very little time.

Mr. MOSS of Indiana. Under the gentleman's bill, does not the farm-loan association make the first appraisement of the land that is offered for the loan through its loan committee? Is not that the fact?

Mr. MORGAN of Oklahoma. I prefer to answer in my own way, if the gentleman pleases. I have appraising committees—one, two, three, four—as many as you want. This appraising committee is required to go and appraise the land, but they are not expected to go 40, 50, or 60 miles, and they will appraise the land within their own neighborhood; and I believe they will do that local appraisement. It is not expected under the commitee's bill that these appraising committees shall be paid. The only salary provided for in the committee's bill is that of the secretary-treasurer, but there are other expenses that may be incurred.

Mr. MOSS of Indiana. That same feature is in the gentleman's bill, is it not?

Mr. MORGAN of Oklahoma. No. The trouble is that under this committee bill you have made your farm-loan association expensive, and under the substitute which I have offered they will contribute more for their assistance than they will under this expensive system which the committee has provided.

Mr. McKELLAR. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. McKELLAR. Does the gentleman's substitute provide that every borrower shall be liable for 10 per cent of his loan for his neighbor's debts?

Mr. MORGAN of Oklahoma. No, sir; they are liable for the amount of stock they hold in the Federal land company. Now, I think that it is a good deal to ask of the farmer to invest 5 per cent of the loan, but I believe, after all, it is not asking too much. Either we must expect private capital to furnish the funds or the farmers must contribute it, and I believe that the farmer can contribute 5 per cent and invest that in farm-loan bonds in a reserve fund which would draw back 4 per cent, and at the end of the loan the farmer is credited with the amount of his stock. He can not possibly lose but little, and yet he becomes independent of capital.

If you draw your bill right, he becomes independent of the speculator and those who would derive profit on him between him and the investment. Now, as I say, the adoption of my substitute would cut the expense of the farm-loan association, and we ought to have some concern for the National Government. If this bill should be enacted into law we may have 1,000, 2,000, or 3,000 of these farm-loan associations, and the National Government furnish and pay the inspectors to inspect them, and under this system you increase very largely the expense of the National Government in supervising these farm-loan associations. It is more expensive to the Government, more complicated, and certainly more aggravating to the farmers. Think about it. If an association is organized with 10 persons, how does the farmer go into that association? He can go in only by a two-thirds vote of the directors. Five directors can prohibit any man from becoming a member of that association.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MILLER of Pennsylvania. Mr. Chairman, I offer the following amendment:

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 94, after line 19, add the following:

"That in addition to the funds provided for in this bill from which loans may be made to borrowers, the moneys on deposit in the several postal savings banks shall be made available, and on the order of the Postmaster General the funds in the several postal savings banks throughout the United States shall be transferred to the Federal farm loan and by it transferred equitably to each of the Federal land banks, and the said banks shall loan the said funds so transferred to it in the same manner and upon the same terms and conditions as the other funds of the said banks are loaned and like security shall be taken therefor. The said farm-loan banks shall assign to the Treasurer of the United States the obligation of said farm-loan banks, paying thereon the same rate of interest the Government pays for said postal deposits. If the postal savings funds should prove insufficient to supply the funds required by said banks to either make the loans applied for, redeem the bonds that have fallen due, pay the interest thereon, or the interest on any bonds that may be due and unpaid, when, and if the banks, by reason of the default of the borrowers from any cause, have not the available funds to pay the same, then, and in such an event, whenever it occurs, the Comptroller of the Treasury may issue full legal tender paper money to create a fund to redeem the said due bonds and pay the interest in default on any of the bonds issued by said banks, and also to purchase any bonds that are undisposed of by reason of there being no other purchasers therefor.

Mr. SHOUSE. Mr. Chairman, I reserve a point of order on the amendment. It seems to me that that should be offered as a separate section; that it does not pertain to this section, and I make the point of order.

The CHAIRMAN. The gentleman from Kansas reserves the point of order.

Mr. SHOUSE. No; I make the point of order. I think it should be offered as a separate section. Evidently it is not germane in any sense to this section.

Mr. MILLER of Pennsylvania. Mr. Chairman, I offer this amendment on the strength of a letter I received from a constituent of mine, and it is practically in the very language of the letter——

The CHAIRMAN. The gentleman from Pennsylvania will suspend.

Mr. MILLER of Pennsylvania. Mr. Chairman, I hope this will not come out of my time.

The CHAIRMAN. The gentleman from Kansas makes the point of order. What is the point of order?

Mr. SHOUSE. That this should be offered as a separate section, and that it is not germane to the section.

The CHAIRMAN. Does the gentleman from Pennsylvania offer his amendment as a separate section?

Mr. MILLER of Pennsylvania. No, sir; I offer it as an amendment at the close of the paragraph that is under discussion.

The CHAIRMAN. The Chair desires to say——

Mr. MILLER of Pennsylvania. And I trust this will not come out of my time. Mr. Chairman, as I have said, this amendment I offered is in almost the language of the letter which I received from a constituent——

Mr. SHOUSE. Mr. Chairman, I would like to have a ruling upon my point of order.

The CHAIRMAN. The Chair will take advantage of two or three minutes in order to look up the precedents.

Mr. SHOUSE. I reserve the point of order.

The CHAIRMAN. The gentleman from Kansas [Mr. SHOUSE] reserves the point of order, to be passed upon before the amendment is voted on.

Mr. MILLER of Pennsylvania. I hope, Mr. Chairman, this will not be taken out of my time.

As I have said, this amendment is offered almost in the language of a letter written to me by a constituent on April 1. I wrote him that I thought Congress would hardly adopt such a bill as he suggested, and in answer to that he wrote me another letter. I will ask unanimous consent to insert the correspondence with my remarks.

The CHAIRMAN. The gentleman has that permission.

Mr. MILLER of Pennsylvania. Now, gentlemen, if you want to give the farmer a real bill, something that will accommodate the farmers beyond all question, which will provide that there will never be a default or deficiency, you want to adopt this amendment. As long as the printing presses can run the bills can be printed to buy up the bonds that are in default of payment, and pay the interest where it is in default. It is just as proper for the Government to take these bonds as it is to force them on an individual.

Mr. McKELLAR. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield to the gentleman from Tennessee?

Mr. MILLER of Pennsylvania. Yes.

Mr. McKELLAR. Does the gentleman expect to vote for that kind of an amendment.

Mr. MILLER of Pennsylvania. I do not expect to vote for it, but I expect you gentlemen on that side of the House to vote for it. That will give you a real bill. It will give you something that will appeal to every farmer in the country that is in debt, and that is the kind of people who need help.

I will frankly say that this bill, or any of the amendments offered or adopted, is not needed in the district I represent. Every farmer in that district who needs money, who is industrious, and who tries to meet his obligations, and is a man of good character, can get all the financial help he should have, on a long-time loan, and at a rate of interest not exceeding 6 per cent per annum, without this bill. [Applause.]

I insert the correspondence to which I referred:

FREDONIA, PA., *April 1, 1916.*

Hon. S. H. MILLER,
*Washington, D. C.*

DEAR SIR: I hope to see a real rural-credits bill, based on a postal-savings-bank measure, that will allow owners of small farms and town properties to get loans on 50 per cent valuation of their property at 4 per cent and to run 25 years, the Government requiring a small payment of the principal, say 4 per cent, and giving privilege to pay off the whole loan any time at the option of the borrower. This would encourage young married men to try to buy and pay for a home of their own without the fear of sheriff foreclosure in case of sickness or temporary forced idleness.

Funds for such loans could be had from postal savings banks now in operation, and they could be materially increased by making the interest on unlimited deposits at 3 per cent, and the difference of 1 per cent would pay the Government expenses of making the loans, if done by a local board of loans created at each money-order office and consisting of the postmaster and two other disinterested freehold appraisers.

If the postal savings funds should prove inadequate, the Comptroller of the Treasury should be required to issue full legal-tender paper money with which to buy the real-estate mortgages as fast as they accumulate, as such money is now issued on assets of banks.

Rural communities could use these borrowed funds to form cooperative buying and marketing centers and help with surplus funds any deserving renter who has no land to better his condition and finally to own land of his own. This system is not new. It was used, by the advice of Benjamin Franklin, for the colony of Pennsylvania till forbidden by England, and, thus forbidden, was one prime source of the cause of the War of the Revolution.

Franklin said that though thousands of pounds of such paper money was issued it never fell in value, because the holder of a mortgage unable to use the borrowed money at a profit at 4 per cent interest went and paid off his mortgage, and that contracted the volume of money, and so kept up its value automatically.

You and I are getting well up in years, and I fear we have not looked well after the general welfare of our people as we should in our eagerness to better our own conditions. I notice that you intend to retire from politics, especially as a candidate for office, and it would please many of us to see your vote and time employed as above for the betterment of the whole people, and not all for a few. * * *

Yours, truly,

N. H. MOTSINGER.

---

APRIL 3, 1916.

Mr. N. H. MOTSINGER,
*Fredonia, Pa.*

DEAR SIR: Your letter of April 1 received. I think a rural-credit bill will pass the House this session, but do not know what its fate will be in the Senate. However, I do not think it will be on the basis you suggest. Very few Congressmen, so far as I have heard them express themselves, are in favor of the Government becoming a banker and lending money direct to borrowers. The proposition that will likely pass is to authorize banks expressly chartered for the purpose to lend farmers and others who can give satisfactory security money on long-time payments, such loans, however, to be secured by long-time mortgages and bonds in denominations of $100 to $1,000, issued to secure payment of said mortgages. Something after this manner will pass.

Very truly, yours,

——— ———.

---

FREDONIA, PA., *April 18, 1916.*

Hon. S. H. MILLER, M. C.,
*Washington, D. C.*

DEAR SIR: I thank you for sending me a copy of the Hollis bill, purporting to afford farmers a means of getting long-time low-rated money to help them improve their farms and to help young men acquire ownership of homes as farmers. I have read this complicated bill and noted how it is burdened with bonds that must be sold, that the borrower must put up himself 5 per cent of the money he borrows, and that there are several kinds of banks he may tackle for relief and find no relief in any of them.

I doubt if you can find 10 Mercer County farmers who will read this bill all the way through to determine which route for relief is the best that the Government offers. The bill furnishes plenty of "jobs" at good salaries and plenty of good picking for attorney fees and abstracts, and no limitation placed on the size of the fee; and, worst of all, there is not a rate named that will assure the farmer that he will pay less interest than a national bank would charge him, but he may get a longer time to pay his mortgage off if the Federal officials of the board of the land bank so decree. This bill was never intended to give the farmers any relief. It is an excuse to fool the farmers into the belief that Congress has tried to aid them, but in such a way that they will never be able to apply it. But the Congressmen can say, "We passed you a rural-credit bill and you haven't sense enough to use it."

It shows that Congress must have an awful grudge against the farmer to pass such a bill as that and call it a relief rural-credit bill. I hope you did not vote for it, as you surely have not such a grudge against the farmer as that.

Yours, truly,

N. H. MOTSINGER.

Mr. OLIVER. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Alabama offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, by inserting the following in line 2, after the word "repayment":

"*Provided, however,* That when the loan is approved and the bonds negotiated the Federal land bank may pay to the secretary-treasurer of the national-loan association through which the said loan was applied for an amount annually equal to one-half of 1 per cent, the same to be paid out of the 1 per cent assessed for expenses against the borrower."

Mr. OLIVER. Mr. Chairman, I have been impressed with the very great care shown by the committee in the preparation of this bill, and I am in hearty sympathy with the general purposes of the bill, though I do not fully concur in the wisdom of some of its provisions. This amendment is offered for the purpose of eliciting information from a member of the committee relative to the matters referred to therein. I would like to ask the gentleman from Indiana [Mr. Moss] a few questions. Did the committee in the hearing consider or discuss the probable limit of territory within which national farm-loan associations would be allowed to operate?

Mr. MOSS of Indiana. I would like to say to the gentleman in reply to his question that neither the Banking and Currency Committee during the present session of Congress nor the joint committee during their sittings held any hearings whatsover on this subject.

Mr. OLIVER. No expense money is immediately provided in the bill for national farm-loan associations, unless raised by assessment on members. The only funds for meeting the necessary expenses of such associations are derived from dividends when declared. Did your committee consider when such dividends would probably be first declared and what the probable expense of conducting the business of those associations would be to the date when they might be so declared?

Mr. MOSS of Indiana. In reply, Mr. Chairman, the committee knew, of course, that the dividends could not be declared before the interest was paid into the land banks. Under the terms of the bill the interest is paid annually or semiannually. If the loans are made annually, I presume the dividends are paid annually. However, the dividends might be paid semi-annually. As to the expense, it was believed the conduct of the association would be largely altruistic and without expense. We did contemplate there would probably be some expenses connected with the secretary-treasurer.

Mr. OLIVER. Just one more question in that connection. When banks or trust companies are designated as agents to submit applications for loans to the Federal land banks, the Federal land banks under the bill as drawn may pay to such agents one-half of 1 per cent. Now, why did the committee not provide the payment of this one-half of 1 per cent to the national farm-loan association when loans were approved and the money collected thereon?

Mr. MOSS of Indiana. Because the relation between the farm-loan association and the land bank is totally different from that which would be between the agent and the land bank. The farm-loan association is a shareholder in the land bank and would naturally share in the dividends whenever declared. Now, then, the agent bank, having no connection whatsoever with the system, would not participate in any way in the earnings, and could not get any pay whatsoever for its labor unless it was by contract. The gentleman must remember the language is "not exceeding one-half of 1 per cent."

Mr. STEAGALL. Mr. Chairman, will the gentleman permit an interruption?

Mr. OLIVER. Yes.

Mr. STEAGALL. Answering further, also, it is a fact, is it not, that every member of the farm-loan association is a borrower and gets his benefit both as a borrower and as a stockholder, whereas in the case of the trust company which acts as agent it would have no such interest in it?

Mr. OLIVER. Mr. Chairman, my purpose in offering the amendment was to write into the record the views entertained by members of the committee on the matters inquired about, and I now ask to withdraw the amendment.

The CHAIRMAN. Without objection, the amendment will be withdrawn.

There was no objection.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. RUBEY having taken the chair as Speaker pro tempore, a message, in writing, from the President of the United States, was communicated to the House

of Representatives by Mr. Sharkey, one of his secretaries, who also informed the House of Representatives that the President had, on May 11, 1916, approved and signed bill of the following title:

H. R. 8067. An act to quiet title to certain lands in the possession of G. B. Dickson, and for other purposes.

RURAL CREDITS.

The committee resumed its session.

Mr. DILLON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from South Dakota [Mr. DILLON].

The Clerk read as follows:

Amendment by Mr. DILLON: Page 92, line 21, strike out "$10,000" and insert "$5,000."

Mr. GREEN of Iowa. Mr. Chairman, I am not well informed with reference to the conditions of the southern farmer. I do not pretend to know what he wants or what he needs. According to what some gentlemen have said here, on the other side of the House, he wants much, and his needs are very great. Indeed, if I may credit some of the statements that have been made, I would assume that his condition is pitiable, indeed, and such that the Federal Government might possibly be justified in going to his aid by what some gentlemen have called the "donations" of this bill.

But, Mr. Chairman, the conditions in the district which I have the honor to represent are far different. The farmers there who have land live in good houses—many have better than I could afford to own. As a rule they possess automobiles, and if they do not have money in the bank have a credit there to an extent that few of the merchants possess, and none of the officeholders. These men who own land can get money at the banks at a fairly reasonable rate for short-time loans. On farm loans, I think, the prevailing rate is now 5 per cent, with a small commission, although at times it has been higher.

But does any gentleman suppose, does anybody think, that these men who are in this condition financially are going to mortgage their farms in order to secure the loans of other parties? Yet that is what they must do in part if they obtain loans under this system. If gentlemen believe that they will do this, I think they are mistaken. No one seems to think that the rate will be less than 5 per cent under this bill. Surely a farmer would rather pay a small commission than to add one-tenth to his loan to help secure the loans of others and submit to the other restrictions of this bill. I can not believe that this system will work satisfactorily in the country at large, or that it will be of any particular benefit to the farmers of the district which I have the honor to represent. I hope it may, but I do not believe it will.

Of course, there is another class of farmers in my district, as there is in every district, I suppose—the tenant farmer. But this bill will not help the tenant farmer. He is the man who needs help most and ought to have it. I will ask any gentlemen in charge of the bill to point out how this bill could possibly help the tenant farmer.

Mr. McKELLAR. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. McKELLAR. If the tenant farmer has accumulated enough to pay 40 per cent on the farm, he can borrow money from this board.

Mr. GREEN of Iowa. Yes; in other words, if the farmer has enough means and credit to borrow from somebody else, this bill will help him to borrow more. He will be in the same condition as those who already own land. But that kind of a tenant in Iowa can get the money elsewhere as cheaply and without the added burdens of this bill.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. HUMPHREY of Washington. Will not this bill increase the price of farm land, so that the prospective buyer will have more to pay?

Mr. GREEN of Iowa. Yes. It has been suggested by the gentleman from South Dakota [Mr. DILLON] that this bill will promote speculation in farm lands, and I think it will. At the time it was first proposed to have a bill of this kind passed by some Congress letters were sent to the farmers all over this country—to those in my district, at least—asking the farmers how much money they would want, and how they would use it. I knew one man who already owned several hundred acres of splendid land in my district who answered back that he could use $50,000, and in answer to the other question as to what he would do with it he said he would buy more land. So it is likely to be in the case of this bill; at least that is what it can be used for. A considerable portion of the money which the Government provides, I think, will be used by speculators. They are the persons who will probably get the greatest advantage from it. [Applause.]

Such in brief are my views of this bill. I hope I am wrong in my conclusions, as I have no doubt it will pass. I may say also that as it is all we are able to get, I am inclined to vote for it in the hope that it may do some good and in the belief that it will not do much harm. The committee has spent much time in preparing it. Their task has been a difficult one, and if they have not been successful it is certainly through no want of effort or desire to help the farmer.

Mr. PHELAN. Mr. Chairman, there are one or two things which I did not intend to touch upon, but I see there is some misunderstanding on the part of some gentlemen in regard to these. The bill is complicated, or seems to be on its first reading, and Members seem to misunderstand some of the provisions of the bill.

I want to call the attention of the gentleman from North Dakota [Mr. YOUNG] to the fact that there is a provision in the bill which absolutely prohibits a loan to one person of more than $10,000. It will be found on page 103, at the top of the page, and also on page 92. So it will not be possible, as was asserted, for one man to go out in 40 different districts and borrow $10,000 in each one, or a total of $400,000.

Mr. YOUNG of North Dakota. Not even by indirection?

Mr. PHELAN. Not even by indirection, as the gentleman suggests.

Now, I want to say in response to what the gentleman from Tennessee [Mr. McKELLAR] has said——

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. PHELAN. No; I can not yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. PHELAN. I can not yield at present. With reference to what the gentleman from Tennessee stated, I want to say a word and call attention to the inconsistency of some of these gentlemen who are talking upon this rural-credit proposition. They will tell you that there is no better security in the world than these farm mortgages. Then they will tell you that it is a perfectly safe proposition to put into effect a system under which the borrower does not put anything into the guarantee fund of the system; that nobody can lose anything by it; that the Government can contribute; that the Government can guarantee; and that there is no danger of any loss. And then, in the next breath, they say, "Why do you put the liability on the poor farmer of the loss that he is likely to sustain under this system?"

My friends, we have attempted to draw this law so that there will not be any loss at any place; and if ultimately there is going to be any appreciable loss, there will be a failure of the whole system.

Let me point out the situation with reference to the contribution of the farmer. Here is the chance he stands of losing any money: He can not lose a nickel if the interest is paid on the mortgage in that association and if the principal is paid. If they are not paid, there is a 40 per cent margin on the land and 80 per cent on the buildings, because under the appraisal you can not loan more than 60 per cent on the land and 20 per cent on the buildings. So that, under the provisions of this bill, if the mortgage is to be foreclosed, the farmers in the association are not going to lose anything ultimately.

But suppose that temporarily the association can not meet its obligations immediately. We have provided in our bill for a special reserve of $150,000 in the land bank that can be drawn on temporarily by the association, so that that money can be used to meet the association's immediate debts. Thus, if the members can not pay their obligations, there will be foreclosure proceedings, if necessary, and the association will be absolutely solvent.

So all this talk about the tremendous responsibility that the farmer is assuming when he contributes 5 per cent to the stock of the association and assumes another 5 per cent of liability amounts to nothing at all.

In addition to that, let me point out that he is going to get something for that 5 per cent. He has got the stock, and it will earn dividends. If it earns dividends, he will get them. Nobody else is going to make any profit out of it. Under this cooperative system nobody can make a single dollar out of the operation of the system except the stockholders, who are themselves borrowers. So if there are no dividends, it will be because the farmer is getting his money at such a low rate of interest that no profits are earned. It is going to work to the benefit of the borrower one way or the other. If the rate of interest is higher than the bank needs to charge, the borrower will get the money back in the form of dividends on his stock.

If he does not get any dividends, it will be because he is getting his money at such a low rate of interest that no dividends are earned. He is bound to get the benefit of it one way or the other.

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

Mr. McKELLAR. Mr. Chairman, it has been quite a while since my amendment was read. It is short, and I ask unanimous consent that it may be read again.

The CHAIRMAN. The amendments will be considered first. The amendment of the gentleman from Tennessee is in the nature of a substitute. It will be voted on after the amendments have been voted on. The vote will first be taken on what is known as the Dillon amendment No. 1.

The question being taken, the amendment was rejected.

The CHAIRMAN. The next amendment is the Platt amendment. The question is on that amendment.

The question being taken, the amendment was rejected.

The CHAIRMAN. The next amendment is that of the gentleman from Pennsylvania [Mr. MOORE].

The question being taken, the amendment was rejected.

The CHAIRMAN. The next amendment is offered by the gentleman from Pennsylvania [Mr. MILLER].

The question being taken, the amendment was rejected.

The CHAIRMAN. The next amendment is known as the Dillon amendment No. 2.

The question being taken, the amendment was rejected.

The CHAIRMAN. The next is the amendment in the nature of a substitute offered by the gentleman from Tennessee [Mr. McKELLAR].

Mr. McKELLAR. I ask unanimous consent that that amendment may be read. It is short.

The CHAIRMAN. The gentleman from Tennessee [Mr. McKELLAR] asks unanimous consent that his substitute may be again reported. Is there objection?

Mr. SHOUSE. I object.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Tennessee [Mr. McKELLAR].

The question being taken, on a division (demanded by Mr. McKELLAR) there were—ayes 38, noes 44.

Accordingly the amendment was rejected.

The CHAIRMAN. The next amendment is in the nature of a substitute, offered by the gentleman from Oklahoma [Mr. MORGAN].

The substitute was rejected.

Mr. MURRAY. Mr. Chairman, I offer an amendment to come in as a new section.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MURRAY] offers an amendment, which the Clerk will report, in the form of a new section.

The Clerk read as follows:

Amendment by Mr. MURRAY:

Page 94, line 19, at the end of the line add the following as a new section:

"COOPERATIVE FARM-HOME SOCIETIES.

"SEC. 8a. The Federal farm-loan board shall authorize, under such rules as it may prescribe, the organization of cooperative farm-home societies, whose members shall consist solely of heads of families, citizens of the United States, whose taxable property does not exceed $1,000 and who own no farm real estate, and who bear a good reputation for thrift, sobriety, and fair dealing. No such society or its members shall be required to own any capital stock in any national farm-loan association, Federal land bank, or joint-stock land bank to entitle it or its members to the benefits hereunder, but such society shall be voluntary, organized wholly within a State, for the purpose of buying farm homes for its members who may each have the privilege, within the discretion of said Federal farm-loan board, of borrowing a sum not exceeding $2,000 with which to buy a tract or parcel of farm land and not to exceed 90 per cent of the cost thereof, exclusive of improvements. The members of such society may collectively or individually, by verified petition, make application to the Federal farm-loan board through the Federal land bank, on blanks furnished by the Federal farm-loan board, setting out their respective qualifications as above and as herein enumerated, each petitioner giving the names of at least two witnesses to sustain each of the requirements of this section to entitle each of them to the benefits thereof, and reciting by metes and bounds the tract or parcel of farm land which each desires to purchase as a farm home, giving the price of same as reasonable and the name of the owner who offers it for sale, and further stating that the petitioner desires said tract of land for a farm home, pledging to live upon it for the purpose of cultivation until the loan is discharged by repayment on an amortization plan, or until authorized to sell or dispose of the same or to remove therefrom by the Federal farm-loan board; and further stating that he will not commit waste nor permit it to be done, and that he will keep all taxes paid upon the said tract or parcel of land. Whenever a number of such petitioners, not less than 100, living within a convenient radius of each other and in the same State, shall have been received by said Federal farm-loan board it shall make or cause to be made investigation as to the truth of the statements of such petitioners, and appraisement of the value and investigation of the title to each tract of land desired to be purchased under this section, and if as many as 30 of such petitioners shall have established to the satisfaction of said Federal farm-loan board the truth that they have met the requirements in said petition and of this act, and are of suitable character authorizing them to come within the benefits extended to members of cooperative farm-home societies, then in that event the Federal farm-loan board shall authorize the Federal land bank of that district to loan to each of such petitioners individually a sum equal to 90 per cent of the value of each respective tract of land not to exceed in any event $2,000 to any one person, conditioned upon each petitioner's individually depositing in such Federal land bank to its credit a sum equal to 10 per cent of the value of said tract of land (exclusive of improvements) and an amount in addition thereto with which to pay the cost of investigation (the full amount so deposited shall be returned if the loan be denied), then in that event the Federal farm-loan board shall direct the purchase of such tract or tracts of land, and the Secretary of the Treasury of the United States is hereby authorized and directed to deposit in such Federal land bank, out of any moneys in the Treasury not otherwise appropriated, as a loan to the reserve fund of farm-home societies, a sum of money equal to 10 per cent of the aggregate loans to all members of such society as a reserve fund, which shall equal at all times the sum of 10 per cent of the outstanding loans to all members of all cooperative farm-home societies of such Federal land-bank district: *Provided*, That the said Federal farm-loan board shall exercise a supervision over the use and occupancy of said land with a view of enforcing purchaser's pledge as to residence, cultivation, preservation against waste, and payment of taxes, together with such other pledges or promises as may be provided in the rules of organization fixed by the Federal farm-loan board; that if any borrower or home purchaser under this section shall fail or refuse to keep any of said pledges the whole of the amount borrowed by him shall within 30 days become due and payable and the land forfeited by nonpayment to the Federal land bank, which shall have power to dispose of the same as in this act provided. Borrowers under this section shall be liable only for the amount of their individual loan.

"All net earnings and profits under this section in each of the 12 Federal land-bank districts shall be kept in a separate account, under the heading 'Reserve fund of cooperative farm-home societies,' and said fund shall at all times be equal to 10 per cent of the aggregate loans of all members of all the cooperative farm-home societies in such district either by a loan from the Government or by profits and net earnings or both: *Provided*, That as rapidly as said reserve fund shall accumulate from the net earnings of such societies the Government shall be reimbursed for the loans made to said reserves, reserving at all times 10 per cent as aforesaid: *Provided further*, That in all other particulars such cooperative farm-home societies, its members, the money borrowed, and the lands purchased by them shall be subject to the rules and regulations promulgated by the Federal farm-loan board, and to the provisions, requirements, limitations, and restrictions, conditions, and covenants as is in this act otherwise provided, so far as they may be applicable."

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. CULLOP having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed without amendment resolutions of the following titles:

House concurrent resolution 39.

*Resolved by the House of Representatives (the Senate concurring)*, That the President be requested to return to the House of Representatives the enrolled bill H. R. 759, entitled "An act to provide for the removal of what is known as the Aqueduct Bridge across the Potomac River and for the building of a bridge in place thereof.

House concurrent resolution 26.

*Resolved by the House of Representatives (the Senate concurring)*, That there shall be printed as a House document 1,500 copies of the journal of the fiftieth national encampment of the Grand Army of the Republic for the year 1916, not to exceed $1,700 in cost, with illustrations, 1,000 copies of which shall be for the use of the House and 500 for the use of the Senate.

House concurrent resolution 27.

*Resolved by the House of Representatives (the Senate concurring)*, That there be printed 20,000 copies of the revised edition of United States bankruptcy laws as prepared by the Committee on Revision of the Laws of the House of Representatives, the said 20,000 copies to be distributed as follows: Three thousand copies to the Senate folding room, 3,000 copies for the Senate document room, 7,000 copies for the House folding room, and 7,000 copies for the House document room.

RURAL CREDITS.

The committee resumed its session.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent that I may speak on this bill for 20 minutes.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MURRAY] asks unanimous consent to speak for 20 minutes. Is there objection. The Chair hears none.

Mr. MURRAY. Mr. Chairman, the purpose of a rural-credits bill, which is a species of "paternal" legislation, is justified in order to prevent home-owning farmers becoming tenants and to aid tenant farmers to become home owners, and both these in order to increase production so that the laboring man in the district of the gentleman from Pennsylvania [Mr. MOORE] and that all may have cheaper cost of living. However, as was the case with the gentleman from Pennsylvania, industrial centers seem to overlook the fundamental principle that when production runs low it increases prices of living, to the damage, particularly, of the laboring man. This bill will greatly aid the home-owning farmer by giving him a low rate of interest and easy time of payment, and thereby tend to prevent his becoming a tenant; but there is nothing in this bill to aid the homeless man unless he has 45 per cent of the cost of a farm when he seeks a loan, and, in my opinion, this class of farmers—the tenant class—are the first to consider, so far as it affects the country, in such legislation.

I agree with you that this is a remarkably good bill considering the fact that the question has been considered only since the campaign of 1912. All great questions require years of agitation, followed by years of deliberate consideration. The immigration question has been before the country for 14 years and yet not a law. We were nearly 30 years in getting the income tax, first placed upon the statute books during the present administration; we were more than 20 years electing Senators by direct vote of the people. Morgan, of Alabama, urged the digging of the Panama Canal for 20 years before it became a reality. Such has been the fate of all great questions. John H. Reagan was a constant advocate in Congress for 14 years of an Interstate Commerce Commission, and at last succeeded in creating that commission with the power to do nothing, but we have added to its power from time to time. Likewise the rural-credits bill, discussed but four years before the whole country, it is but remarkable that the bill is as good as it is. This one is much better than the one we passed two years ago, and if it had a discussion for four more years it could yet be made still better, and I am sure that as time goes along after this bill becomes a law it will be so amended as to permit the homeless man to borrow money with which to buy a home. Therefore I shall vote for the bill, notwithstanding the fact that it will do little to aid my State. I advocated a rural-credits law in my campaign in 1910, and again in 1912. I find here in Congress most men unable, as they admit to me, to draw into detailed form of a statute a rural-credits bill in aid of the man without land, and I agree with you that such is difficult; but if character is as good as collateral as security for a debt—and the late J. P. Morgan testified in an investigation before a committee of Congress that character is better than collateral—then my amendment, which I offer as section 8a, providing for loans of 90 per cent of the value of a farm, in such case not to exceed $2,000, to such United States citizens who have taxable wealth not in excess of $1,000, and who are homeless, thereby permitting them to make a payment of 10 per cent and enable tenant farmers to buy small homes, because a farm costing $1,000 would enable them, with a $100 payment to begin with running from 20 to 36 years, to make an annual payment under "amortization tables," so that annual payments would be less than rent. A farm costing $2,000 they could borrow $1,800 from the land bank, and by paying $200, or 10 per cent, procure that home, and proportionately less as the value of the farm became less. This would enable men who have no real estate and who do not own more than $1,000 worth of taxable property to buy homes, provided their reputation in their own community is good for sobriety, industry, and fair dealing, for such excessive loans would require men of character. Then, in order to make the loan safe, my provision directs that the Secretary of the Treasury shall deposit in the land bank 10 per cent of all loans as a reserve until the profits arising from that class of loans can return such reserve loan to the Government. This principle is identical with the principle in the bill which directs the Government to buy stock in the land bank without dividends upon such stock.

Many gentlemen find a "bugaboo" in Government aid, but just recently Canada has enacted a rural-credit bill providing that bonds in the sum of a million dollars in each issue should be sold by the fiscal agent of the Government, and then should be unconditionally secured by the Crown both for the payment of principal and interest, with the interest limited to 1 per cent above the interest which such bonds should bear. This makes them essentially Government bonds. Remember the four hundred million of Panama Canal bonds bore 3½ per cent. It is assumed therefore that such bonds could be sold at the same rate, making the interest at 4½ per cent to the borrower. I agree that direct Government aid is not essential for a rural credit, but if these bonds are made like the Canadian law provides and exempt from taxes, secured in addition by the land mortgages upon which they are based, there could not be a better security offered to the market, and every man having money to invest in larger or small amounts would gladly buy a hundred-dollar bond or a five-hundred-dollar bond or a five-thousand-dollar bond, because he could use it as collateral anywhere in the United States to borrow money if he needed it. At the same time the interest, as small as it is, would continue to accumulate. I may recite also that the very beginning of a rural-credit system was with Government aid. The first practical operation was proposed by an obscure merchant in Prussia by the name of Büring, who finally enlisted the aid of Frederick the Great, who, having absolute power, consulted no one, but put it into operation and forced all to come under it at the close of the seven-years war with the neighboring States of Europe. This was a devastating war and constitutes a very remarkable tale in the history of the world. I quote from a speech delivered by Mr. Speaker CHAMP CLARK, because that story can not be better told than he has given it in his speech, which is as follows:

With 5,500,000 people when he started, Frederick the Great fought France, Russia, Austria, Sweden, and Saxony, one of the largest of the German States, all at one time, and soundly thrashed the whole aggregation, although they had a population of 105,000,000 people. His kingdom was not half as large then as the Kingdom of Prussia is now, and consisted of three separate disconnected pieces. Although he was the victor in that war, he had lost one-ninth of his entire population, and there never has been a country in the history of modern times that was so thoroughly devastated as was the Kingdom of Prussia. There was not a square mile which had not been laid waste with fire and sword. Frederick started in to rehabilitate his country. The people did not have seed enough to plant a crop. He mortgaged the crown jewels and tore the silver bullion out of his palaces—for in those days they fixed up fine houses with a great deal of bullion. He melted it down and sold it and invested the proceeds of the bullion and the crown jewels in field seed for the farmers and gave it to them. They did not have horses enough to put the crop in, and he loaned them 60,000 cavalry and artillery horses to do their plowing. Then he undertook, furthermore, to reestablish their homes, and he constructed over 30,000 houses. Taken all in all, he is one of the greatest men who ever lived. This man Büring, the obscure merchant, went to Frederick the Great and pumped into his head this scheme of landschaft, farm loans or rural credits. Frederick changed it somewhat, but accepted the principle. He reached out and took the nobility of Silesia by the nape of the neck and dragged them into the landschaft. They did not have any choice about it; he made them go in; and in order to help it along he contributed $632,000 out of the royal revenues—a large contribution in those days.

The landschaft that he started in 1769 is running successfully yet, and it has been adopted in every country of Germany—the 26 States—except one, and has been adopted in France, where it has been reduced to almost an exact science.

So it will be observed that the system had its birth in governmental aid. I suspect that the fear excited by governmental aid is due to the fact that most of the advocates of governmental aid, both in and out of Congress, advocate governmental currency on land; but the currency question is a different question, and, in my opinion, they are unsound in this, because currency could not be issued for 20 or 30 years without a gold reserve of 40 per cent be piled up, just as it is provided in the regional reserve system, because no paper currency issued with a promise to pay, or in the form of debt, called asset currency, can ever be made sound without a reserve of money to pay it on demand. The gentlemen who want to issue currency unlimited by the Government, and who tell us they ask no more than is provided for the regional banks, overlook the fact that the currency issued to the regional reserve banks require 40 per cent gold reserve to pay them on demand; and I ask, Where is the farmer, should he get the same terms, to get 40 per cent of his loan in gold in order to secure such currency? Such would not serve the farmer, and therefore such idea should be dismissed as a plan merely to deceive the farmer, or as but a dream of some one who does not really know the banking law as it exists. The farmer is not worrying about currency. What he wants is money on low rate of interest, on such terms as will enable him to pay.

I feel that I have as good a record as any man on the rural credits.

Mr. Chairman, no Member of this House has been a more consistent, earnest advocate of genuine rural-credit legislation—legislation beneficial alike to tenant as well as land-owning farmers—than myself.

When the President called the Sixty-third Congress to meet in extraordinary session on April 7, 1913, and submitted to it the matter of revising the banking and currency law, the bill, after being prepared by the Committee on Banking and Currency, was submitted to the Democratic membership of the House in caucus on the 11th day of August, 1913. The bill was continuously considered, section by section, until the 28th day of August, 1913, when, as amended, it received the approval of the caucus.

An effort was made to incorporate in that bill a rural-credit provision, and I favored it because I believed a system of credits for the farmers and producers of the country was of equal importance and deserved the same consideration as a system of banking and currency for the commercial and industrial interests. The effort, however, was defeated, and the friends of rural credits legislation then moved that section 26 of the banking and currency bill and all amendments thereto be referred to the Banking and Currency Committee with instructions to bring in a bill providing for rural credits. This motion was agreed to, but subsequently a motion to reconsider was lodged, and a motion was then made and carried to lay the motion to reconsider on the table, which, under parliamentary law, carried with it the original and all subsidiary motions, and the whole matter, under the parliamentary status, was tabled. In the caucus all parliamentary questions are settled on general parliamentary law; in the House they are decided

on the general principles of parliamentary law, in so far as they have not been changed by the rules of the House and its practice and procedure.

On account of my experience as the proceedings advanced and my familiarity with the general principles of parliamentary law, by common consent, the friends of rural-credit legislation did me the honor to take charge of the parliamentary struggle and take the matter of rural-credit legislation from the table where the enemies of this class of legislation thought it had been put forever to sleep, breathe into it new life and make it possible at an early date.

On page 36 of the caucus proceedings the record discloses the following:

Mr. MURRAY, of Oklahoma, then moved to take from the table the motion to reconsider. Mr. UNDERWOOD made the point of order that the motion to lay on the table was tantamount to a disposal of the motion. Mr. MURRAY, of Oklahoma, made the point of order that the House rules did not operate in the caucus, but that the caucus was governed by general parliamentary law.

His point of order was sustained. Mr. HAY then moved to postpone indefinitely the motion made by Mr. MURRAY to take from the table the motion to reconsider, but this was refused on the point of order being made against it by Mr. MURRAY and sustained by the Chair.

This motion of Mr. MURRAY'S to take from the table the motion to reconsider the vote by which section 26 was referred to the Banking and Currency Committee with instructions to bring in a bill providing for rural credits was carried, and a roll call was had, and after that a recapitulation, which resulted in the motion of Mr. MURRAY being carried by a vote of 116 ayes to 66 noes.

Mr. MURRAY, of Oklahoma, then offered the following amendment, and it was adopted: "I move that all amendments be committed to the Committee on Banking and Currency with instructions that it bring in a bill for farm credits during the regular session of Congress."

This record ought to entitle my opinion to consideration on this subject.

My efforts have been concentrated along the line that it seems difficult to get others to think about, to wit, to aid the tenant farmer, for the reason that my conception of government is that the poor and weak should have first consideration. The rich and powerful can take care of themselves, although their rights should be protected the same as the poor.

As I said a moment ago, there are many men in my country and in Arkansas and Texas whom this bill would not serve without my amendment or something like it. These men are tenant farmers. Their fathers before them were tenants; their children will be tenants, for the reason they have never developed the faculty of management which ownership of property develops in any man. You must remember also that the first $100 is the most difficult to lay up. I remember when I worked for $7.50 per month for a farmer down at Garvin, Wise County, Tex., that it was more difficult for me to get hold of $100 then than it would be to get $5,000 now, and this is the experience of all men. If you can not aid this class, what argument can you make to aid the class who have already scaled the ladder? Gentlemen on this floor speak of their knowledge of farming and of farm life, but I fear the most of them only know that life which landowners live, and some of them from the South, where all of the tenants are negroes, have but little care for that reason, but they ought not to begrudge giving an opportunity even to a poor old darkey; but the tenants of my State are white men, and I know their life and the hardships which they must undergo. When a recess in Congress comes I always go down there to help them and encourage them. When I quit the practice of law in 1902 and moved to my farm there was but one man in that community who owned the land upon which he lived. Since that time some six or eight have bought homes, and I have aided three of them in their effort. My experience with them convinces me that if given an opportunity they could own a home by providing a system whereby they could make an annual payment that would be less than the rents they pay. The statement made by Mr. CARAWAY, of Arkansas, to the gentleman from Pennsylvania on yesterday that many tenant farmers live on less than many members of Congress spend for luxury is literally true.

I am sending to two tenant farmers who have four in their family $10 a month, and this is all they have to live on. I send them this money to save them interest. I am on the notes of four other tenant farmers with six in their families, who draw at the bank on that loan not exceeding $20 per month with which to support their families while making their crop. That sounds like a fairy tale to many of you, but that is the literal truth. I remember one man in my community who bought 50 acres of land at $50 an acre. He was afraid to make the purchase; but after he got into it, partly due to my advice and promise to aid, he succeeded in paying for that farm in six years, and now has bought another, and he can pay for it much easier than he paid for the first. Why not aid these men? I know of another man in my county who has lived all his life as a tenant on two farms. He is an old man with grandchildren. His father before him was a tenant. He is industrious, sober, and upright. The only thing wrong with him is that he votes the Republican ticket; but if he finds that you are going to give direct governmental aid to the man already up in the world and not to him, he is liable to do worse, and you could not blame him for voting the Socialist ticket. It is little wonder that my State had 53,000 Socialist votes in the last election. Of course, I agree with you that there is no sense in their casting that vote, because that would not aid them. Carl Marx, the greatest of all Socialists, correctly stated a truth when he stated there is nothing in farm life to justify a farmer becoming a Socialist, but they do it as a protest to governmental power. In this they are wrong. If they had not been with us when the Oklahoma constitutional convention was called our constitution would not have contained the reforms it does.

In my amendment I have sought to adopt the machinery and the principle of the bill itself, which is sound in its financial make-up, and certainly legislation of this character must be as financially sound as the regional reserve system. The gentleman from Illinois [Mr. CANNON], whom we love to call Uncle Joe, quoted some figures to show that the farmers were wealthy; but Uncle Joe has not breathed the air of this tenant class which we find down in Oklahoma, Arkansas, and Texas. Give this class an opportunity. In other words, supply what they lack—a fostering care of the Government that will give them an opportunity under management in such a way that their annual payments by "amortization" will be less than their rents, and in a very few years they will learn to manage for themselves. They will increase the production of the country and prove a greater guaranty in all political movements, aiding greatly the preservation of our institutions and the integrity of the Republic.

Mr. FESS. Will the gentleman yield?

Mr. MURRAY. No. The learned gentleman from Ohio, I fear, wants to interrupt. I am sure that he knows little about this class of farmers. I will yield if he wants information.

Mr. FESS. The gentleman's State was opened in 1889. Why is it that there are so many tenant farmers in Oklahoma?

Mr. MURRAY. It is true that in 1889 the west half of Oklahoma was opened and settled entirely under the homestead law, but the east half of the State, or the Indian country, was owned by the Indians, and these lands are cultivated by white men, and this is the reason why Oklahoma has 104,000 tenants, 75 per cent of whom are in the east half of the State.

Mr. FESS. It is only 27 years ago that the State was opened for settlement. Are these men tenants because they can not buy the Indian lands?

Mr. MURRAY. They are tenants because when the restrictions were removed on the Indian lands they were unable to make the cash payment down that the Indian demanded, and it has resulted in the wealthy classes or land companies buying the land upon which restrictions are removed and thus aggravating the hardships of tenant conditions, because the land companies are more exacting with their tenants than the Indian landlord, and it will continue until all Indian restrictions are removed, unless some provision like mine is put into this bill; because when you remove the Indian's restrictions and the Indian demands one-third or one-half down—and oftentimes he demands all of it—and there is no law that Congress can pass to compel the Indian to sell it on any better terms, because it is the Indian's property, any more than you can force a white man to sell his property on time. All these lands have been allotted and become private property. Therefore Congress can not order them sold on time payment. Therefore the removal of restrictions without a governmental aid to the tenant farmer would in no sense enable the tenant farmer to buy his home, and things would continue to occur just as they have in the past—the tenant would be just as homeless as ever. Of course, we in Oklahoma are all in favor of removal of restrictions, but I say to you, along with it should be such a provision as I am advocating in order to enable this homeless class to buy a home. Otherwise the tenant would later buy from the white purchaser and pay, in addition, the white man's speculation. Under my provision, as you can readily see, a farmer can put up 10 per cent on not to exceed a $2,000 tract of land, and he could pay $200, or less, if it cost less; whereas under the bill as it stands, without my provision, he would have to put up at least $990. I submit it would be much easier to make a payment of $200 than it would $990, and I say to you that none of the tenants in my country could do that. I agree with you about the difficulty of drafting legislation of this kind and making it at the same time financially sound, but if any man can criticize my provision I would be pleased for him to do it from any standpoint. I have had a lot of experience in drafting laws to protect the weak, and with tolerable success.

Some gentlemen object to this legislation because they say it is "special" legislation. Now, what harm is there in that? We have made "special" laws for all classes of people. We have made a "special" law in the interest of the railroads when we gave them the power of "eminent domain"—the power to take your land or mine, by paying for it, whether we would or not, over which to run their road. This is a king's power, the power of a monarch, but it is necessary in the interest of progress. Otherwise the road would not be built. All the States have passed "special" laws for the laboring man, giving him the first lien for his labor. We have passed "special" laws here in Congress for the bankers, and it is essential to husband the credits and money of the country. I do not object to "special" legislation which will prove beneficial to any class, provided it does not hurt any other class. That is the dead line. No legislation is objectionable solely because it is "special." It only becomes objectionable when it hurts some one else, and I submit, Is not aid to make a home owner out of a tenant not only beneficial to him as a "special" act but also beneficial to society in general in this, that it improves the citizenship, gives him something to be interested in in the country, and increases production, which aids the whole society by lowering the cost of living?

The gentlemen from Pennsylvania, Massachusetts, and New York in their opposition seem not to understand the philosophy upon which their own citizens subsist. I am sure they are equally as honest as I am, but the trouble is they do not see it from my viewpoint, because they have not been in the position, but they ought to be able to see that their existence grows out of the production of crops in the West, South, and Northwest, and that any aid to production is an aid to the industrial centers of the East. I realize that you are surrounded by labor votes who do not comprehend this, but why not show them this indirect benefit just as I have attempted to show the people of my district the necessity for a merchant marine, which directly concerns you, yet indirectly concerns the people of Oklahoma, by giving them transportation to market? Let us be as broad as the Republic.

If you adopt this amendment of mine, the only one offered for the tenant farmer, you will have a provision in this bill sound financially, agreeing to the machinery of the system that will prove practical and workable. If you are going to give the farmers of the country a rural-credit system, why not give one to all of them? I agree with you that you can not serve the penniless man who will not try to do anything, but you can aid the man who is honest, industrious, and sober. We have aided all the other classes, and it is the farmers' time now. You do not violate any principle. You do no violence to the rich and strong. You only make government just and fair to all.

Now, in conclusion I want to thank the House for their generous, "unanimous consent" for me to speak longer than the rules would otherwise permit, but let us amend this bill so as to give to the class of which I speak that to which they are entitled. I agree with you that this bill is remarkably good, considering the short time it has been before the country, realizing as I do the difficulty of drawing new legislation. I also agree with you that new laws have to have a demonstration in practical operation in order to show their weakness and that amendment from time to time may be made to the end that they may be perfected, but we can afford to delay now long enough to criticize the provision I have drawn in every light, first, to determine whether it will meet the condition; second, whether it is financially sound; and third, whether it will be practical; and I invite such criticism. If it be defective, I fail to see it.

Again I thank you. [Applause.]

Mr. SMITH of Michigan. Mr. Chairman, I move to strike out the last word. That is one of the features of the bill I wish to mention. It seems to me to be discriminatory. It does not include enough people who are interested in farms and farming to make it of the value that it is intended to be or to cover the ground. For instance, a great many of the farms are worked by farmers who are not cultivating the land themselves. A mortgage would be just as good if it is a land mortgage, whether the person cultivated the farm or lived on the farm or not. The question has been raised as to why an industrial bond or a municipal bond is better security than a bond secured by real estate. The gentleman from Oregon [Mr. HAWLEY] spoke of that yesterday. I will say that the gentleman from Oregon, who has had a great deal of experience in investing money, would not invest in securities or in bonds or in any paper to the extent of 60 or 80 per cent of the value of the property. For instance, when he purchases a municipal bond he will look to see that the indebtedness of the district covered by that municipal bond or the property in the township or the property in the city or the property in the school district does not exceed 10 per cent of the assessed valuation of the property.

When you come to purchase bonds that equal in amount 60 to 80 per cent of the value of the property, they are not as good security as a municipal school, township, or county bond that covers property of from three to ten times the value of the bond or where the indebtedness upon the property, including the bond, is only 10 per cent of the assessed valuation of the property. Then a municipal or an industrial bond has a fixed rate of value upon the stock exchange. These bonds are to sell, if they are sold at all, upon their own merits in the open market. There is no function performed by these farm banks that you are establishing here to-day but what can be performed by the banks that are already established. These farm mortgages in no way will exceed 25 per cent of all the real-estate mortgages of the country. There are more real-estate mortgages in the United States other than farm mortgages than there are of farm mortgages. No provision is made for them, and the hundreds of millions of dollars loaned in the United States upon real estate other than farms very largely exceeds the amount and value of mortgages given upon farm property. On the 30th of June, 1914, 26,765 banks reported that they had loaned out on farm mortgages $542,100,000 and on other real-estate mortgages $2,965,900,000; and at the same time the life-insurance companies of the country had loaned out $654,650,505 on farm mortgages and $993,480,170 on other real-estate mortgages. (Report of ninth annual meeting of life insurance presidents, Dec. 15, 1915, p. 17.)

I am not speaking as a banker. The gentleman from Alabama, for instance, thought that I represented some banking institution. I will say to him that there is no farmer in my vicinity who would not as soon go to a bank to make his loan as to anyone else; and, if he offered the security, would get it as readily of the bank as he would any place else. And he would get it at a reasonable rate and for the length of time he wanted it. He would not have to keep the money for five years, but could pay it off in installments on any interest day. He would only be charged annual interest, while you propose to charge him semiannual interest. [Applause.]

Mr. MANN. Mr. Chairman, I move to strike out the last word. A man acquires property by labor and saving and he never will acquire much by borrowing money. He may get a little money, but if he is not willing to work and save he never will pay back what he gets. A young man, or an older man, for that matter, can go into the State of Illinois, and doubtless almost any other State in the Union to-day, and go on a farm as a farm laborer where he can gain experience all the time and save $20 to $30 a month. If he will do that, by the time he is really ready to own a farm and operate it on his own account, he will have some money to help purchase a farm, but to say that you will loan money to a man who has nothing either in the way of experience or accumulation is not to give an advantage to such a man, because it is harmful rather than helpful to him. There are not many men in this Chamber who commenced life with either a gold or a silver spoon. The men here in the main who have accumulated farms or other property on even terms with those around them did it by hard work and by saving a portion of their earnings. That opportunity is open in the world, especially in this country, to every young man and to those who are older, and the man who wants to own a farm can easily accumulate enough money, if he will save what he earns and work for what he wants, to help buy the farm with the aid that this bill will give him without saying to everybody who is either thrifty or thriftless, "We invite you to borrow money which you will never pay back."

Mr. BENNET. Mr. Chairman——

Mr. GLASS. Does the gentleman desire to speak?

Mr. BENNET. For five minutes.

Mr. GLASS. I ask unanimous consent, Mr. Chairman, that all debate on this amendment be closed in seven minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment close in seven minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BENNET. Mr. Chairman, the conditions which have been described by the gentleman from Illinois obtain in the State of New York and in the northern part of New Jersey. I have in mind at the moment the case of a man going on a farm after he arrived at the age of 45 years, without money, working as a tenant farmer for four years, as I recall it, going from that farm with somewhere between $1,500 and $2,000 from the township of Wantage, in the northern part of New Jersey, from the district of the gentleman from New Jersey [Mr. HART] into the western part of New York State, buying land and starting to

farm with the money that he himself had acquired after arriving at that somewhat advanced age. And he succeeded as a farmer. I have in mind another man, now I think the sheriff of the county of Sussex, in northern New Jersey, or recently the sheriff—I think his term has just expired—and in my boyhood in northern New Jersey he was a farm hand. Now he owns not one farm but several, acquired through his own efforts and not with any aid either from the State of New Jersey or from the Federal Treasury. All over the older States that condition has obtained, and there is a serious question in my mind whether there is not a tendency in this sort of paternal legislation to dull the edge of husbandry. Oh, you let people get money easily. Why, there are some gentlemen here who can recall when the United States Government handed $38,000,000 to the several States. To be distributed where? Amongst the farmers—to be loaned. My State of New York got four and a half million dollars, and we handled it considerably better than some of the other States. Have we that four and a half million now, if the United States Government should call on us to hand it back to them?

Mr. MOORE of Pennsylvania. Will my colleague yield——

Mr. BENNET. Yes.

Mr. MOORE of Pennsylvania. The gentleman from Oklahoma——

Mr. BENNET. I am not the gentleman's colleague, but I am his friend.

Mr. MOORE of Pennsylvania. I am glad to think we are both. The gentleman from Oklahoma [Mr. MURRAY], in his very eloquent speech, said in substance that if we wanted to help these poor farmers in his section to become landowners we could do so by giving them Government money, and that that was the only way in which they could become the owners of the land. Is it not a fact we have many poor people in the cities who labor just as hard and as industriously as the farmer, who do not own their own homes? If we give them Government money also, could they not become owners of their homes?

Mr. BENNET. Oh, yes; but that is an unfair comparison.

Mr. MOORE of Pennsylvania. Why is it unfair?

Mr. BENNET. Because the gentleman from Oklahoma, to be fair to him, said if we could propose any bill that would help those people he would be for it, and this bill practically referred to farmers.

Mr. MOORE of Pennsylvania. Does not the gentleman know there are many people in the cities, thousands of them, who do not own their own homes, but who have worked industriously all their lives?

Mr. BENNET. And never will own their own homes. Of course, there is a larger opportunity out on the farm.

As I was about to say, what have the States done with this $38,000,000 that the United States Government gave some time in the fifties, I think? Have all those States got that money? Not one single State—not Indiana, not Illinois, not a single cent of it left in Indiana. Is not that correct?

Illinois has not any of it left. It we in New York should call our loans and force payment, I think, although we carry them on the books at something like $3,750,000, we could not get a million and a half. That was the result of distributing money from the United States Treasury around amongst the States. We did not exercise ordinary care. One State was as reckless as another. We ought to guard against that in this bill. I participated in my time in this House in two attempts to help the people of the country, once the people of the United States and once the people of the Philippines——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET. I will have to talk about it some other time.

Mr. GLASS. Mr. Chairman, I desire to say that I have listened with considerable interest to the remarks of the gentleman from Oklahoma [Mr. MURRAY], and, I might add, with considerable sympathy to some of the things said; but, after all, what the gentleman from Illinois [Mr. MANN] said so happily awhile ago goes to the very foundation of this whole question. It was as philosophic as anything he has ever said in the 14 years I have been here or that he may ever say, regardless of how long he shall stay here. I have no doubt that there is some merit in the suggestions of the gentleman from Oklahoma [Mr. MURRAY], some merit to his bill, but I do not think it ought to be projected into the provisions of this bill. Therefore I hope the amendment will not prevail.

The CHAIRMAN. The question is on the amendment of the gentleman from Oklahoma [Mr. MURRAY].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MURRAY. Division, Mr. Chairman.

The committee divided; and there were—ayes 23, noes 56.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CAPITAL STOCK AND SPECIAL PROVISIONS OF NATIONAL FARM-LOAN ASSOCIATIONS.

SEC. 9. That the shares in national farm-loan associations shall be of the par value of $5 each.

Every shareholder shall be entitled to one vote on each share of stock held by him at all elections of directors and in deciding all questions at meetings of shareholders: *Provided*, That the maximum number of votes which may be cast by any one shareholder shall be 20.

No persons but borrowers on farm-land mortgages shall be members or shareholders of national farm-loan associations.

Any person desiring to borrow on farm-land mortgage through a national farm-loan association shall subscribe for shares of stock in such farm-loan association to an amount equal to 5 per cent of the face of the desired loan, said subscription to be paid in cash upon the granting of the loan. If the loan is granted, the applicant shall, upon full payment therefor, become the owner of one share of capital stock in said loan association for each $100 of the face of his loan or any fractional part thereof. Said capital stock shall be held by said association as collateral security for the payment of said loan, but said borrower shall be paid any dividends accruing and payable on said capital stock while it is outstanding.

Every national farm-loan association formed under this act shall by its articles of association provide for an increase of its capital stock from time to time for the purpose of securing loans for its members and providing for the issue of shares to borrowers in accordance with the provisions of this act. Such increases shall be included in the quarterly reports of the Federal farm-loan board.

Any person whose application for membership is accepted by a national farm-loan association shall be entitled to borrow money on farm-land mortgage upon filing his application in accordance with section 8 and otherwise complying with the terms of this act whenever the Federal land bank of the district has funds available for that purpose, unless said land bank or the Federal farm-loan board shall, in its discretion, otherwise determine.

Any person desiring to secure a loan through a national farm-loan association under the provisions of this act may, at his option, borrow from the Federal land bank through such association the sum necessary to pay for shares of stock subscribed for by him in the national farm-loan association, such sum to be made a part of the face of the loan and paid off in amortization payments: *Provided, however*, That such addition to the loan shall not be permitted to increase said loan above the 60 per cent limited in section 12.

Shareholders of every national farm-loan association shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such association to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

After a charter has been granted to a national farm-loan association, any natural person who is the owner, or about to become the owner, of farm land qualified under section 12 of this act as the basis of a mortgage loan, and who desires to borrow on a mortgage of such farm land, may become a member of the association by a two-thirds vote of the directors upon subscribing for one share of the capital stock of such association for each $100 of the face of his proposed loan or any fractional part thereof. He shall at the same time file with the secretary-treasurer his application for a mortgage loan, giving the particulars required by section 12 of this act.

If membership is refused to any applicant under this section, or if the loan applied for is for any reason rejected, the sum deposited by him shall be returned without deduction.

Mr. TRIBBLE. Mr. Chairman, I offer an amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Strike out, on page 96, lines 20, 21, 22, 23, 24, and 25 and insert in lieu thereof the following:

"Shareholders of national farm-loan associations shall not be held responsible for contracts, debts, and engagements of such association or members thereof."

Mr. TRIBBLE. Mr. Chairman, I move to amend this section of the bill by striking out that part of the section which provides that the borrower shall be subject to sustain loss to the extent of 10 per cent of the loan granted him.

I trust the membership of this House will not pass over this section without giving it serious consideration. I consider the greatest errors that have been made in this bill are in this section. Now, if you turn to page 99 you will find that this bank, this association of farmers, is authorized to acquire land, indorse notes, and perform other functions of a corporation, and yet your bill requires a farmer desiring to borrow money to purchase stock in the associated bank and become responsible for losses and expense of operating such an institution. The farmer desires a loan and not joint bank stock, but in order to borrow money in this rural-credit system you are now offering to the farmers he must become a stockholder and become jointly liable with the other shareholders in that corporation for the losses to a certain amount. First he pays expense of examination of title, which is right, but that should be the extent of his expense. In addition to other expenses, where there is a loss he must bear double the amount of his stock.

Now, Mr. Chairman, there is where you will drive away the farmers who would otherwise apply for loans and secure loans and be benefited by them. This bill should not require the borrower to stand sponsor for the failures of his neighbor to repay his loan.

Mr. Chairman, on page 97 notice the other section. This section over here provides that after an association has been

formed—I will call it a corporation—of 10 farmers, a board of directors is selected, and before another farmer can get into that association and become a borrower he must receive a two-thirds vote of those directors. Now, where is the danger in this? I will show it to you. The farmers with financial backing will go into this corporation willingly and organize it, and they will become jointly responsible for the shareholders in the stock company, knowing that the rules will enable them to keep out bad loans. They become personally interested in preventing losses. Personal interest would cause them to select with great care their associates to whom loans are to be made, being liable for double their stock for losses. Experience and observation cause me to fear that they will force out all the little fellows who are not able and who are not responsible and whom they do not want in the association as a borrower, fearing personal loss. The man who has little and no financial friends and is helpless in the world is the man we are supposed to help most by this bill. These directors, knowing there will be losses in this company and knowing they will have to share those losses will refuse to take these farmers of small means into the association of borrowers because of the extra prospect of losses which would fall on the members of the association.

Mr. GLASS. The fundamental error my friend makes is in the supposition that this bill is designed to help the helpless man who has no friends and no money. That is not what it is designed for.

Mr. TRIBBLE. I regret to hear the gentleman from Virginia, the chairman of the committee having this bill in charge, make that statement. My own idea is that this bill should benefit most the farmer who is worthy but financially unable to help himself.

Mr. GLASS. It is designed to afford facilities to men who are thrifty and have friends.

Mr. TRIBBLE. My reply is this: That a man who has friends and the man who has land and has ability does not need help from the Government or anybody else nearly so much as the poor man, because the man of wealth can go to the bank and get money whenever he needs help. The bank doors are open to him now. I wish to aid the farmer of financial standing to get money at lower rates of interest and longer terms; but, I repeat, the farmer who needs help most is the worthy man struggling to provide a little home for his wife and children, and who has no financial standing to aid him in getting a rise in the world.

Mr. PHELAN. Are there many of the latter class?

Mr. TRIBBLE. There are many of them.

Mr. PHELAN. What is to prevent those men, if they can not go into this one association, forming an association of their own? All it takes is 10 men.

Mr. TRIBBLE. I will tell you the reason they can not do it. Suppose 10 rejected applicants should apply for a charter. The Federal land bank, having control of charters, is required to send an inspector and investigate the solvency, character of applicants, and value of land, and if the report is unfavorable the charter is refused. It is left with the inspector to investigate and see whether or not these 10 men who desire to form the association are men of good character and men of good standing, and, as the gentleman from Virginia [Mr. GLASS] says, men of influence, with money in their pockets, and if they are not, they are turned down and can not get into the organization.

Mr. GLASS. Oh, I did not exactly say that.

Mr. TRIBBLE. That is the substance of what the gentleman said.

Mr. GLASS. Would you have a system of loaning money on land without inspection and without examination?

Mr. TRIBBLE. I would have a system where a farmer could go and apply for money without becoming a member of any association. Let him send his application and have an inspection made of his application, his security offered, appraisement, and so forth, without any stock-subscription feature connected therewith.

Mr. GLASS. He can do that under this bill.

Mr. TRIBBLE. Oh, yes; by becoming responsible for somebody else's debts.

Mr. GLASS. He can do it under this bill.

Mr. TRIBBLE. Under the joint-stock land banks, the banking proposition you provide for, financed by private funds or corporations?

Mr. GLASS. Yes; certainly.

Mr. TRIBBLE. Read page 96, at the bottom, in the rural credit. I want a rural-credit bill backed by the Government and not by mortgage-security companies. We can have the mortgage-security companies without this bill. It reads as follows:

Shareholders of every national farm-loan association shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such association to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

Mr. GLASS. That is the Federal land bank. That is not the joint-stock bank. He has no liability for one cent except what he borrows.

Mr. TRIBBLE. Yes; and you propose to give him more benefits under the joint-stock company than you do under the rural-credit bill we are trying to give the farmer. After finishing your rural-credit bill, then you place in the same act a provision legalizing charters for mortgage-security companies. You relieve them of tax and authorize them to issue bonds, and you propose to give the farmer more privileges under the joint-stock company—mortgage-security company—than you do in the rural-credit land banks. I stand for the rural-credit Federal farm-loan association, and there is where the farmer should be protected and cared for, and not turn him over to this mortgage company you have chartered by this bill.

Mr. GLASS. We are standing for both propositions.

Mr. TRIBBLE. I am only standing for one—the rural-credit association feature of the bill—and I am trying to amend it so the farmer may be benefited.

Mr. GLASS. Well, this bill is for both.

Mr. TRIBBLE. The Baltimore platform promised the farmers a rural-credit bill. My amendment would remove the most objectionable feature in the bill. If this House refuses to so amend this bill that it may respond to the needs of the farmers, I promise you now, if I am permitted to remain in Congress, I will continue this fight until this bill is perfected by amendments. This House is making progress in giving aid to the agricultural pursuits. We have established a plant to manufacture Army nitrates and fertilizers for the farm, and this bill, though imperfect, will become a law at this session. The friends of rural credit will amend the bill now or at some future time, and I trust make it a real rural-credit bill fully responding to the needs of the rural districts. [Applause.]

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

Mr. GLASS. How many amendments will be proposed?

Mr. MORGAN of Oklahoma. I have but one more. It is a short one.

Mr. MANN. I want a little time on this section.

Mr. GLASS. Will the gentleman indicate how much? I would like to get through by 5 o'clock.

Mr. MANN. I would like to have five minutes. I want to ask something about the section. It may take longer than five minutes.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MORGAN of Oklahoma: Page 96, line 23, after the words "extent of," strike out the words "the amount of" and line 24.

Mr. MORGAN of Oklahoma. Mr. Chairman, if the members of the committee will look at the bill on page 96 they will see the effect of this amendment. Instead of making the borrowers liable for their stock of 5 per cent and also for another 5 per cent equal to the amount of stock, it will make the members of the loan association liable only for the 5 per cent of stock.

I believe that under all the circumstances it is right, in view of the aid and assistance that the National Government will give the farmers under this bill, that the farmers should help protect their own security by providing 5 per cent of the capital amount of the loan, but I do not believe you should put an additional liability upon them of 5 per cent.

There is another reason. When they put up 5 per cent of stock the association and the land bank has that stock and it is held as security for their loans. It can be used to meet any default of the borrower in the payment of interest or otherwise. But this other 5 per cent is a sort of contingent proposition. It would be very difficult to enforce. It can not be realized upon. It is a security that the Federal land bank can not go out and use to borrow money on. It is a sort of indefinite liability, and yet it would be a liability that it seems to me would be very objectionable to the farmers—to the borrowers.

It looks to me, gentlemen, as if you were putting unnecessary "red tape" upon the borrowers under the Federal land-bank system.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Oklahoma yield to the gentleman from Indiana?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. Has not the gentleman criticized the committee bill because there is not enough reserve capital held in this system?

Mr. MORGAN of Oklahoma. Yes; I have.

Mr. MOSS of Indiana. And is not the effect of the gentleman's motion, if it were adopted, to take away some of the reserve and guarantees that the committee has put into this system?

Mr. MORGAN of Oklahoma. I will concede that. But I believe that a reserve, as I understand that term, in every banking system is security of some kind that is tangible, that can be used on a moment's warning, that is held to meet emergencies, that is to meet default, that in times of stress and trouble and financial difficulty the bank has something to lay its hands on. But you have fixed here an indefinite liability of 5 per cent additional, making it still more objectionable for the farmers to go into this system. It looks to me as if the framers of this bill—and I do not wish to criticize them—have put so many restrictions and limitations upon those who wish to borrow of the Federal land bank that it seems almost intended to drive the farmers away from the Federal land bank and drive them into the profit-sharing institutions which you propose to create.

Where is the self-respecting farmer who will want to go into these Federal land banks under all these restrictions which you have made? You have put up these restrictions, these limitations, these conditions to such an extent that you drive the farmer into the joint-stock land bank, where capitalists can profit from the interest payments upon their loans. You are, I think, unnecessarily putting limitations and restrictions upon the borrowers in the Federal land banks. And while I would strike out this extra 5 per cent liability, which is not an asset that can be realized upon by the bank at any time when it needs it, I would increase the reserve that will be in the hands of the bank, that will be held, as it were, by the bank for the benefit of the bondholders, because if the farmers have any real credit and standing among investors it must be because the bonds, the securities that you have manufactured and created and sent out into the world, are good. But they will not be good unless you have a sufficient reserve, a real reserve, not a liability, not something that you can not realize upon in time of danger, but a real reserve that stands there forever to meet emergencies, to meet defaults, to meet difficulties, to be a real reserve that will enable the farmers of that section to command credit at the very lowest rate of interest. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GLASS. I ask unanimous consent that debate on this amendment be now closed. Did I understand that the gentleman from Illinois [Mr. MANN] wanted to offer an amendment to this section?

Mr. MANN. I want to call the attention of the committee to some contradictory provisions in the section, as it seems to me.

Mr. GLASS. I ask unanimous consent that all debate on this pending amendment be closed and that the vote be taken at once.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

The question being taken, the amendment was rejected.

Mr. SHOUSE. Mr. Chairman, I have a committee amendment.

The CHAIRMAN. The gentleman from Kansas offers a committee amendment, which the Clerk will report.

The Clerk read as follows:

Page 96, line 2, after the word "report," strike out the word "of" and insert the word "to."

Mr. SHOUSE. Mr. Chairman, this amendment is to correct a purely typographical error.

The amendment was agreed to.

By unanimous consent, Mr. MURRAY was given leave to extend his remarks in the RECORD.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MORGAN of Oklahoma: Page 97, line 6, strike out the word "may" and insert in lieu thereof the word "shall"; strike out, after the word "association," the words "by a two-thirds"; strike out, in line 7, the words "vote of the directors."

Mr. GLASS. I ask unanimous consent that all debate on this section and all amendments thereto be closed at 5 o'clock.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close at 5 o'clock.

Mr. MANN. Will I be recognized then?

The CHAIRMAN. Yes. Is there objection?

There was no objection.

Mr. MORGAN of Oklahoma. Mr. Chairman, if the members of the committee will look at page 97 they will notice that in lieu of the conditions there expressed my amendment will provide that a person who desires to borrow on a mortgage on such farm lands shall become a member of the association upon subscribing for one share of the capital stock of such association.

Under the provisions of the bill, as was pointed out by the gentleman from Georgia, a man, to become a member of this association—and he must become a member before he can secure a loan—after the association is first organized, he must become a member of the association by a two-thirds vote of the directors. There are five directors, and after the loan association is once organized no other person can become a member of that association and no other person can get a loan through that association except by a two-thirds vote of the directors. There are five directors. Two-thirds of five is three and one-third. It would thus require four votes out of the five directors. The farmers will not like this.

We will suppose that in a community there is an association organized of 10 members. That can be organized in a secret way; one man can go out and pick out ten of his friends, persons that he has confidence in and that he would like to get the benefit of these loans. They take in 10 persons, but any citizen, any farmer in that community, could not get into the association except by a two-thirds vote of the directors. That is what I suppose would be called a "close" corporation. It provides for discrimination against another man who might be worthy.

If you will strike out the words suggested in my amendment you will still have this restriction: The appraisement committee would have a right to appraise the land; the Federal land bank sends an inspector or appraiser, and he appraises the land; so that it seems to me that you would take all the precautions that are necessary.

If a man has a farm, if he has the security, and the association members are to appraise his security, and the Federal land-bank appraiser, a Government officer, is also to appraise his farm, why should you say that he can not get his loan accepted except by two-thirds vote of these directors. I repeat what I said before, that if you place the restrictions and limitations in various ways that will irritate the American farmer, you will drive him away to other institutions. It will have that effect; and I want to know why you should do it. I think it would be better to take the old commission plan, as represented by the joint-stock company, if we could get the proper kind of a bill, with proper restrictions and limitations, make a proper reserve fund, give them a proper capital, than to have the system that you are going to provide here. I would like to see this amendment carried.

Mr. MANN. Mr. Chairman, I want to call the attention of the gentleman in charge of the bill to what seems to me an apparent contradiction in the hope that they may be able to remedy it. I know perfectly well what they are trying to do, and it may be that a law enacted in this form would be construed as they intend it to be.

You say that no persons but borrowers on farm-land mortgages shall be members or shareholders of the national farm association. Without taking the time to dwell on the words "members" and "shareholders," which I assume to mean the same, I will say that on page 96 you say "any person whose application for membership is accepted by a national farm-loan association shall be entitled to borrow money on farm-land mortgage upon filing his application." In other words, having first said that he must be a borrower before he can become a member, you then say his membership may be accepted and then he can file his application for a loan.

Again, on page 87 you say that certain persons may apply and may become members of the association by a two-thirds vote of the directors upon subscribing for one share of the capital stock, and so forth. Having become a member by subscribing for one share of capital stock, you say he shall at the time file with the secretary-treasurer his application for a mortgage loan.

Now, a borrower is not the applicant for a loan. The borrower is the one who receives the loan. He certainly must have executed the papers. In other words, the language of the bill as I read it would say that a man must be a shareholder before he is a borrower, and he must be a borrewer before he is a shareholder, and that is impossible.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. MANN. Yes.

Mr. MOSS of Indiana. Has the gentleman's attention been called to the language on page 95, lines 12 to 14: "If the loan is granted, the applicant shall upon full payment therefor be-

come the owner of one share of capital stock in said loan association"? So he does not become a shareholder——

Mr. MANN. That only shows another conflict that I did not take the time to call attention to. You have said that he may become a member of the association by a two-thirds vote of the directors upon subscribing for one share of the capital stock of the association. I understand what gentlemen are trying to accomplish, but when you are writing a law it seems desirable that you should not have to make a forced construction of it after it is enacted into law.

Mr. MOSS of Indiana. Not speaking for the committee, I would say that it is not strange that there is some language in the bill that is not perfectly clear.

Mr. MANN. Oh, I hope the gentleman will not think that I am criticizing the committee at all. I do not intend to do that.

Mr. MOSS of Indiana. As a matter of fact, the reason this language came to be changed is that when a man made his application it was thought that he should tender 5 per cent of his stock in cash——

Mr. MANN. I hope the gentleman will not think that I am criticizing the draftsman of the bill. I have had too much to do with drafting bills in this House not to understand the difficulty in a long bill of making everything absolutely coordinate.

Mr. MOSS of Indiana. I appreciate the position of the gentleman. We believe that the bill as written expressed the intention of the committee perfectly; but if not, I presume the committee will be very glad to have it clarified.

Mr. MANN. I am calling it to the attention of the committee, and I hope the gentleman in charge will correct it. There is no occasion for having one provision inconsistent with another.

Mr. GLASS. We will be very glad to have our attention called to any seeming inconsistency.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

Mr. TRIBBLE. Mr. Chairman, I offer an amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Strike out, on page 96, lines 20, 21, 22, 23, 24, and 25 and insert in lieu thereof the following:

"Shareholders of national farm-loan associations shall not be held responsible for contracts, debts, and engagements of such association or members thereof."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Georgia.

The question was taken, and the amendment was rejected.

Mr. GLASS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2986 and had come to no resolution thereon.

## MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The SPEAKER laid before the House the following message from the President of the United States:

*To the House of Representatives:*

In compliance with the resolution of the House of Representatives (the Senate concurring) of May 12, 1916, I return herewith House bill No. 759, entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge across the Potomac River, and for the building of a bridge in place thereof."

## THE AQUEDUCT BRIDGE.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent for the present consideration of the following concurrent resolution, which I send to the desk and ask to have read.

Mr. MANN. Mr. Speaker, has the bill referred to in the resolution come back?

Mr. ADAMSON. Yes; the bill is here; and I will ask the Speaker to lay it before the House.

The SPEAKER. The Chair lays before the House the bill (H. R. 759) to provide for the removal of what is now known as the Aqueduct Bridge across the Potomac River, and for the building of a bridge in place thereof. The gentleman from Georgia asks unanimous consent for the present consideration of the following resolution, which the Clerk will report.

The Clerk read as follows:

House concurrent resolution 40.

*Resolved by the House of Representatives (the Senate concurring)*, That the Speaker of the House of Representatives and the President of the Senate be, and they are hereby, requested to cancel their respective signatures to the enrolled bill (H. R. 759) entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge across the Potomac River, and for the building of a bridge in place thereof"; that upon the cancellation of said signatures the Clerk be directed to reenroll said bill with an amendment as follows:

On page 4, line 10, strike out the word "five" and insert in lieu thereof the word "four."

The SPEAKER. Is there objection to the consideration of the resolution? [After a pause.] The Chair hears none. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the concurrent resolution was agreed to was laid on the table.

## PENSIONS.

Mr. SHOUSE. Mr. Speaker, I call up the bill H. R. 15494——

Mr. MANN. Ask unanimous consent to consider this bill in the House as in the Committee of the Whole.

Mr. SHOUSE. Mr. Speaker, I make that request.

The SPEAKER. The gentleman asks unanimous consent to consider these pension bills in the House as in the Committee of the Whole. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, do we have an understanding that there will be no other business transacted to-night except these pension bills?

Mr. RUSSELL of Missouri. Not from this committee. We only have one House bill and one Senate bill.

Mr. MANN. Can we have an understanding that there will be nothing else coming up to-night except these pension bills?

Mr. GLASS. I have nothing further.

The SPEAKER. That is the understanding, and the Chair will enforce it. The Chair hears no objection, and the Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 15494) granting pensions and increase of pensions to certain soldiers and sailors and the Civil War and certain widows and dependent children of soldiers and sailors of said war.

Mr. SHOUSE. Mr. Speaker, I ask unanimous consent that the first reading of the bill be dispensed with.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill for amendment.

The Clerk calls the attention of the Chair to the fact that there is a mistake in the title of the bill. Of course, it will have to be amended after the bill is passed. The word "and" should be changed to the word "of."

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Ellen Rohr, former widow of William E. Scott, late of Company B, Thirteenth Regiment Indiana Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The name of John W. Guilliams, late of Company B, One hundred and fifty-first Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of John Welsh, late of Company G, Tenth Regiment Illinois Volunteer Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Elizabeth Maurer, former widow of Frederick Neigeman, late of Company E, Sixteenth Regiment Illinois Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The name of John Wilson, late of Company D, Third Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Joseph McCain, late of Company G, Twenty-sixth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Carrie M. Peters, widow of Samuel S. Peters, late of Company H, One hundred and thirty-third Regiment Ohio Volunteer Infantry, and unassigned, Fifth Regiment Ohio Volunteer Cavalry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Jacob A. Wandling, late of Company H, Thirty-third Regiment, and Company I, Thirty-fourth Regiment, Iowa Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John H. Murrey, late of Company I, One hundred and ninety-fourth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Emma A. Gasper, widow of John Gasper, late of Company C, Fifty-first Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Sylvester T. Chick, late of Company K, One hundred and seventy-third Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Samuel Lenix, late of Company E, Forty-second Regiment Illinois Volunteer Infantry, and Company F, Fourth Regiment Veteran Reserve Corps, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Joseph J. Sanson, late of Company F, Twenty-sixth Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Margaret L. Miller, widow of John Miller, late of Company G, One hundred and first Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $12 per month.
